Manzo Pharmaceuticals, Inc.
(Formerly Fortune Oil & Gas, Inc.)
Notes to Financial Statements
January 1, 2014 – September 30, 2014

NOTE 1 - ORGANIZATION AND OPERATIONS

Organization

Manzo Pharmaceuticals, Inc. (formerly - Fortune Oil & Gas Inc.) (the "*Company* ") was incorporated under the laws of the State of Nevada on January 24, 1980. The Company is an independent energy company engaged in the exploration, development, exploitation and production of oil and natural gas, in locations off the shore of Indonesia with operations focused mainly on the North Java Sea, Indonesia. In April of 2012 the company sold off its subsidiary corporations but maintained its intellectual properties, commission and license agreements, generating minimal but measurable revenue and owning substantial assets in the form of intellectual property as it operates to this day.

The Company was originally incorporated with an authorized capital of 25,000,000 shares of common stock with a par value of one cent ($0.001) per share. On 10/1/1999 the Company amended its articles of incorporation, changing its authorizing common stock to 50,000,000 shares at $0.001 par value. On 8/22/2002 the company amended its articles of incorporation once more to increase the authorized common shares to 100,000,000 with a par value of .001, and then again on 11/15/2010 to increase the authorized shares to 888,000,000 at a par value of.001. On 2/16/2012, the company amended its articles of incorporation to increase its number of authorized shares to 5,000,000,000 with a par value of .001, and on 4/25/2012, the company moved its state of incorporation to Wyoming.

On June 18, 2014 the company changed its name to Manzo Pharmaceuticals, Inc. and appointed Kenneth Manzo, an experienced chemist and licensed pharmacist, to the board of directors as the sole Officer and Director of the company. Mr. Manzo's appointment was done in conjunction with an agreement that laid out the acquisition of Manzo Pharmaceuticals LLC, an alternative healthcare company with patents for a probiotic remedy for lactose intolerance. The company also owns other products including a remedy for babies suffering from colic and/or digestive gas. The company sells this remedy online and plans to add many more to its product line in the near future. Fortune oil and gas will submit for a name change to Manzo pharmaceuticals and the business model will follow to target the multi-billion dollar alternative health sector.

The Company acquired 100% of Manzo Pharmaceutical LLC a Pennsylvania LLC in exchange for 2,000,000 shares of its Series "A; preferred stock on May 1 2014. On September 17, 2014 the Company effectuated a reverse 10 for 1 stock split. All financial has been adjusted to reflect this switch.

NOTE 2- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This summary of significant account policies of the Company is presented to assist in understanding the Company's financial statements. The financial statements and the notes are the representation of the Company's management, who are responsible for their integrity and objectivity. These accounting policies conform to U.S. generally accepted accounting principles ("US GAAP") and have been consistently applied in the preparation of the financial statements.

Basis of Presentation

The Consolidated Financial Statements include the accounts of the Company and its majority-owned and wholly-owned

subsidiaries. All significant intercompany account balances, transactions, profits and losses have been eliminated.

Use of Estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Fair Value of Financial Instruments

For certain of the Company's financial instruments, including cash and cash equivalents, accounts receivable, and accounts payable, the carrying amounts approximate fair value due to their short maturities.

Revenue Recognition

The majority of the Company's revenue is derived from the sale of recycled OEM products and aftermarket products. Revenue is recognized when the products are shipped, title and risk of loss transfer to the buyer, and collectability is reasonably assured, subject to an allowance for estimated returns, discounts and allowances that management estimates based upon historical information. Retail revenues are recognized when customers pay for parts, and wholesale product revenues are recognized when customer weight certificates are received following shipments. Historically, there have been very few sales returns and adjustments that impact the ultimate collection of revenues; therefore, no material provisions have been made when the sale is recognized.

Cash and Cash Equivalents

Cash comprise cash in hand and cash held on demand with banks. The Company considers all highly liquid investments with original maturities of 90 days or less to be cash equivalents. Cash equivalents are carried at cost, which approximates market value. Cash and cash equivalents comprise of the non-interest bearing checking accounts in US Dollars.

Accounts Receivables, Net

Accounts receivable represent amounts due from customers on product and other sales. These accounts receivable, which are reduced by an allowance for doubtful accounts, are recorded at the invoiced amount and do not bear interest. The Company evaluates the collectability of its accounts receivable based on a combination of factors, including whether sales were made pursuant to letters of credit. In cases where management is aware of circumstances that may impair a specific customer's ability to meet its financial obligations, management records a specific allowance against amounts due, and reduces the net recognized receivable to the amount the Company believes will be collected. For all other customers, the Company maintains an allowance that considers the total receivables outstanding, historical collection rates and economic trends. Accounts are written off when all efforts to collect have been exhausted.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost less accumulated depreciation. Expenditures for major additions and improvements are capitalized. As property and equipment are sold or retired, the applicable cost and accumulated depreciation are removed from the accounts and any resulting gain or loss thereon is recognized as operating expenses.

Depreciation is calculated using the straight-line method over the estimated useful lives or, in the case of leasehold improvements, the term of the related lease, including renewal periods, if shorter. Estimated useful lives are as follows:

Buildings	40 years
Equipment	5-15 years

The Company reviews property, plant and equipment and all amortizable intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable. Recoverability is based on estimated undiscounted cash flows. Measurement of the impairment loss, if any, is based on the difference between the carrying value and fair value.

Impairment of Long-Lived Assets and Amortizable Intangible Assets

The Company follows ASC 360-10, "Property, Plant, and Equipment," which established a "primary asset" approach to determine the cash flow estimation period for a group of assets and liabilities that represents the unit of accounting for a long-lived asset to be held and used. Long-lived assets to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less cost to sell.

Intangible Assets - Goodwill

The excess of the purchase price over net tangible and identifiable intangible assets of business acquired is carried as Goodwill on the balance sheet. Goodwill is not amortized, but instead is assessed for impairment at least annually and upon the occurrence of certain triggering events or substantive changes in circumstances that indicate that the fair value of goodwill may be impaired. Measurement of the impairment loss, if any, is based on the difference between the carrying value and fair value of reporting unit. The goodwill impairment test follows a two-step process. In the first step, the fair value of a reporting unit is compared to its carrying value. If the carrying value of a reporting unit exceeds its fair value, the second step of the impairment test is performed for purposes of measuring the impairment. In the second step, the fair value of the reporting unit is allocated to all of the assets and liabilities of the reporting unit to determine an implied goodwill value. If the carrying amount of the reporting unit's goodwill exceeds the implied fair value of goodwill, an impairment loss will be recognized in an amount equal to that excess. There were no material impairments to the carrying value of long-lived assets and intangible assets subject to amortization during the six months ended September 30, 2014 and 2013.

Business segments

ASC 280, "Segment Reporting" requires use of the "management approach" model for segment reporting. The management approach model is based on the way a company's management organizes segments within the company for making operating decisions and assessing performance. The Company determined it has one operating segments as of September 30, 2014 and 2013.

Fair Value Measurements

For certain financial instruments, including accounts receivable, accounts payable, interest payable, advances payable and notes payable, the carrying amounts approximate fair value due to their relatively short maturities.

On January 1, 2008, the Company adopted ASC 820-10, "Fair Value Measurements and Disclosures." ASC 820-10 defines fair value, and establishes a three-level valuation hierarchy for disclosures of fair value measurement that enhances disclosure requirements for fair value measures. The carrying amounts reported in the consolidated balance sheets for receivables and current liabilities each qualify as financial instruments and are a reasonable estimate of their fair values because of the short period of time between the origination of such instruments and their expected realization and their current market rate of interest. The three levels of valuation hierarchy are defined as follows:

Level 1 inputs to the valuation methodology are quoted prices for identical assets or liabilities in active markets.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The Company did not identify any non-recurring assets and liabilities that are required to be presented in the balance sheets at fair value in accordance with ASC 815.

In February 2007, the FASB issued ASC 825-10 "Financial Instruments."ASC 825-10 permits entities to choose to measure many financial assets and financial liabilities at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. ASC 825-10 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company adopted ASC 825-10 on January 1, 2008. The Company chose not to elect the option to measure the fair value of eligible financial assets and liabilities.

Income Taxes

When tax returns are filed, it is highly certain that some positions taken would be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above is reflected as a liability for unrecognized tax benefits in the accompanying balance sheets along with any associated interest and penalties that would be payable to the taxing authorities upon examination.

Applicable interest and penalties associated with unrecognized tax benefits are classified as additional income taxes in the statements of operations.

Deferred income taxes are provided using the liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carry-forwards, and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are

Special Purpose Entities

The Company does not have any off-balance sheet financing activities.

Net Income per Share

The Company computes net income (loss) per share in accordance with ASC 260-10, "Earnings Per Share." The basic net loss per common share is computed by dividing the net loss by the weighted average number of common shares outstanding. Diluted net loss per share gives effect to all dilutive potential common shares outstanding during the period using the "as if converted" basis.

Common Stock

There is currently only one class of common stock. Each share common stock is entitled to one vote. The authorized number of common stock of the Company at September 30, 2014 was 5,000,000,000 shares with a nominal value per share of $0.001. Authorized shares that have been issued and fully paid amounted to 388,521,168 shares of common stocks.

Preferred Stock

The Company's Board of Directors has authorized the issuance of Series "A" Preferred stock of 2,000,000 with a nominal

value per share of $0.0001. 2,000,000 series "A" shares have been issued and each preferred share carries the voting rights of 1,000 common shares.

NOTE 3 - RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

No. 2012-02, July 2012, Intangibles—Goodwill and Other (Topic 350): In accordance with the amendments in this update, an entity has the option first to assess qualitative factors to determine whether the existence of events and circumstances indicates that it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. However, if an entity concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount in accordance with Subtopic 350-30.

No. 2012-06, October 2012, Business Combinations (Topic 805): When a reporting entity recognizes an indemnification asset (in accordance with Subtopic 805-20) as a result of a government-assisted acquisition of a financial institution and subsequently a change in the cash flows expected to be collected on the indemnification asset occurs (as a result of a change in cash flows expected to be collected on the assets subject to indemnification), the reporting entity should subsequently account for the change in the measurement of the indemnification asset on the same basis as the change in the assets subject to indemnification. Any amortization of changes in value should be limited to the contractual term of the indemnification agreement (that is, the lesser of the term of the indemnification agreement and the remaining life of the indemnified assets).

No. 2013-01, January 2013, Balance Sheet(Topic 210): The amendments in this Update affect entities that have derivatives accounted for in accordance with Topic 815, including bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with Section 210-20-45 or Section 815-10-45 or subject to an enforceable master netting arrangement or similar agreement. Entities with other types of financial assets and financial liabilities subject to a master netting arrangement or similar agreement also are affected because these amendments make them no longer subject to the disclosure requirements in Update 2011-11.

NOTE 4 - ACCOUNTS RECEIVABLE

The company currently has no receivables as all accounts are paid in full as of September 30, 2014.

NOTE 5 – NET INCOME PER SHARE

The following table sets forth the information used to compute basic and diluted net income per share attributable to MNZO for the nine months ended September 30, 2014:

	9/30/2014	9/30/2013
Net Income (Loss)	$ (5,914,042)	$ 0
Weighted-average common shares outstanding basic:		
Weighted-average common stock basic	299,076,723	268,521,168
Equivalents		
Stock options	-	-
Warrants	-	-
Convertible Notes	-	-
Weighted-average common shares outstanding- Diluted	299,076,723	268,521,168

NOTE 6 - ACQUISITIONS AND INTANGIBLES

During the fiscal year ended December 31, 2012, the Company acquired Fortune Oil & Gas Inc.. The acquisitions were also accounted for as business purchases and recorded at the estimated fair values of the net tangible and identifiable intangible assets acquired.

Intangible assets consist of the following:

	9/30/2014	12/31/2013
Trademarks	$ 65,000	$ 65,000
Software	5,000	5,000
Less: Accumulated amortization Impairment	0	0
Intangible Assets, Net	70,000	70,000
Goodwill	$ 110,100	$ 110,100
Less: impairment	0	0
Goodwill, Net	$ 110,100	$ 110,100

NOTE 7 - CONVERTIBLE PROMISSORY NOTES

As of September 30, 2014, the company was originally owed a balance of $168,800.00 from past loans that have been put into four convertible notes dated as follows: Note dated 5/17/2011 for $70,000.00 USD, Note dated 5/27/2011 for $100,000.00 USD, Note dated 8/15/2011 for $60,000.00 USD, Note dated 9/29/2011 for $80,000.00 USD. In June of 2014, Peachtree Capital LLC acquired the notes and then sold 50% of each note to two third parties in the amounts of $84,400 acquired by Globe Idol Capital Inc. and $84,400 to Eastlight Enterprises, Inc. All four of these convertible debt notes convert to common shares at a rate of 45% discount to the current market price. This market price is calculated using an average of the lowest five closing bids over the ten days prior to the conversion should one take place. This allows for a variable conversion price that will convert into an unfair amount of common shares. All four note were due in full immediately, and were therefore immediately in default.

NOTE 8 - GOING CONCERN

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. Currently, the Company has limited operating history and has incurred continuing operating losses, and as of September 30, 2014 the Company had insufficient working capital on hand. These factors raise substantial doubt about the Company's ability to continue as a going concern. Management believes that the Company's capital requirements will depend on many factors including the success of the Company's development efforts and its efforts to raise capital. Management also believes the Company needs to raise additional capital for working capital purposes. There is no assurance that such financing will be available in the future. The conditions described above raise substantial doubt about our ability to continue as a going concern. The financial statements of the Company do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts and classifications of liabilities that might be necessary should the Company be unable to continue as a going concern.

NOTE 9 - COMMITMENTS AND CONTINGENCIES

Commitments:

None.

Contingencies:

None.

NOTE 10 - DISCONTINUED OPERATIONS

On or around April of 2012, the company was divested of its mining operations, but continued operating as a licensing company maintaining its intellectual property and attempting to license it. Currently, management is preparing to acquire Manzo pharmaceuticals, which will change the company direction to include the sale of alternative health aids.

NOTE 11- RELATED PARTY TRANSACTIONS

During the past six months ended September 30, 2014, the Company has had no related party transactions.

NOTE 12- INCOME TAXES

Deferred income tax assets and liabilities are computed annually for differences between financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized. Income tax expense is the tax payable or refundable for the period plus or minus the change during the period in deferred tax assets and liabilities.

The effective tax rate on the net loss before income taxes differs from the U.S. statutory rate as follows:

	9/30/2014
U.S statutory rate	34.00%
Less valuation allowance	(34.00)%
Effective tax rate	0.00%

The significant components of deferred tax assets and liabilities are as follows:

	9/30/2014
Deferred tax assets	
Net operating losses	$ (8,729,154)
Deferred tax liability	
Net deferred tax assets	(2,967,912)
Less valuation allowance	2,967,912
Deferred tax asset - net valuation allowance	$ 0

On an interim basis, the Company has a net operating loss carryover of approximately $8,729,154 available to offset future

income for income tax reporting purposes, which will expire in various years through 2032, if not previously utilized. However, the Company's ability to use the carryover net operating loss may be substantially limited or eliminated pursuant to Internal Revenue Code Section 382. The Company adopted the provisions of ASC 740-10-50, formerly FIN 48, and "Accounting for Uncertainty in Income Taxes". The Company had no material unrecognized income tax assets or liabilities as of September 30, 2014.

The Company's policy regarding income tax interest and penalties is to expense those items as general and administrative expense but to identify them for tax purposes. During the six months ended September 30, 2014, there were no income tax, or related interest and penalty items in the income statement, or liabilities on the balance sheet. The Company files income tax returns in the U.S. federal jurisdiction and Nevada state jurisdiction. We are not currently involved in any income tax examinations.

END OF NOTES TO FINANCIAL STATEMENTS FOR THE THREE MONTHS ENDED September 30, 2014

6) Describe the Issuer's Business, Products and Services

A. As of 9/30/14: Manzo Pharmaceuticals, LLC. is a specialty pharmaceutical company that is developing a range of innovative and affordable formulations for various drugs and supplements. Manzo Pharmaceuticals is focused on addressing the unmet medical needs of patients with innovative, patient-friendly and affordable solutions. Manzo Pharmaceuticals is currently engaged in research and development of a patented new experimental product that will help people with lactose intolerance by removing the symptoms for months at a time after taking it only for a short time. Other products include a safe and natural solution for babies with colic, gas, and stomach discomfort that will be released for sale to the public very shortly.
