Forward-Looking Statements

This Report contains forward-looking statements. Any statements contained in this Report that are not statements of historical fact may be deemed to be forward-looking statements. You can identify forward-looking statements as those that are not historical in nature, particularly those that use terminology such as “may,” “will,” “should,” “expects,” “anticipates,” “contemplates,” “estimates,” “believes,” “plans,” “projects,” “predicts,” “potential,” or “continue” or the negative of these similar terms. In evaluating these forward-looking statements, you should consider various factors, including the following: (a) those risks and uncertainties related to general economic conditions, (b) whether we are able to manage our planned growth efficiently and operate profitably, (c) whether we are able to generate sufficient revenues or obtain financing to sustain and grow our operations, (d) whether we are able to successfully fulfill our primary requirements for cash. The Company’s actual results may differ significantly from the results projected in the

forward-looking statements. The Company assumes no obligation to update forward-looking statements, except as otherwise required under the applicable federal securities laws.

A. Business Operations

We decided in 2006 to engage in the field of clean energy technologies with an emphasis on Natural Gas transportation and Natural Gas Vehicles (“NGV”), fields in which the company is active until now.

The Company enables the transport of Natural Gas. The Company has made special technology developments for semitrailers at different pressures, both in the 2900 PSI - 3650 PSI range (200 - 250 bars) and in the 1000 PSI – 1600 PSI range (70 bars – 110 bars).

The Company also enables the conversion of vehicles, especially two and three wheelers, into natural gas powered vehicles, allowing this much cleaner and cheaper fuel to replace other more expensive and environmentally damaging fuel sources.

The Company has also developed expertise in the conversion of industrial facilities to the use of natural gas.

Following the financial crisis at end of 2008 the Company operated under stringent financial budgets, addressed to develop the activities of the Company and to create value towards future fund-raising processes. Following the changes in the market conditions, that abruptly reflected on the financial markets starting September 2008, the Board and the management of the Company implemented a program (the "Streamlining Plan") aimed to focus on continuous marketing activities for the products of the Company in the most advanced opportunities, while delaying or stopping activities in other operational fronts, significantly reducing the current expenses of the Company. The Company was deeply affected by the crisis and the impossibility to receive the investments that were expected in the last quarter of 2008. On December 15, 2008, the Company filed a Form 15 pursuant to Rule 12g-4(a)(1) to have its securities deregistered with the Securities and Exchange Commission which resulted in the delisting of its securities from the OTC Bulletin Board. The lack of these funds significantly affected the Company’s performance, as reflected in its financial reports. Since then the Company was able to raise funds, in amounts that enabled the performance of the present activities.

The Company presently aims to have its securities registered with the Securities and Exchange Commission during 2015, with the intention to have this process taking place in Q2-2015.

During the third quarter of 2014, the Company continued with the implementation of the signed agreements and continued business development activities. The Company expects that the efforts performed in the last periods will continue

crystallizing to revenue creating activities within the foreseeable future.

The revenues during the third quarter of 2014 were about 87% of the revenues in the second quarter of 2014. As reported the revenues might vary from time to time since our main client in Bosnia and Herzegovina has variable sales and thus varying rates of energetic input consumption. In the third quarter all the sales were only to our main client.

Regarding development activities, in previous years we completed the production of the first semitrailer based on our proprietary design, and we finalized the accreditation process in Philippines as an accredited participant in Re-powering, retrofitting and conversion of Natural Gas powered vehicles under the Natural Gas Vehicle Program for Power Transport. We have also converted several three-wheelers to run on Natural Gas in the context of the accreditation process.

In the last years we have developed additional knowhow regarding gas transportation, gas storage, semitrailers and process. We have continued these activities during the third quarter of 2014, during which there was an emphasis on US regulations and solutions addressed to the US market. In this context we continued developing the proprietary Hyboost systems – compact, light and inexpensive devices for transferring NG from one high-pressure vessel into another without the usage of cumbersome, heavy and expensive conventional compressors. We expect with these system to achieve competitive advantages in deliveries to small and medium size customers.

During the third fiscal quarter we have also been involved in defining a cooperation program with a US university, for setting up R&D facilities, and developing commercial applications of ANG technology. The resulting products will be aimed first and foremost for the U.S. natural gas market (non-vehicular), but possess worldwide marketing potential. We expect a cooperation arrangement to be in place within the next two months.

Regarding commercial activities, the first commercial delivery, that started in Serbia at the beginning of 2011 as a pilot delivery continued performing until the end of 2012, when it was stopped. The Company has decided in 2013 to close the subsidiary in Serbia and implemented this decision.

The main commercial activity is currently the provision of natural gas to Aluminij d.o.o Mostar, (hereinafter “Aluminij”). The Company completed the tuning activities of the first conversion stage. During the third quarter of 2012 the Company started the second conversion stage, which enabled the full implementation of the agreement with Aluminij. The conversion stage has been mostly completed in March 2013, and final adjustments took place during April 2013.

The Company received in the third fiscal quarter of 2012 the permits for constructing a filling station in facilities of BH Gas in the Sarajevo area. The

completion of the construction of the filling station was achieved during the fourth fiscal quarter of 2012, and in the first quarter of 2013 the final permits for its operation were received. The operation of this filling station, that is currently operated, has a significant operational contribution to the supply to Aluminij and to the additional customer. The gas from the filling station is being purchased according to the agreement that the Company has with BH Gas.

Starting July 15, 2012, after completing a trial period, the provision of gas to Aluminij has been taking place continuously as normal commercial delivery under the terms of the contract signed with Aluminij, as reported in previous reports.

We reported during several quarters of 2013, including the fourth fiscal quarter of 2013 that the Company has been delivering gas to an additional client without a signed contract. The gas delivered to this additional customer represented a substantial contribution to the sales. These delivery activities did not take place in the third quarter of 2014 and are not taking place as of the filing of the present report. There is no assurance as of the continuation of these activities in the future.

The Company is operating now a large fleet of acquired and rented semitrailers, used for transporting the gas to Aluminij.

The Company continued also business development activities with suppliers and additional potential customers in Bosnia and Herzegovina, and in other countries of former Yugoslavia.

In Israel, the Company has as of the day of this report a 35.7% holding in Gatal (Natural Gas for Israel) Ltd. (hereinafter "GATAL"), formerly our subsidiary. Our holding in GATAL increased almost 10% in the fourth quarter of 2014.

The activities of GATAL have suffered delays due to delays by the Ministry of Energy regarding the definition of the legal requirements that will be used for regulating the activities in which Gatal is involved.

The Company is working towards expanding its activities in the United States, with activities taking place to establish the most convenient way to address these operations. In order to address several alternatives with different parties the Company has established several subsidiaries in the United States.

During the current year Energtek has strengthened its management team in the United States.

In the first quarter of 2014, Yoav Krill, former Director and Executive of El Al Israel Airlines, Kupat Holim Clalit (Israel's largest health services organization), Bezeq (Israel's largest telecommunication group), and IDT Corp. Europe and USA., undertook the role of CEO of the Company.

During the second quarter of 2014, Andre H. Friedman, Esq., former Regional General Counsel of Teva Pharmaceuticals Industries, Ltd., joined as General Counsel. In the same period Dr. Timothy Nulty, that formerly held senior

positions at the DoE, the U.S. Senate and then the U.S. House of Representatives, as well as having served as a Senior Telecom Project Officer for the World Bank International Finance Corporation was nominated as CEO of Energtek North Country Inc., and Mrs. Leslie Nulty former General Manager at a large food co-op, and Treasurer for a large Business Association was appointed CFO of Energtek North Country Inc.

During the third quarter of 2014 Mr. Alfred G. McNeill, former Deputy Commissioner for Administration and NYPD Chief of Staff, joined as a Director of our subsidiary Energtek USA Inc., and the Illuminado Group, headed by Mr. Robert Catell, former Chairman and CEO of KeySpan Energy Corp. and National Grid, joined our Advisory Board.

During the second fiscal quarter, our subsidiary Energtek North Country Inc. has entered into an agreement for purchase of land in the area of Swanton, Vermont, in order to establish a filling station. It has also signed a Memorandum of Understanding with Vermont Gas, a Vermont corporation, for the provision of natural gas and for the design, engineering, construction, and commissioning of a metering station and lateral pipe that will connect to the filling station with an expected cost about \$300,000.

During the third fiscal quarter our team has been working on all the aspects of the process of delivering natural gas to customers in Vermont, starting from from the filling station and up to the end customer. As of the day of this report most of the permits required from starting the work on the filling station have been obtained, and it is expected that the other permits will be received before the current fiscal year end.

During the third fiscal quarter our team has also been involved in organizing the financing for the activities in Vermont, and in business development activities in other areas in the USA.

As of June 30, 2014 we had the following subsidiaries:

- 1) We own 51% of Energtek Products Ltd., a company organized under the laws of the State of Israel on September 3, 2006;
- 2) We own, through Energtek Products Ltd., 35.7% of the shares of GATAL (Natural Gas for Israel) Ltd., a company organized under the laws of the State of Israel on November 16, 2006;
- 3) Angstore Technologies Ltd., a company organized under the laws of the State of Israel on May 25, 2003;
- 4) We own the majority of Energtek AL LLC, a Nevada limited liability company registered on March 2, 2011, in which third parties are entitled to

49% of the ownership

- 5) We own, through Energtek AL LLC, 55% of the issued and outstanding shares of Energtek Herz d.o.o. in Bosnia and Herzegovina, incorporated in June 2011.
- 6) AMP - American Mobile Pipeline Inc., incorporated on August 12, 2013 in the state of Delaware.
- 7) Energtek USA Inc., incorporated on February 4, 2014 in the state of Delaware.
- 8) We own through Energtek USA Inc., 100% of the issued and outstanding shares of Energtek North Country Inc., incorporated on February 4, 2014 in the state of Delaware.

We intend in the future to acquire or establish additional subsidiaries in selected countries and regions, in order to sustain our business activities

The Company reported until the end of 2013 as a Development Stage Enterprise. Starting January 2014 the Company is no longer reporting as such.

B. Date and State of Incorporation

Please refer to the information appearing in Item 1 above.

C. SIC Codes

The Company's SIC Code is: 4923 - Gas transmission and distribution

D. Fiscal Year End Date

Our fiscal year end is December 31st of each year.

E. Principal Products/Services and their markets

The company leverages on its technologies in order to sell natural gas to end customers, industrial customers for bulk transportation applications and private customers in the case of products from small quantities (three wheelers and motorcycles).

In the last years the company has been focused in bulk supply.

We sell natural gas to industrial/commercial customers that are not connected to natural gas pipelines. We sell the natural gas at the customer's facilities. We take care of all the supply activities. We purchase the natural gas, take care of the filling of the transporting semitrailers, organize the transport and deliver the natural gas to the customer's facilities.

Not only we sell to our customers the natural gas at competitive prices compared with alternative fuels, but also we provide to the customers full solutions for the conversion, if and when needed, of their facilities in order to enable the use of

natural gas.

As above stated, we have developed technologies and knowhow that we incorporate to our supply activities

Our markets for the bulk supply are wherever there are significant customers not connected to the pipeline. Due to historical reasons we have found that pipelines were not developed in many parts of former Yugoslavia. In Israel the pipeline development has started last year, and natural gas is flowing from gas extraction facilities located in the sea.

In the United States we have identified several target areas.

Similar opportunities are present in India, Indonesia, Philippines and other countries.

Item 7.

Facilities

Facilities that the Company has used during the first fiscal quarter of 2014 and afterwards:

1. Filling Plant Reljevo, Bosnia and Herzegovina

This is presently the main facility owned by the Company, through its subsidiary Energtek Herz d.o.o., and it includes all the equipment of the filling station. The filling station itself is property of the Company and is located inside a real estate property of BH Gas d.o.o., the governmental owned sole natural gas transmission provider in Bosnia and Herzegovina, and the biggest gas carrier in that country. There is no rent payment for the filling station.

2. Office Sirokij Brijeg, Bosnia and Herzegovina

Following the change of our main partner in the ownership of Energtek Herz d.o.o., the new partner allowed the use of its offices by Energtek Herz d.o.o. Energtek Herz d.o.o. works in these offices since 2012. There is fee of about 500 Euro per month for the use of this office

3. Offices in New York, USA.

Until June 2014, we had a short term lease office in 1350 Avenue of the Americas, New York. The monthly payment was about \$1,700, including certain services. During the third quarter we entered into larger, fully equipped offices in the same building, the net space of the offices being approximately 225 sq. feet, plus the use of all the shared facilities (secretary at entrance, kitchen, meeting rooms, corridors, communication systems, , etc), with a total monthly cost of \$4,250

In addition we are authorized to use according to the needs offices located at 108 S. Franklin Avenue, Suite 10, Valley Stream, NY 11580

4. Offices Israel

In Israel our subsidiary Energtek Products used leased facilities of about 3,400 sq. feet located in Bnei Brak, space which is shared with other entities, with a monthly rent about \$1.8 per sq. foot. As of the day of this report the subsidiary in Israel has moved to a smaller area sublet of about 1,200 sq. feet located also in Bnei Brak area, with a similar cost per sq. foot.

5. Laboratory Israel,

Our subsidiary in Israel has a laboratory in a leased area in Ashkelon, Israel, having an approximate size of 1,400 sq. ft. The monthly rent is about US 700.
