6) Describe the Issuer's Business, Products and Ser vices

A. Description of the issuer's business operations;

Describe the issuer's business so a potential investor can clearly understand the company. In answering this item, please include the following:

Headquartered at 1110 Brickell Avenue, Suite 430, Miami, FL, 33131, and with operations in Amazonas, Brazil, at Rua Sao Salvador 120 Andar Vierialves, Business Center Manuas, Amazonas, Brazil, AZFL's through it's wholly owned subsidiary AFL, is a diversified timber company, with a focus on sustainable practices in the management of its forestry holdings in the Brazilian stae of Amazonas. The AZFL management team and its shareholders, some of whom have owned large tracts of land in the Amazon Rain Forest for over fifty years, are committed to sustainable forest management and the bio-diversity of the Amazon Rain Forest. AZFL intends to build a business strategy that will enable its development into a profitable enterprise, as well as preserve the balance between environmental integrity and consumer needs.

AZFL currently owns 90,108 acres of virgin Rain Forest (141 square miles), known as Fazenda, Jutuarana, located in Amazonas, Brazil. The *Fazenda Jatuarana* is unencumbered by any debt, and has an appraised value of over US $47,000,000 (Forty Sevel million dollars), which has been audited under US GAAP accounting principles. The AFL business strategy will include the harvesting and extraction of timber, both from the *Fazenda Jatuarana* and third-party land, and the production nof quality wood products such as lumber, flooring and docking, all while maintaining Sustainable Forest Management (SFM) practices, further described below, which are congruous with the preservation of the bio-diverse Rain Forest land and its people.

The AZFL approach addresses local poverty alleviation, sustainable development and bio-diversity conservation, and restoration, and also combats the new challenges of climate change. AZFL is committed to working closely with the local forest communities, and providing employment opportunities to the indigenous peoples. AZFL offers an innovative way of doing business, and a new way of life for individuals, forest communities and the natural environment, while generating company profits and benefits from preservation incentives.

AZFL's forest property and assigned and approved forest management plans have been recently audited by Labrozzi & Co., P.A., Miami, Florida, a P.C.A.O.B. (Public Company Accounting Oversight Board) certified accounting firm as collateral to fund AZFL's capital requirements needed to develop the properties and bring them into a profitable commercial status.

Current Operations

Timber Market

Production and consumption of key wood products and wood energy are expected to rise from the present to 2030*(2);* largely following historical trends of 1-2% increases per annum. Two main factors affecting long-term global demand for wood products are demographic changes and continued economic growth. The world's population is projected to increase to 8.2 billion in 2030. During a 40 year span from 1970=2010 global GDP increased approximately US $42 trillion. It is projected to grow another US$42 trillion in the next 20 years. Global trade of all wood products doubled in a six-year span from 2002-2008, increasing from approximately US$300 billion to approximately US$600 billion. Income derived from high global timber demands is a primary determinant for investment in forest management. This escalating growth not just increases global wood demands but creates a need for conservative forest management initiatives.

Timber Agent Operations

Since inception, AZFL has acted as Timber Agent providers of various species of wood products from the Amazon Rain Forest. As Timber Agents, AZFL acts as originating broker and sales agent for various timber products. Current operations focus on the sale of wood products procured from third party forest land owners and producers in Brazil. AZFL coordinates several factors when fulfilling the requirements of clients' timber orders:

1. Quantity of Timber
2. Species of Timber

3. Finish and specifications of desired product
4. Shipment of finished product

As a natural resource, wood is available in many species. AZFL spends time researching the various species that will best fit the needs of their customers and the availability of the raw wood. Different woods have geographical, seasonal, and cutting season differences. The decisions made regarding these three differences are crucial to the business.

Geographical decisions include determining the region the wood specie is located, and which third-party owns the land to be focused on for harvesting.

Seasonal decisions include at what time felling (the cutting of trees) should commence, and also the amount of time felling will take, factoring in weather patterns to minimize erosion. There can be substantial differences in weather patterns from one season to another in the northern parts of Brazil, as in most places. More of less rainfall can cause river water levels to fluctuate at different times of the year sometimes dictating the total amount of timber that can logistically be transported.

The cutting season is substantially affected by the weather conditions. Rain hampers the ability to work in the forest using heavy equipment. As a result, when there is more rainfall, the cutting season is shorter, and less active days of extraction work is performed. In addition, more or less timber may be harvested from one season to the next.

Revenues

Currently AZFL is attempting to fulfill its second order from a U.K. based railroad supply company, for US 2.64 MM dollars in Railroad Ties or “Sleepers.”

Governmental Regulations

The timber industry and all wood products produced are regulated by the State and Federal Government of Brazil as to their origin, chain of custody, extraction, production, and shipment, under the prescribed Environmental Standards. As a “Timber Agent” AZFL requires that all of its suppliers maintain and provide the proper documentation and licenses in reference to any wood products AZFL may broker.

Employees

AZFL has 5 full time employeeys. AZFL currently has no key employees, other than Mr. Michael Ibar, AZFL’s CEO/Director, and Mr. Ricardo Cortez, a shareholder in AZFL. Employees do not currently receive stock benefits for performance. There are no consulting contracts with any individuals or companies at this time.

Intellectual Property

AZFL owns the domain name www.amazonasf.com. AZFL does not currently own any patents, trademarks, or copyrights. AZFL plans to file for certain Trademarks and Copyrights in the near future.

B. Date and state of incorporation

The company was incorporated in the State of Nevada December 16, 2008.

The issuer’s primary and secondary SIC Codes:

AZFL’s primary and only SIC code is 800 5 FORESTRY.

C. Issuer’s fiscal year end:

Issuer’s fiscal year end is 12/31

D. Principle products or services, and their markets:

Currently the Company's wholly owned subsidiary, AFL engages in the wholesale export of tropical hardwood products from Brazil to potential customers in the US and abroad. Wood in general is one of the most consumed commodities worldwide and the sustainable supply of wood is under consistent pressure from population growth and environmental concerns. Tropical hardwoods specifically, are a marketable type of wood for export out of Brazil and have numerous applications and product derivates including but not limited to, Sleepers, Decking, Flooring, Lumber and Furniture. There is worldwide demand and for these types of products and while AZFL currently represents an inconsequential market share for such, the Company believes it can be competitive as it grows in this sector do to its access, contacts and experience in relation to the direct supply and production of these materials at their source.

To date the Company has only sold Railroad Ties or Sleepers to one customer in the UK. While the company has other prospective clients that it can potentially market more products to, it has chosen to focus first on increasing its volume of this product to this one customer. This does currently create a dependence on this one customer and a lack of diversity in its client and product base. AZFL has abundant access to supply of this product through its existing contacts with producers in the region named in later sections. Our Railroad Sleepers are shipped by means of cargo vessel to the client from the respective port of departure, usually the port of Manuas, Brazil. The company does not have any pending publicly announced "new product or services" other than those described herein. AZFL does not have any patents, trademarks, licenses, franchises, concessions, royalty agreements. Government and environmental approval necessary for the products are achieved by the supplier prior to AZFL's purchase of said product as the Company is acting as a Timber Agent.

AZFL also retains the original ECOSYS business plan and will pursue setting up a series of alternative fuel stations at existing gas stations along various freeways in the state of California.

7) Describe the Issuer's Facilities

The goal of this section is to provide a potential investor with a clear understanding of all assets, properties or facilities owned, used or leased by the issuer.
