**NOTE 1. FORWARD-LOOKING STATEMENTS**

*Except for the historical information contained herein, this report specifies forward-looking statements of management of the Company within the meaning of Section 27a of the Securities Act of 1933 and Section 21e of the Securities Exchange Act of 1934 ("forward-looking statements") including, without limitation, forward-looking statements regarding the Company's expectations, beliefs, intentions and future strategies. Forward-looking statements are statements that estimate the happening of future events and are not based on historical facts. Forward-looking statements may be identified by the use of forward-looking terminology, such as "could", "may", "will", "expect", "shall", "estimate", "anticipate", "probable", "possible", "should", "continue", "intend" or similar terms, variations of those terms or the negative of those terms. The forward-looking statements specified in this report have been compiled by management of the Company on the basis of assumptions made by management and considered by management to be reasonable. Future operating results of the Company, however, are impossible to predict and no representation, guaranty, or warranty is to be inferred from those forward-looking statements. The assumptions used for purposes of the forward-looking statements specified in this report represent estimates of future events and are subject to uncertainty as to possible changes in economic, legislative, industry, and other circumstances. As a result, the identification and interpretation of data and other information and their use in developing and selecting assumptions from and among reasonable alternatives require the exercise of judgment. To the extent that the assumed events do not occur, the outcome may vary substantially from anticipated or projected results, and, accordingly, no opinion is expressed on the achievability of those forward-looking statements. In addition, those forward-looking statements have been compiled as of the date of this report and should be evaluated with consideration of any changes occurring after the date of this report. No assurance can be given that any of the assumptions relating to the forward-looking statements specified in this report are accurate and the Company assumes no obligation to update any such forward-looking statements.*

### **NOTE 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

#### *Basis of presentation*

The Company’s financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The preparation of financial statements in conformity with accounting principles generally accepted in the United States of

America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Management further acknowledges that it is solely responsible for adopting sound accounting practices, establishing and maintaining a system of internal accounting control and preventing and detecting fraud. The Company's system of internal accounting control is designed to assure, among other items, that 1) recorded transactions are valid; 2) valid transactions are recorded; and 3) transactions are recorded in the proper period in a timely manner to produce financial statements which present fairly the financial condition, results of operations and cash flows of the Company for the respective periods being presented.

### Principles of Consolidation

The consolidated financial statements include the accounts of Myson Group, Inc. and all previously owned subsidiaries of the Company, except Thanh Quang Binh Exploiting and Processing High Calcium Carbonate Joint Stock Company.

### Consolidated Financial Statements

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. They do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. These statements should be read in conjunction with the previously filed Initial Company Information and Disclosure Statement for the fiscal year ended December 31, 2010, the annual reports for the fiscal years ended December 31, 2011, 2012, 2013, 2014 and 2015 as well as all the interim quarterly reports. In the opinion of management, all adjustments consisting of normal reoccurring accruals have been made to the financial statements. The results of operations for the quarter ended March 31, 2016 are not necessarily indicative of the results to be expected for the fiscal year ended December 31, 2016.

### Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period.

The Company's significant estimates include income taxes provision and valuation allowance of deferred tax assets; the fair value of financial instruments; the carrying value and recoverability of long-lived assets, including the values assigned to an estimated useful lives of computer equipment; and the assumption that the Company will continue as a going concern. Those significant accounting estimates or assumptions bear the risk of change due to the fact that there are uncertainties attached to those estimates or assumptions, and certain estimates or assumptions are difficult to measure or value.

Management bases its estimates on historical experience and on various assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources.

Management regularly reviews its estimates utilizing currently available information, changes in facts and circumstances, historical experience and reasonable assumptions. After such reviews, and if deemed appropriate, those estimates are adjusted accordingly. Actual results could differ from those estimates.

*Fair value of financial instruments measured on a recurring basis*

**Definition and Hierarchy**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Assets and liabilities measured at fair value are categorized based on whether or not the inputs are observable in the market and the degree that the inputs are observable. The categorization of financial assets and liabilities within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

A fair value hierarchy for inputs is used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs are to be used when available.

Valuation techniques that are consistent with the market or income approach are used to measure fair value. The fair value hierarchy is categorized into three levels based on the inputs as follows:

*Level 1* - Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.

*Level 2* - Valuations based on inputs other than quoted prices included in Level 1 that are observable, either directly or indirectly.

*Level 3* - Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

Fair value is a market-based measure, based on assumptions of prices and inputs considered from the perspective of a market participant that are current as of the measurement date, rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. The availability of valuation techniques and observable inputs can vary from investment to investment and are affected by a wide variety of factors, including; type of investment, whether the investment is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the transaction.

To the extent that valuation is based upon models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Because of the inherent uncertainty of valuation, those estimated values may be materially higher or lower than the values that would have been used had a ready market for the investments existed. Accordingly, the degree of judgment exercised by the Fund in determining fair value is greatest for investments categorized in Level 3. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy in which the fair value measurement falls in its entirety is determined based upon the lowest level input that is significant to the fair value measurement.

## Valuation Techniques and Inputs

The Company may invest public securities traded on public exchanges or over-the-counter (OTC), private securities, real estate, convertible securities, interest bearing securities and other types of securities and has adopted specific techniques for their respective valuations.

### Equity Securities in Public Companies

#### Unrestricted

The Company values investments in securities that are freely tradable and listed on major securities exchanges at their last reported sales price as of the valuation date. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy.

Securities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 or 3 of the fair value hierarchy.

#### Restricted

Securities traded on public exchanges or over-the-counter (OTC) where there are formal restrictions that limit (i.e. Rule 144 holding periods and underwriter's lock-ups) their sale shall be valued at the closing price on the date of valuation less applicable discounts. The Company may apply a discount to securities with Rule 144 restrictions. Additional discounts may be assessed if the Company believes there are other mitigating factors which warrant the additional discounting. When determining potential additional discounts, factors that will be taken into consideration include, but are not limited to; securities' trading characteristics, volume, length and overall impact of the restriction as well as other macro-economic factors. Valuations should be discounted appropriately until the securities may be freely traded.

If it has been determined that the exchange or OTC listed price does not accurately reflect fair market value, the Company may elect to treat the security as a private company and apply an alternative valuation method.

Investments in restricted securities of public companies may be included in Level 2 of the fair value hierarchy. However, to the extent that significant inputs used to determine liquidity discounts are not observable, investments in restricted securities in public companies may be categorized in Level 3 of the fair value hierarchy.

### Carrying value, recoverability and impairment of long-lived assets

The Company has adopted paragraph 360-10-35-17 of the FASB Accounting Standards Codification for its long-lived assets. The Company's long-lived assets, which include computer equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

The Company assesses the recoverability of its long-lived assets by comparing the projected undiscounted net cash flows associated with the related long-lived asset or group of long-lived assets over their remaining estimated useful lives against their respective carrying amounts. Impairment, if any, is based on the excess of the carrying amount over the fair value of those assets. Fair value is generally determined using the asset's expected future discounted cash flows or market

value, if readily determinable. If long-lived assets are determined to be recoverable, but the newly determined remaining estimated useful lives are shorter than originally estimated, the net book values of the long-lived assets are depreciated over the newly determined remaining estimated useful lives.

The Company considers the following to be some examples of important indicators that may trigger an impairment review: (i) significant under-performance or losses of assets relative to expected historical or projected future operating results; (ii) significant changes in the manner or use of assets or in the Company's overall strategy with respect to the manner or use of the acquired assets or changes in the Company's overall business strategy; (iii) significant negative industry or economic trends; (iv) increased competitive pressures; (v) a significant decline in the Company's stock price for a sustained period of time; and (vi) regulatory changes. The Company evaluates acquired assets for potential impairment indicators at least annually and more frequently upon the occurrence of such events.

The impairment charges, if any, is included in operating expenses in the accompanying consolidated statements of operations.

#### Cash equivalents

The Company considers all highly liquid investments with maturity of three months or less when purchased to be cash equivalents.

#### Related parties

The Company follows subtopic 850-10 of the FASB Accounting Standards Codification for the identification of related parties and disclosure of related party transactions.

Pursuant to Section 850-10-20 the Related parties include a. Affiliates of the Company; b. Entities for which investments in their equity securities would be required, absent the election of the fair value option under the Fair Value Option Subsection of Section 825-10-15, to be accounted for by the equity method by the investing entity; c. Trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of management; d. Principal owners of the Company; e. Management of the Company; f. Other parties with which the Company may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests; and g. Other parties that can significantly influence the management or operating policies of the transacting parties or that have an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests.

The financial statements shall include disclosures of material related party transactions, other than compensation arrangements, expense allowances, and other similar items in the ordinary course of business. However, disclosure of transactions that are eliminated in the preparation of consolidated or combined financial statements is not required in those statements. The disclosures shall include: a. The nature of the relationship(s) involved description of the transactions, including transactions to which no amounts or nominal amounts were ascribed, for each of the periods for which income statements are presented, and such other information deemed necessary to an understanding of the effects of the transactions on the financial statements; b. The dollar amounts of transactions for each of the periods for which income statements are presented and the effects of any change

in the method of establishing the terms from that used in the preceding period; amounts due from or to related parties as of the date of each balance sheet presented and, if not otherwise apparent, the terms and manner of settlement.

### Commitments and contingencies

The Company follows subtopic 450-20 of the FASB Accounting Standards Codification to report accounting for contingencies. Certain conditions may exist as of the date the consolidated financial statements are issued, which may result in a loss to the Company but which will only be resolved when one or more future events occur or fail to occur. The Company assesses such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal proceedings that are pending against the Company or un-asserted claims that may result in such proceedings, the Company evaluates the perceived merits of any legal proceedings or un-asserted claims as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company's consolidated financial statements. If the assessment indicates that a potential material loss contingency is not probable but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, and an estimate of the range of possible losses, if determinable and material, would be disclosed.

Loss contingencies considered remote are generally not disclosed unless they involve guarantees, in which case the guarantees would be disclosed. Management does not believe, based upon information available at this time, that these matters will have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows. However, there is no assurance that such matters will not materially and adversely affect the Company's business, financial position, and results of operations or cash flows.

### Revenue recognition

The Company follows paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company will recognize revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the product has been shipped or the services have been rendered to the customer, (iii) the sales price is fixed or determinable, and (iv) collectability is reasonably assured.

### Income Tax Provisions

The Company follows Section 740-10-30 of the FASB Accounting Standards Codification, which requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax assets and liabilities are based on the differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the fiscal year in which the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the fiscal years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the Statements of Income and Comprehensive Income in the period that includes the enactment date.

The Company adopted section 740-10-25 of the FASB Accounting Standards Codification (“Section 740-10- 25”) with regards to uncertainty income taxes. Section 740-10-25 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under Section 740-10-25, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent (50%) likelihood of being realized upon ultimate settlement. Section 740-10-25 also provides guidance on de- recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures.

#### *Net income (loss) per common share*

Net income (loss) per common share is computed pursuant to section 260-10-45 of the FASB Accounting Standards Codification. Basic net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during the period. Diluted net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock and potentially outstanding shares of common stock during the period. The weighted average number of common shares outstanding and potentially outstanding common shares assumes that the Company incorporated as of the beginning of the first period presented.

There were no potentially dilutive shares outstanding for the quarters ended March 31, 2016.

#### *Cash flows reporting*

The Company adopted paragraph 230-10-45-24 of the FASB Accounting Standards Codification for cash flows reporting, classifies cash receipts and payments according to whether they stem from operating, investing, or financing activities and provides definitions of each category, and uses the indirect or reconciliation method (“Indirect method”) as defined by paragraph 230-10-45-25 of the FASB Accounting Standards Codification to report net cash flow from operating activities by adjusting net income to reconcile it to net cash flow from operating activities by removing the effects of (a) all deferrals of past operating cash receipts and payments and all accruals of expected future operating cash receipts and payments and (b) all items that are included in net income that do not affect operating cash receipts and payments. The Company reports the reporting currency equivalent of foreign currency cash flows, using the current exchange rate at the time of the cash flows and the effect of exchange rate changes on cash held in foreign currencies is reported as a separate item in the reconciliation of beginning and ending balances of cash and cash equivalents and separately provides information about investing and financing activities not resulting in cash receipts or payments in the period pursuant to paragraph 830-230-45-1 of the FASB Accounting Standards Codification.

#### *Subsequent events*

The Company follows the guidance in Section 855-10-50 of the FASB Accounting Standards Codification for the disclosure of subsequent events. The Company will evaluate subsequent events through the date when the financial statements were issued.

## Recently issued accounting pronouncements

### FASB Accounting Standards Update No. 2011-05

In June 2011, the FASB issued the FASB Accounting Standards Update No. 2011-05 “*Comprehensive Income*” (“ASU 2011-05”), which was the result of a joint project with the IASB and amends the guidance in ASC 220, *Comprehensive Income*, by eliminating the option to present components of other comprehensive income (OCI) in the statement of stockholders’ equity. Instead, the new guidance now gives entities the option to present all non-owner changes in stockholders’ equity either as a single continuous statement of comprehensive income or as two separate but consecutive statements. Regardless of whether an entity chooses to present comprehensive income in a single continuous statement or in two separate but consecutive statements, the amendments require entities to present all reclassification adjustments from OCI to net income on the face of the statement of comprehensive income.

### FASB Accounting Standards Update No. 2011-08

In September 2011, the FASB issued the FASB Accounting Standards Update No. 2011-08 “*Intangibles— Goodwill and Other: Testing Goodwill for Impairment*” (“ASU 2011-08”). This update is to simplify how public and nonpublic entities test goodwill for impairment. The amendments permit an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350. Under the amendments in this update, an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount.

The guidance is effective for interim and annual periods beginning on or after December 15, 2011. Early adoption is permitted.

### FASB Accounting Standards Update No. 2011-10

In December 2011, the FASB issued the FASB Accounting Standards Update No. 2011-10 “*Property, Plant and Equipment: Derecognition of in Substance Real Estate—a Scope Clarification*” (“ASU 2011-09”). This Update is to resolve the diversity in practice as to how financial statements have been reflecting circumstances when parent company reporting entities cease to have controlling financial interests in subsidiaries that are in substance real estate, where the situation arises as a result of default on nonrecourse debt of the subsidiaries.

The amended guidance is effective for annual reporting periods ending after June 15, 2012 for public entities. Early adoption is permitted.

### FASB Accounting Standards Update No. 2011-11

In December 2011, the FASB issued the FASB Accounting Standards Update No. 2011-11 “*Balance Sheet: Disclosures about Offsetting Assets and Liabilities*” (“ASU 2011-11”). This Update requires an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. The objective of this disclosure is to facilitate comparison between those entities that prepare their financial statements on the basis of U.S. GAAP and those entities that prepare their financial statements on the basis of IFRS.

The amended guidance is effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods.

FASB Accounting Standards Update No. 2011-12

In December 2011, the FASB issued the FASB Accounting Standards Update No. 2011-12 “*Comprehensive Income: Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*” (“ASU 2011- 12”). This Update is a deferral of the effective date pertaining to reclassification adjustments out of accumulated other comprehensive income in ASU 2011-05. FASB is to going to reassess the costs and benefits of those provisions in ASU 2011-05 related to reclassifications out of accumulated other comprehensive income. Due to the time required to properly make such a reassessment and to evaluate alternative presentation formats, the FASB decided that it is necessary to reinstate the requirements for the presentation of reclassifications out of accumulated other comprehensive income that were in place before the issuance of Update 2011-05.

All other requirements in Update 2011-05 are not affected by this update, including the requirement to report comprehensive income either in a single continuous financial statement or in two separate but consecutive financial statements. Public entities should apply these requirements for fiscal years, and interim periods within those years, beginning after December 15, 2011.

Management does not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on the accompanying consolidated financial statements.

**NOTE 4. GOING CONCERN**

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern, which contemplates continuity of operations, realization of assets, and liquidation of liabilities in the normal course of business.

While the Company believes in the viability of its strategy to generate revenues and in its ability to raise additional funds to further its business plan; however, there can be no assurances to that effect. The ability of the Company to continue as a going concern is dependent upon the Company’s ability to further implement its business plan and generate revenues.

The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

#### **NOTE 7 – SUBSEQUENT EVENTS**

The Company has evaluated all events that occurred after the balance sheet date through the date when the financial statements were issued to determine if they must be reported.

The Company is in the process of completing the financial audits for the two years ended December 31, 2014 and 2015 for both the Company and Van Phuc Holding Building and Investment JSC and will file a Form 10 with the U.S. Securities and Exchange Commission to become a fully reporting company.

#### **ITEM 6. DESCRIBE THE ISSUER'S BUSINESS, PRODUCTS AND SERVICES**

Description of the issuer's business operations:

Myson Group, Inc. (formerly Vanguard Mining Corporation) has been engaged in acquiring and developing metallic and industrial mineral properties in Southeast Asia and other parts of the world. As of December 31, 2015, the Company has acquired a 50.90% ownership in Van Phuc Holding Building and Trading Joint Stock Company, a Vietnam-based company, and will focus on expanding Van Phuc's building construction, infrastructure development and manufacturing businesses.

#### **New Business Prospect, Development and Production Plan:**

Following the acquisition of a 50.90% ownership in Van Phuc Holding Building and Trading Joint Stock Company ("Van Phuc") in Vietnam, the Company has been focusing on growing and expanding Van Phuc's building construction, infrastructure development and manufacturing businesses. Van Phuc has been constructing a 350-unit tower at 62 Nguyen Huy Tuong Street, Thanh Xuan District, Hanoi, Vietnam and is in the process of undertaking other projects that may add significant revenues and profitability to the Company in the near future. For more information, visit the Company's website:

[www.mysongroup.com](http://www.mysongroup.com).

**Financial Plan:**

We will need to raise capital to implement each stage of our business plan. We intend to file a registration statement with the Securities and Exchange Commission to become a fully reporting company and aim at listing the Company's stock on a US national exchange like the Nasdaq Stock Market in the new future to facilitate our capitalization plan. In the meantime, we rely on loans from shareholders and officers, customer deposits, and financing from commercial banks to carry out operations. We believe that the financial condition of the Company will improve significantly in the near future with Van Phuc's operations, additional acquisitions and new business development.
