Accountant's Compilation Report

Stockholders of
Gelstat Corporation
Palm City, Florida

We have compiled the accompanying consolidated balance sheets of Gelstat Corporation and Subsidiaries as of March 31, 2015, and December 31, 2014, and the related consolidated statements of operations and cash flows for the three months ended March, 31, 2015 and 2014, and the statement of stockholders' equity for the three months ended March, 31, 2015. We have not audited or reviewed the accompanying financial statements and, accordingly, do not express an opinion or provide any assurance about whether the financial statements are in accordance with accounting principles generally accepted in the United States of America.

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America and for designing, implementing, and maintaining internal control relevant to the preparation and fair presentation of the financial statements.

Our responsibility is to conduct the compilation in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. The objective of a compilation is to assist management in presenting financial information in the form of financial statements without undertaking to obtain or provide any assurance that there are no material modifications that should be made to the financial statements.

We are not independent with respect to Gelstat Corporation

GELSTAT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
THREE MONTHS ENDED MARCH, 31, 2015 AND 2014

NOTE 1 - ORGANIZATION AND BUSINESS BACKGROUND

GelStat Corporation ("the Company" or "GelStat") is a consumer health care company dedicated to the cost-effective development and marketing of over-the-counter (OTC) and other non-prescription consumer health care products. While development efforts ceased in 2005 due to lack of capital, its efforts were focused on proprietary, innovative products that addressed multi-billion dollar global markets.

On May 9, 2003, Developed Technology Resource, Inc. (DTR) filed a Current Report on Form 8-K with the Securities and Exchange Commission reporting the merger of GelStat Corp. with NP Acquisition Corp. (NP Acquisition), then a wholly owned subsidiary of DTR. The stock exchange transaction has been accounted for as a reverse acquisition and recapitalization of NP Acquisition, whereby Gelstat is deemed to be the accounting acquirer (legal acquiree) and NP Acquisition to be the accounting acquiree (legal acquirer). Effective July 14, 2003, DTR changed its name to GelStat Corporation. Effective March 17, 2004, GS Corp. was merged into its parent, GelStat Corporation.

On September 29, 2011, the Company acquired 100% of the capital stock of GSC Direct Inc., a Florida corporation, from Equisolve, LLC and High Alpha Partners, Inc. in exchange for the issuance of 25,000,000 shares of the Company's common stock. Upon the Closing, GSC Direct Inc. became a wholly-owned subsidiary of the Company. The results of GSC Direct, Inc.'s operations from September 29, 2011 through December 31, 2011 are included in the accompanying consolidated financial statements.

GelStat Corporation and GSC Direct Inc. are hereinafter referred to as the "Company".

NOTE 2 - Summary of Significant Accounting Policies

Basis of Presentation
The accompanying financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) under the accrual basis of accounting.

Basis of Consolidation
The consolidated financial statements include the financial statements of the Company and its subsidiary. All inter-company balances and transactions within the Company and subsidiary have been eliminated upon consolidation.

Management's Estimates
In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the dates of the financial statements, as well as the reported amounts of revenues and expenses during the reporting periods. The Company's significant estimates include, the collectability of accounts receivables, valuation of inventories and stock-based compensation, and the realizability of income tax assets Actual results could differ from these estimates.

Cash and Cash Equivalents
The Company considers all short-term investments with a maturity of three months or less when purchased to be cash and equivalents for purposes of the statement of cash flows.

NOTE 2 - Summary of Significant Accounting Policies (Continued)

Accounts Receivable
Accounts receivable are recorded at the invoiced amount and do not bear interest. The Company extends unsecured credit to its customers in the ordinary course of business but mitigates the associated risks by performing credit checks and actively pursuing past due accounts. As of March, 31, 2015, and December 31, 2014, the Company did not record an allowance for uncollectible accounts.

Inventories
Inventories are valued at the lower of cost (using the first-in, first out method) or market. Inventory items replaced by an alternative and rendered unusable or diminished in value are considered to be obsolete. Obsolete inventory items are written down to zero.

Intangible Assets
Patent cost, including legal fees and other costs associated with obtaining the patent, will be amortized over the life of the patent using the straight-line method after the patent is approved by the authorities.

Revenue Recognition
The Company sells its products to a number of leading regional and national retailers, wholesalers, specialty distributors and catalog merchandisers, both directly and through the services of external sales brokers. The Company recognizes revenue when persuasive evidence of a customer or distributor arrangement exists, shipment has occurred, the price is fixed or determinable, and the sales revenues are considered collectible. Subject to these criteria, the Company recognizes revenue at the time of shipment of the merchandise.

Cost of Revenue
Cost of revenues consists primarily of product costs and shipping and handling, which are directly attributable to the sale of products. Shipping and handling costs included in cost of revenue for the three months ended March, 31, 2015 and 2014, totaled $6,575 and $4,004, respectively.

Advertising
Advertising costs, which totaled $2,543 and $15,817 for the three months ended March, 31, 2015 and 2014, respectively, are charged to operations when incurred.

Impairment
Long-lived assets and certain identifiable intangibles are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net undiscounted cash flows expected to be generated by the asset.

Income Taxes
The Company accounts for income tax using Financial Accounting Standards Board ("FASB") Accounting Standard Codification ("ASC 740") *"Accounting for Income Taxes"*, which requires the asset and liability approach for financial accounting and reporting for income taxes. Under this approach, deferred income taxes are provided for the estimated future tax effects attributable to temporary differences between financial statement carrying amounts of assets and liabilities and their respective tax bases, and for the expected future tax benefits from loss carry-forwards and provisions, if any. Deferred tax assets and liabilities are measured using the enacted tax rates expected in the years of recovery or reversal and the effect from a change in tax rates is recognized in the statement of operations and comprehensive income in the period of enactment. A valuation allowance is provided to reduce the amount of deferred tax assets if it is considered more likely than not that some portion of, or all of the deferred tax assets will not be realized.

NOTE 2 - Summary of Significant Accounting Policies (Continued)

Stock-Based Compensation

The Company accounts for stock-based compensation using the fair value method following the guidance set forth in section 718-10 of the FASB Accounting Standards Codification for disclosure about Stock-Based Compensation. This section requires a public entity to measure the cost of employee services received in exchange for an award of equity instruments based on the grant date fair value of the award (with limited exceptions). That cost will be recognized over the period during which an employee is required to provide service in exchange for the award – the requisite service period (usually the vesting period). No compensation cost is recognized for equity instruments for which the employees do not render the requisite service.

The Company recognizes expenses for the fair value of its outstanding stock warrants and options as they vest, whether held by employees or others. The fair value of each stock warrant and option at the grant date is evaluated by using the Black-Scholes option pricing model based upon certain assumptions, including the expected stock price volatility.

Earnings or Loss per Common Share

Basic earnings or loss per share is calculated as the income or loss attributable to common stockholders divided by the weighted average number of shares outstanding during each period. Diluted earnings or loss per share is calculated by dividing the net income or loss attributable to common shareholders by the diluted weighted average number of shares outstanding during the year. For the three months ended March, 31, 2015, warrants to acquire 37,312,500 shares of common stock were excluded from the computation of diluted loss per share, as inclusion would be anti-dilutive.

Recent Accounting Standards

The Company has reviewed all recently issued, but not yet effective, accounting pronouncements and does not believe the future adoption of any such pronouncements may be expected to cause a material impact on its consolidated financial condition or the consolidated results of its operations.

NOTE 3 – Patents

On June 6, 2003, the Company filed a patent application with the United States Patent and Trademark Office for "Compositions and methods of treatment to alleviate or prevent migrainous headaches and their associated symptoms". The patent #7,192,614 was issued on March 7, 2007. Legal fees and other costs associated with obtaining this patent were $25,780 and are being amortized over the 20 year useful life of the patent, using the straight-line method. The carrying value of the patent as of March, 31, 2015, and December 31, 2014, was $16,987 and $17,266, respectively. Amortization expense totaled $279 and $279 for each of the three months ended March, 31, 2015 and 2014, respectively. Future annual amortization will be approximately $1,300 through 2027.

NOTE 4 - Stockholders' Deficit

During the three months ended March 31, 2015, management determined that it previously recorded the incorrect number of shares related to a September 2014 sale of common stock. The Company has decreased the number of shares outstanding as of December 31, 2014, by 31,819 shares with no impact on stockholders' deficit or net loss.

During the three months ended March 31, 2015, the Company sold 5,000,000 shares of common stock for cash proceeds of $100,000.

NOTE 4 - Stockholders' Deficit (Continued)

During the three months ended March 31, 2015, holders of warrants to purchase 3,395,742 shares of common stock for $0.012 per share elected exercise these warrants on a cashless basis for which the Company will issued 1,854,258 shares of common stock. These shares have yet to be issued as of March 31, 2015..

Stock Warrants

The Company has issued warrants to acquire commons stock in connection with equity offerings, for services rendered, and with short term notes payable. During the three months ended March 31, 2015 and holders of warrants to purchase 3,395,742 shares of common stock elected to exercise the warrants on a cashless basis in exchange for 1,854,258 shares of common stock. In January 2015, the Company granted warrants to purchase 100,000 shares for $0.02 per share over a three-year term, to a consultant for services rendered. The Company estimated the fair value of the warrants of $1,500 using a Black Scholes model and the following assumptions: volatility - 88.6%, risk free rate – 0.86%, expected term – 3 years. Dividend rate – 0.0%.

Warrant activity for the three months ended March, 31, 2015 is summarized below:

		Weighted Average Exercise Price	Weighted Average Remaining Term (yrs)
Outstanding as of December 31, 2013	42,962,500	$0.02	
Granted	100,000	$0.02	
Exercised	(3,395,742)	$0.01	
Outstanding as of March 31, 2015	39,666,758	$0.02	2.61

Exercise Price		Number of Shares	Weighted Average Remaining Term (Years)
	$0.012	2,104,258	0.04
$0.015		17,500,000	3.71
	$0.018	500,000	0.76
	$0.020	1,500,000	1.43
	$0.025	14,000,000	1.88
	$0.030	2,062,500	1.82
	$0.050	2,000,000	2.88
		39,666,758	2.61

NOTE 6 - Income Taxes

The provision (benefit) for income taxes consists of the following:

	Three Months Ended March 31,	
	2015	2014
Current		
Federal	$ -	$ -
State	-	-
Deferred		
Federal	75,619	22,667
State	7,339	2,200
Change in valuation allowance	(82,959)	(24,867)
	$ -	$ -

The Company's income tax rate computed at the statutory federal rate of 34% differs from its effective tax rate primarily due to permanent items, state taxes and the change in the deferred tax asset valuation allowance.

	Three Months Ended March 31,	
	2014	2014
Income tax at statutory rate	34.0%	34.0%
State income taxes, net of federal benefit	3.3	3.3
Permanent differences	(0.0)	(1.4)
Change in valuation allowance	(37.3)	(35.9)
Total	0.00%	0.00%

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. In assessing the realizability of deferred tax assets, Management evaluates whether it is more likely than not that some portion or all of its deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Based on Management's evaluation, the net deferred tax asset was offset by a full valuation allowance in all periods presented. The Company's deferred tax asset valuation allowance will be reversed if and when the Company generates sufficient taxable income in the future to utilize the tax benefits of the related deferred tax assets.

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets as of March, 31, 2015 and December 31, 2014 are as follows:

	2014	2014
Net operating loss	$ 4,554,492	$ 4,335,296
Less: valuation allowance	(4,554,492)	(4,335,296)
Net deferred tax asset	$ -	$ -

NOTE 6 - Income Taxes (Continued)

As of March, 31, 2015 the Company had a net operating loss carry-forward of approximately $12,210,000 which may be used to offset future taxable income and begins to expire in 20 years from the year of incurrence. The availability of the net operating loss carry-forward to offset future taxable income may be limited in the event of a change in control.

NOTE 7 – Subsequent Events

In April 2015, the Company issued 10,000,000 shares of common stock pursuant to a 12 month consulting agreement valued at $200,000 and 1,617,647 shares of common stock for the exercise of cashless warrants.

NOTE 8 – Going Concern

As shown in the accompanying audited consolidated financial statements, the Company has incurred recurring losses from operations to date. As of March, 31, 2015, the Company had a working capital deficit of $671,000, and an accumulated deficit of $19,101,411. These factors raise substantial doubt about the Company's ability to continue as a going concern. The accompanying financial statements do not include any adjustments that might arise as a result of this uncertainty. The Company's ability to continue as a going concern is dependent upon its ability to generate future profitable operations and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due. Management's plan includes obtaining additional funds by equity financing and/or related party advances; however there is no assurance of additional funding being available.
