**Information required for compliance with the provisions of the OTC Markets, Inc.,  
OTC Pink Disclosure Guidelines (Version 1.0 1/03/13)**

Because we want to provide more meaningful and useful information, this Disclosure Statement contains certain “forward-looking statements” (as such term is defined in Section 21E of the Securities Exchange Act of 1934, as amended). These statements reflect our current expectations regarding our possible future results of operations, performance, and achievements. These forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, regulation of the Securities and Exchange Commission, and common law.

Wherever possible, we have tried to identify these forward-looking statements by using words such as “anticipate,” “believe,” “estimate,” “expect,” “plan,” “intend,” and similar expressions. These statements reflect our current beliefs and are based on information currently available to us. Accordingly, these statements are subject to certain risks, uncertainties, and contingencies, which could cause our actual results, performance, or achievements to differ materially from those expressed in, or implied by, such statements. These risks, uncertainties and contingencies include, without limitation, the factors set forth under “Item 4. Management's Discussion and Analysis or Plan of Operation.” We have no obligation to update or revise any such forward-looking statements that may be made to reflect events or circumstances after the date of this Disclosure Statement.

## **Item 1.        The exact name of the Issuer and its predecessors (if any).**

The Company was originally incorporated in the State of Nevada on April 6, 2000 as eXmailit.com to engage in the business of providing Internet-based email-to-mail printing and delivery services.

On November 25, 2003, we acquired all of the issued and outstanding capital stock of Cirond Networks Inc., a Nevada corporation ("CNI"), in exchange for 17,000,000 shares of our common stock. As a result of this share exchange, the parent company of CNI owned approximately 51.2% of our issued and outstanding shares and CNI became our wholly-owned subsidiary. We changed our name to Cirond Corporation as of October 14, 2003. CNI was founded in March 2001 to develop technologies designed to enhance the performance and security of wireless networking technologies.

On August 31, 2006 the Company's shareholders approved an amendment to the registrant's Articles of Incorporation to change its name to Amarium Technologies, Inc. In connection with the new name, the registrant has changed its trading symbol to AMMG and its CUSIP number to 02311N109 to be effective at the open of market August 31, 2006. Effective on October 6, 2014 the Company changed its name to Calissio Resources Group, Inc. having new CUSIP number of 130 88P 102. The Company now does business as Calissio Resources Group, Inc.

Other than listed above, the corporation has used no other names in the past five years.

Is the Transfer Agent registered under the Exchange Act: Yes ☒ No ☐

List any restrictions on the transfer of securities: As of October 28, 2014, other than 5,579,423 shares of its common stock that are free-trading, all the other 102,280,577 shares are restricted and subject to Rule 144. The combined total of free trading and restricted shares issued and outstanding on October 28, 2014 are 107,860,000.

Describe any trading suspension orders issued by the SEC in the past 12 months: **None**

#### **Item 4. Issuance History**

There were issuances totaling 42,300,000 shares for the last year of 2012 and to the present March 31, 2013. On December 31, 2010 the number of shares outstanding was 456,478,578, on December 31, 2011 the number of shares outstanding was also 456,478,578, on December 2012 the number of shares outstanding was 498,778,578 and on December 31, 2013 the total number of shares outstanding remained the same at 498,778,578 while the number of authorized shares outstanding of 500,000,000 was increased by 100,000,000 to now have authorized shares of 600,000,000.

On February 4, 2014: 44.5 million shares were issued at \$0.001 and on March 18, 2014 28.5 million shares were issued at \$0.001 for debt reduction in the amounts of \$44,500 and \$28,500 respectively. Total shares issued and outstanding September 30, 2014 were 571,778,578. On October 6, 2014 the Company's 1 for 200 reverse split became effective and there were 2,858,893 shares issued and outstanding with total authorized shares of 300,000,000. On October 7, 2014 the Company issued 100 Million shares at \$0.05 to Industrias Calissio SUR SA for net proceeds to the Company of \$5,000,000 and October 8, 2014 there were 5 Million shares were issued at \$0.001 to reduce the outstanding debt.

#### **Item 5. Financial Statements**

The financial statements for the Quarter Ending September 30, 2014, are being filed with OTC Markets, Inc. contemporaneously herewith, as Quarterly Reports for the respective quarterly period.

#### **Item 6. Describe the Issuer's Business, Products and Services.**

##### **A. Description of the Issuer's Business Operations:**

We were originally incorporated in the State of Nevada on April 6, 2000. The Company is in the business of resource property acquisitions and development and currently has an operating copper mine.

##### **CURRENT DEVELOPMENTS:**

As a result of the significant challenges facing the Company in the technology business, management ceased its involvement in the technology sector in the early in 2013. Presently Management has completely transitioned operations and the focus its business efforts to be exclusively in the mining sector operating copper mines. The Company's Jovita property covers a total of 250 hectares and is located in the municipality of Vialla Madero, Michoacán and 150 meters east of the town "La Carpinteria". Coordinates (UTM) 02, 56,719 East and 21, 32,971 North, and only 47 km from the city of Morelia Michoacán. The main access to the property is from highway number 14 that comes from Morelia, Michoacán going to Patzcuaro, Michoacán. Amarium has also acquired the San Pedro Copper Mine in Michoacán, Mexico. The flotation mill at the San Pedro Mine currently has an operating at 120 tons per day (tpd) with a capacity of 200 tpd, and after upgrades the mill will have a capacity of 500 tpd. The Jovita mine is currently running at 200 tpd and after expansion it is expected to be at 500 tpd by the end of 2014. An exploration program commenced on the Company's San Pedro Copper Mine in Michoacán, Mexico and will involve extensive rock sampling and trenching throughout the southern portion of the property. Expectations are to prove a significant and sufficient copper resource to run the mine at 500 tpd.

## **Item 6: CURRENT DEVELOPMENTS cont'd:**

On May 22, 2013 the Company Amarium signed a Definitive Agreement ("Agreement") with Minerales Consolidados S.A. de C.V. (MCSA) to purchase the Jovita Mine and a 40 ton per day (tpd) copper mill. The Jovita Mine is a producing copper concentrate mine operating in Michoacán, a well-known base metals mining region in Mexico. Under the terms of the Agreement, Amarium will acquire 100% ownership of the Jovita Mine for aggregate expenditures of USD \$6.1 Million over the next 3 years. Expenditures include a payment of USD \$2.5 Million and 1 million shares of Amarium to MCSA, within 30 days. Additional payments of 1 million shares will also be issued to MCSA, in 12 months and 24 months. Amarium will also be required to spend USD \$3 million in exploration activities on the property over the next 36 months. MCSA is transitioning the management and operation of the Jovita Mine to Amarium over the next 60 days.

The Jovita Mine encompasses a 250 hectare mineral concession and production facility located in the Mexican state of Michoacán. The current mill operation allows for ore to be processed onsite into copper concentrate for shipment to foreign buyers. Michoacán is a historic mining region in Western Mexico with a large deep-sea port located along the Pacific coastline that is well situated for transport and the supply of Western US, Asian and other Pacific Rim markets.

On June 5, 2013 the Company has executed a Copper Stream Sale Agreement ("Agreement") with Anglo-Asia Resource Partners ("Anglo-Asia") for US\$8.75 million. Under the terms of the Agreement, Anglo-Asia is entitled to 18% of the copper concentrate produced at the Jovita Mill operating in Michoacán, Mexico. Amarium will allocate the sale proceeds from the Agreement to complete the financial obligations outstanding from the Jovita Mine acquisition and the remaining funds will be expended on upgrades and expansion of the existing flotation mill and facilities.

The Agreement entitles Anglo-Asia, a private Hong Kong partnership that is focused on procuring precious and base metals for the Asian market, to 18% of the monthly production at the Jovita Mill. Anglo-Asia will make an initial payment of US\$8.75 million to Amarium and on-going payments of US\$0.75 per pound of copper produced. If the spot price of copper was to decline below US\$2.50 per pound, Anglo-Asia's on-going payment obligations would be reduced to US\$0.50 per pound of copper. Additional terms of the Agreement will be released at a later date.

## **Item 6: CURRENT DEVELOPMENTS cont'd:**

On August 21, 2013, the Company has acquired the San Pedro Copper Mine and Flotation Mill in Michoacán, Mexico, from Minera Rio Cobre SA de CV. The San Pedro Mine, located in southwestern Michoacán, is a past producer with a 20 ton-per-day (tpd) flotation mill currently on the property. The San Pedro acquisition is a cash and shares purchase transaction totaling \$3 million USD consisting of \$2.5 million USD and \$500,000 paid in stock by issuing 2 million common shares valued @ \$0.25.

Due to these activities occurring in the later stage of the second quarter ending June 30, 2013 and not fully taking effect until on or around July 1, 2013 the Company will be recognizing the effects of the above mentioned business activities in the financial statements starting in the third quarter July 1, 2013 and onwards. The Company has completed an agreement with Minera Cobre SA de CV to purchase 50,000 tonnes of high-grade ore over the next 24 months. The purchased ore is to have an average grade in excess of 2.1% copper per tonne and is to be used as feedstock for both the Jovita Mill and the San Pedro Mill, located in Michoacán, Mexico, while the Company conducts advanced exploration activities at the Jovita property.

Copper production is currently ahead of targets at the Jovita Mill in Michoacán, Mexico. The primary factors cited for the higher than anticipated production were increased operational efficiency from recent implementations and higher than expected ore grades. Production results will be reflected in the Company's next quarterly report for the period ending September 30. The Company also announced that it is conducting an initial assessment to upgrade the existing 20 ton-per-day San Pedro Mill, also located in Michoacán.

The Company's first shipment of copper production to Anglo Asia Resource Partners is currently in transit. The initial copper shipment of 65,000 pounds to its destination in China begins the fulfillment of the copper stream sales agreement the Company entered into with Anglo Asia on June 5, 2013. Anglo Asia Resource Partners is a private Hong Kong partnership that is focused on procuring precious and base metals for the Asian market's manufacturing and industrial supply chain.

Additional copper shipments are now scheduled to the Asian market, due to increased sales orders from Anglo-Asia Resource Partners. Amarium is currently organizing shipping and production schedules at both the Jovita and San Pedro Mine facilities to ensure the Company successfully fulfills the new sales orders. Anglo-Asia Resource Partners is a private Hong Kong partnership that is focused on procuring precious and base metals for the Asian market's manufacturing and industrial supply chain.

## **Item 6: CURRENT DEVELOPMENTS cont'd:**

Net Earnings for the 3<sup>rd</sup> quarter ending September 30, 2013, of \$392,034, the Company's first earnings report to include revenues from the producing La Jovita and San Pedro Copper Mines in Michoacán, Mexico. Amarium reported total production revenues from both sites of US\$784,035 during the period.

January 22, 2014 The Mill Expansion Programs for both the Jovita Mine and San Pedro Mine are progressing on schedule, and have met all of their aggressive milestones to date. In August, Amarium announced it had initiated an expansion program at the Jovita Mine, to expand production from the current 40 tons per day (tpd) to 500 tpd. Subsequently in December, the Company announced approval for upgrades to the San Pedro Mill that will bring production from 20 tpd to 200 tpd.

February 20, 2014 The Company has initiated an exploration program at the Company's San Pedro Copper Mine in Michoacán, Mexico. The San Pedro Mine is currently undergoing an expansion project of the existing flotation mill now running at 20 tons per day that will be increased to 200 tons per day. The exploration program will involve extensive rock sampling and trenching throughout the southern portion of the property. The cost of the program is expected to come in on budget at US\$500,000 and will be completed within the next 90 days.

## **Item 6: CURRENT DEVELOPMENTS cont'd:**

March 6: The Company has completed an agreement to increase the tonnage of its High-Grade Copper Purchase Contract with Minera Cobre SA de CV from 50,000 tonnes of high-grade ore to 125,000 tonnes over the next 24 months. The Agreement was amended to account for an increase in operational capacity of the Jovita Mill and the need to secure additional high-grade feedstock.

March 11: Amarium is now 14 days into the program, and is on schedule with over 200 select rock and soil samples having been marked by GPS, bagged, and submitted for metallurgical assays. Additionally, the site survey is now complete and the trenching and pitting program activities are ongoing in conjunction with the surface sampling.

March 24: Our Jovita mine is continuing through the last 21 days of the 45 day test run at a constant daily throughput of 200 tonnes with the copper ore grade recovery averaging at 2%. Our objective now, is to obtain further efficiencies at this level before we further increase production in the third quarter with the ultimate target of reaching 500 tonnes per day by December of this year. The exploration program that commenced on February 20 at our San Pedro Mill property is now 30 days into a scheduled 90 day program. Initial results are indicating that there may be a sufficient copper resource to provide the required ore material to increase the existing 20 tpd to 200 tpd prior to the end of 2014.

April 22: Mr. Henrich Krauss has been appointed to our Executive Staff as the new Senior V.P. of Operations and Production Manager for the San Pedro Mine. Mr. Krauss is a Geologist and Management Consultant with over 35 years of experience in managing mining operations in Mexico, South America and Africa.

April 28: Amarium has completed of the surface trenching phase of our current exploration program at the San Pedro Mine in Michoacán, Mexico. Eight trenches to depths to 25 feet are completed, with samples submitted to the lab for assaying and broad spectrum analysis. Amarium has scheduled drilling to begin on the property by May 15<sup>th</sup>. The Company will be evaluating the data contained in the assay report in preparation for the drilling program and core logging to begin on schedule next month. The San Pedro soil sampling and trenching program was initiated to expose mineralization along the southern region of the property as a precursor and litmus test to validate further exploration by way of drilling.

## **Item 6: CURRENT DEVELOPMENTS cont'd:**

### **June 4**

Amarium has initiated drilling at the San Pedro property in Michoacán, Mexico. Amarium has been engaged in exploration of the San Pedro Mine since mid-February, conducting trenching activity and soil sampling throughout the property. The drill program has planned for the completion of 20 drill holes, which will be primarily concentrated along the Southern region.

### **June 9**

Amarium initiates a Copper Mineral Asset Acquisition Program (MAAP). Adam Carter, the President & CEO stated that Amarium's net-earnings over the previous 12 months have significantly exceeded projections, therefore generating cash reserves for reinvestment. Due to the capital surplus and the ongoing relationship with Anglo-Asia Resource Partners' demand to purchase additional copper, the Company is instituting the MAAP to increase value for shareholders.

### **June 12**

Amarium updates to the San Pedro Exploration program. With 6 holes completed of a planned 20, the Company has decided to expand the program by an additional 10 holes that will allow for more extensive coverage of specific areas of interest. Drilling at San Pedro has been concentrated along the Southern region of the property, where previous trenching activity indicated significant mineralization. The San Pedro Mine is a producing copper mine with a 200 ton per day floatation mill

### **June 18**

Amarium signs a Letter of Intent (LOI) to acquire a high-grade copper property in Michoacán, Mexico. This copper property has been previously worked as a smaller scale artisan mine. Due to the prior mining and extensive exploration, management believes there is a sufficiently significant available copper resource at this location to warrant large-scale commercial production. Terms of the pending acquisition have not been disclosed at this time.

### **June 24**

The company has initiated an infrastructure upgrade at the Jovita Mine to facilitate increased production. Upgrades of the roads and loading facilities have been planned for over a year, and are a requirement for the continued expansion of production at the Jovita Mine. The project is scheduled for completion within 90 days, and is budgeted at an estimated US\$375,000. The Jovita Mine is located in Michoacán, Mexico, and has been recently expanded to an operational capacity of 200 tons per day (tpd).

## **Item 6: CURRENT DEVELOPMENTS concluded:**

### **July 8**

Amarium completes of upgrades to the ore processing mill located at the San Pedro Mine. The San Pedro mill now has an operational capacity of 120 tons per day (tpd), an increase of 600% over the previous capacity of 20 tpd. The recent updates will allow Amarium to stay on schedule for increasing the medium term maximum throughput of the mill to 200 tpd by December 2014. Both the San Pedro Copper Mine and the Jovita Mill are located in Michoacán, Mexico.

### **July 10**

The Company appoints Mr. Troy Morgan as the Manager of Operations at the San Pedro Mine located in Michoacán, Mexico. Mr. Morgan has a substantial history with the Company over the past year in a similar capacity at Amarium's other production facility, the Jovita Mine. The Company announced earlier in the week that it had completed upgrades to the processing mill at the San Pedro Mine, increasing the daily tonnage capacity from 20 tons per day (tpd) to 120 tpd. Mr. Morgan, an engineering technician from New York, brings over 25 years of experience in project and process management, with the past 15 years focused specifically on mining operations.

### **July 29**

The Company has signed a definitive agreement to acquire the El Desvan Cobre SA property, located in Michoacán, Mexico. Amarium completed the agreement to acquire a 100% interest in the El Desvan from Minera Rio Cobre SA de CV, after signing a Letter of Intent to acquire the mine on June 18<sup>th</sup>, 2014. Terms of the agreement have not been released at this time, but the Company reports the value of the acquisition at USD \$7.9 million.

### **August 6**

Amarium reports the commencement of the ore extraction program at the recently acquired El Desvan Cobre mine. El Desvan is located in the Mexican state of Michoacán, within close proximity to both the Company's producing copper mines, San Pedro and La Jovita.

The program has begun limited mining operations at El Desvan by extracting and trucking up to 200 tons of ore daily to supplement production at the San Pedro Mill in the short-term. The San Pedro property is currently undergoing its own exploration program.

### **August 19**

The Company has secured a US \$3.15 Million financing with Anglo Asia Resource Partners. Repayment of this financing will be in the form of a revenue streaming agreement with Anglo Asia receiving 75% of all net revenue until payback and 22% of all net revenue in perpetuity. The previous sales contract with Anglo Asia receiving 18% of all production at a discounted price of \$0.75 USD per pound will remain in effect along with this new streaming agreement.

**Item 6: CURRENT DEVELOPMENTS concluded:**

**Subsequent events:**

The following subsequent events occurred after the third quarter ending September 30, 2014; Effective October 6, 2014 the Company has changed its name to Calissio Resources Group, Inc. with a 1 for 200 reverse split. The new symbol of CRGP commenced being used as of October 31, 2014.

The name change to Calissio Resources Group, Inc. and a 1 for 200 reverse split was enacted with the total shares issued and outstanding on October 6, 2014 being reflected as 2,858,893 on these Quarterly Financial Statements ending September 30, 2014. The 571,778,578 shares issued and outstanding on September 30, 2014 became 2,858,893 shares on October 6, 2014 though were recorded to reflect post reverse split on September 30, 2014.

On October 8, 2014 5,000,000 shares were issued at \$0.001 to reduce debt. On October 7, 2014 100 Million shares at \$0.05 were issued to Industrias Calissio SUR SA for net proceeds of \$5,000,000 to the Company. Total shares issued and outstanding on October 28, 2014 are 107,860,000.

**Adam Carter. President, Secretary and Director**

Based originally in Southern Australia, Mr. Carter has acquired more than 9 years' experience in the field of industrial equipment sales, leasing and supply as an agent servicing primarily the mining sector. Mr. Carter has consequently developed many contacts and business relationships worldwide and has also acted as a consultant facilitating the completion of various mining transactions during this time. Prior to his current focus, Mr. Carter began his involvement in the mining industry and spent more than 6 years working as a contracted staker, prospector and ground work specialist. In addition, Mr. Carter has been an active investor in primarily mining and resource-based companies around the world.

### **Alberto Navarro. Treasurer and Director**

Over the past 7 years, Mr. Navarro has been a contractor in the South American mining industry specializing as a project planner and logistics coordinator. Through his travels and working relationships in this role, Mr. Navarro has gained an intimate knowledge of all aspects of the mining business from exploration to production. Previous to his mining industry experience, Mr. Navarro began his career in Central Chile as an operations research consultant and project planner within the forestry and construction industries for more than 6 years. Additionally, Mr. Navarro's responsibilities in this role included accounting and administrative support in the generation of IAS/GAAP compliant financial reports.

### **Sebastian Cervantes Cuevas, Director**

Mr. Cuevas was previously engaged with numerous European and South American mining companies over the past 20 years and specializes in managing base metals exploration programs.
