FERNHILL CORPORATION
(Formerly "Global Gold Corp.")
NOTES TO UNAUDITED FINANCIAL STATEMENTS
(Unaudited)
FOR THE YEAR ENDED DECEMBER 31, 2014

NOTE 1 - ORGANIZATION AND DESCRIPTION OF BUSINESS

The interim financial statements of Fernhill Corporation (formerly "Global Gold Corporation") (the "Company" or "FERN") have been prepared by management and are unaudited. In the opinion of management, these financial statements reflect all adjustments of a normal recurring nature necessary for a fair presentation of the results for the interim periods presented.

Basis of Presentation

The Company has not generated significant revenues from operations. There is no bankruptcy, receivership, or similar proceedings against our company.

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules and regulations of the United States Securities and Exchange Commission for annual financial information.

NOTE 2 – GOING CONCERN

The accompanying financial statements have been prepared on the basis of accounting principles applicable to a "going concern", which assume that the Company will continue in operation for at least one year and will be able to realize its assets and discharge its liabilities in the normal course of operations.

Several conditions and events cast doubt about the Company's ability to continue as a "going concern". The Company has incurred net losses of approximately $9,170,559 for the period from inception, (April 7, 1997 through December 31, 2014, has a liquidity problem, and requires additional financing and or sales in order to finance its business activities on an ongoing basis. The Company is actively pursuing alternative financing and has had discussions with various third parties, although no firm commitments have been obtained.

The Company's ability to survive will depend on numerous factors including, but not limited to, the Company's receiving continued financial support, completing public equity financing, or generating profitable operations in the future.

These financial statements do not reflect adjustments that would be necessary if the Company were unable to continue as a "going concern". While management believes that the actions already taken or planned, will mitigate the adverse conditions and events which raise doubt about the validity of the "going concern" assumption used in preparing these financial statements, there can be no assurance that these actions will be successful.

If the Company were unable to continue as a "going concern", then substantial adjustments would be necessary to the carrying values of assets, the reported amounts of its liabilities, the reported revenues and expenses, and the balance sheet classifications used.

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Re-Classification

As of December 31, 2013 the Company re-classified $105,234 from 'accumulated deficit' to 'accumulated other comprehensive income' on the balance sheet to conform with the current presentation of the financial statements. This reclassifications had no impact on the Company's financial condition, results of operation, or cash flows.

Cash and Cash Equivalents

The Company considers highly liquid financial instruments purchased with a maturity of three months or less to be cash equivalents.

Per Share Data

Net loss per common share is computed by dividing net loss by the weighted average common shares outstanding during the period as defined by Financial Accounting Standards, ASC Topic 260, "Earnings per Share". Basic earnings per common share ("EPS") calculations are determined by dividing net income by the weighted average number of shares of common stock outstanding during the year. Diluted earnings per common share calculations are determined by dividing net income by the weighted average number of common shares and dilutive common share equivalents outstanding. During periods when common stock equivalents, if any, are anti-dilutive they are not considered in the computation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could materially differ from those estimates. Management believes that the estimates used are reasonable.

In Management's opinion all adjustments necessary for a fair statement of the results for the interim periods have been made. All adjustments are normal and recurring other than the impairment of the Software development intangible as described in Note 5 of these footnotes.

Revenue Recognition

The Company recognizes revenue on an accrual basis. Revenue is generally realized or realizable and earned when all of the following criteria are met: 1) persuasive evidence of an arrangement exists between the Company and our customer(s); 2) services have been rendered; 3) our price to our customer is fixed or determinable; and 4) collectability is reasonably assured.

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (CONTINUED)

Fair value of financial instruments

Fair value accounting establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
Level 2 Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; and
Level 3 Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The Company's financial instruments consist of cash, accounts receivable, equity securities available for sale, accounts payable and accrued liabilities. Except for the equity securities available for sale which are valued using level 1 inputs, the carrying amount of these financial instruments approximate fair value due to either length of maturity or interest rates that approximate prevailing market rates unless otherwise disclosed in these financial statements.

Stock-based Compensation

The Company recognizes stock-based compensation in accordance with ASC Topic 718 “Stock Compensation”, which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors including employee stock options and employee stock purchases related to an Employee Stock Purchase Plan based on the estimated fair values.

Recent Accounting Pronouncements

Management has evaluated all recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the American Institute of Certified Public Accountants, and the SEC through the issuance date of these financials and they are not believed by management to, have a material impact on the Company's present or future financial position, results of operations or cash flows.

NOTE 4 – COMMITMENTS

As of December 31, 2014, the Company has a “virtual office” in the United States contracted on a month-to-month basis. Currently, there are no outstanding debts owed by the company for the use of these facilities and there are no commitments for future use of the facilities.

NOTE 5 – ASSET PURCHASE AGREEMENT

On February 11, 2010 the Company entered into an Asset Purchase Agreement to acquire 13 mining claims comprising of 414.14 hectares in the Montauban and Chavigny Townships near Grondines-West, in the Portneuf County, Quebec, for the purpose of exploration for gold and silver mineralization deposits.

NOTE 5 – ASSET PURCHASE AGREEMENT - (CONTINUED)

The Company acquired the mining claims for a total of approximately $250,000 consisting of an initial deposit of Fifty Thousand Canadian dollars on the signing of this Agreement, US$100,000 of the Company common shares at its fair market value on February 11, 2010, CAD$50,000 on or before February 10, 2011, and CAD$50,000 on or before February 11, 2012. An agreement was reached to extend this due date to December 31, 2013.

The Company issued 90,000,000 common shares with a deemed value of US$100,000 on April 16, 2010, in partial consideration for this acquisition.

NOTE 6 – NOTES PAYABLE

On February 27, 2006, the Company entered into a Settlement Agreement with one of its creditors. Under the terms of the Settlement Agreement, the Company issued an 8% Promissory Note for $123,615 due on December 31 2007. Since the Promissory Note is in default, the holder has the right to convert the Promissory Note into shares of the Company at par value according to the agreement. On December 31, 2008, the Company issued 21,586,735 pre-reverse split shares. On March 15, 2009, the Company converted $50,000 of the balance of the Promissory Note into 50,000,000 shares of the Company. On April 24, 2010 the company converted the $40,000 balance of the Promissory Note into 40,000,000 shares of the Company.

On January 31, 2011, the Company entered into a note payable with an unrelated party in the amount of $82,000. The note is unsecured, bears an interest rate of 8% per annum and was due on January 31, 2012. The note is currently in default and as a provision of the note is convertible into common shares of the Company. Accordingly, as of June 30, 2014 $29,000 in principal has been converted into common shares leaving a balance of $53,000, (see Note 8).
