EPAZZ, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Note 1 – Nature of Business and Summary of Significant Accounting Policies

Nature of Business and Organization

Epazz, Inc. ("Epazz" or the "Company"), a corporation, was formed on March 23, 2000 to create software to help college students organize their college information and resources.

Today, Epazz Inc. is an enterprise-wide cloud software company that specializes in providing customized web applications to the corporate world, higher education institutions and the public sector. Epazz unique applications can create virtual communities for enhanced communication, provide information and content for decision-making, and create a secure marketplace for any type of commerce all through the medium of the Internet. Epazz is the answer to the increasing information technology demand of the 21st century.

Basis of Accounting

Our consolidated financial statements are prepared using the accrual method of accounting as generally accepted in the United States of America (U.S. GAAP).

The Company's headquarters are located in Wheeling, Illinois and substantially all of its customers are within the United States.

These statements reflect all adjustments, consisting of normal recurring adjustments, which in the opinion of management are necessary for fair presentation of the information contained therein.

Segment Reporting

FASB ASC 280-10-50 requires annual and interim reporting for an enterprise's operating segments and related disclosures about its products, services, geographic areas and major customers. An operating segment is defined as a component of an enterprise that engages in business activities from which it may earn revenues and expenses, and about which separate financial information is regularly evaluated by the chief operating decision maker in deciding how to allocate resources. All of the Company's software products are considered operating segments, and will be aggregated into one reportable segment given the similarities in economic characteristics among the operations represented by the common nature of the products, customers and methods of distribution.

Reclassifications

Certain amounts in the financial statements of the prior year have been reclassified to conform to the presentation of the current year for comparative purposes.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Fair Value of Financial Instruments

Under FASB ASC 820-10-05, the Financial Accounting Standards Board establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. This Statement reaffirms that fair value is the relevant measurement attribute. The adoption of this standard did not have a material effect on the Company's financial statements as reflected herein. The carrying amounts of cash, accounts payable and accrued expenses reported on the balance sheets are estimated by management to approximate fair value primarily due to the short term nature of the instruments. The Company had debt instruments that required fair value measurement on a recurring basis.

Beneficial Conversion Features

From time to time, the Company may issue convertible notes that may contain an imbedded beneficial conversion feature. A beneficial conversion feature exists on the date a convertible note is issued when the fair value of the underlying common stock to which the note is convertible into is in excess of the remaining unallocated proceeds of the note after first considering the allocation of a portion of the note proceeds to the fair value of warrants, if related warrants have been granted. The intrinsic value of the beneficial conversion feature is recorded as a debt discount with a corresponding amount to additional paid in capital. The debt discount is amortized to interest expense over the life of the note using the effective interest method.

Derivative Liability

The Company evaluates its convertible instruments, options, warrants or other contracts to determine if those contracts or embedded components of those contracts qualify as derivatives to be separately accounted for under ASC Topic 815, "Derivatives and Hedging." The result of this accounting treatment is that the fair value of the derivative is marked-to-market each balance sheet date and recorded as a liability. In the event that the fair value is recorded as a liability, the change in fair value is recorded in the statement of operations as other income (expense). Upon

conversion or exercise of a derivative instrument, the instrument is marked to fair value at the conversion date and then that fair value is reclassified to equity. Equity instruments that are initially classified as equity that become subject to reclassification under ASC Topic 815 are reclassified to liabilities at the fair value of the instrument on the reclassification date. We analyzed the derivative financial instruments (the Convertible Note and tainted Warrant), in accordance with ASC 815. The objective is to provide guidance for determining whether an equity-linked financial instrument is indexed to an entity's own stock. This determination is needed for a scope exception which would enable a derivative instrument to be accounted for under the accrual method. The classification of a non-derivative instrument that falls within the scope of ASC 815-40-05 "Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock." also hinges on whether the instrument is indexed to an entity's own stock. A non-derivative instrument that is not indexed to an entity's own stock. First, the instrument's contingent exercise provisions, if any, must be evaluated, followed by an evaluation of the instrument's settlement provisions. The Company utilized multinomial lattice models that value the derivative liability within the notes based on a probability weighted discounted cash flow model. The Company utilized the fair value standard set forth by the Financial Accounting Standards Board, defined as the amount at which the assets (or liability) could be bought (or incurred) or sold (or settled) in a current transaction between willing parties, that is, other than in a forced or liquidation sale.

Basic and Diluted Net Earnings per Share

Basic net earnings (loss) per common share is computed by dividing net earnings (loss) applicable to common shareholders by the weighted-average number of common shares outstanding during the period. Diluted net earnings (loss) per common share is determined using the weighted-average number of common shares outstanding during the period, adjusted for the dilutive effect of common stock equivalents, consisting of shares that might be issued upon exercise of common stock options. In periods where losses are reported, the weighted-average number of common shares outstanding excludes common stock equivalents, because their inclusion would be anti-dilutive. There were no outstanding potential common stock equivalents for the periods presented. As such, basic and diluted earnings per share resulted in the same figure for the periods ended September 30, 2017 and 2016.

Stock-Based Compensation

Under FASB ASC 718-10-30-2, all share-based payments to employees, including grants of employee stock options, are to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative. The Company did not issue stock for services and compensation during the periods ended September 30, 2017 and 2016.

Revenue Recognition

The Company designs and sells various software programs to business enterprises including, among others, hospitals, pet stores, and Government and post-secondary institutions. Prior to shipment, each software product is tested extensively to meet Company specifications. The software is shipped fully functional via electronic delivery, but some installation and setup is required. No other entities sell the same or largely interchangeable software.

Installation is a standard process, outlined in the owner's manual, consisting principally of setup, calibrating, and testing the software. A purchaser of the software could complete the process using the information in the owner's manual, although it would probably take significantly longer than it would take the Company's technicians to perform the tasks. Although other vendors do not install the Company's software, they do provide largely interchangeable installation services for a fee. Historically, the Company has never sold the software without installation. Most installations are performed by the Company within 7 to 24 days of shipment and are included in the overall sales price of the software. In addition, the customer must pay for support contracts and training packages, depending on their desired level of service. The Company is the only manufacturer of the software and it only sells software on a standalone basis directly to the end user.

The sales price of the arrangement consists of the software, installation, and training and support services, which the customer is obligated to pay in full upon delivery of the software. In addition, there are no general rights of return involved in these arrangements. Therefore, the software is accounted for as a separate unit of accounting.

The Company does not have vendor-specific objective evidence of selling price for the software because it does not sell the software separately (without installation services and support contracts). In addition, third-party evidence of selling price does not exist as no vendor separately sells the same or largely interchangeable software. Therefore, the Company uses its best estimate of selling price when allocating such arrangement consideration.

In estimating its selling price for the software, the Company considers the cost to produce the software, profit margin for similar arrangements, customer demand, effect of competitors on the Company's software, and other market constraints. When applying the relative selling price method, the Company uses its best estimate of selling price for the software, and third-party evidence of selling price for the installation. Accordingly, without considering whether any portion of the amount allocable to the software is contingent upon delivery of the other items, the Company allocates the selling price to the software, support, and installation.

The Company doesn't currently provide product warranties, but if it does in the future it will provide for specific product lines and accrue for estimated future warranty costs in the period in which the revenue is recognized.

Recent Accounting Pronouncements

The Company continually assesses any new accounting pronouncements to determine their applicability to the Company. Where it is determined that a new accounting pronouncement affects the Company's financial reporting, the Company undertakes a study to determine the consequence of the change to its financial statements and assures that there are proper controls in place to ascertain that the Company's financials properly

reflect the change. The Company currently does not have any recent accounting pronouncements that they are studying and feel may be applicable.

Note 2 – Going Concern

As shown in the accompanying condensed consolidated financial statements, the Company has incurred recurring losses from operations resulting in an accumulated deficit of \$17,254,404 as of September 30, 2017. The Company's current liabilities exceeded its current assets by \$4,099,166 and its total liabilities exceeded its total assets by \$4,917,270. These factors raise substantial doubt about the Company's ability to continue as a going concern.

The financial statements do not include any adjustments that might result from the outcome of any uncertainty as to the Company's ability to continue as a going concern. These financial statements also do not include any adjustments relating to the recoverability and classification of recorded asset amounts, or amounts and classifications of liabilities that might be necessary should the Company be unable to continue as a going concern.

Note 3 – Related Parties

Debt Financing

From time to time we have received and repaid loans from our CEO and his immediate family members to fund operations. These related party debts are fully disclosed in Note 9 below.

Shares of Convertible Series C Preferred Stock

On June 2, 2016, the Company issued 30,000,000 shares of Class A Stock pursuant to the exchange agreement with our CEO in exchange for 10,000,000 shares of Preferred C Stock. As the stock was converted within the terms of the agreement, no gain or loss was recognized as a result of the exchange.

On June 2, 2016, the Company issued 2,550,000 shares of Class A Stock pursuant to the exchange agreement with Star Financial in exchange for 850,000 shares of Preferred C Stock. As the stock was converted within the terms of the agreement, no gain or loss was recognized as a result of the exchange.

On June 3, 2016, the Company issued 3,300,000 shares of Class A Stock pursuant to the exchange agreement with GG Mars in exchange for 1,100,000 shares of Preferred C Stock. As the stock was converted within the terms of the agreement, no gain or loss was recognized as a result of the exchange.

Debt Conversions into Class A Common Stock - Related Parties

On January 29, 2016, the Company issued 40,000 shares of Class A Common Stock pursuant to the conversion of \$5,000 of convertible debt held by GG Mars, a company owned by our CEO's family member, a related party, which consisted of \$5,000 of principal. The note was converted in accordance with the conversion terms; therefore no gain or loss has been recognized.

Employment Agreement

On September 6, 2012, we entered into an employment agreement with Shaun Passley, Ph.D., our Chief Executive Officer, President, and Chairman of the Board of Directors which had a term of ten (10) years. Compensation pursuant to the agreement calls for a base salary of \$180,000 per year; of which \$30,000 shall be payable annually in cash and \$150,000 shall be payable in shares of the Company's Common Stock at the rate of \$0.006 per share, or 2,500 shares per year. In addition, the Company issued 800,000 shares of Class A Common Stock to the Company's CEO as a bonus in consideration for various services performed, and to be performed over a ten year period beginning on September 6, 2012, provided that all of the shares remain subject to forfeiture until such time, if ever, as we generate annual revenues of at least \$10 million, subject to the below termination provisions. The total fair value of the common stock was \$6,000,000 based on the closing price of the Company's common stock on the date of grant, which has been presented as a deduction against additional paid in capital in the equity section of the balance sheet until the terms of the vesting periods are satisfied. The vesting restrictions were subsequently lifted on March 22, 2014 pursuant to the exchange of these shares for Convertible Series C Preferred shares. In the event of the termination of Dr. Passley's employment agreement for cause by the Company or without good reason by Dr. Passley, any non-vested shares are to be canceled and he is to be paid any consideration he is owed through the date of termination. In the event of the termination of Dr. Passley's employment agreement for good reason (as described in the agreement) by Dr. Passley or without cause by the Company, he is due eight additional weeks of compensation and all non-vested shares vest to him immediately. In the event of the termination of Dr. Passley's employment agreement for any other reason, he is due eight weeks of additional salary and any non-vested shares are to be canceled

We do not have an employment or consultant agreement with Craig Passley, our Secretary, however on March 20, 2013, we granted 4.80 shares to Craig Passley for services rendered between 2012 and 2021. The shares vest annually over the 10 year period with the first 0.48 vesting upon the grant date. The vesting restrictions were subsequently lifted on March 22, 2014 pursuant to the exchange of these shares for Convertible Series C Preferred shares.

Amendments to Employment Agreement

On August 16, 2013, the Company amended Shaun Passley, Ph.D.'s employment agreement to increase the cash portion of his compensation from \$30,000 per year to \$100,000 in the initial year of the agreement only. All other terms remain in effect, and the shares of stock awarded as a bonus as previously disclosed were granted in addition to the stock based compensation outlined in the original agreement.

Note 4 – Fair Value of Financial Instruments

Under FASB ASC 820-10-5, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). The standard outlines a valuation framework and creates a fair value hierarchy in order to increase the consistency and comparability of fair value measurements and the related disclosures. Under GAAP, certain assets and liabilities must be measured at fair value, and FASB ASC 820-10-50 details the disclosures that are required for items measured at fair value.

The Company does not have any financial instruments that must be measured under the new fair value standard. The Company's financial assets and liabilities are measured using inputs from the three levels of the fair value hierarchy. The three levels are as follows:

Level 1 - Inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2 - Inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates, yield curves, etc.), and inputs that are derived principally from or corroborated by observable market data by correlation or other means (market corroborated inputs).

Level 3 - Unobservable inputs that reflect our assumptions about the assumptions that market participants would use in pricing the asset or liability.

The following schedule summarizes the valuation of financial instruments at fair value on a non-recurring basis in the balance sheets as of September 30, 2017 and December 31, 2016:

	Fair Value Measurements at September 30, 2017
	Level 1 Level 2 Level 3
Assets	
Cash	\$ 34,779 \$ - \$ -
Total assets	34,779 – –
Liabilities	
Lines of credit	- 95,181 -
Notes payable, related parties	- 1,446,446 -
Promissory notes	- 2,657,367 -
Total Liabilities	- 4,198,994 -
	\$ 34,779 \$ (4,198,994) \$ -

	 Fair Value Measurements at December 31, 2016					
	Level 1		Level 2	Level 3		
Assets						
Cash	\$ 32,145	\$	- 5	\$	_	
Total assets	32,145		_		_	
Liabilities						
Lines of credit	_		85,700		_	
Notes payable, related parties	_		1,446,446		_	
Promissory notes	_		2,576,498		_	
Total Liabilities			4,108,644		_	
	\$ 32,145	\$	(4,108,644)	\$	_	

There were no transfers of financial assets or liabilities between Level 1 and Level 2 inputs for the periods ended September 30, 2017 and 2016.

Note 6 – Other Current Assets

As of September 30, 2017 and December 31, 2016 other current assets included the following:

	Sep	2017 ptember 30,	De	ecember 31, 2016
Deferred financing costs	\$	3,278	\$	3,874
Security deposits		9,878		9,878
	\$	13,156	\$	13,752

The Company recognized \$596 and \$616,564 of amortization expense related to the deferred financing costs during the periods ended September 30, 2017 and 2016, respectively.

Note 6 – Property and Equipment

Property and Equipment consists of the following at September 30, 2017 and December 31, 2016, respectively:

	September 30, 2017	December 31, 2016
Furniture and fixtures	\$ 22,006	\$ 22,006
Computers and equipment	197,462	197,462
Software	15,660	15,660
Assets held under capital leases	17,855	17,855
	 252,983	252,983
Less: accumulated depreciation	 (239,025)	(228,686)
	\$ 13,958	\$ 24,297

Depreciation expense totaled \$10,339 and \$25,676 for the periods ended September 30, 2017 and 2016, respectively.

Note 7 – Accrued Expenses

As of September 30, 2017 and December 31, 2016 accrued expenses included the following:

	Sep	tember 30, 2017	December 31, 2016	
Accrued interest	\$	2,395	\$	22,530
Accrued interest, related parties		613,746		463,665
Accrued payroll and payroll taxes		13,400		18,600
	\$	629,541	\$	504,795

Note 8 – Line of Credit

Lines of credit consisted of the following at September 30, 2017 and December 31, 2016, respectively:

	September 30, 2017	December 31, 2016
Total line of credit	95,181	85,700
Less: current portion	(95,181)	(85,700)
Line of credit, less current portion	<u>\$ </u>	\$

Note 9 – Notes Payable, Related Parties

Notes payable, related parties consist of the following at September 30, 2017 and December 31, 2016, respectively:

	September 30, 2017]	December 31, 2016
Originated October 9, 2012, unsecured promissory note payable owed to a Company owned by an immediate family member of the Company's CEO carries a 15% interest rate,			
matures on July 15, 2013. In addition, a loan origination fee, consisting of 144,928 shares			
of Series A Common Stock with a fair market value of \$884 was issued as consideration for the loan on October 9, 2012. Currently in default.	\$ 2,868	\$\$	2,868

Originated August 2, 2013. unsecured promissory note payable owel to Star Financial Corporation, Inc., a corporation owned by an immediate family member of the Company's CEO. The note carries a 15% interest rate, matures on January 17, 2014. On January 29, 2015, we entered into a Securities Purchase Agreement with KBM Worldwide, Inc., pursuant to which we sold to KBM an 8% Convertible Promissory Note in the original principal amount of \$43,000. The One KBM Note had a maturity date of November 2, 2015, and was convertible into our common stock at the greater of (i) the Variable Conversion Price and (ii) the Fixed Conversion Price. The "Variable Conversion Price" shall mean 50% multiplied by the Market Price (representing a discount rate of 50%). "Market Price" means the average of the lowest three (3) Trading Prices for the Common Stock during the thirty (30) Trading Day period ending on the latest complete Trading Day prior to the Conversion Date. "Fixed Conversion Price" shall mean \$0.00005 per share. The shares of common stock issuable upon conversion of the One KBM Note were restricted securities as defined in Rule 144 promulgated under the Securities Act of 1933. The issuance of the One KBM Note was exempt from the registration requirements of the Securities Act of 1933 pursuant to Rule 506 of Regulation D promulgated thereunder. The purchaser was an accredited and sophisticated investor, familiar with our operations, and there was no solicitation. This note was purchased by GG Mars, Inc. The	21,355	21,355

convertible debts. Driginated March 2, 2015, an unsecured \$5,000 convertible promissory note, carries a 15% interest rate, matures on May 20, 2015. The Company recorded interest expense on notes payable to related parties in the amounts of \$154,104 and \$131,366 during the period ended September 30, 2017 and 2016, respectively. The Company recorded accrued interest associated with related parties of \$613,746 and \$463,665 as of September 30, 2017 and December 31, 2016, respectively.

Note 10 – Promissory Notes

Promissory notes consist of the following at September 30, 2017 and December 31, 2016, respectively:

	Sep	September 30,		December 31,	
		2017		2016	
Total promissory notes		2,657,367		2,576,498	
Less: current portion		(1,825,305)		(1,684,849)	
Promissory notes, less current portion	\$	832,062	\$	891,649	

The Company recorded interest expense on promissory notes of \$21,549 and \$698,848 for the period ended September 30, 2017 and 2016, respectively. The Company recorded accrued interest of \$2,395 and \$22,530 as of September 30, 2017 and December 31, 2016, respectively.

The Company is currently in a legal dispute with certain short-term debt lenders regarding alleged usury. In addition, the Company has cease paying other unsecured loans and is currently in negotiation for settlement. The Company believes the outcome of the litigation and the actions taken to negotiate better lending terms will not have an adverse material effect on the financial condition of the Company

Note 11 – Stockholders' Equity

Reverse Stock Splits

In June 2016, Epazz, Inc.'s (the "Company's") majority stockholder and sole director (Shaun Passley) approved a 1:2,500 reverse stock split of the Company's Class A common stock Effective June 2, 2016, the Company affected the 1:2,500 reverse stock split of its Class A common stock. The Company's Class B common stock and preferred stock were not affected by the reverse stock split. The Company's new symbol following

the reverse split will be EPAZD. The D will be removed in 20 business days. The Company's new CUSIP number is 29413V 606. In order for the Company to be in compliance with the minimum bid price requirement of \$0.01 per share for listing on OTCQB OTC markets. The Company may need to make a reverse stock split, if the share price falls below \$0.01 or if the Company needs to qualify for a national stock exchange.

Convertible Preferred Stock, Series A

The Company has one thousand (1,000) authorized shares of \$0.0001 par value Series A Convertible Preferred Stock ("Series A Preferred Stock"). The Series A Preferred Stock accrues dividends equal to 1.5% of the Company's revenues per quarter, beginning on January 1st of any calendar year in which the Company has generated revenue over \$2 million, and an additional 24% of the Company's net income beginning on January 1st of any calendar year in which the Company has generated net income over \$2 million. The dividends are payable at the discretion of the Company, provided that any unpaid dividends accrue until paid. The Series A Preferred Stock includes a liquidation preference equal to \$0.01 per share, plus any accrued and unpaid dividends.
