NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Three Months Ended Dec 31, 2013
(Unaudited)

A. Summary of Significant Accounting Policies:

Nature of Business:

O2 Secure Wireless, Inc., a Georgia Corporation, was established on October 29, 2003. The Entity designs and maintains high-speed wireless broadband connection networks for customers throughout the southeastern United States and specializes in wireless tower construction and lease operations. It is also being structured to provide flat rate prepaid wireless services in developing countries.

Principles of Consolidation:

The accompanying unaudited consolidated financial statements include the financial statements of O2 Secure Wireless, Inc. and its wholly-owned subsidiary, Earthcom Service, Inc. All significant transactions and balances between O2 Secure Wireless, Inc. and its subsidiary have been eliminated in consolidation.

Financial Statements:

The accompanying condensed financial statements have been prepared without audit or review. Certain information and disclosures required by the accounting principles generally accepted in the United States have been condensed or omitted. These condensed financial statements reflect all adjustments that, in the opinion of management, are necessary to present fairly the results of operations of the Entity for the periods presented.

Basis of Accounting:

The accompanying unaudited consolidated financial statements of the Entity have been prepared in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Recognition:

Revenues from network service operations and consulting services are recognized at the time the service is completed. Revenues from network component sales are recognized at the time the goods are shipped.

(Continued)

A. Summary of Significant Accounting Policies (continued):

Cash and Cash Equivalents:

The Entity considers all highly liquid investments purchased with a maturity of three months or less to be cash equivalents.

Concentration of Credit Risk:

Financial instruments that potentially subject the Entity to concentrations of credit risk consist principally of cash deposits in excess of federally insured limits and accounts and notes receivable. The Entity has not experienced any losses in such accounts. Cash was not in excess of insured limits at December 31, 2013.

Allowance for Doubtful Accounts:

The carrying amount of receivables is reduced by an allowance that reflects managements' best estimate of the amounts that will not be collected. Management reviews each receivable and, based on historical bad debt experience and managements' evaluation of credit worthiness, estimates that portion, if any, of the balance that will be collected. The Entity considers all accounts receivable to be fully collectible; accordingly, no allowance for doubtful accounts is required.

Goodwill:

Goodwill is recognized to the extent that the purchase price of the acquisition exceeds the estimated fair value of the net assets acquired. Goodwill is tested for impairment annually. If there is an impairment it would be charged to operations in the period such impairment is determined. During the three months ended December 31, 2013, there were no changes in the carrying amount of the goodwill. Goodwill is the result of the purchase price of the stock of Earthcom Service, Inc. in excess of the fair value of the assets acquired (see Note C).

Equipment:

Equipment is stated at cost. Expenditures for maintenance, repairs and minor renewals are charged to expense as incurred. Major renewals and betterments are capitalized. Depreciation and amortization are provided using the accelerated methods over the estimated useful lives of the assets, which is five years.

(Continued)

A. Summary of Significant Accounting Policies (continued):

Income Taxes:

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to be applied to taxable income in the years in which those temporary differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the statement of operations in the period that includes the enactment date. A valuation allowance is provided for deferred tax assets if it is more likely than not these items will either expire before the Entity is able to realize their benefits, or that future deductibility is uncertain. There were no current or deferred income tax expense or benefits for the year ended September 30, 2013.

The Entity's wholly-owned subsidiary, Earthcom Service, Inc. is not recognized as a reporting entity for income tax purposes. Income and losses of the Entity are reported by the parent company on its corporate tax return.

B. Going Concern:

The accompanying unaudited consolidated financial statements have been prepared assuming that the Entity will continue as a going concern. The Entity has sustained operating losses since inception and it has been dependent upon limited private lending to provide sufficient working capital in order to finance its operations. Management believes that it can continue to raise debt and equity financing to support its operations.

The Entity's ability to continue in existence is dependent upon developing additional sources of capital and/or achieving profitable operations. Management's plan is to raise capital through private financing initiatives and to fund operations utilizing the experience, expertise, and government connections obtained during the acquisition of Earthcom, Inc. The Entity's inability to fund its capital requirements would have a material adverse effect on the Entity. The accompanying consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

C. Earthcom Service, Inc. Merger:

Pursuant to the Agreement and Plan of Merger, dated May 4, 2010, by and between the Entity, Oxygen Acquisition Corporation (the wholly-owned subsidiary of the Entity), and Earthcom Service, Inc., the Entity acquired 100% of the outstanding shares of the common stock of Earthcom Service, Inc. The merger was a tax-free merger for the Entity. The acquisition will allow the Entity to expand its wireless services into developing countries and its cell tower setup and lease operations. Earthcom's results of operations will be included in the Entity's results beginning May 4, 2010. Under the terms of the Merger Agreement, 500 shares of Earthcom Service, Inc. common stock and 1,000 shares of Oxygen Acquisition Corporation stock were exchanged for 550,001,000 shares of the Entity's common stock.

(Continued)

The merger will be accounted for under the purchase method of accounting in accordance with FASB ASC topic 805, Business Combinations. Accordingly, the purchase price has been allocated to the assets acquired and the liabilities assumed based on their estimated fair values at the merger date as summarized below:

Purchase Price:	
Earthcom Service, Inc. common stock exchanged	500

The accumulated value of Earthcom's licensing in the Dominican Republic has been evaluated and assessed at $36,262,210.77.

In February 2011, the Entity secured a broadband network agreement with the City of Palm Coast Florida allowing the Entity to connect to the City's fiber network in order to provide LTE broadband network to the residents of Palm Coast, Bunnell and Flagler Beach Florida. The Entity also entered into two lease agreements on land within Flagler County, Florida and Polk County, Florida where the Entity intends to build wireless towers to serve wireless carriers in these areas.

With the acquisition of Earthcom and additional private funding, the Entity will pursue the opportunities to establish ourselves as the primary cell service provider in the Dominican Republic while continuing to expand the cell tower setup and lease operations brought over from Earthcom throughout the southeast in the United States. Funding for these expanded operations will come primarily from private financing and cell tower lease revenues.

The Entity' long term plan is to become the number one provider of wireless access in the Dominican Republic, and to use that position to expand into neighboring jurisdictions to eventually dominate the emerging wireless market in the Caribbean. The acquisition of Earthcom has provided experience, expertise, and government connections necessary to establish our position.
