RE: Progress Report

Dear Shareholders:

We felt it was appropriate, and needed, to share some more data on the progress of the Company. As most have noticed, there have been a lot of conversions recently. We do keep the OTC current, so please refer to it for information. Also, one of our goals is to work with the note holders to ensure our shareholders are better served. We are working diligently on that.

We have received some emails regarding conversions. It is important to mention that the Company has received a few emails asking questions like "are we done with the conversions". We cannot reiterate or summarize the material that we file with the SEC to each shareholder. It is not our role, nor it is not appropriate according to SEC rules, for us to comment or provide more information than is publicly available.

We have updated our web page as reported earlier in May. We hope this will diminish any confusion regarding Image Worldwide and the printing business this Company used to be in back in 2009. We hope that this helps with understanding what we are trying to accomplish.

It is taking time to rebuild our momentum. For example, our dealers for the PhoneSuite product have been a little hesitant due to my personal situation, but I think they are beginning to understanding that we are here to sell product and regardless of that situation we are transacting today. We have a potential sale in Africa that we are actively working with the local dealer, as well as some pending opportunities in the Caribbean. A potential new dealer in Mexico is also an exciting new possibility.

We are also looking to add a product to the distribution side of the business. This is an exciting opportunity for us and works well within the distribution business PhoneSuite has been establishing. It would not use the Dealer network but much of the same infrastructure. The product is in place already with large accounts and we believe it could provide much needed progress for the Company. We hope to issue an 8K with the SEC on the subject in the near term.

While the pressure on the stock is significant, we do hope that the work we are doing will help investors. As always, if you have any questions, please let us know at info@v3rsant.com .

Sincerely,

Jose P. Quiros
CEO
