DALTON INDUSTRIES INC.

(A Development Stage Company)
NOTES TO THE UNAUDITED FINANCIAL STATEMENTS

July 31, 2015

NOTE 1 – NATURE OF OPERATIONS AND BASIS OF PRESENTATION

The Company was incorporated in the State of Minnesota on August 3, 1992, under the name MedicalCV Inc. The company changed its name to Dalton Industries December 2013. The company has an established fiscal year end of April 30.

The Company is in the initial development stage and has incurred losses since inception totaling $64,086.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation
The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States of America and are presented in US dollars

Cash and Cash Equivalents
The Company considers all highly liquid instruments with a maturity of three months or less at the time of issuance to be cash equivalents.

Use of Estimates and Assumptions
The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Financial Instruments
The carrying value of the Company's financial instruments approximates their fair value because of the short maturity of these instruments.

Basic and Diluted Net Loss per Share
The Company computes loss per share in accordance with "ASC-260", "Earnings per Share" which requires presentation of both basic and diluted earnings per share on the face of the statement of operations. Basic loss per share is computed by dividing net loss available to common shareholders by the weighted average number of outstanding common shares during the period. Diluted loss per share gives effect to all dilutive potential common shares outstanding during the period. Dilutive loss per share excludes all potential common shares if their effect is anti-dilutive. The Company has no potential dilutive instruments and accordingly basic loss and diluted loss per share are the same.

NOTE 3 – GOING CONCERN

The Company's financial statements are prepared using generally accepted accounting principles in the United States of America applicable to a going concern which contemplates the realization of assets and liquidation of liabilities in the normal course of business. The Company does not currently have an established ongoing source of revenues sufficient to cover its operating costs and allow it to continue as a going concern. The ability of the Company to continue as a going concern is dependent on the Company obtaining adequate capital to fund operating losses until it becomes profitable. If the Company is unable to obtain adequate capital, it could be forced to cease operations.

In order to continue as a going concern, the Company will need, among other things, additional capital resources. Management's plan is to obtain such resources for the Company by obtaining capital from management and significant shareholders sufficient to meet its minimal operating expenses and seeking equity and/or debt financing. However management cannot provide any assurances that the Company will be successful in accomplishing any of its plans.

The ability of the Company to continue as a going concern is dependent upon its ability to successfully accomplish the plans described in the preceding paragraph and eventually secure other sources of financing and attain profitable operations. The accompanying financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

NOTE 4 - CAPITAL STOCK

On March 11, 2014 ten shareholders were issued shares for debt; for a total of 30,000,000 shares.

NOTE 5 - RELATED PARTY TRANSACTION

As at July 31, 2015, the Company owed $14,517 (July 31, 2014 - $14,517) to Stoneridge Investments for funding of general operations. The amounts owing are unsecured, non-interest bearing, and due on demand.

On March 15, 2013 the company made payment to Stoneridge Investments in the amount of $3,000 towards the $17,517 outstanding loan, with a remaining balance of $14,517.

NOTE 6 - SUBSEQUENT EVENTS

The Company has evaluated subsequent events from the balance sheet date through the date the financial statements were available to be issued and has determined that there are no events to disclose.
