AMARIUM TECHNOLOGIES, INC.**Notes to the Consolidated Financial Statements****(Presented in US dollars)**

June 30, 2014

1. OPERATIONS:

Amarium Technologies Inc. ("Amarium" or the "Company") is incorporated under the laws of the State of Nevada. Previously the Company developed software solutions and network security products.

CURRENT DEVELOPMENTS: As a result of the significant challenges facing the Company in the technology business, management ceased its involvement in the technology sector in the early in 2013. Presently Management has completely transitioned operations and the focus its business efforts to be exclusively in the mining sector. The Company's Jovita property covers a total of 250 hectares and is located in the municipality of Vialla Madero, Michoacán and 150 meters east of the town "La Carpinteria". Coordinates (UTM) 02, 56,719 East and 21, 32,971 North, and only 47 km from the city of Morelia Michoacán. The main access to the property is from highway number 14 that comes from Morelia, Michoacán going to Patzcuaro, Michoacán. Amarium has also acquired the San Pedro Copper Mine in Michoacán, Mexico. The flotation mill at the San Pedro Mine currently has an operating at 120 tons per day (tpd) with a capacity of 200 tpd, and after upgrades the mill will have a capacity of 500 tpd. The Jovita mine is currently running at 200 tpd and after expansion it is expected to be at 500 tpd by the end of 2014. An exploration program commenced on the Company's San Pedro Copper Mine in Michoacán, Mexico and will involve extensive rock sampling and trenching throughout the southern portion of the property. Expectations are to prove a significant and sufficient copper resource to run the mine at 500 tpd.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Management further acknowledges that it is solely responsible for adopting sound accounting practices, establishing and maintaining a system of internal accounting control and preventing and detecting fraud. The Company's system of internal accounting control is designed to assure, among other items, that 1) recorded transactions are valid; 2) valid transactions are recorded; and 3) transactions are recorded in the proper period in a timely manner to produce financial statements which present fairly the financial condition, results of operations and cash flows of the Company for the respective periods being presented.

AMARIUM TECHNOLOGIES, INC.
Notes to the Consolidated Financial Statements
(Presented in US dollars)

June 30, 2014

Former Development Stage Company

The Company is no longer a development stage company as defined by section 915-10-20 of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification. A Development stage company is defined as follows: An entity devoting substantially all of its efforts to establishing a new business and for which either of the following conditions exists: Planned principal operations have not commenced and there has been no significant revenue therefrom. The Company has now both generated and expanded upon initial operations and has significant revenues allowing it to self-sustain. The Company may require outside capital in the future, however this would be for further capital expansion and acquisitions.

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include the estimated useful lives of property and equipment. Actual results could differ from those estimates.

Cash equivalents The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents.

Fair value of financial instruments The Company follows paragraph 825-10-50-10 of the FASB Accounting Standards Codification for disclosures about fair value of its financial instruments and paragraph 820-10-35-37 of the FASB Accounting Standards Codification (“Paragraph 820-10-35-37”) to measure the fair value of its financial instruments. Paragraph 820-10-35-37 establishes a framework for measuring fair value in accounting principles generally accepted in the United States of America (U.S. GAAP), and expands disclosures about fair value measurements. To increase consistency and comparability in fair value measurements and related disclosures, Paragraph 820-10-35-37 establishes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three (3) broad levels. The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three (3) levels of fair value hierarchy defined by Paragraph 820-10-35-37 are described below:

AMARIUM TECHNOLOGIES, INC.
Notes to the Consolidated Financial Statements
(Presented in US dollars)

June 30, 2014

Fair value of financial instruments cont'd

Level 1 Quoted market prices available in active markets for identical assets or liabilities as of the

Level 2 Pricing inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date.

Level 3 Pricing inputs that are generally observable inputs and not corroborated by market data.

The carrying amount of the Company's financial assets and liabilities, such as cash, prepaid expenses and accrued expenses approximate their fair value because of the short maturity of those instruments. The Company's notes payable approximate the fair value of such instruments based upon management's best estimate of interest rates that would be available to the Company for similar financial arrangements at June 30, 2013. The Company does not have any assets or liabilities measured at fair value on a recurring or a non-recurring basis.

Equipment

Equipment is recorded at cost. Expenditures for major additions and betterments are capitalized. Maintenance and repairs are charged to operations as incurred. Depreciation of equipment is computed by the straight-line method (after taking into account their respective estimated residual values) over the assets estimated useful life of seven (7) or ten (10) years. Upon sale or retirement of equipment, the related cost and accumulated depreciation are removed from the accounts and any gain or loss is reflected in statements of operations.

Impairment of long-lived assets

The Company follows paragraph 360-10-05-4 of the FASB Accounting Standards Codification for its long-lived assets. The Company's long-lived assets, which includes computer equipment is reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable.

AMARIUM TECHNOLOGIES, INC.
Notes to the Consolidated Financial Statements
(Presented in US dollars)

June 30, 2014

Impairment of long-lived assets: cont'd

The Company assesses the recoverability of its long-lived assets by comparing the projected undiscounted net cash flows associated with the related long-lived asset or group of long-lived assets over their remaining estimated useful lives against their respective carrying amounts. Impairment, if any, is based on the excess of the carrying amount over the fair value of those assets. Fair value is generally determined using the asset's expected future discounted cash flows or market value, if readily determinable. If long-lived assets are determined to be recoverable, but the newly determined remaining estimated useful lives are shorter than originally estimated, the net book values of the long-lived assets are depreciated over the newly determined remaining estimated useful lives.

The Company determined that there were no impairments of long-lived assets as of June 30, 2014, December 31, 2013 and December 31, 2012.

Commitments and contingencies

The Company follows subtopic 450-20 of the FASB Accounting Standards Codification to report accounting for contingencies. Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount of the assessment can be reasonably estimated.

Revenue recognition

The Company follows paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company will recognize revenue when it is realized or realizable and earned. The Company recognizes revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the product has been shipped or the services have been rendered to the customer, (iii) the sales price is fixed or determinable, and (iv) collection is reasonably assured.

AMARIUM TECHNOLOGIES, INC.
Notes to the Consolidated Financial Statements
(Presented in US dollars)

June 30, 2014

Income taxes

The Company follows Section 740-10-30 of the FASB Accounting Standards Codification, which requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax assets and liabilities are based on the differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the fiscal year in which the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the fiscal years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the Statements of Income and Comprehensive Income in the period that includes the enactment date.

The Company adopted section 740-10-25 of the FASB Accounting Standards Codification (“Section 740-10-25”) with regards to uncertainty income taxes. Section 740-10-25 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under Section 740-10-25, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be greater than fifty percent (50%) likelihood of being realized upon ultimate settlement. Section 740-10-25 also provides guidance on de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures. The Company had no material adjustments to its liabilities for unrecognized income tax benefits according to the provisions of Section 740-10-25.

Net income (loss) per common share

Net income (loss) per common share is computed pursuant to section 260-10-45 of the FASB Accounting Standards Codification. Basic net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during the period. Diluted net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock and potentially outstanding shares of common stock during the period. The weighted average number of common shares outstanding and potentially outstanding common shares assumes that the Company incorporated as of the beginning of the first period presented. There were no potentially dilutive shares outstanding as of June 30, 2014, December 31, 2013 and December 31, 2012.

Cash flows reporting

The Company adopted paragraph 230-10-45-24 of the FASB Accounting Standards Codification for cash flows reporting, classifies cash receipts and payments according to whether they stem from operating, investing, or financing activities and provides definitions of each category, and uses the indirect or reconciliation method (“Indirect method”) as defined by paragraph 230-10-45-25 of the FASB Accounting Standards Codification to report net cash flow from operating activities by adjusting net income to reconcile it to net cash flow from operating activities by removing the effects of (a) all deferrals of past operating cash receipts and payments and all accruals of expected future operating cash receipts and payments and (b) all items that are included in net income that do not affect operating cash receipts and payments. The Company reports the reporting currency equivalent of foreign currency cash flows, using the current exchange rate at the time of the cash flows and the effect of exchange rate changes on cash held in foreign currencies is reported as a separate item in the reconciliation of beginning and ending balances of cash and cash equivalents and separately provides information about investing and financing activities not resulting in cash receipts or payments in the period pursuant to paragraph 830-230-45-1 of the FASB Accounting Standards Codification.

Advertising Costs

The Company expenses the cost of advertising and promotional materials when incurred. Total Advertising costs were zero for all periods.

Subsequent events

The Company follows the guidance in Section 855-10-50 of the FASB Accounting Standards Codification for the disclosure of subsequent events. The Company will evaluate subsequent events through the date when the financial statements were issued. Pursuant to ASU 2010-09 of the FASB Accounting Standards Codification, the Company as an OTC Markets filer considers its financial statements issued when they are widely distributed to users, such as through filing them on The OTC Markets Website.

Subsequent events cont'd

.Recently issued accounting pronouncements

The following accounting standards were issued as of December 26, 2011:

ASU 2010-06, Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements.

This ASU affects all entities that are required to make disclosures about recurring and nonrecurring fair value measurements under FASB ASC Topic 820, originally issued as FASB Statement No. 157, Fair Value Measurements. The ASU requires certain new disclosures and clarifies two existing disclosure requirements. The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years.

ASU 2011-04, Fair Value Measurement (Topic 820) – Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs

This ASU supersedes most of the guidance in Topic 820, although many of the changes are clarifications of existing guidance or wording changes to align with IFRS 13. In addition, certain amendments in ASU 2011-04 change a particular principle or requirement for measuring fair value or disclosing information about fair value measurements. The amendments in ASU 2011-04 are effective for public entities for interim and annual periods beginning after December 15, 2011.

NOTE 3 – GOING CONCERN

As reflected in the accompanying financial statements, the Company had an accumulated deficit of \$(2,347,946) from inception to June 30, 2014 and had a net income of \$1,548,016, for the 3 months ended June 30, 2014, also a net loss of \$(53,720) was recorded for the 3 months ended June 30, 2013. The Company has commenced operations and is generating revenue. Management intends to raise additional funds by way of a public or private offering to fund further expansion and acquisitions. The consolidated financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

Commitments and contingencies

The Company follows subtopic 450-20 of the FASB Accounting Standards Codification to report accounting for contingencies. Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount of the assessment can be reasonably estimated.

Revenue recognition

The Company follows paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company recognizes revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the product has been shipped or the services have been rendered to the customer, (iii) the sales price is fixed or determinable, and (iv) collectability is reasonably assured.

4. RELATED PARTY TRANSACTIONS:

For the quarter ending June 30, 2014 and the year ending December 31, 2013 there were no related party transactions.

AMARIUM TECHNOLOGIES, INC.**Notes to the Consolidated Financial Statements****(Presented in US dollars)**

June 30, 2014

7. SHARES ISSUED:

For Deposit On Mineral Property: On September 30, 2010 the Company entered into an agreement with Industrias Calissio SUR SA for a total of 450,000,000 million shares to be issued at a cost basis of \$.01. This is to provide the Company with a deposit on a mineral resource property with a value of \$4,500,000 minimum in situ value.

To Reduce Debt:

On September 30, 2010 the Company entered into an agreement with Global Infinitum Market SA de CV for a line of credit to secure funding for mining operations. Under the terms of this agreement \$600,000 is made available for a four year term, at an interest rate of 7.5% with an option to extend the term. The amount outstanding and payable including accrued interest at December 31, 2013 is \$546,000; this includes accrued interest in the amount of \$146,250 and at March 31, 2014 is \$557,250 with accrued interest of \$157,500. On August 9, 2012 the Company elected to reduce this obligation by issuing 21,300,000 common shares at a cost basis of \$106,500 and issuing a further 21,000,000 million shares at a cost basis of \$105,000. This reduced the principal amount of \$600,000 down to \$388,500. The amount of accrued interest at December 31, 2012 is \$112,500 and with the remaining principal amount of \$388,500, for a total of \$501,000.

On February 4, 2014: 44.5 million shares were issued at \$0.001 and on March 18, 2014 28.5 million shares were issued at \$0.001 to Global Infinitum Market S.A. De C.V as a reduction of a note outstanding in the amounts of \$44,500 and \$28,500, on March 31, 2014 the amount outstanding was \$117,000. Total shares issued and outstanding on June 30, 2014 were 571,778,578.

8. NOTES PAYABLE:

The Company acquired the Jovita Mine on May 22, 2013 for a total consideration of \$6.1 million USD to be paid to Minerales Consolidados S.A. de C.V. (MCSA) Under the terms of the Agreement, Amarium will acquire 100% ownership of the Jovita Mine for aggregate expenditures of USD \$6.1 Million over the next 3 years. Expenditures include a payment of USD \$2.5 Million and 1 million shares of Amarium to MCSA, within 30 days. Additional payments of 1 million shares will also be issued to MCSA, in 12 months and 24 months. Amarium will also be required to spend USD \$3 million in exploration activities on the property over the next 36 months. These terms leave Amarium with a note payable to Minerales Consolidados in the amount of \$3 million USD for the next 36 months.

AMARIUM TECHNOLOGIES, INC.**Notes to the Consolidated Financial Statements****(Presented in US dollars)**

June 30, 2014

8. NOTES PAYABLE cont'd

On August 21, 2013, the Company has acquired the San Pedro Copper Mine and Flotation Mill in Michoacán, Mexico, from Minera Rio Cobre SA de CV. The San Pedro Mine, located in southwestern Michoacán, is a past producer with a 20 ton-per-day (tpd) flotation mill currently on the property. The San Pedro acquisition is a cash and shares purchase transaction totaling \$3 million USD consisting of \$2.5 million USD and \$500,000 paid in stock by issuing 2 million common shares valued @ \$0.25. These terms leave Amarium with a note payable to Minera Rio Cobre SA de CV in the amount of \$1.5 million USD for the next 36 months.

9. RECENT BUSINESS DEVELOPMENTS:

On May 22, 2013 the Company Amarium signed a Definitive Agreement ("Agreement") with Minerales Consolidados S.A. de C.V. (MCSA) to purchase the Jovita Mine and a 40 ton per day (tpd) copper mill. The Jovita Mine is a producing copper concentrate mine operating in Michoacán, a well-known base metals mining region in Mexico. Under the terms of the Agreement, Amarium will acquire 100% ownership of the Jovita Mine for aggregate expenditures of USD \$6.1 Million over the next 3 years. Expenditures include a payment of USD \$2.5 Million and 1 million shares of Amarium to MCSA, within 30 days. Additional payments of 1 million shares will also be issued to MCSA, in 12 months and 24 months. Amarium will also be required to spend USD \$3 million in exploration activities on the property over the next 36 months. MCSA is transitioning the management and operation of the Jovita Mine to Amarium over the next 60 days.

The Jovita Mine encompasses a 250 hectare mineral concession and production facility located in the Mexican state of Michoacán. The current mill operation allows for ore to be processed onsite into copper concentrate for shipment to foreign buyers. Michoacán is a historic mining region in Western Mexico with a large deep-sea port located along the Pacific coastline that is well situated for transport and the supply of Western US, Asian and other Pacific Rim markets.

On June 5, 2013 the Company has executed a Copper Stream Sale Agreement ("Agreement") with Anglo-Asia Resource Partners ("Anglo-Asia") for US\$8.75 million. Under the terms of the Agreement, Anglo-Asia is entitled to 18% of the copper concentrate produced at the Jovita Mill operating in Michoacán, Mexico. Amarium will allocate the sale proceeds from the Agreement to complete the financial obligations outstanding from the Jovita Mine acquisition and the remaining funds will be expended on upgrades and expansion of the existing flotation mill and facilities.

The Agreement entitles Anglo-Asia, a private Hong Kong partnership that is focused on procuring precious and base metals for the Asian market, to 18% of the monthly production at the Jovita Mill. Anglo-Asia will make an initial payment of US\$8.75 million to Amarium and on-going payments of US\$0.75 per pound of copper produced. If the spot price of copper was to decline below US\$2.50 per pound, Anglo-Asia's on-going payment obligations would be reduced to US\$0.50 per pound of copper. Additional terms of the Agreement will be released at a later date.

9. RECENT BUSINESS DEVELOPMENTS CONT'D:

On August 21, 2013, the Company has acquired the San Pedro Copper Mine and Flotation Mill in Michoacán, Mexico, from Minera Rio Cobre SA de CV. The San Pedro Mine, located in southwestern Michoacán, is a past producer with a 20 ton-per-day (tpd) flotation mill currently on the property. The San Pedro acquisition is a cash and shares purchase transaction totaling \$3 million USD consisting of \$2.5 million USD and \$500,000 paid in stock by issuing 2 million common shares valued @ \$0.25.

Due to these activities occurring in the later stage of the second quarter ending June 30, 2013 and not fully taking effect until on or around July 1, 2013 the Company will be recognizing the effects of the above mentioned business activities in the financial statements starting in the third quarter July 1, 2013 and onwards. The Company has completed an agreement with Minera Cobre SA de CV to purchase 50,000 tonnes of high-grade ore over the next 24 months. The purchased ore is to have an average grade in excess of 2.1% copper per tonne and is to be used as feedstock for both the Jovita Mill and the San Pedro Mill, located in Michoacán, Mexico, while the Company conducts advanced exploration activities at the Jovita property.

Copper production is currently ahead of targets at the Jovita Mill in Michoacán, Mexico. The primary factors cited for the higher than anticipated production were increased operational efficiency from recent implementations and higher than expected ore grades. Production results will be reflected in the Company's next quarterly report for the period ending September 30. The Company also announced that it is conducting an initial assessment to upgrade the existing 20 ton-per-day San Pedro Mill, also located in Michoacán.

The Company's first shipment of copper production to Anglo Asia Resource Partners is currently in transit. The initial copper shipment of 65,000 pounds to its destination in China begins the fulfillment of the copper stream sales agreement the Company entered into with Anglo Asia on June 5, 2013. Anglo Asia Resource Partners is a private Hong Kong partnership that is focused on procuring precious and base metals for the Asian market's manufacturing and industrial supply chain.

Additional copper shipments are now scheduled to the Asian market, due to increased sales orders from Anglo-Asia Resource Partners. Amarium is currently organizing shipping and production schedules at both the Jovita and San Pedro Mine facilities to ensure the Company successfully fulfills the new sales orders. Anglo-Asia Resource Partners is a private Hong Kong partnership that is focused on procuring precious and base metals for the Asian market's manufacturing and industrial supply chain.

AMARIUM TECHNOLOGIES, INC.**Notes to the Consolidated Financial Statements****(Presented in US dollars)**

June 30, 2014

9. RECENT BUSINESS DEVELOPMENTS CONT'D:

Net Earnings for the 3rd quarter ending September 30, 2013, of \$392,034, the Company's first earnings report to include revenues from the producing La Jovita and San Pedro Copper Mines in Michoacán, Mexico. Amarium reported total production revenues from both sites of US\$784,035 during the period.

January 22, 2014 The Mill Expansion Programs for both the Jovita Mine and San Pedro Mine are progressing on schedule, and have met all of their aggressive milestones to date. In August, Amarium announced it had initiated an expansion program at the Jovita Mine, to expand production from the current 40 tons per day (tpd) to 500 tpd. Subsequently in December, the Company announced approval for upgrades to the San Pedro Mill that will bring production from 20 tpd to 200 tpd.

February 20, 2014 The Company has initiated an exploration program at the Company's San Pedro Copper Mine in Michoacán, Mexico. The San Pedro Mine is currently undergoing an expansion project of the existing flotation mill now running at 20 tons per day that will be increased to 200 tons per day. The exploration program will involve extensive rock sampling and trenching throughout the southern portion of the property. The cost of the program is expected to come in on budget at US\$500,000 and will be completed within the next 90 days.

9. RECENT BUSINESS DEVELOPMENTS CONT'D:

March 6: The Company has completed an agreement to increase the tonnage of its High-Grade Copper Purchase Contract with Minera Cobre SA de CV from 50,000 tonnes of high-grade ore to 125,000 tonnes over the next 24 months. The Agreement was amended to account for an increase in operational capacity of the Jovita Mill and the need to secure additional high-grade feedstock.

March 11: Amarium is now 14 days into the program, and is on schedule with over 200 select rock and soil samples having been marked by GPS, bagged, and submitted for metallurgical assays. Additionally, the site survey is now complete and the trenching and pitting program activities are ongoing in conjunction with the surface sampling.

March 24: Our Jovita mine is continuing through the last 21 days of the 45 day test run at a constant daily throughput of 200 tonnes with the copper ore grade recovery averaging at 2%. Our objective now, is to obtain further efficiencies at this level before we further increase production in the third quarter with the ultimate target of reaching 500 tonnes per day by December of this year. The exploration program that commenced on February 20 at our San Pedro Mill property is now 30 days into a scheduled 90 day program. Initial results are indicating that there may be a sufficient copper resource to provide the required ore material to increase the existing 20 tpd to 200 tpd prior to the end of 2014.

April 22: Mr. Henrich Krauss has been appointed to our Executive Staff as the new Senior V.P. of Operations and Production Manager for the San Pedro Mine. Mr. Krauss is a Geologist and Management Consultant with over 35 years of experience in managing mining operations in Mexico, South America and Africa.

April 28: Amarium has completed of the surface trenching phase of our current exploration program at the San Pedro Mine in Michoacán, Mexico. Eight trenches to depths to 25 feet are completed, with samples submitted to the lab for assaying and broad spectrum analysis. Amarium has scheduled drilling to begin on the property by May 15th. The Company will be evaluating the data contained in the assay report in preparation for the drilling program and core logging to begin on schedule next month. The San Pedro soil sampling and trenching program was initiated to expose mineralization along the southern region of the property as a precursor and litmus test to validate further exploration by way of drilling.

AMARIUM TECHNOLOGIES, INC.
Notes to the Consolidated Financial Statements
(Presented in US dollars)

June 30, 2014

June 4

Amarium has initiated drilling at the San Pedro property in Michoacán, Mexico. Amarium has been engaged in exploration of the San Pedro Mine since mid-February, conducting trenching activity and soil sampling throughout the property. The drill program has planned for the completion of 20 drill holes, which will be primarily concentrated along the Southern region.

June 9

Amarium initiates a Copper Mineral Asset Acquisition Program (MAAP). Adam Carter, the President & CEO stated that Amarium's net-earnings over the previous 12 months have significantly exceeded projections, therefore generating cash reserves for reinvestment. Due to the capital surplus and the ongoing relationship with Anglo-Asia Resource Partners' demand to purchase additional copper, the Company is instituting the MAAP to increase value for shareholders.

June 12

Amarium updates to the San Pedro Exploration program. With 6 holes completed of a planned 20, the Company has decided to expand the program by an additional 10 holes that will allow for more extensive coverage of specific areas of interest. Drilling at San Pedro has been concentrated along the Southern region of the property, where previous trenching activity indicated significant mineralization. The San Pedro Mine is a producing copper mine with a 200 ton per day floatation mill

June 18

Amarium signs a Letter of Intent (LOI) to acquire a high-grade copper property in Michoacán, Mexico. This copper property has been previously worked as a smaller scale artisan mine. Due to the prior mining and extensive exploration, management believes there is a sufficiently significant available copper resource at this location to warrant large-scale commercial production. Terms of the pending acquisition have not been disclosed at this time.

June 24

The company has initiated an infrastructure upgrade at the Jovita Mine to facilitate increased production. Upgrades of the roads and loading facilities have been planned for over a year, and are a requirement for the continued expansion of production at the Jovita Mine. The project is scheduled for completion within 90 days, and is budget at an estimated US\$375,000. The Jovita Mine is located in Michoacán, Mexico, and has been recently expanded to an operational capacity of 200 tons per day (tpd).

AMARIUM TECHNOLOGIES, INC.
Notes to the Consolidated Financial Statements
(Presented in US dollars)

June 30, 2014

10. SUBSEQUENT EVENTS:

The following subsequent events occurred after the second quarter ending June 30, 2014:

July 8

Amarium completes of upgrades to the ore processing mill located at the San Pedro Mine. The San Pedro mill now has an operational capacity of 120 tons per day (tpd), an increase of 600% over the previous capacity of 20 tpd. The recent updates will allow Amarium to stay on schedule for increasing the medium term maximum throughput of the mill to 200 tpd by December 2014. Both the San Pedro Copper Mine and the Jovita Mill are located in Michoacán, Mexico.

July 10

The Company appoints Mr. Troy Morgan as the Manager of Operations at the San Pedro Mine located in Michoacán, Mexico. Mr. Morgan has a substantial history with the Company over the past year in a similar capacity at Amarium's other production facility, the Jovita Mine. The Company announced earlier in the week that it had completed upgrades to the processing mill at the San Pedro Mine, increasing the daily tonnage capacity from 20 tons per day (tpd) to 120 tpd. Mr. Morgan, an engineering technician from New York, brings over 25 years of experience in project and process management, with the past 15 years focused specifically on mining operations.

July 29

The Company has signed a definitive agreement to acquire the El Desvan Cobre SA property, located in Michoacán, Mexico. Amarium completed the agreement to acquire a 100% interest in the El Desvan from Minera Rio Cobre SA de CV, after signing a Letter of Intent to acquire the mine on June 18th, 2014. Terms of the agreement have not been released at this time, but the Company reports the value of the acquisition at USD \$7.9 million.

August 6

Amarium reports the commencement of the ore extraction program at the recently acquired El Desvan Cobre mine. El Desvan is located in the Mexican state of Michoacán, within close proximity to both the Company's producing copper mines, San Pedro and La Jovita.

The program has begun limited mining operations at El Desvan by extracting and trucking up to 200 tons of ore daily to supplement production at the San Pedro Mill in the short-term. The San Pedro property is currently undergoing its own exploration program.
