Special Note Regarding Forward-Looking Statements

Information included in this Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended ("Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended ("Exchange Act"). This information may involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Simlatus Corp. (the "Company"), to be materially different from future results, performance or achievements expressed or implied by any forward-looking statements. Forward-looking statements, which involve assumptions and describe future plans, strategies and expectations of the Company, are generally identifiable by use of the words "may," "will," "should," "expect," "anticipate," "estimate," "believe," "intend," or "project" or the negative of these words or other variations on these words or comparable terminology. These forward-looking statements are based on assumptions that may be incorrect, and there can be no assurance that these projections included in these forward-looking statements will come to pass. Actual results of the Company could differ materially from those expressed or implied by the forward-looking statements as a result of various factors. Except as required by applicable laws, the Company has no obligation to update publicly any forward-looking statements for any reason, even if new information becomes available or other events occur in the future.

Please note that throughout this Quarterly Report, and unless otherwise noted, the words "we," "SIML," "our," "us," the "Company," refers to Simlatus Corp.

(Unaudited)

1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Description of Business

Simlatus manufactures, in their facility and through various suppliers, its own product line of commercial audio and video systems that offer advanced applications used within the broadcast industry and other industries where such applications are required. The company products are sold through a global distribution network of established audio/video equipment retailers that have been selling the Simlatus products for the past 18 years.

Simlatus Corporation (the "Company") was incorporated in the State of Nevada under the name Sunberta Resources Inc. on November 15, 2006, as a mining and exploration of mineral claims business. On November 18, 2009, the Company changed its name to Grid Petroleum Corp. and continued with the mining and exploration of mineral claims operations, exploring mining claims in Alberta, Canada, Vancouver Island, British Columbia, England and the United States.

On January 20, 2011, the Company entered into a Share Exchange Agreement (the "Agreement") with a Nevada corporation, Joaquin Basin Resources Inc., ("Seller"), and its stockholders, ("Selling Shareholders"). Joaquin Basin Resources Inc. became the wholly owned subsidiary of Grid Petroleum. In 2012, Joaquin Basin ceased operations and its business license in the State of Nevada was revoked in 2012.

On March 9, 2016, the Company entered into an Asset Purchase Agreement (the "Asset Purchase Agreement") with RJM and Associates, LLC, a California limited liability company ("RJM"); thereby, acquiring Intellectual Property referred to as "Media IP" and inventory consisting of finished products and raw materials and supplies. RJM will assign the Media IP asset and inventories and provide "Know-How" that will enable the Company to launch a Broadcast Equipment and Digital Media Product Line, together valued at \$6,250,000. As consideration for the Media IP and the "Know -How", the Buyer shall issue, or cause to be issued, \$5,000,000 of Restricted Common Stock (PAR \$.00001) 90 days from the date of this agreement and \$1,250,000 of Preferred Series-A Shares of a GRPR Preferred Stock; (PAR \$.001). The value of restricted common shares will be the closing price of the stock as of 90 days from this agreement. The maturity date for the restricted common shares will be 60 months from the date of this agreement.

On March 25, 2016, the Company approved a name change to Simlatus Corporation, stock symbol SIML, which was executed on April 4, 2016. The new name change better describes the Company's new business and new revenues in selling commercial broadcast equipment on a global basis. Simlatus Corporation develops, manufactures, markets and owns proprietary advanced broadcast equipment and software and sells this audio and video broadcast equipment worldwide. These systems have been sold worldwide over the past 15 years including some of the major broadcast companies. On August 3, 2016, the Company modified the Asset Purchase Agreement; no Restricted Common Stock shares were issued pursuant to the Agreement, and on August 3, 2016, the Parties entered into an Amendment to the Agreement wherein only the terms of the Agreement relative to the issuance of the Restricted Common Stock were modified. The terms relative to the issuance of the Restricted Common Stock Shares were modified as follows:

As consideration for the Media IP and the "Know How" the Company will issue, or cause to be issued, \$5,000,000 of Restricted Common Stock, par value \$.00001, valued at the lowest closing market price with a 15 day look back. The Shares may be issued in increments of up to \$1,500,000 at the discretion of the Board of the Directors until the full amount of \$5,000,000 has been satisfied. Any amount of shares not issued in a \$1,500,000 increment may be rolled over and added to the next issuance, and at the discretion of the Board of Directors. The entire \$5,000,000 worth of Shares must be issued within 60 months of this Amendment, unless extended, in writing, by the Board of Directors.

The Company, respectively, sells approximately 55 different audio/video products, and is preparing to market its newest audio/video product referred to as SyncPal™. In addition to the Company's traditional line of audio/video products, it has commenced the research & development of its Immersive Broadcast System, referred to as the Simlatus-IBS™. The Simlatus-IBS™ will include commercial augmented reality and virtual reality applications for studio engineers. These applications, both hardware and software, will allow the customer to control and manage the studio audio/video systems from anywhere in the world. These products are being developed to serve a market segment that is presently being strongly embraced by consumers and is forecasted, by some of the most widely recognized tech companies in the world, as becoming a multi-billion dollar market in the very near future. The Market Analysis and IP Portfolio will include new patents specifically developed for these products and owned by the Company.

Basis of Presentation

The accompanying financial statements of the Company have been prepared without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and disclosures required by accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations. These financial statements reflect all adjustments that, in the opinion of management, are necessary to present fairly the results of operations of the Company for the period presented. The results of operations for the nine months ended December 31, 2016, are not necessarily indicative of the results that may be expected for any future period or the fiscal year ending March 31, 2017.

Cash and Cash Equivalents

Cash and cash equivalents are comprised of cash and highly liquid investments with original maturity dates of less than six months that may not be reported as investments. While the Company may maintain cash and cash equivalents in bank deposit accounts, which at times exceed Federal Deposit Insurance Corporation insured limits, they have not experienced any losses in such accounts.

Management believes it is not exposed to any significant credit risk on cash and cash equivalents.

Accounts Receivable and Uncollectible Receivables

Accounts Receivable are recorded at the invoiced amount to the customer and do not bear interest. The Company extends unsecured credit to its customers in the ordinary course of business, but mitigates associated risks by actively pursuing past due accounts. Receivables that are over 180 days past due are deemed uncollectible and are written off to the statement of operations.

(Unaudited)

Broadcast Equipment Products and Support Services

The company sells 55 various products related to the broadcast industry. These products are sold through a global distribution network of audio/video retailers. The company has an established B2B distribution platform so that the distributor can request a quote for all related product inquiries, and the distributor provides a purchase order to confirm the itemized sale. The company provides established and qualified distributors with a 30 Day 2% Net 10 Days payment option, and sometimes requires a deposit against the purchase order, and full payment is required prior to shipping/delivery of the product(s). The Company offers a 3-Year Limited Warranty, along with any technical support required for the customer.

Impairment of Long-Lived Assets

The Company periodically analyzes its long-lived assets for potential impairment, assessing the appropriateness of lives and recoverability of unamortized balances through measurement of undiscounted operating cash flows in accordance with ASC No. 144, *Property, Plant and Equipment*. If impairment is deemed to exist, it will be written down to its fair value. Fair value is generally determined using a discounted cash flow analysis. As of December 31, 2016, the Company does not believe any adjustment for impairment is required.

Use of Estimates

The preparation of the Company's consolidated financial statements in conformity with generally accepted accounting principles of United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Management makes its best estimate of the ultimate outcome for these items based on historical trends and other information available when the financial statements are prepared. Actual results could differ from those estimates.

Loss Per Share

Basic loss per share of common stock is computed by dividing the net loss by the weighted average number of common shares outstanding during the period after giving retroactive effect to the reverse stock split affected on July 22, 2016 (see Note 10). Diluted earnings (loss) per share is equal to the basic per share for the nine months ended December 31, 2016 and 2015. Common stock equivalents are not included in the loss per share since they are anti-dilutive. All per share amounts have been adjusted for the reverse stock split.

Inventories

Inventories are stated at the lower of cost, computed using the first-in, first-out method and net realizable value. Any adjustments to reduce the cost of inventories to their net realizable value are recognized in earnings in the current period. As of December 31, 2016, the Company's inventories consist primarily of raw materials and supplies rather than finished goods.

Long Lived Assets Including Goodwill and Other Acquired Intangible Assets

The Company amortizes its intangible assets with definite useful lives over their estimated useful lives and reviews these assets for impairment. The Company typically amortizes its acquired intangible assets with definite useful lives over periods from three to seven years.

Fair Value of Financial Instruments

The carrying value of cash, accounts receivable, inventory, accounts payable, and accrued liabilities at December 31, 2016 and March 31, 2016 reflected in these financial statements approximates their fair value due to the short-term maturity of these financial instruments.

Fair value is defined as the price that would be received upon sale of an asset or paid upon transfer of a liability in an orderly transaction between market participants at the measurement date and in the principal or most advantageous market for that asset or liability. The fair value should be calculated based on assumptions that market participants would use in pricing the asset or liability, not on assumptions specific to the entity. In addition, the fair value of liabilities should include consideration of non-performance risk including our own credit risk.

In addition to defining fair value, the standard expands the disclosure requirements around fair value and establishes a fair value hierarchy for valuation inputs is expanded. The hierarchy prioritizes the inputs into three levels based on the extent to which inputs used in measuring fair value are observable in the market. Each fair value measurement is reported in one of the three levels and which is determined by the lowest level input that is significant to the fair value measurement in its entirety.

These levels are:

Level 1 - inputs are based upon unadjusted quoted prices for identical instruments traded in active markets.

Level 2 – inputs are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3- inputs are generally unobservable and typically reflect management's estimates of assumptions that market participants would use in pricing the asset or liability. The fair values are therefore determined using model-based techniques that include option pricing models, discounted cash flow models, and similar techniques.

SIMLATUS CORP .
(FORMERLY KNOWN AS GRID PETROLEUM CORP.)
NOTES TO THE INTERIM FINANCIAL STATEMENTS
December 31, 2016
(Unaudited)

Financial assets and liabilities measured at fair value on a recurring basis:

	Fair Value Input Level	December 31, 2016 Amount	March 31, 2016 Amount
Derivative Liability	3	\$ 554,663	\$ 995,645
Total Financial Liabilities		\$ 554,663	\$ 995,645

In management’s opinion, the fair value of convertible notes payable and advances payable is approximate to carrying value as the interest rates and other features of these instruments approximate those obtainable for similar instruments in the current market. Unless otherwise noted, it is management’s opinion that the Company is not exposed to significant interest, exchange or credit risks arising from these financial instruments.

Income Taxes

The Company records deferred taxes in accordance with FASB ASC No. 740, *Income Taxes*. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and loss carry-forwards and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rules on deferred tax assets and liabilities is recognized in operations in the year of change. A valuation allowance is recorded when it is “more likely-than-not” that a deferred tax asset will not be realized.

Comprehensive Income

The Company has adopted ASC No. 220, *Comprehensive Income*. Comprehensive income includes net income and all changes in equity during a period that arises from non-owner sources, such as foreign currency items and unrealized gains and losses on certain investments in equity securities.

Recent Accounting Pronouncements

The Company has reviewed recently issued accounting pronouncements and noted no new pronouncements that would have a material impact on its results of operations or financial position.

Reclassification

Certain prior year amounts have been reclassified to conform to the current year presentation.

2. GOING CONCERN

These financial statements have been prepared on a going-concern basis which assumes the Company will be able to realize assets and discharge liabilities in the normal course of business for the foreseeable future.

The Company has experienced substantial losses since its inception and has limited business operations, which raises substantial doubt about the Company’s ability to continue as going concern. The ability of the Company to meet its commitments as they become payable is dependent on the ability of the Company to obtain necessary financing or achieving a profitable level of operations. There is no assurance the Company will be successful in achieving these goals.

The Company does not have sufficient cash to fund its desired research and development objectives for its augmented/virtual reality product development for the next 12 months. The Company has arranged financing as described in Subsequent Events and intends utilize the cash received to fund the research and development project. This financing may be insufficient to fund expenditures or other cash requirements required to complete the product design for the augmented/virtual reality markets. There can be no assurance the Company will be successful in completing any new product development. The Company plans to seek additional financing if necessary in private or public equity offering(s) to secure future funding for operations. There can be no assurance the Company will be successful in raising additional funding. If the Company is not able to secure additional funding, the implementation of the Company’s business plan will be impaired. There can be no assurance that such additional financing will be available to the Company on acceptable terms or at all.

These financial statements do not give effect to adjustments to the amounts and classification to assets and liabilities that would be necessary should the Company be unable to continue as a going concern.

3. OIL AND GAS PROPERTIES

On January 20, 2011, the Company purchased, through its former subsidiary Joaquin Basin Resources Inc., a 50% working interest (37% net revenue interest) in a mineral lease on 4,000 acres in Kings and Fresno counties in California. The lease was initially recorded at the cost of issuing 62,000,000 common shares. On January 20, 2012, 2,076,000 shares of convertible preferred stock were issued in concluding the Joaquin Basin purchase agreement. The cost of the issue, \$4,152,000, was based on the value of preferred stock as if converted to common stock. The total cost, \$7,026,666, was supported by a volumetric analysis.

On November 21, 2011, a portion of the interest in the lease was swapped for a future “carry” of exploration costs and administration of the lease. Grid’s 50% working interest (37.5% net revenue interest) was reduced to 30% and 14% respectively. The co-lessee, is the obligor under the agreement. Future exploration costs include the operating “carry” costs of the lease and drilling costs of the first well, named “First Farmin Well.” The exploration costs were valued based on the percentage reduction in net revenue interest. A reduction of \$4,825,334 in the value of the Joaquin Basin property was recorded.

Impairment of the California properties from their recorded acquisition values was considered at March 31, 2015 and 2014. Management considered that there were no changes in circumstances that would warrant impairment from the estimated values indicated by independently prepared geological reports.

On October 18, 2013, the Company entered into an Asset Swap Agreement (the “Asset Swap Agreement”) by and amongst the Company, Xploration Inc., a Nevada Corporation (“Xploration”) and Solimar Energy, LLC, a California limited liability company (“Solimar”); thereby, swapping certain land leases as described below, forgiveness of delay rentals and terminating the (a) Kreyenhagen Trend Joint Operating Agreement dated March 1, 2011, between Solimar and Xploration (b) Jacalitos Joint Operating Agreement dated March 1, 2011, between Solimar and Xploration and the (c) Farmin / Settlement Agreement dated November 3, 2011, between Solimar and Xploration, with an effective date as of September 1, 2013.

Solimar assigned eighty 84% of its interest in the Bureau of Land Management Lease, serial number: CACA 49877 representing 1,140.62 gross and net landowner acres that is a part of the Kreyenhagen Trend to the Company.

The Company has oil and gas properties in Wyoming which it does not wish to develop and, accordingly has recorded an impairment in the amount of \$85,334 at March 31, 2013.

In connection with an Amendment to an Asset Purchase Agreement dated November 21, 2011, the Company recorded rights to future exploration costs in the amount of \$4,825,334 on its balance sheet as of March 31, 2012. The Company recorded a full impairment as of March 31, 2013.

7. DERIVATIVE LIABILITIES

The Company issued financial instruments in the form of convertible notes with embedded conversion features and uses the Black-Scholes model for valuation of the derivative instrument. Some of the convertible notes payable have conversion rates, which are indexed to the market value of the Company's stock price. During the nine months ended December 31, 2016 and 2015, the Company recorded derivative liabilities for embedded conversion features related to convertible notes payable of face value \$760,293 and \$631,952, respectively. During the nine months ended December 31, 2016 and 2015, \$281,724 and \$193,465, respectively, of convertible notes payable principal and accrued interest was converted into common stock of the Company. For the nine months ended December 31, 2016 and 2015, the Company performed a final mark-to-market adjustment for the derivative liability related to the convertible notes of and the carrying amount of the derivative liability related to the conversion feature of \$1,178,468 and \$497,323, respectively, was re-classified to additional paid in capital on the date of conversion in the statement of shareholders' equity. During the nine months ended December 31, 2016 and 2015, the Company recognized a gain of \$22,807 and a loss of \$105,579, respectively, based on the change in fair value (mark-to market adjustment) of the derivative liability associated with the embedded conversion features in the accompanying statement of operations.

These derivative liabilities have been measured in accordance with fair value measurements, as defined by ASC 820. The valuation assumptions are classified within Level 3 inputs.

The fair value of these derivatives was valued on the date of the issuances of the convertible notes using the Black-Scholes option pricing model with the following weighted average assumptions: (1) risk free interest rate 0.71% - 0.88%, (2) term of 0.50 – 1 year, (3) expected stock volatility of 594% - 606%, (4) expected dividend rate of 0%, and (5) common stock price of \$0.001 - \$0.0035.

The fair value of these derivatives was valued on December 31, 2016 using the Black-Scholes option pricing model with the following weighted average assumptions: (1) risk free interest rate 0.81%, (2) term of 0.5 -1 year, (3) expected stock volatility of 288%, (4) expected dividend rate of 0%, and (4) common stock price of \$0.0001.

The following table represents the Company's derivative liability activity for the embedded conversion features discussed above for the nine months ending December 31, 2016 and 2015 respectively:

	December 31, 2016	December 31, 2015
Balance, beginning of period	\$ 995,645	\$ 843,376
Initial recognition of derivative liability	760,293	631,952
Conversion of derivative instruments to Common Stock	(1,178,468)	(497,323)
Mark-to-Market adjustment to fair value	(22,807)	105,579
Balance, end of period	\$ 554,663	\$ 1,083,584

These instruments were not issued with the intent of effectively hedging any future cash flow, fair value of any asset, liability or any net investment in a foreign operation. The instruments do not qualify for hedge accounting, and as such, all future changes in the fair value will be recognized in earnings until such time as the instruments are exercised, converted or expire.

8. RELATED PARTY TRANSACTIONS

Subsequent Developments

None.

Going Concern

We have not attained profitable operations and are dependent upon obtaining financing to pursue any extensive acquisitions and activities. For these reasons, our auditors stated in their report on our audited financial statements that they have substantial doubt that we will be able to continue as a going concern without further financing.

Future Financings

We will continue to rely on equity sales of our common shares in order to continue to fund our business operations. Issuances of additional shares will result in dilution to existing stockholders. There is no assurance that we will achieve any additional sales of the equity securities or arrange for debt or other financing to fund our operations and other activities.

Off-Balance Sheet Arrangements

We have no significant off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to stockholders.

Critical Accounting Policies

Our financial statements and accompanying notes have been prepared in accordance with United States generally accepted accounting principles applied on a consistent basis. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods.

We regularly evaluate the accounting policies and estimates that we use to prepare our financial statements. A complete summary of these policies is included in the notes to our financial statements. In general, management's estimates are based on historical experience, on information from third party professionals, and on various other assumptions that are believed to be reasonable under the facts and circumstances. Actual results could differ from those estimates made by management.

Inflation

The amounts presented in the financial statements do not provide for the effect of inflation on our operations or financial position. The net operating losses shown would be greater than reported if the effects of inflation were reflected either by charging operations with amounts that represent replacement costs or by using other inflation adjustments.

Recently Issued Accounting Pronouncements

The Company has reviewed recently issued accounting pronouncements and noted no pronouncements that would have a material impact on its results of operations or financial position.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are a non-accelerated filer and a smaller reporting company, as defined in Rule 12b-2 of the of the Securities Exchange Act of 1934, and as such, are not required to provide the information under this item.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures, as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934 (the "Exchange Act"), that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our Company's officers, as appropriate to allow timely decisions regarding required disclosure. We carried out an evaluation, under the supervision and with the participation of our Company's officers, of the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2016. Based on the evaluation of these disclosure controls and procedures, and in light of the material weaknesses in our internal control over financial reporting identified in our Annual Report on Form 10-K for the year ended March 31, 2016, that was filed with the SEC on June 29, 2016, the Company's officers concluded that our disclosure controls and procedures are ineffective.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting, as defined in Rule 13a-15(f) promulgated under the Exchange Act, during the quarter ended December 31, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II- OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We know of no material, existing or pending legal proceedings against our company, nor are we involved as a plaintiff in any material proceeding or pending litigation. There are no proceedings in which our director, officer or any affiliates, or any registered or beneficial shareholder, is an adverse party or has a material interest adverse to our interest.

 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
