PURE ENERGY MINERALS LIMITED
(formerly Harmony Gold Corp.)
CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED JUNE 30, 2013 AND 2012

Independent Auditor's Report

To the Shareholders of
Pure Energy Minerals Limited

We have audited the accompanying consolidated financial statements of Pure Energy Minerals Limited and its subsidiaries, which comprise the consolidated statements of financial position as at June 30, 2013, and the consolidated statements of comprehensive loss, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements
Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility
Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion
In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Pure Energy Minerals Limited and its subsidiaries as at June 30, 2013 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Emphasis of matter
Without modifying our opinion, we draw attention to Note 1 to the consolidated financial statements which describes the material uncertainty that may cast significant doubt about the ability of Pure Energy Minerals Limited to continue as a going concern.

Other matter
The financial statements of Pure Energy Minerals Limited for the year ended June 30, 2012 were audited by another auditor who expressed an unmodified opinion on those statements on October 26, 2012.

Supplementary cash flow information (Note 13)

1. NATURE OF BUSINESS AND CONTINUING OPERATIONS

Pure Energy Minerals Limited (the "Company"; formerly Harmony Gold Corp) was incorporated on May 10, 2007 under the British Columbia Business Corporations Act. The Company's principal business activities are the acquisition, exploration and development of mineral properties. The Company is domiciled in Canada and is a reporting issuer with its common shares publicly traded on the TSX-Venture exchange under the stock symbol "PE". The address of its head office is 1780-355 Burrard Street, Vancouver, B.C., V6C 2G8.

At June 30, 2013, the Company had not yet determined whether the properties contain ore reserves that are economically recoverable. The recoverability of amounts shown for mineral properties and related deferred exploration costs is dependent upon the discovery of economically recoverable reserves, confirmation of the Company's interest in the underlying mineral claims, the ability of the Company to obtain necessary financing to complete the development, and upon future profitable production from the mineral properties or proceeds from the disposition of the mineral property.

At June 30, 2013, the Company had incurred a net loss of $846,134 (2012 - $1,344,842) and an accumulated deficit of $12,699,916 (2012 - $11,853,782) which have been funded by the issuance of equity. The Company's ability to continue its operations and to realize its assets at their carrying values is dependent upon obtaining additional financing and generating revenues sufficient to cover its operating costs.

These consolidated financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the accompanying financial statements. The ability of the Company to raise sufficient funds to carry out its exploration plan creates material uncertainty that raises significant doubt to the Company's ability to continue as a going concern.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Statement of compliance

The consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

The consolidated financial statements were authorized for issue in accordance with a resolution from the Board of Directors on October 10, 2013.

b) Basis of presentation

The consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair value, as explained in the accounting policies set out in Note 2(n). In addition, these consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

b) Basis of presentation (continued)

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements.

c) Consolidation

The consolidated financial statements include the accounts of the Company and its 100% wholly owned subsidiaries, Avantec Technologies, Inc. ('ATI") and 0891884 BC Ltd., from the date of acquisition October 18, 2012. Inter-company balances and transactions are eliminated on consolidation.

d) Significant accounting estimates and judgments

The preparation of these consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These consolidated financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the financial position reporting date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

Critical accounting estimates

i. the inputs used in accounting for share-based compensation expense in profit or loss;

ii. the assessment of indications of impairment of the exploration and evaluation assets and related determination of the net realizable value and write-down of the property where applicable; and,

Critical accounting judgments

i. The determination of categories of financial assets and financial liabilities has been identified as an accounting policy which involves judgments or assessments made by management.

ii. Deferred income tax assets are not recognized.

iii. The functional currency is the Canadian dollar.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

e) Exploration and evaluation assets

All costs related to the acquisition, exploration and development of mineral properties are capitalized. Upon commencement of commercial production, the related accumulated costs are amortized against projected income using the units of production method over estimated recoverable reserves. Management annually assesses carrying values of non-producing properties and properties for which events and circumstances may indicate possible impairment. Impairment of a property is generally considered to have occurred if the property has been abandoned, there are unfavourable changes in the property economics, there are restrictions on development, or when there has been an undue delay in development. In the event that estimated discounted cash flows expected from its use or eventual disposition is determined by management to be insufficient to recover the carrying value of the property, the carrying value is written-down to the estimated recoverable amount.

The recoverability of mineral properties and exploration and evaluation costs is dependent on the existence of economically recoverable reserves, the ability to obtain the necessary financing to complete the development of the reserves, and the profitability of future operations. The Company has not yet determined whether or not any of its future mineral properties contain economically recoverable reserves. Amounts capitalized to mineral properties as exploration and evaluation costs do not necessarily reflect present or future values.

When options are granted on mineral properties or properties are sold, proceeds are credited to the cost of the property. If no future capital expenditure is required and proceeds exceed costs, the excess proceeds are reported as a gain.

f) Income taxes

Income tax on the profit or loss for the periods presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at year end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is provided using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the financial position reporting date applicable to the period of expected realization or settlement.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

g) Decommissioning, restoration and similar liabilities

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration or development of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset, along with a corresponding liability as soon as the obligation to incur such costs arises. The timing of the actual rehabilitation expenditure is dependent on a number of factors such as the life and nature of the asset, the operating license conditions and, when applicable, the environment in which the mine operates.

Discount rates using a pre-tax rate that reflects the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either the unit-of-production or the straight line method. The corresponding liability is progressively increased as the effect of discounting unwinds creating an expense recognized in profit or loss.

Decommissioning costs are also adjusted for changes in estimates. Those adjustments are accounted for as a change in the corresponding capitalized cost, except where a reduction in costs is greater than the unamortized capitalized cost of the related assets, in which case the capitalized cost is reduced to nil and the remaining adjustment is recognized in profit or loss.

The operations of the Company have been, and may in the future be, affected from time to time in varying degree by changes in environmental regulations, including those for site restoration costs. Both the likelihood of new regulations and their overall effect upon the Company are not predictable.

The Company has no material restoration, rehabilitation and environmental obligations as the disturbance to date is immaterial.

h) Share-based compensation

Share-based compensation to employees and others providing similar services are measured at the estimated fair value of the instruments issued on the grant date and amortized over the vesting periods. Share-based compensation to non-employees is measured at the fair value of the goods or services received or the fair value of the equity instruments issued if it is determined the fair value of the goods or services cannot be reliably measured, and is recorded at the date the goods or services are received. The amount recognized as an expense is adjusted to reflect the number of awards expected to vest. The offset to the recorded cost is to contributed surplus.

Consideration received on the exercise of stock options is recorded as share capital and the related contributed surplus is transferred to share capital. Charges for options that are forfeited before vesting are reversed from contributed surplus.

i) Loss per share

Basic loss per share is computed by dividing net loss available to common shareholders by the weighted average number of common shares outstanding during the period. The Company applies the treasury stock method in calculating diluted loss per share. Diluted loss per share excludes all dilutive potential common shares if their effect is anti-dilutive.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

j) Flow-through shares

Current Canadian tax legislation permits a company to issue securities referred to as flow-through shares whereby the Company assigns the tax deductions arising from the related resource expenditures to the shareholders. The issue of flow-through shares is in substance an issue of ordinary shares and the sale of tax deductions. At the time the Company issues flow-through shares, the sale of tax deductions is deferred and presented as other liabilities in the statement of financial position to recognize the obligation to incur and renounce eligible resource exploration and evaluation expenditures. The tax deduction is measured as the difference between the current market price of the Company's common shares and the issue price of the flow-through share. Upon incurring and renouncing eligible resource exploration and evaluation expenditures, the Company recognizes the sale of tax deductions as other income on the statement of comprehensive loss and reduces the other liability.

To the extent that the Company has deferred tax assets in the form of tax loss carry-forwards and other unused tax credits as at the reporting date, the Company may use them to reduce its deferred tax liability relating to tax benefits transferred through flow-through shares.

k) Share capital and warrants

When the Company issues units during a private placement, which include both common shares and share purchase warrants, the warrants are valued by comparing the total unit price to the fair value of the shares on the day of the announcement of the private placement. Any premium above the fair value of the shares issued would be allocated to the warrants and credited to the warrant reserve. The warrant reserve is a component of contributed surplus.

l) Impairment of non-financial assets

At the end of each reporting period, the Company assesses each cash generating unit to determine whether there is any indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a discounted rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in profit or loss for the period. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

When an impairment subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate and its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

m) Cash and cash equivalents

Cash and cash equivalents consist of cash and liquid investments which are readily convertible into cash with maturities of three months of less when purchased. The Company's cash and cash equivalents are invested with major financial institutions and are not invested in any asset-backed deposits or investments.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

n) Financial instruments

i) Financial assets

Financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: at fair value through profit or loss ("FVTPL"), loans and receivables, held-to-maturity, or available-for-sale.

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through profit or loss. The Company has classified its cash as FVTPL.

Financial assets classified as loans and receivables are measured at amortized cost less impairment. The Company has classified amount receivable as loans and receivables.

Financial assets classified as held-to-maturity are measured at amortized cost. The Company has no financial assets classified as held-to-maturity.

Financial assets classified as available-for-sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income (loss) except for losses in value that are considered other than temporary. The Company has no financial assets classified as available-for-sale.

Transaction costs associated with FVTPL financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

ii) Financial liabilities

Financial liabilities are initially recorded at fair value and designed upon inception as FVTPL or classified as other financial liabilities.

Financial liabilities classified as FVTPL include financial liabilities held-for-trading and financial liabilities designated upon initial recognition as FVTPL. Fair value changes on financial liabilities classified as FVTPL are recognized through the statement of comprehensive income or loss. The Company has no financial liabilities classified as FVTPL.

Financial liabilities classified as other financial liabilities are initially recognized at fair value less directly attributable transaction costs. Subsequently, they are measured at amortized cost using the effective interest rate method. The Company has classified its accounts payable and accrued liabilities as other financial liabilities.

o) Property and equipment

Property and equipment is recorded at cost and amortized at the following annual rates:

Equipment	20%	declining balance
Leasehold improvement	20%	straight line

p) Related party transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or common significant influence. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources, services or obligations between related parties.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

q) Revenue Recognition

Revenue from royalties is recognized when it is probable that the economic benefits associated with the transaction will flow to the Company.

3. RECENT ACCOUNTING PRONOUNCEMENTS

Certain new standards, interpretations and amendments to existing standards have been issued by the IASB or International Financial Reporting Interpretations Committee ("IFRIC") that are mandatory for accounting periods beginning after July 1, 2013, or later periods. Some updates are not applicable or are not consequential to the Company may have been excluded from the list below.

Accounting standards adopted during the year ended June 30, 2013

Income taxes
In December 2010, the IASB issued an amendment to IAS 12 – *Income Taxes* that provide a practical solution to determining the recovery of investment properties as it relates to the accounting for deferred income taxes. This amendment is effective for annual periods beginning on or after January 1, 2012, and was adopted during the year. This did not have a significant impact on its consolidated financial statements.

Presentation of financial statements
IAS 1, *Presentation of Financial Statements*, was amended to require entities to group items within other comprehensive income that may be reclassified to profit or loss. This amendment is effective for annual periods beginning on or after January 1, 2012, and was adopted during the year. This did not have a significant impact on its consolidated financial statements.

Accounting standards anticipated to be effective January 1, 2013

Financial Instruments
IFRS 7, *Financial Instruments: Disclosures' - Offsetting of Financial Assets and Liabilities,* requires an entity to disclose information to enable users of its financial statements to evaluate the effect or potential effect of netting arrangements on the entity's financial position. The Company does not anticipate the application of IFRS 7 to have a material impact on its consolidated financial statements.

Consolidation
IFRS 10, *Consolidated Financial Statements*, requires an entity to consolidate an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Under existing IFRS, consolidation is required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. IFRS 10 replaces SIC-12 Consolidation—Special Purpose Entities and parts of IAS 27 *Consolidated and Separate Financial Statements*. The Company does not anticipate the application of IFRS 10 to have a material impact on its consolidated financial statements.

Joint ventures
On May 12, 2011, the IASB issued IFRS 11, *Joint Arrangements*. IFRS 11 requires a venturer to classify its interest in a joint arrangement as a joint venture or joint operation. Joint ventures will be accounted for using the equity method of accounting whereas for a joint operation the venturer will recognize its share of the assets, liabilities, revenue and expenses of the joint operation. Under existing IFRS, entities have the choice to proportionately consolidate or equity account for interests in joint ventures. IFRS 11 supersedes IAS 31, *Interests in Joint Ventures*, and SIC-13, J*ointly Controlled Entities—Non-monetary Contributions by Venturers*. The Company does not anticipate the application of IFRS 11 to have a material impact on its consolidated financial statements.

3. RECENT ACCOUNTING PRONOUNCEMENTS (continued)

Accounting standards anticipated to be effective January 1, 2013 (continued)

Disclosure of interest in other entities
IFRS 12, *Disclosure of Interest in Other Entities*, establishes disclosure requirements for interests in other entities, such as joint arrangements, associates, special purpose vehicles and off balance sheet vehicles. The standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of, and risks associated with, an entity's interests in other entities. The Company does not anticipate the application of IFRS 12 to have a material impact on its consolidated financial statements.

Fair value measurement
IFRS 13, Fair Value Measurement, sets out a single IFRS framework for measuring fair value and new required disclosures about fair value measurements. Management anticipates that this standard will be adopted in the Company's consolidated financial statements for the period beginning July 1, 2013, and has not yet considered the potential impact of the adoption of IFRS 13.

Accounting standards anticipated to be effective January 1, 2014

Financial Instruments
IAS 32, *Financial Instrument: Presentation*, clarifies some of the requirements for offsetting financial assets and liabilities in the statement of financial position. The Company does not anticipate the application of IAS 32 to have a material impact on its consolidated financial statements.

Accounting standards anticipated to be effective January 1, 2015

Financial instruments
IFRS 9, *Financial Instruments*, addresses classification and measurement of financial assets and replaces the multiple category and measurement models in IAS 39 for debt instruments with a new mixed measurement model having only two categories: amortized cost and fair value through profit and loss. IFRS 9 also replaces the models for measuring equity instruments and such instruments are either recognized at fair value through profit and loss or at fair value through other comprehensive income. The Company has not yet considered the potential impact of the adoption of IFRS 9 on its consolidated financial statements.

4. ACQUISITION OF 0891884 BC LTD.

On October 18, 2012 the Company completed a share exchange agreement with 0891884 BC Ltd (formerly Pure Energy Minerals Limited) ("0891884"), pursuant to which the Company purchased all of the issued and outstanding common shares of 0891844 in exchange for the issuance of 9,850,001 common shares of the Company with a fair value of $689,500 (the "Acquisition"). 0891884 BC Ltd. does not meet the definition of a business under IFRS 3 and accordingly the acquisition has been treated as an asset acquisition. As a result of the Acquisition, the Company assumed the option to acquire an 80% undivided interest in an early stage lithium exploration project. The 80% interest is comprised of claims located in Nevada (the "Property"). The option is held under an agreement (the "Option Agreement") between GeoXplor Corp. and 0891844, whose remaining obligations under the Option Agreement were assumed by the Company on closing of the Acquisition. Under the terms of the Option Agreement the Company will issue 1,750,000 common shares, make cash payments of US $250,000 and is committed to exploration expenditures of US$1,600,000 prior to June 10, 2016. See Note 6.

4. ACQUISITION OF 0891884 BC LTD. (continued)

A summary of the net assets acquired is as follows:

Cash	$ 10,089
Receivables	11,583
Exploration and evaluation assets	840,036
Accounts payable and accrued liabilities	(72,997)
Due to Pure Energy Minerals Limited	(84,451)
Net assets acquired	$ 704,260
Consideration paid:

Esmeralda Property

Pursuant to an Option agreement (the "Option Agreement") between the 0891884 BC Ltd. and GeoXplor Corp. ("GeoXplor") dated June 10, 2011, as amended on August 3, 2012, 0891884 BC Ltd. was granted an option to acquire an 80% interest in certain placer mining claims situated in Esmeralda County, Nevada (the "Property"). Under the terms of the Option Agreement, 0891884 BC Ltd made a cash payment of US$75,000 and issued 250,000 common shares and incurred exploration expenditures in excess of US$150,000. The Company shall make the following cash payments and share issuances: on or before October 10, 2012, cash payment of US$50,000 (paid) and issuance of 500,000 shares (issued); June 10, 2013 US$100,000 (paid) and 500,000 shares (issued October 8, 2013 see note 14); and June 10, 2014 US$100,000 and 750,000 shares. If the Company prepares a pre-feasibility study which recommends putting the property into production, the Company shall pay GeoXplor an additional payment of US$500,000, to be paid in cash or shares at GeoXplor 's discretion. In addition, the Company commits to a work program spending a minimum of $1,600,000 over a five year period as to not less than $250,000 in year two, $350,000 in year three, $500,000 in year four and $500,000 in year five. After five years GeoXplor and the Company shall form a joint venture where each party will be responsible for its proportionate share of future costs.

On January 18, 2013, the Company amended its option agreement with GeoXplor Corp. The amended option agreement entitles the Company to acquire a 100% interest in an additional 2,240 acres of land in Esmeralda County. The Company paid $50,640 ($50,000 US) for this amendment. The terms of the original option agreement with GeoXplor, dated June 10, 2011, as amended on August 3, 2012, otherwise remain unchanged.

6. EXPLORATION AND EVALUATION ASSETS (continued)

Purisma Project

On March 2011, the Company entered into an agreement with ECI Exploration and Mining Inc. ("ECI") to acquire up to a 70% interest in ECI's Purisma Project located in the state of Nayrit, in west-central Mexico. In order to obtain a 51% interest in the property, the Company agreed to make a cash payment of $100,000, issue 8,000,000 common shares and incur $3,250,000 in exploration expenditures. In October 2011, the Company terminated the agreement and wrote off all costs incurred for the project, including option payments of $100,135 and 1,000,000 common shares of the Company issued to ECI with a fair value of $110,000.

Fourbert Lake Property

On October 7, 2011, the Company received regulatory approval for a Property Option Agreement dated October 3, 2011 between the Company and an unrelated individual whereby the Company acquired a 100% undivided interest in the Foubert Lake Property which comprised of 20 claims for a total of 1,010.93 hectares, located in Carheil Township, approximately 230 kilometres northwest of Val d'Or, Quebec. The Company paid $25,000 and issued 200,000 shares with a fair value of $16,000 to acquire the property, which were subsequently written off as the Company had no exploration activity planned for the property in the foreseeable future due to unfavorable drilling results.

7. ROYALTY RIGHTS

During the year ended June 30, 2009, the Company sold certain assets including equipment and patents to a third party. Under the sale agreement, the Company retained a royalty of $0.20 US per unit sold. The Company is paid its Royalty quarterly and at June 30, 2013 there was $4,043 US included in Amount Receivable. Royalty income for the year ended June 30, 2013 was $17,762 (2012 - $23,683) The Company sold its Royalty rights subsequent to June 30, 2013. (See Note 14)

8. RELATED PARTY TRANSACTIONS AND BALANCES

The Company's related parties consist of companies owned in whole or in part by executive officers and directors as follows:

Name	Position and nature of transactions
Jason Dussault	President, CEO and Director – Management fees
Robert Mintak	Director, Management fees
Mike Dake	Director, Investor relations and Management fees
Grant Hall	Director
Michael Liddle	Director
J. W. Jardine & Company Ltd.	CFO – Professional fees
Jean Bailly	former Director
Jerry Minni	former Director – Management fees
Craig Englesman	former Director – Management fees

Transactions have been measured at the exchange amount which is determined on a cost recovery basis.

8. RELATED PARTY TRANSACTIONS AND BALANCES (continued)

Compensation of Key Management Personnel

Year ended	June 30, 2013	June 30, 2012
Management fees	$ 152,375	$ 240,000
Investor relations	30,000	15,000
Consulting	-	7,697
Professional fees	35,000	85,000
Share-based compensation	115,605	-
Total	$ 332,980	$ 347,697

Included in accounts payable and accrued liabilities is $23,712 (2012 - $7,728) owing to a director and companies controlled by directors of the Company for accrued and unpaid fees. These amounts are unsecured, non-interest bearing and due on demand.

9. SHARE CAPITAL

a) Authorized

The Company is authorized to issue an unlimited number of common shares without par value.

b) Issued and outstanding

(i) On October 12, 2012, the Company completed a private placement of 12,000,000 units at $0.05 per unit. Each unit consists of one share and one half of a share purchase warrant entitling the holder to acquire one additional share at a cost of $0.10 per share to October 11, 2013. The Company paid finders' fees and commissions totaling $92,400 in cash pursuant to the financing.

(ii) On October 18, 2012, the Company issued 9,850,001 shares with a fair value of $689,500 for the acquisition of 0891884 BC Ltd. (Note 4).

(iii) On November 19, 2012, the Company issued 500,000 shares with a fair value of $30,000 pursuant to the Esmeralda property option agreement (Note 6).

(iv) During the year ended June 30, 2012, the Company completed a private placement of 11,250,000 units at $0.10 per unit. Each unit consists of one share and one half of a share purchase warrant entitling the holder to acquire one additional share at a cost of $0.20 per share to May 5, 2012. The Company paid finders' fees totaling $73,465 in cash pursuant to the financing.

(v) On July 7, 2011 the Company issued 1,000,000 common shares with a fair value of $110,000 pursuant to a mineral property option agreement for the Purisma project (Note 6).

(vi) On October 17, 2011 the Company issued 200,000 common shares with a fair value of $16,000 pursuant to a mineral property option agreement for the Fourbert Lake Property (Note 6).

9. SHARE CAPITAL (continued)

c) Stock options

The Company grants incentive stock options as permitted pursuant to the Company's Stock Option Plan (the "Plan") which complies with the rules and policies of the TSX. Under the Plan, the aggregate number of common shares which may be subject to option at any one time may not exceed 5% of the issued common shares and the maximum term is 10 years.

The continuity of stock options for the year ended June 30, 2013 is as follows:

	Number of Options	Weighted Average Exercise Price	Expiry Date
Balance, June 30, 2011	3,300,000	$0.35	
Cancelled	(3,300,000)	$0.35	
Balance, June 30, 2012	-	-	
Granted	3,050,000	$0.10	January 29, 2017
Balance, June 30, 2013	3,050,000	$0.10	
Fully vested and exercisable at June 30, 2013	2,250,000	$0.10	

d) Share-based payments

During the year ended June 30, 2013, the Company granted 3,050,000 (2012 - nil) stock options with a fair value of $180,587 or $0.06 per option. During the year ended June 30, 2013, the Company expensed $162,972 (2012 - $nil) relating to the options granted and vested during the period. Of the options granted in the current year, 2,250,000 vest upon grant, and 400,000 vest on July 29, 2013 and 400,000 vest on January 29, 2014.

During the year ended June 30, 2012, the Company cancelled all stock options outstanding to directors, officers, and consultants that were exercisable to acquire an aggregate of 3,300,000 common shares of the Company. All stock options had vested at the time of cancellation.

The options were valued using the Black-Scholes option pricing model under the following weighted average assumptions:

	2013	2012
Risk free interest rate	1.38%	-
Expected dividend yield	-	-
Stock price volatility	97%	-
Expected life of options	4 years	-
Forfeiture rate	-	-

Expected stock price volatility was calculated based solely on historical volatility.

9. SHARE CAPITAL (continued)

e) Warrants

A summary of the changes in the Company's warrants for the years ended June 30, 2013 and 2012 is presented below.

	Number of Warrants	Weighted Average Exercise Price	Expiry Date
Balance, June 30, 2011	-	-	
Issued on private placement	5,625,000	$0.20	July 14, 2012
Balance, June 30, 2012	5,625,000	$0.20	
Expired, unexercised	(5,625,000)	$0.20	
Issued	6,000,000	$0.10	October 11, 2013
Balance, June 30, 2013	6,000,000	$0.10	

10. INCOME TAXES

The following table reconciles the amount of income tax recoverable on application of the combined statutory Canadian federal and provincial income tax rates:

	2013	2012
Combined statutory tax rate	25.75%	25.75%
Income tax recovery at combined statutory rate	$ 216,374	$ 346,297
Non-deductible expenses and other	(41,558)	-
Change in tax rates	66,792	(9,740)
Change in unrecognized deferred tax assets	(241,608)	(336,557)
Income tax expense	$ -	$ -

Significant components of the Company's unrecognized deferred tax assets (liabilities) are shown below:

	2013	2012
Share issue costs	$ 36,900	$ 60,900
Exploration and evaluation assets	614,600	571,500
Non-capital and capital loss carry-forwards	1,593,800	1,015,600
Total deferred income tax assets	$ 2,245,300	$ 1,648,000
Unrecognized deferred tax assets	(2,245,300)	(1,648,000)
Net deferred tax assets	$ -	$ -

As at June 30, 2013, the Company has available for deduction against future taxable income Canadian non-capital losses of approximately $5,400,000 (2012: $4,600,000) and in the United States $2,700,000.These non-capital losses expire from 2015 to 2033.

11. MANAGEMENT OF CAPITAL

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the sourcing and exploration of mineral properties. The Company considers the items in shareholders' equity as capital. There has been no change to what the Company considers capital from the prior year. The Company does not have any externally imposed capital requirements to which it is subject.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue common shares or dispose of assets or adjust the amount of cash. There has been no change to how capital is managed from the prior year.

12. FINANCIAL INSTRUMENTS

Fair value

As at June 30, 2013 the Company's financial instruments consist of cash, amount receivable and accounts payable and accrued liabilities. The fair values of these financial instruments approximate their carrying values because of their current nature.

IFRS 7 *Financial Instruments – Disclosures*, establishes a fair value hierarchy based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. IFRS 7 prioritizes the inputs into three levels that may be used to measure fair value:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical unrestricted assets or liabilities.

Level 2 – Inputs that are observable, either directly or indirectly, but do not qualify as Level 1 inputs (i.e. quoted prices for similar assets or liabilities).

Level 3 – Prices or valuation techniques that are not based on observable market data and require inputs that are both significant to the fair value measurement and unobservable.

The fair values of the Company's financial assets and liabilities as of June 30, 2013 and June 30, 2012 were calculated as follows:

	Level 1	Level 2	Level 3	June 30, 2013
Cash	$ 200,383	$ -	$ -	$ 200,383

	Level 1	Level 2	Level 3	June 30, 2012
Cash	$ 850,630	$ -	$ -	$ 850,630

12. FINANCIAL INSTRUMENTS (continued)

Credit Risk

Credit risk is the risk of loss associated with the counterparty's inability to fulfill its payment obligations. Financial instruments that potentially subject the Company to concentrations of credit risks consist principally of cash. To minimize the credit risk the Company places these instruments with a high quality financial institution.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due (Note 1). The Company manages liquidity risk through the management of its capital structure and financial leverage as outlined above.

The Company monitors its ability to meet its short-term exploration and administrative expenditures by raising additional funds through share issuance when required. All of the Company's financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms. The Company does not have investments in any asset backed deposits.

Foreign Exchange Risk

The Company is exposed to currency fluctuations. The Company has US dollar balances in cash, amounts receivable, accounts payable and accrued liabilities and is therefore exposed to gains or losses on foreign exchange. A significant change in the currency exchange rate between the Canadian dollar relative to the US dollar could have an effect on the Company's results of operations, financial position and/or cash flows. The Company has not hedged its exposure to currency fluctuations.

At June 30, 2013, the Company, through its wholly owned subsidiaries, had a cash balance of $6,356, amounts receivable of $4,043 and accounts payable of $24,627 which were denominated in US dollars. Management considers foreign exchange not to be a significant risk.

Interest Rate Risk

The Company is not exposed to significant interest rate risk.

13. SUPPLEMENTARY CASH FLOW INFORMATION

Non-cash Financing and Investing Activities	2013	2012
	$	$
Shares issued for:		
Acquisition of 0891884 BC Ltd.	689,500	-
Acquisition of Exploration and evaluation assets	30,000	126,000

There were no cash inflows and outflows for interest and taxes during fiscal 2013. There were cash inflows of $6,517 for interest income in fiscal 2012.

See Note 4 for acquisition of 0891884 BC Ltd.

14. SUBSEQUENT EVENTS

(a) On July 11, 2013 the Company entered into an Assignment Agreement whereby the certain royalty rights owned by the Company were sold to a third party for cash consideration of $160,000 US.
(b) On October 8, 2013 issued 500,000 shares to GeoXplor under the agreement for the AF Claims.
