EKO INTERNATIONAL CORP
Notes to Financial Statements
As at Sept 30, 2014

---

1 Nature of Operations and Basis of Presentation

Going Concern

The accompanying financial statements have been prepared assuming the company will continue as a going concern. The company has negative working capital, no current cash balances, losses from operations, that raise substantial doubt about the company's ability to continue as a going concern. The company's abilityto operate as a going concern is dependent apon its ability (1) to obtain sufficient additional debt and equity capital from public and private sources. The successful outcome of future activities cannot be determined at this time and there are no assurances that if achieved the company will have sufficient funds to execute its intended plan or generate positive operating results.

a Reporting Entity

EKO International Corp is a private Ontario Corporation based inToronto, Ontario

b Statement of Compliance

The unaudited financial statements of EKO International Corp have been prepared in accordance with generally accepted accounting prinicpals for interim financial statements. The financial statements include all adjustments which, in the opinion of management, are necessary in order to fairly present the financial statements. The results of interim financial statements are not necessarily indicative of the results for a full year and should be read in conjuncton with the company's annual financial statements and notes thereto.

c Use of Estimates and Assumptions

The preparation of financial statements in conformity with GAAP require EKO to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as at the date of the financial statements as well as the reported amount of revenues and expenses during the period. Key areas of estimation where OFE has made judgements, include those relating to goodwill and purchase price share value

d Foreign Currency

Transactions in currencies other than the functional currency of the company are recorded at a rate of exchange approximating to that prevailing at the date of the tranasction

Significant Accounting Policies:

e Future Accounting changes

A number of standards and amendments have been issued by the IASB, and the following changes may have an impact on EKO's future financial statements, EKO is currently reviewing these standards to determine the impact on the financials statements.

Fair Value Measurement

The IASB has issued new guidance on fair value measurement and disclosure requirements, that require or permit fair value measurements or disclosure about fair value measurements and set out a framework on how to measure fair value using the assumotions that market participants would use when pricing

the asset or liability under current market conditions, including assumptions about risk.

Financial Instuments

IFRS specifies that financial assets be classified into one of two categories on the initial recognition: financial assets measured at amortized cost of financial assets measured at fair value. Gains or losses on remeasurement of financial assets measured at fair value will generally be recognized in profit or loss. These changes are not expected to materially impact the financial position, cash flow or earnings of EKO

Taxation

The company calculates its actual tax rate and applies this as its accounting provision thereby eliminating reporting of any differences in an accounting provision and the effective tax bases.

2 Risk Management

As part of EKO's risk management practices, the risks that are significant to the business are identified, monitored and controlled. The most significant risks included credit risk, liquidity risk, operational risk, and legal risk.

Credit Risk
Credit risk is the risk one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. EKO's credit risk consist of cash, cash equivalent and accounts receivable, the risk is manged by monitoring its customers and the risk remains low.

Liquidity Risk
Liquidity risk is the risk an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. EKO manages this risk by having access to sufficient cash and cash equivalents to meet short-term obligations.

Operational Risk
Probability of loss occurring from the internal inadequacies of a firm or a breakdown in its controls, operations, or procedures. EKO is monitored and managed closely by it major shareholder on a daily basis to reduce this risk to minimal.

Legal Risk
Legal risk is the potential for loss arising from the uncertainty of legal proceedings. EKO has maintained high quality control standards and continues to invest into improving its products and services.

3 Revenue Recognition

The company's revenues are generated designing and installing IT solutions.

The company generates an invoice and recognizes revenue once it has a signed and agreed to purchase order from the client.

4 Receivables

Trade and other receivables are recorded at their nominal amount unless EKO is of the opinion that the receivable should be regarded as impaired based on objective evidence. Objective evidence that the receivable is impaired can include significant financial difficulties of the customer or indication that the customer will cease operations.

The impairement is measured as the difference between the carrying value of the receivable at the time it is impaired and the present value of the expected realizable amount.

5 Inventory

Inventory is valued at cost. Cost is based on actusl cost for larger items or items directly purchased for specific projects. Other inventory items are based on a weighted average cost basis.

6 Capital Assets

Capital assets are stated at cost or an estimated value based on cost.

7 Intangible Assets

Intangible assets represent identifiable non-monetary assets and were acquired as part of a business combination. The assets useful lives are confirmed at least annually and tested for impairment

Impairment testing is performed by comparing the estimated recoverable amountfrom a cash -generating unit with the carrying amounts of its net assets. The recoverable amount of an asset is the higher of its fair value less cost to sell, and its value in use. If the recoverable amount is leass then the carrying value, an impairment loss is charged to the statement of income.

The recoverable amounts of EKO cash-generating units have been calculated based on their value in use. Value in use for each unit was determined by estimating the expected future cash flows for the unit.

8 Purchase

In August of 2013, The company purchased 100% interest in Automated Vision, LLC, a Wisconsin limited liability company for $200,000.

We have attached a copy of the September Balance Sheet for Automated Vision
(See Appendix A to the Notes)

9 Issuance of Common Stock

In September 2013, the company entered into an agreement with Automated Detection Devices Inc., a private Ontario corporation for a 100% interest in the corporation in exchange for a 1,000,000 common shares in EKO.

In October 2013, the company entered into an agreement with 2251393 Ontario Inc., a private Ontario corporation for a 100% interest in the corporation in exchange for a 1,000,000 common shares in EKO.

We have attached a copy of the September Balance Sheet for Automated Detection Devices Inc
(See Appendix A to the Notes)
