

Digital 7 continues to grows its business with expansion of Tinker AFB business

FOR IMMEDIATE RELEASE

Arvada, CO—May 4th, 2017—

Digital Info Security Co/Digital 7 Inc. (OTC: DGIF) through its wholly owned subsidiary Data Source Inc. is expanding its customer base and business with additional work at Tinker AFB (ALC/OC). Digital 7 is strategically positioned to solve one of the major issues facing Government and large business alike regarding their legacy data. Legacy data is degrading and disappearing at a rapid rate and once data is lost it is irretrievable. DGIF/Digital 7 with Data Source and its Virtual Tape Storage (VTS) solution is successfully solving this problem at Tinker Air Force base in Oklahoma with DGIF expanding its services and offering additional solutions.

Digital's successful deployment [at Tinker AFB] provides not only data preservation but also enhanced access and retrieval not previously available.

According to a recent GAO report, <http://www.gao.gov/assets/680/677436.pdf>, in 2015, the government planned to spend \$55 billion on IT operations and maintenance systems. The data for these systems and much of the obsolete hardware used to access this data is at risk. Digital 7's solutions address these growing problems in a cost efficient manner resulting in significant savings and increased reliability for its customers.

Digital 7 is currently working with over 20 government departments and agencies with plans to provide direct solutions. With the success at Robins AFB, Tinker AFB and other locations, Digital 7 believes it is positioned to capture a large portion of the legacy data needs for over 800 US military bases. As well Digital 7 is in talks with other companies and individuals that are currently servicing government or large company contracts to integrate Digital 7's solution into their offering.

ABOUT DIGITAL 7

Digital Info Security Co/Digital 7 Inc. (OTC: DGIF) with its acquisition of Data Source Inc (a fully owned subsidiary of DGIF) is a data management company that specializes in Legacy Data and the conversion and management of that Data for its preservation, protection and efficient accessibility.
