Material Disclosure to Our Shareholders for Validation of EP Global Communications, Inc. and CooperVision, Inc. Joint Patent Filings

For the benefit and validation to our shareholders, the following disclosure of one example of a joint patent filing document is made with redactions to protect the most sensitive information.

This filing disclosure is just one single example of several others like it, to demonstrate and verify the existence of joint intellectual property filings between EP Global Communications, Inc. and CooperVision, Inc., as well as other corporations.

Patent filings such as this single example, represent months of research and experimentation by both companies and have potential to shape the coming electronic vision correction and augmentation revolution worth billions of dollars in potential revenues. The current non-electronic contact lens industry already earns multiple billions of dollars annually worldwide. Electronics hold promise to dramatically expand that market.

This also serves as an example of why EP Global Communications, Inc. believes that our share price is currently undervalued significantly on the market due to uninformed critics who have claimed non-existence of such jointly owned filings.

Here's your proof today folks. We're just at the beginning.
