5. Any material reclassification, merger, consolidation, or purchase or sale of a significant amount of assets

   On May 28, 2010, the Company received notification from the appropriate state agencies that the acquisition of Wilon Resources by the Company was effective. On June 3, 2010, final approval was given by FINRA for the share exchange between the Company and Wilon Resources. The Company issued one share of common stock for each share of Wilon stock outstanding (49,207,973 shares) plus one warrant to purchase an additional share exercisable for a period of 5 years from the issue date. In July 2010, the Company canceled 1,000,000 shares of common stock relating to the Wilon acquisition. These shares were owned by the Company. The Company's common stock at June 3, 2010 had a value of $.035 per share making the acquisition price $1,687,279.

   The Company accounted for the business combination using the purchase method. The estimated fair market value of Wilon's net assets (assets less liabilities) was recorded at the value of the acquisition price of $1,687,279. Management reduced its original estimate of the fair market value. This reduction in the estimate had no effect on the recorded amount of the transaction as the excess fair market value over the acquisition price reduced the recorded value of oil and gas properties and equipment. The oil and gas properties consist of 115 natural gas wells, 12,000 acres of mineral rights leases and the gathering system interconnecting the wells. The Company intends to retain a third party to complete a Reserve Report covering the 12,000 acres located in Wayne County, West Virginia substantiating proven and unproven wells. The estimates used by the Company in recording the acquisition could change significantly pending the valuation results of the third party.

Should any liabilities be incurred in the future, they will be accrued based on management's best estimate of the potential loss. As such, there is no adverse effect on our consolidated financial position, results of operations or cash flow at this time. Furthermore, management of the Company does not believe that there are any proceedings to which any director, officer, or affiliate of the Company, any owner of record of the beneficially or more than five percent of the common stock of the Company, or any associate of any such director, officer, affiliate of the Company, or security holder is a party adverse to the Company or has a material interest adverse to the Company.

On November 28, 2011, the Company entered into a Forbearance Agreement ("Agreement") with Caesar Capital Group, LLC due to the inability of the Company to pay the remaining amounts due on two outstanding notes. On December 6, 2012, a default judgment was entered against the Company in the amount of $85,341.13. We own all of our ancillary facilities in West Virginia, inclusive of our gathering system, which are required for production, cleansing and delivery of our produced natural gas. Our first revenue from production was generated in July 2009.

The wells operated and owned by WV are held under the bond of E 3 Petroleum Corp ("E 3"). Through E 3, WV operates 122 natural gas wells that were previously shut-in from June 2005 to April 2010 due to a delivery constraint. WV has entered into an agreement with a third party to allow for the purchase of its natural gas production on a firm capacity basis which management believes will remedy the prior transmission constraint. A list of all wells operated and bonded by E 3 in Wayne County, WV can be found in the Company's unaudited 2013 Annual Report.

US Natural Gas Corp KY ("KY"), a wholly owned subsidiary, concentrates on oil producing activities mainly in the counties of Green, Hart, Adair, Russell, Edmonson, and Monroe in Kentucky. E 3 acts as the bonding and operating entity for all wells in Kentucky in which KY maintains a working interest. On average, KY maintains a 95% working interest and 83% net revenue interest in each well. To date, E 3 has 19 wells under bond of which 12 are currently producing commercially viable crude with minimal revenue. It is KY's intentions to continue to drill new wells on the current leasehold base as well as acquire previously drilled wells for re-entering and placing into production.

Item 14: Management's Discussion and Analysis or Plan of Operation

Plan of Operation

We began operations on March 28, 2008 and are engaged in the oil and natural gas industry focusing on exploration, development, and production. We operate oil and gas wells in which we own the majority of the working interest, and are presently re-working and completing oil and natural gas wells on our current leaseholds in Kentucky and West Virginia. We maintain leaseholds covering approximately 4,600 acres in South Central Kentucky and 12,000 acres in Wayne County, West Virginia and are presently expanding our leasehold interests in both states. Our first revenue from production was generated in July 2009. We have incurred a net loss of $5,402,516 since inception.

Our Kentucky properties, operated by our wholly owned subsidiary US Natural Gas Corp KY ("KY"), are focused in the South Central region of the state encompassing the counties of Allen, Monroe, Metcalfe, Green, Hart, Adair, Edmonson and Barren. We currently have the majority Working Interest in 19 oil wells of which 9 are currently in production.

We also maintain the majority Working Interest in 3 previously producing natural gas wells in Kentucky. One well located in Eastern Kentucky is currently shut-in due to issues with the receiving transmission pipeline. We anticipate that if we elect to expand our operations in this region, we can satisfactorily resolve this issue and place this well back into production. We have reached an agreement with Magnum Hunter for the transmission of natural gas produced from our two natural gas producing wells located in Whitley County, Kentucky. We maintain a majority working interest in each of these wells. Prior to placing these wells into production, we will need to complete the laying of a 1 ¼" extension of our gathering system to a tap into Magnum Hunter's line. With the spot price of natural gas staying at or near $3.35/mcf, management anticipates that the Company will complete the work necessary to place two of the three wells into production during calendar 2014.

Our West Virginia properties, operated by our wholly owned subsidiary US Natural Gas Corp WV ("WV"), are concentrated in Wayne County, West Virginia. We currently have the majority Working Interest in 122 natural gas wells of which 71 are currently in production.

We acquired all wells, and the majority of all leaseholds and right of ways located in West Virginia through the acquisition of Wilon Resources, Inc. in 2010. We are currently addressing the remaining approximate 51 wells through re-entry, swabbing, and completion procedures to place those capable of producing commercially viable natural gas into production. We anticipate that we will complete addressing each of the remaining wells during 2014.

We expect to generate long-term reserve and production growth through drilling activities, re-entry and completion projects, and further acquisitions. We believe that our management's experience and expertise will enable it to identify, evaluate, and develop our oil and natural gas projects.

We continue to seek to identify oil and natural gas wells for possible acquisition. However, there can be no assurance that we will be able to enter into agreements for the acquisition of these oil wells upon terms that are satisfactory to the Company.

We expect to generate long-term reserve and production growth through drilling activities, re-entry and completion projects, and further acquisitions. We believe that our management's experience and expertise will enable us to identify, evaluate, and develop oil and natural gas projects.

While we anticipate the majority of future capital expenditures will be expended on the acquisition of previously drilled wells, reworking of wells, and drilling of wells, we intend to use our experience and regional expertise to add leasehold interests to the inventory of leases for future drilling activities, as well as property acquisitions.

On March 13, 2014, the Company formed The Greater Cannabis Company, LLC ("GCC") in the state of Florida. GCC will act as the Company's operating subsidiary for its new operation in the medical and recreational marijuana market.
