SERIES A PREFERRED STOCK DESCRIPTION

CONVERSION RIGHTS.

Preferred A Stock is non-convertible.

VOTING RIGHTS.

If at least one share of Series A Preferred Stock is issued and outstanding, then the total aggregate issued shares of Series A Preferred Stock at any given time, regardless of their number, shall have voting rights equal to four times the sum of: i) the total number of shares of Common Stock which are issued and outstanding at the time of voting, plus ii) the total number of shares of Series B and Series C Preferred Stocks which are issued and outstanding at the time of voting.

Each individual share of Series A Preferred Stock shall have the voting rights equal to:

[four times the sum of: {all shares of Common Stock issued and outstanding at time of voting + all shares of Series B and Series C Preferred Stocks issued and outstanding at time of voting}]

divided by:

[the number of shares of Series A Preferred Stock issued and outstanding at the time of voting]

DIVIDENDS. The holders of Series A Preferred Stock shall be entitled to receive dividends when, as and if declared by the Board of Directors, in its sole discretion.

SERIES B PREFERRED STOCK DESCRIPTION

DIVIDENDS. The holders of Series B Preferred Stock shall be entitled to receive dividends when, as and if declared by the Board of Directors, in its sole discretion.

LIQUIDATION RIGHTS. Upon any liquidation, dissolution or winding up of the Corporation, whether voluntary or involuntary, before any distribution or payment shall be made to the holders of any stock ranking junior to the Series B Preferred Stock, the holders of the Series B Preferred Stock shall be entitled to be paid out of the assets of the Corporation an amount equal to \$1.00 per share or, in the event of an aggregate subscription by a single subscriber for Series B Preferred Stock in excess of \$100,000, \$0.997 per share (as adjusted for any stock dividends, combinations, splits, recapitalizations and the like with respect to such shares) (the "Preference Value"), plus all declared but unpaid dividends, for each share of Series B Preferred Stock held by them. After the payment of the full applicable Preference Value of each share of the Series B Preferred Stock as set forth herein, the remaining assets of the Corporation legally available for distribution, if any, shall be distributed ratably to the holders of the Corporation's Common Stock.

CONVERSION AND ANTI-DILUTION.

(a) Each share of Series B Preferred Stock may be convertible, at any time by the respective holder, into the number of shares of the Corporation's common stock, par value \$0.00001 per share (the "Common Stock"), equal to the price of the Series B Preferred Stock as stated in 2.6 of this Certificate of Designations, divided by one hundred times the par value of the Common Stock, subject to adjustment as may be determined by the Board of Directors from time to time (the "Conversion Rate"). For example, assuming a \$2 price per share of Series B Preferred Stock, and a par value of \$0.00001 per share for Common Stock, each share of Series B Preferred Stock would be convertible into 2,000 shares of Common Stock. Such conversion shall be deemed to be effective on the business day (the "Conversion Date") following the receipt by the Corporation of written notice from the holder of the Series B Preferred Stock of the holder's intention to convert the shares of Series B Stock, together with the holder's stock certificate or certificates evidencing the Series B Preferred Stock to be converted.

(b) Promptly after the Conversion Date, the Corporation shall issue and deliver to such holder a certificate or certificates for the number of full shares of Common Stock issuable to the holder pursuant to the holder's conversion of Series B Preferred Shares in accordance with the provisions of this Section. The stock certificate(s) evidencing the Common Stock

shall be issued with a restrictive legend indicating that it was issued in a transaction exempt from registration under the Securities Act of 1933, as amended (the "Securities Act"), and that it cannot be transferred unless it is so registered, or an exemption from registration is available, in the opinion of counsel to the Corporation. The Common Stock shall be issued in the same name as the person who is the holder of the Series B Preferred Stock unless, in the opinion of counsel to the Corporation, such transfer can be made in compliance with applicable securities laws. The person in whose name the certificate(s) of Common Stock are so registered shall be treated as a holder of shares of Common Stock of the Corporation on the date the Common Stock certificate(s) are so issued.

All shares of Common Stock delivered upon conversion of the Series B Preferred Shares as provided herein shall be duly and validly issued and fully paid and nonassessable. Effective as of the Conversion Date, such converted Series B Preferred Shares shall no longer be deemed to be outstanding and all rights of the holder with respect to such shares shall immediately terminate except the right to receive the shares of Common Stock issuable upon such conversion.

(c) The Corporation covenants that, within 30 days of receipt of a conversion notice from any holder of shares of Series B Preferred Stock wherein which such conversion would create more shares of Common Stock than are authorized, the Corporation will increase the authorized number of shares of Common Stock sufficient to satisfy such holder of shares of Series B submitting such conversion notice.

(d) Shares of Series B Preferred Stock are anti-dilutive to reverse splits, and therefore in the case of a reverse split, are convertible to the number of Common Shares after the reverse split as would have been equal to the ratio established in Section 2.4(a) prior to the reverse split. The conversion rate of shares of Series B Preferred Stock, however, would increase proportionately in the case of forward splits, and may not be diluted by a reverse split following a forward split.

VOTING RIGHTS. Each share of Series B Preferred Stock shall have ten votes for any election or other vote placed before the shareholders of the Company.

SERIES C PREFERRED STOCK DESCRIPTION

DIVIDENDS. The holders of Series C Preferred Stock shall be entitled to receive dividends when, as and if declared by the Board of Directors, in its sole discretion.

LIQUIDATION RIGHTS. Upon any liquidation, dissolution or winding up of the Corporation, whether voluntary or involuntary, before any distribution or payment shall be made to the holders of any stock ranking junior to the Series C Preferred Stock, the holders of the Series C Preferred Stock shall be entitled to be paid out of the assets of the Corporation an amount equal to \$1.00 per share or, in the event of an aggregate subscription by a single subscriber for Series C Preferred Stock in excess of \$100,000, \$0.997 per share (as adjusted for any stock dividends, combinations, splits,

recapitalizations and the like with respect to such shares) (the "Preference Value"), plus all declared but unpaid dividends, for each share of Series C Preferred Stock held by them. After the payment of the full applicable Preference Value of each share of the Series C Preferred Stock as set forth herein, the remaining assets of the Corporation legally available for distribution, if any, shall be distributed ratably to the holders of the Corporation's Common Stock.

CONVERSION AND ANTI-DILUTION.

(a) Each share of Series C Preferred Stock may be convertible, with the approval and at the discretion of the Board of Directors, into 500 shares of Common Stock. Such conversion shall be deemed to be effective on the business day (the "Conversion Date") following the receipt by the Corporation of written notice from the holder of the Series C Preferred Stock of the holder's intention to convert the shares of Series C Stock, together with the holder's stock certificate or certificates evidencing the Series C Preferred Stock to be converted.

(b) Promptly after the Conversion Date, the Corporation shall issue and deliver to such holder a certificate or certificates for the number of full shares of Common Stock issuable to the holder pursuant to the holder's conversion of Series C Preferred Shares in accordance with the provisions of this Section. The stock certificate(s) evidencing the Common Stock shall be issued with a restrictive legend indicating that it was issued in a transaction exempt from registration under the Securities Act of 1933, as amended (the "Securities Act"), and that it cannot be transferred unless it is so registered, or an exemption from registration is available, in the opinion of counsel to the Corporation. The Common Stock shall be issued in the same name as the person who is the holder of the Series C Preferred Stock unless, in the opinion of counsel to the Corporation, such transfer can be made in compliance with applicable securities laws. The person in whose name the certificate(s) of Common Stock are so registered shall be treated as a holder of shares of Common Stock of the Corporation on the date the Common Stock certificate(s) are so issued.

All shares of Common Stock delivered upon conversion of the Series C Preferred Shares as provided herein shall be duly and validly issued and fully paid and nonassessable. Effective as of the Conversion Date, such converted Series C Preferred Shares shall no longer be deemed to be outstanding and all rights of the holder with respect to such shares shall immediately terminate except the right to receive the shares of Common Stock issuable upon such conversion.

(c) The Corporation covenants that, within 30 days of receipt of a conversion notice from any holder of shares of Series C Preferred Stock wherein which such conversion would create more shares of Common Stock than are authorized, the Corporation will increase the authorized number of shares of Common Stock sufficient to satisfy such holder of shares of Series C submitting such conversion notice.

(d) Shares of Series C Preferred Stock are anti-dilutive to reverse splits, and therefore in the case of a reverse split, are convertible to the number of Common Shares after the

reverse split as would have been equal to the ratio established in Section 2.4(a) prior to the reverse split. The conversion rate of shares of Series C Preferred Stock, however, would increase proportionately in the case of forward splits, and may not be diluted by a reverse split following a forward split.

SMART MOBILE PHONE APPS:

- We hold three developer accounts that provides mobile applications currently distributed through the Apple iTunes App Store and the Google Android Market
- Smart Phone applications (apps) have achieved international market penetration unlike any technology before it due to the popularity of Apple's iPhone and the general public's insatiable appetite for data and information
- Mobile Apps are comprised of small pieces of software code designed to run on a particular mobile platform (iOS, Android, BlackBerry etc.) and perform a simple task, most of which are of short duration
- Apple has revolutionized software distribution by allowing third party developers to create independent applications and then providing them with a worldwide distribution network and payment processing system (iTunes App Store, available in over 80 countries) - Apple's success and the rapid acceptance and adoption of iPhone apps has caused several major companies (Google, Microsoft, Blackberry etc.) to enter the app market and create competing platforms and apps stores

Plan of Operation

- The mobile applications industry is in a state of rapid and explosive international growth fed by the increasingly larger number of smart phone mobile devices sold every day. With the addition of Verizon and Sprint as an iPhone provider

in the US, the user base and the resulting demand for apps continues to grow. Action App is also well positioned in overseas markets with most our foreign website traffic coming from Japan, the leading country in mobile subscription density per capita.

Our banner ads should rotate every 30 seconds with a new banner or ad. Our apps send out a request and if our ad requests are not getting filled, we modify the selection of our ad providers so that we are getting as close to 100% as possible. In addition to fill rates, we also watch which network is paying the most revenue for our ad space, so we are constantly watching the conversion rates to once again maximize the revenue. Again, this is something that changes sometimes daily.

Company Acquisitions

We continue to search for additional opportunities for expansion through acquisition of other companies and have reviewed several recently. When we find suitable candidates, we will make appropriate announcements.

Human Resource Expansion

Due to the current job market and economic situation, there is a large pool of talent seeking employment. Action App can take advantage of this to add in house graphic designers and programmers to lower the cost of app productions and to increase the speed of growth

Geographic Expansion

- Our apps are available in every country apple has opened an app store, these are currently more than 80 countries
- The apps will be available in more counties as Apple continues to expand the iTunes App store into additional countries as well. We will also see a rapid increase of subscribers and additional income from the introduction of all our apps to the Android Market - We have also translated many of their apps in many of the major languages to increase the appeal of the apps to the non-English speaking natives of these countries which will increase sales and ad revenue. App localization will be a focus going forward as part of our global expansion business model.

Marketing, Advertising, and Competitive Factors

We have developed a proprietary cross application / cross company marketing platform which allows the companies to advertise new apps to its existing user base. Newly created apps are integrated into this network and acquired apps can be integrated with mostly minor modifications

- We will continue to update their applications on a regular basis, reengage existing users and provide additional value for existing and future users. - Some of our apps are ranked in the entertainment, and photography categories and enjoy increased visibility through "browse traffic"
- We also very carefully select app titles, keywords, descriptions etc., to optimize and benefit from the inherent search traffic on the app store - Action App Corporation

also enjoy word of mouth / viral advertising as their apps are intuitive, entertaining, and created with the user in mind. To this end we are also integrating the major social networks in all our apps to help increase the viral marketing affect

Personnel Upgrades

- As industry demand and growth continues, we will evaluate and add experienced team members as needed.

As of July 31, 2014, the decision to divest Campaign Matrix has been made. The decision to divest this asset was based on significant changes that were made within the internet market and World Wide Web that deemed this asset obsolete due to changes in programming. The cost associated with bringing this platform up to current programming standards would have been far too expensive and as the platform had not been maintained, this will be offered for sale through a business broker as a non-operational asset. The asset will be sold to the highest offer.

Note A – Nature of Business and Summary of Significant Accounting Policies

On July 5, 2011 Title Consulting Services, Inc. a Delaware Corporation, redomiciled to Nevada from Delaware and changed its name to Andiamo Corporation (the “Company”). The Company is a holding company for several corporations. The Company owns a software application company. Subsequently on October 12, 2015 the Company redomiciled to Wyoming.

Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting. Revenues are recognized at the time when the services are provided and earned and expenses are recorded when incurred.

Cash and Cash Equivalents

For purposes of the statement of cash flows, the Company considers all unrestricted highly liquid investments with an initial maturity of three months or less to be cash equivalents.

Income Taxes

The Company files as a regular C corporation for federal tax purposes.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Advertising

The Company expenses all advertising and marketing costs as incurred. Advertising and marketing costs for the years then ended July 31, 2016 and 2017 were \$182 and \$1,445, respectively.

Fair Value of Financial Instruments

The Company believes that the carrying value of its current assets and current liabilities approximate the fair value of such items due to their short-term nature. The carrying amounts of cash, accounts receivable, accounts payable and other liabilities are carried at amounts that reasonably approximate their fair values.

Property and Equipment

Property and equipment are stated at cost. The Company provides for amortization on the straight-line method and depreciation on the straight-line and MACRS methods over the estimated useful lives of the related assets. Major classes of property and equipment and their related lives are as follows:

Software - 3 to 15 years

Maintenance and repairs are expensed as incurred. Replacements and betterments are capitalized.

Asset Impairment

When the Company has long-lived assets, which have a possible impairment indicator, the Company estimates the future cash flows from the operation of these assets. Because events and circumstances frequently do not occur as expected, there will usually be differences between the estimated and actual future cash flow and these differences may be material. If the estimated cash flows recoup the recorded value of the assets, they remain on the books at that value. If the net recorded value cannot be recovered, the assets are written down to their market value if lower than the recorded value.
