## **2. Summary of Significant Accounting Policies**

### ***Method of Accounting***

The Company maintains its general ledger and journals with the accrual method of accounting for financial reporting purposes. The financial statements and notes are representations of management. Accounting policies adopted by the Company conform to generally accepted accounting principles in the United States of America and have been consistently applied in the presentation of financial statements, which are compiled on the accrual basis of accounting.

The accompanying financial statements have been prepared in accordance with the Statement of Financial Accounting Standards No. 7 *Accounting and Reporting by Development-Stage Enterprises*. A development-stage enterprise is one in which planned principal operations have not commenced or if its operations have commenced, there has been no significant revenues there from.

The Company’s year-end for financial reporting and income reporting is December 31st.

### ***Use of estimates***

The preparation of our financial statements in conformity with accounting principles generally accepted in the United States of America (“GAAP”) requires us to make estimates and assumptions that affect the amounts reported in these financial statements and accompanying notes. Due to the inherent uncertainty involved in making estimates, actual results reported in future periods may be based upon amounts that could differ from those estimates.

### ***Cash equivalents***

The Company considers cash on hand, cash in banks, certificates of deposit, time deposits, U.S. government and other highly liquid investments with original maturities of three months or less to be cash equivalents.

The accompanying notes are an integral part of these financial statements.

### ***Property, plant, and equipment***

Property, plant, and equipment is stated at historical cost. We compute depreciation by the straight-line method based on the following estimated useful lives:

Land improvements	5-20 years
Buildings and leasehold improvements	5-50 years
Machinery and equipment	3-5 years

Significant improvements that add to productive capacity or extend the lives of properties are capitalized. Costs for repairs and maintenance are charged to expense as incurred. When property is retired or otherwise disposed of, the cost and related accumulated depreciation are removed from the accounts and any related gains or losses are included in income.

### ***Revenue recognition***

The Company recognizes revenue when it is realized or realizable and has been earned. Revenue is recognized when persuasive evidence of an arrangement exists; shipment or delivery has occurred (depending on the terms of the sale); the seller's price to the buyer is fixed or determinable; and collectability is reasonably assured.

Generally, there is no post-shipment obligation on product sold other than warranty obligations in the normal, ordinary course of business. In the event significant post-shipment obligations were to exist, revenue recognition would be deferred until substantially all obligations were satisfied.

### ***Selling Expenses***

Selling expenses are comprised of salary for the sales force, client entertainment, commissions, depreciation, advertising, and travel and lodging expenses.

### ***General & Administrative Expenses***

General and administrative expenses include outside consulting services, executive compensation, quality control, and general overhead such as the finance department, administrative staff, and depreciation and amortization expense.

### ***Income taxes***

Deferred tax assets and liabilities are recognized for the expected future tax consequences of differences between the carrying amounts of assets and liabilities and their respective tax basis using enacted tax rates in effect for the year in which the differences are expected to reverse.

The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period when the change is enacted. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Changes in valuation allowances from period to period are included in our tax provision in the period of change.

### ***Earnings per share***

The Company calculates net income per share in accordance with SFAS No. 128, *Earnings per Share*. Basic net income per share is computed by dividing the net income by the weighted-average number of common shares outstanding during the periods. Diluted net income per share is computed similar to basic net income per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common stock equivalents had been issued and if the additional common shares were dilutive.

The accompanying notes are an integral part of these financial statements.

### ***Related parties***

Related parties, which can be a corporation, individual, investor or another entity are considered to be related if the party has the ability, directly or indirectly, to control the other party or exercise significant influence over the Company in making financial and operating decisions. Companies are also considered to be related if they are subject to common control or common significant influence. The Company has these relationships.

### ***Merger & acquisition***

In December 2007, the FASB issued two new statements: (a.) SFAS No. 141(revised 2007), *Business Combinations*, and (b.) No. 160, *Non-controlling Interests in Consolidated Financial Statements*. These statements are effective for fiscal years beginning after December 15, 2008 and the application of these standards will improve, simplify and converge internationally the accounting for business combinations and the reporting of non-controlling interests in consolidated financial statements.

The Company adopted SFAS 141 (R) and SFAS 160 on the prospective basis. New merger and acquisition activities will be accounted for under these standards.

SFAS No. 141 (R) requires an acquiring entity in a business combination to: (i) recognize all (and only) the assets acquired and the liabilities assumed in the transaction, (ii) establish an acquisition-date fair value as the measurement objective for all assets acquired and the liabilities assumed, (iii) disclose to investors and other users all of the information they will need to evaluate and understand the nature of, and the financial effect of, the business combination, (iv) recognize and measure the goodwill acquired in the business combination or a gain from a bargain purchase, and (v) expense all related acquisition costs as period expenses if they are not related to the fair value of the acquired company.

SFAS No. 160 will improve the relevance, comparability and transparency of financial information provided to investors by requiring all entities to: (i) report non-controlling (minority) interests in subsidiaries in the same manner, as equity but separate from the parent's equity, in consolidated financial statements, (ii) net income attributable to the parent and to the non-controlling interest must be clearly identified and presented on the face of the consolidated statement of income, and (iii) any changes in the parent's ownership interest while the parent retains the controlling financial interest in its subsidiary be accounted for consistently.

### ***Recent Accounting Pronouncements***

The Company has reviewed all recently issued, but not yet effective, accounting pronouncements and do not believe the future adoption of any such pronouncements may be expected to cause a material impact on its consolidated financial condition or the results of its consolidated operations.

### **3. Acquisition of Assets**

It is typical to use the Black-Scholes option-pricing model to value the grants of options or warrants based on assumptions on risk-free interest rate, expected dividend yield, expected stock price volatility, and the expected life of the options.
