

TORON, INC (OTC: TRON) PROVIDES CORPORATE UPDATE REGARDING PENDING MERGER WITH IMEDSCAN CORPORATION

Toron Inc. to Merge With Disruptive Healthcare Technology Company

MIAMI BEACH, FLORIDA – August 17, 2016 - Toron, Inc (OTC Pink: TRON) provided its stockholders today with a corporate update regarding the pending merger with private company, iMedScan Corporation. Pursuant to the definitive Agreement and Plan of Merger entered into on March 30, 2016 iMedScan will become public through an alternative public offering or “APO” transaction with Toron. On March 21, 2016, in anticipation of the closing of the merger transaction during the third quarter of 2016, Fabrizio Bosticco, the Chief Executive Officer of iMedscan, was also named Chief Executive Officer, President and Director of Toron.

iMedican is a healthcare project development and management company holding a proprietary technology that provides for the instant verification of a patient’s medical insurance. “iMedcan’s proprietary technology will generate a twenty-five (25%) reduction in patient insurance rejections or denials from insurance payors,” Bostico said. He continued, “changes in the healthcare industry have considerably lowered profit margins and increase the costs of healthcare to consumers; we believe our technology will create significant cost reductions that will benefit both insurers and insureds.”

In March, 2016, iMedScan entered into an agreement with Acuant Corporation of Los Angeles, California to employ its proprietary, hosted scanning solution on patient’s driver’s licenses and insurance cards. Most recently, in June, 2016, iMedScan finalized a test program with Change America, formerly Emdeon Corporation, utilizing an electronic data interchange for verifying and validating patients’ health insurance. “We estimate a fifty (50%) percent net profit recapture from each medical office that adopts our technology,” Bostico noted. Currently, in addition to traditional medical offices, iMedScan is focusing on the further development and commercialization of kiosk devices hosting the company’s scanning solution.

About Toron, Inc. & iMedScan Corporation

On March 30, 2016, Toron, Inc. entered into an definitive Agreement and Plan of Merger with iMedScan corporation, pursuant to which, upon closing, iMedScan will become a wholly-owned subsidiary of Toron.

iMedscan Corporation is an innovative disruptive healthcare technology company focused on integrating access to electronic data interfaces (“EDI”) for healthcare providers and payor systems in a user friendly manner. iMedScan’s technology provides ease of use for patients by simplifying their check-in registration process, while at the same time reducing the healthcare providers’ administrative expenses and lost revenues by eliminating insurance rejections, denials or any incorrect results arising from erroneous or incomplete patient information verification. iMedScan’s proprietary

iMedScan Connect and iMedScan EDI technologies will combine to create strong, recurring revenue for the company.

Statements in this press release that are not historical fact may be deemed forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Although Toron, Inc believes the expectations reflected in any forward-looking statements are based on reasonable assumptions, Toron is unable to give any assurance that its expectations will be attained. Factors that could cause actual results to differ materially from expectations include the company's ability meet the conditions necessary to, among other matters, obtain a public listing on a major national exchange.
