business services. Under the term of the agreement, we agreed to issue Mingyi Song a total of 65,000,000 shares of our common stock. The shares were valued at the fair market value of $84,500 on the grant date.

On July 24, 2014, we entered into a consulting agreement with Hai Xia. The agreement is for a term of 24 months from July 24, 2014 to July 24, 2016. We engaged Hai Xia as our consultant to provide the Company with consulting service including but not limited to marketing and sales plan, strategic planning for growth and general business consulting. Under the term of the agreement, we agreed to issue Hai Xia a total of 60,000,000 shares of our common stock. The shares were valued at the fair market value of $78,000 on the grant date.

On July 24, 2014, we entered into a consulting agreement with Yijianan Wang. The agreement is for a term of 24 months from July 24, 2014 to July 24, 2016. We engaged Yijianan Wang as our consultant to provide the Company with consulting service including but not limited to merger and acquisition, strategic planning for growth and business services. Under the term of the agreement, we agreed to issue Yijianan Wang a total of 65,000,000 shares of our common stock. The shares were valued at the fair market value of $84,500 on the grant date.

On March 30, 2013, the Company issued a 2% convertible note of the Company in the aggregate principal amount of $33,500 to CDII in connection with the exchange for working capital advances due to CDII in 2013 and prior to this convertible note. On March 26, 2014, CDII assigned certain notes payable and the related accrued interest due to CDII amounting to $33,500 to JSJ Investments, Inc.("JSJ") and the Company entered into an Assignment and Replacement Agreement in connection with the issuance of a 12% convertible note of the Company to JSJ in the aggregate principal amount of $35,500. On April 10, 2014, the entire outstanding principal amount of this note was converted into 47,857,143 shares of the Company's common stock at the cost basis of $0.0007 per share.

On April 9, 2014, we issued 40,000,000 shares of its common stock to Shaoyin Wang as compensation for his consulting service to the Company for the period effective on January 1, 2014 and terminating on December 31, 2014. The shares were valued at the fair market value of $88,000 on the grant date.

On January 9, 2014, we issued 50,000,000 shares of its common stock to China Direct Investments, Inc.("CDI"), a Florida corporation located at 431 Fairway Drive, Suite 200, Deerfield Beach, FL 33441 for its consulting services rendered in fiscal 2013. The shares were valued at the fair market value of $90,000 on the grant date.

On December 21, 2012, we issued 130,000,000 shares to Hongzhu Xi, Feng Li, Fen Liu, Lei Chen and Zheng Cha in connection with the purchase by our subsidiary, Shanghai Yazheng, of 100% of the equity interest in Shanghai Zhiye, a Chinese limited liability company. The amount of shares each of the above shareholders received is equal to 26,000,000. These shares were valued at $0.003 per share for a total purchase price of $390,000.

During fiscal 2011, we issued 20,000,000 shares valued at a total amount of $20,000 to China Direct Investments for its services rendered in the consulting services that China Direct Investments, Inc. rendered between October 1, 2010 and March 31, 2011.

Each of the above securities offerings or transactions was made by officers and directors of the issuer and was not a registered offering. The offerings relied upon an exemption under Regulation S or Rule 4(2) of the Securities Act of 1933, as amended. The shares in these offerings or transactions were restricted (i.e., not freely tradable); and the certificates evidencing such shares contained a legend (1) stating that the shares have not been registered under the Securities Act of 1933, as amended, and (2) setting forth or referring to the restrictions on transferability and sale of the shares under the Securities Act of 1933, as amended.

Item 5) Financial information for the issuer's most recent fiscal period

The Company's unaudited financial statements for the three and six months ended June 30, 2014 and 2013 are attached hereto as part of the Company's Quarterly Company Information and Disclosure Statement and filed herewith.

Notes to Consolidated Financial Statements

NOTE 1 – ORGANIZATION AND DESCRIPTION OF BUSINESS

Dragon Capital Group, Corp., a Nevada corporation, (formerly Dragon Venture) ("we", the "Company" or "Dragon Capital"), is doing business in China through our subsidiaries. Dragon Capital serves as a holding company of emerging technology enterprises operating in China. We function as an incubator, offering support in the critical functions of general business consulting, formation of joint ventures, access to capital markets, consulting regarding potential merger & acquisition transactions, business valuation, and revenue growth strategies. Our primary focus is on innovative software solutions for businesses, as well as sale of computer and electronic component sales.

Our business is conducted entirely through our operating subsidiaries:

i. Dragon Venture Corp., a Florida corporation, a wholly owned subsidiary, ("Dragon Florida");
ii. Shanghai Zhaoli Technology Development Co., Ltd. an 80% owned subsidiary of Dragon Nevada, ("Shanghai Zhaoli");
iii. Dragon Venture (Shanghai) New Energy Technology Development Co., Ltd., a wholly owned subsidiary of Dragon Florida, ("Dragon Shanghai");
iv. Chengdu Imaging Soft Co., Ltd, a 51% owned subsidiary of Dragon Shanghai, ("Chengdu ISoft");
v. Shanghai Yazheng Information Technology Co., Ltd., a 90% owned subsidiary of Dragon Florida, ("Shanghai Yazheng");
vi. Shanghai Yazheng, holds a 51% interest in the below entity:
Shanghai Cnnest Technology Development Co., Ltd., ("Cnnest")
vii. Shanghai Yazheng, holds a 100% interest in the below entity:
Shanghai Zhiye Computer Science and Technology Development Co., Ltd. ("Shanghai Zhiye")

Dragon Venture (Shanghai) New Energy Technology Development Co., Ltd.

In September 2005, our wholly owned subsidiary, Dragon Florida, formed Dragon Shanghai, a Chinese limited liability company ("Dragon Shanghai"). Dragon Shanghai is a wholly owned subsidiary of Dragon Florida. In March 2010, Dragon Shanghai changed its name from Dragon Venture (Shanghai) Co., Ltd. to Dragon Venture (Shanghai) New Energy Technology Development Co., Ltd. to reflect its current business focus on new energy technology.

Shanghai Yazheng Information Technology Co., Ltd.

In December 2004, our wholly owned subsidiary, Dragon Florida, acquired a 90% interest in Shanghai Yazheng Information Technology Co., Ltd. ("Shanghai Yazheng"), a Chinese limited liability company, in exchange for 8,000,000 shares of common stock of Dragon Capital.

Shanghai Cnnest Technology Development Co., Ltd.

In December 2004, Dragon Florida's 90% owned subsidiary, Shanghai Yazheng, acquired a 51% interest in Shanghai Cnnest Technology Development Co., Ltd. ("Cnnest"), a Chinese limited liability company, in exchange for Shanghai Yazheng's assumption of Cnnest's liabilities totaling $24,284 as of December 31, 2004.

Shanghai Zhaoli Technology Development Co., Ltd.

In December 2004, Dragon Capital acquired an 80% interest in Shanghai Zhaoli Technology Development Co., Ltd. ("Shanghai Zhaoli"), a Chinese limited liability company, from Genesis Technology Group, Inc., a Florida corporation, in exchange for 18,825,000 shares of our common stock.

Chengdu Imaging Soft Co., Ltd.

In January 2008, Dragon Capital formed a new entity, Chengdu Imaging Soft Co., Ltd, ("Chengdu ISoft") as a Chinese limited liability company. Chengdu ISoft was formed with an initial registered capital of $285,714 (RMB 2 million). Dragon Capital contributed approximately $145,714 (RMB 1.02 million) to obtain a 51% interest in Chengdu ISoft.

As of June 30, 2013, Dragon Capital decided to put our 51% interest in Chengdu ISoft for sale because it's business development in recent years has failed to meet the management's expectation.. The asset and liabilities associated with the discontinued operations were reflected as current assets or liabilities held for sale in our balance sheets.

Shanghai Zhiye Computer Science and Technology Development Co., Ltd.

In December 21, 2012, our wholly owned subsidiary, Shanghai Yazheng, acquired a 100% interest in Shanghai Zhiye Technology Development Co., Ltd. (" Shanghai Zhiye"), a Chinese limited liability company, in exchange for 130,000,000 shares of our common stock valued at $390,000.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States of America ("US GAAP"). The accompanying consolidated financial statements for the interim periods are unaudited and reflect all adjustment (consisting only of normal recurring adjustments), which are, in the opinion of management, necessary for a fair presentation of the financial position and operating results for the periods presented.

The consolidated financial statements of the Company include the accounts of our wholly-owned and majority owned subsidiaries. All significant inter-company balances and transactions have been eliminated.

Use of estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates. Significant estimates in 2014 and 2013 include the allowance for doubtful accounts which is based on an evaluation of our outstanding accounts receivable including the age of amounts due, the financial condition of our specific customers, knowledge of our industry segment in Asia, and historical bad debt experience, also the useful life of property and equipment.

Cash and cash equivalents

For purposes of the consolidated statements of cash flows, the Company considers all highly liquid instruments purchased with a maturity of three months or less and money market accounts to be cash equivalents.

Accounts receivable

The Company has a policy of reserving for uncollectible accounts based on its best estimate of the amount of probable credit losses in its existing accounts receivable. The Company periodically reviews its accounts receivable to determine whether an allowance is necessary based on an analysis of past due accounts and other factors that may indicate that the realization of an account may be in doubt. Account balances deemed to be uncollectible are charged to the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. At June 30, 2014 and December 31, 2013, the Company has established, based on a review of its outstanding balances, an allowance for doubtful accounts in the amount of $169,855 and $169,360, respectively.

Investment in marketable securities

The investment in marketable securities represents 56 million shares held in a publicly traded company, which shares had a fair value of $0.02 per share at December 31, 2007, the date of issuance. These shares were received as a placement fee for a transaction completed as of December 31, 2007. The shares are carried as available-for-sale for purposes of accounting recognition. On March 11, 2008, these shares affected a one for 40 reverse stock splits of its issued and outstanding common stock. On December 31, 2010, the investment in marketable securities represents 1.4 million shares valued at $0.08 per share. Unrealized gains or losses on marketable securities available for sale are recognized on a quarterly basis as an element of comprehensive income based on changes in the fair value of the security. Once liquidated, realized gains or losses on the sale of marketable securities available for sale are reflected in our net income for the period in which the security was liquidated.

The realized loss on investments in marketable securities at September 30, 2014 and December 31, 2013 was $81,200 and $81,200, respectively. This loss related to our assessment of other than temporary impairment for marketable securities available for sale at December 31, 2011 under the guidance of ASC 325.

Inventories

Inventories, consisting of finished goods, related to the Company's products are stated at the lower of cost or market utilizing the weighted average method. At September 30, 2014 and December 31, 2013, inventory balances of $6,255,765 and $6,037,220, respectively, were comprised of finished goods consisting of electronic merchandise and salable components.

Property and equipment

Property and equipment are carried at cost. The cost of repairs and maintenance is expensed as incurred; major replacements and improvements are capitalized. When assets are retired or disposed of, the cost and accumulated depreciation are removed from the accounts, and any resulting gains or losses are included in income in the year of disposition. In accordance with SFAS No. 144, "*Accounting for the Impairment or Disposal of Long-Lived Assets,*" the Company examines the possibility of decreases in the value of fixed assets when events or changes in circumstances reflect the fact that their recorded value may not be recoverable.

Advances from customers

Advances from customers totaled $0 and $0 at September 30, 2014 and December 31, 2013, respectively. Advances from customers consist of prepayments from third party customers to the Company for merchandise that had not yet shipped or services not yet provided. We will recognize the deposits as revenue as customers take delivery of the goods or services are provided, in compliance with our revenue recognition policy.

Impairment of long-lived assets

In accordance with ASC 360, "Property, Plant, and Equipment", we periodically review our long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be fully recoverable. We recognize an impairment loss when the sum of expected undiscounted future cash flows is less than the carrying amount of the asset. The amount of impairment is measured as the difference between the estimated fair value and the book value of the underlying asset. We did not record any impairment charges during the three and nine month periods ended September 30, 2014 and 2013.

Concentration of Credit Risks

Financial instruments, which potentially subject the Company to concentrations of credit risk, consist principally of cash and trade accounts receivable. The Company places its cash with high credit quality financial institutions in the United States and China. As of September 30, 2014, bank deposits in the United States did not exceed federally insured limits. On June 30, 2014, the Company had approximately $341,315 in China bank deposits, which cannot be insured. In China, there is no equivalent to Federal Deposit Insurance Corporation ("FDIC") insurance as in the United States. Through June 30, 2014, we have not experienced any losses of funds maintained in our Chinese based accounts. To reduce our risk associated with the failure of financial institutions; both in China and the United States, we periodically evaluate the credit quality of the financial institutions in which we hold deposits.

At September 30, 2014 and December 31, 2013, our bank deposits, by geographic area, were as follows:

	September 30, 2014		December 31, 2013

Fair Value of financial Instruments

The carrying value of cash and cash equivalents, prepaid expenses, accounts payable and accrued expenses and other payable approximate their fair value due to their short-term maturities.

Revenue recognition

The Company follows the guidance of the Securities and Exchange Commission's Staff Accounting Bulletin 104 for revenue recognition. In general, we record revenue when persuasive evidence of an arrangement exists, services have been rendered or product delivery has occurred, the sales price to the customer is fixed or determinable, and collectability is reasonably assured.

Foreign currency translation

Transactions and balances originally denominated in U.S. dollars are presented at their original amounts. Transactions and balances in other currencies are converted into U.S. dollars in accordance with ASC Section 830-20-35 and are included in determining net income or loss.

Our reporting currency is the U.S. dollar. The functional currency of our Chinese subsidiaries is the local currency; the Chinese dollar or Renminbi ("RMB"). The financial statements of the subsidiaries are translated into United States dollars using year-end rates of exchange for assets and liabilities, and average rates of exchange for the period for revenues, costs, and expenses. Net gains and losses resulting from foreign exchange transactions are included in the consolidated statements of operations. Translation adjustments resulting from the process of translating the local currency financial statements into U.S. dollars are included in determining comprehensive income or loss. The translation adjustments were an unrealized gain of $88,991for the first nine months of fiscal year 2014.

Income (loss) per common share

Pursuant to ASC Section 260-10-45, basic income (loss) per common share is computed by dividing income (loss) available to common shareholders by the weighted average number of shares of common stock outstanding for the periods presented. Diluted income (loss) per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that would then share in the income, subject to anti-dilution limitations.

Comprehensive income (loss)

Comprehensive income (loss) is comprised of net income and other comprehensive income (loss). Other comprehensive income (loss) refers to revenue, expenses, gains and losses that under accounting principles generally accepted in the United States and included on comprehensive income (loss) but are excluded from net income (loss) as their amounts are recorded directly as an adjustment to stockholders' equity.

Our other comprehensive income consists of currency translation adjustments and unrealized loss on marketable securities held for sale. The following table sets forth the computation of comprehensive income for the nine month periods ended September 30, 2014 and 2013 respectively.

	September 30,

NOTE 7 – OPERATING RISK

Country risk

Currently, the Company's revenues are primarily derived from the sales in the Peoples Republic of China ("PRC"). The Company hopes to expand its operations to countries outside the PRC; however, such expansion has not been commenced and there are no assurances that the Company will be able to achieve
such an expansion successfully. Therefore, a downturn or stagnation in the economic environment of the PRC could have a material adverse effect on the Company's financial condition.

Product risk

In addition to competing with other manufacturers of product offerings, the Company competes with larger US companies who have greater funds available for expansion, marketing, research and development and the ability to attract more qualified personnel. The US companies may be able to offer products at a lower price or under better competitive terms, which would adversely affect our operations.

Exchange risk

The Company cannot guarantee that the current exchange rate will remain steady; therefore, there is a possibility that the Company could post the same amount of profit for two comparable periods and, because of a fluctuating exchange rate, actually post higher or lower profit depending on exchange rate of Renminbi converted to US dollars on that date. The exchange rate could fluctuate depending on changes in the political and economic environments without notice.

Political risk

Currently, the PRC is in a period of growth and is openly promoting business development in order to bring more business into the PRC. Additionally, the PRC allows a Chinese corporation to be owned by a United States corporation. If the laws or regulations are changed by the PRC government, our ability to effectively operate our PRC subsidiaries could be negatively affected.

NOTE 8 – FOREIGN OPERATIONS

For the nine month periods ended September 30, 2014 and year ended December 31, 2013, we derived all of our revenue from our subsidiaries located in the People's Republic of China. Identifiable assets by geographic areas as of June 30, 2014 and December 31, 2013 are as follows:

	Identifiable Assets at	
	September 30, 2014	**December 31, 2013**
United States	$ 626,034	$ 55,093
China	9,532,108	9,794,115
Total	$ 10,158,142	$ 9,849,208

NOTE 9 – DISCONTINUED OPERATIONS

On June 30, 2013, through our wholly-owned subsidiary Dragon Shanghai, we held our 51% interest in Chengdu Isoft for sale because it's business development in recent years has failed to meet the manager's expectation. The asset and liabilities associated with the discontinued operations were reflected as current assets or liabilities held for sale in our balance sheets.

In January 2008, Chengdu ISoft was formed with an initial registered capital of $285,714 (RMB 2 million). Dragon Capital contributed approximately $145,714 (RMB 1.02 million) to obtain a 51% interest in Chengdu ISoft.

On January 2, 2011, we entered into a disposition agreement with Wei Lu, the minority owner of both Shanghai Longri Information Technology Co., Ltd ("Shanghai Longri") and Shanghai Huice Electronic System Integration Co., Ltd ("Shanghai Huice"). Pursuant to the agreement, we transferred all of our rights, title and 51% interest in Shanghai Longri and Shanghai Huice to Mr. Lu in exchange for an aggregate of 2,000,000 shares of our common stock held by Mr. Lu. As a result, a total of 2,000,000 shares of the Company's common stock held by Mr. Lu were to be cancelled, and Shanghai Longri and Shanghai Huice were discontinued as of January 2, 2011 and were sold effective as of that date.

In April 2006, we acquired a 51% interest in Shanghai Longri, a Chinese limited liability company, in exchange for 10,000,000 shares of common stock of Dragon Capital. In April 2006, we acquired a 51% interest in Shanghai Huice, a Chinese limited liability company, in exchange for 8,000,000 shares of common stock of Dragon Capital.

NOTE 10- SUBSEQUENT EVENTS

We have evaluated all the events that occurred after the balance sheet date but before financial statements were available to be issued through September 30, 2014 and determined no other significant subsequent events occurred that would require disclosure.

Shanghai Yazheng Information Technology Co., Ltd.

Shanghai Yazheng provides services for software development projects in China. Shanghai Yazheng's capabilities include network software, e-business software development, financial and enterprise information management systems, and other related technologies.

Shanghai Yazheng utilizes skilled software development personnel, including 10 software programmers, developers and system analysts with rich experience in software programming and hardware integration. These developers and system analysts have extensive experience designing and producing various software applications compatible with either the Windows or Linux operating systems. Shanghai Yazheng analysts, developers and programmers are capable of designing and programming a wide variety of e-business and database projects utilizing programming languages such as C/C++, VB, Dephi, Java and Perl. Additionally, they are capable of developing Internet projects with ISP, ASP, PHP and related languages.

In August, 2013, Shanghai Yazheng as been selected by the Chinese Central Government as one of the participants in a national science and technology research project focusing on the application of safe and large-scale programmable logic controllers (PLC's). Projects like this are being sponsored by the government to foster domestic development of high-end control systems to enable China based companies to capture a much larger percentage of this fast growing market. The participants in this project will be able to utilize technologies developed through this government assistance to design practical applications for future commercialization. The project is expected to begin in the fourth quarter of 2013 and last through 2015. The total estimated R&D cost of the project for the government is approximately 20 million RMB ($3 million U.S.).

In March, 2013, Shanghai Yazheng received government sponsorship from 'Shanghai Innovation Fund for Technology-Based Firm' ("Shanghai Innovation Fund")to fund the development of Shanghai Yazheng's Metropolian Gas Pipeline Risk Valuation System which is based off its Gas Information System project("GIS"). Shanghai Innovation Fund was founded in 2013 by Shanghai Science and Technology Commission in an effort to encourage small and medium enterprises to contribute more in entrepreneurship and innovation. The Innovation Fund is managed under the supervision of the local government with the advice and guidance from outside experts. Shanghai Yazheng's GIS project is completely innovative and has acquired full intellectual property rights to achieve both national and international leading level.

In December 2010, Shanghai Yazheng received the software enterprise registration certificate from Shanghai Economic and Information Technology Commission for its newly developed risk assessment system software platform for China's gas pipeline system, one of the first of its kind in China. In 2011, Shanghai Yazheng started to promote the gas risk assessment system software nationwide. By 2012, the software series has covered about 6,000 kilometers of pipelines that serve 5.76 million households and nearly 17 million users in Shanghai. In 2013, Shanghai Yazheng will continue to make the improvements to the performance of the Gas Network software series and promote the product to municipal gas supply companies located in second and third tier cities in the northwestern and southeastern part of China. In December 21, 2012, Shanghai Yazheng completed the acquisition of a 100% equity interest of Shanghai Zhiye Software Development Company through a stock exchange. Shanghai Zhiye was founded in 2008 by a group of software engineers engaged in application development

of mobile solutions for Android, Windows Mobile and Apple's iOS. Shanghai Zhiye has developed a mobile solution platform that allows numerous applications such as game, utility, and payment for a wide variety of smart phones.

Shanghai *Cnnest Technology Development Co., Ltd.*

Cnnest is a wireless software development company established in 2002, dedicated to developing commercial Third-Generation ("3G") wireless applications and mobile business solutions based on 3G platforms.

Cnnest is currently developing applications for the human resources, mobile banking, food and beverage, and entertainment industries. Cnnest has worked to produce an application called "Mobile Real Estate", a consumer end program that is compatible with China Mobile and China Unicom, two wireless companies in China. This proprietary application combines internet, cell phone mobile internet, newspapers and call centers to form a multimedia platform of real estate services. With this application, the seller, landlord, buyer and tenant can access market information through a variety of devices including computers and smart phones as well as through telephone, newspaper and sub-stations. The product offers detailed information, including property description and data related to the surrounding environment. The system enables a user to send detailed requirements through mobile devices so that sellers and landlords can contact the user directly. The system permits property owners to publish listings and specific information through Mobile Real Estate Shanghai. Cnnest populated the application with data for 10 of the largest cities in China, including Shanghai, Beijing and Guangzhou, for the implementation of its real estate service solutions.

This solution platform would cover numerous applications such as games, utility and payment for different types of smart phones.

The Company's business plan entails acquiring a majority interest in companies operating within the technology industry in the Peoples Republic of China. The Company has adopted a strategy of seeking opportunities to realize gains through the selective acquisition of subsidiaries. The Company believes this strategy provides the ability to create shareholder value. Our plan is to provide capital to support the growth in the Company's subsidiaries.

Competitive business conditions, the issuer's competitive position in the industry and methods of competition.

Industry

China is the world's most populous country with 1.3 billion citizens and in the midst of a steady transition to a free market economy that is transforming global trade. According to the Chinese Academy of Social Science the middle class is estimated between 200-300 million people or 70-100 million households. Household purchasing power is between $9,000 and $12,000 and household wealth is approximately $36,000. The combination of massive capital investment, low cost labor, re-admission to the World Trade Organization in 2001 and a blossoming domestic consumer economy presents a rare opportunity to invest in a nation becoming a major economic superpower.

Given the country's size and its demographics, telecommunications currently clearly plays one of the major roles in the Chinese industry landscape. Over the last decade, the Chinese telecommunications service sector has gone through key reforms that substantially deregulated the market previously dominated by the monopolistic China Telecom. China surpassed the U.S. as the number one mobile market in the world in 2002. According to data released by China's Ministry of Industry and Information Technology in December 2012, the number of mobile phone users in the country is 1.10 billion at the end of November 2012, of which 220 million are 3G users..

As the market grows, mobile subscribers in China are increasingly using their wireless handsets to access a wider range of value-added services, including instant message, information services and games applications..

In the mobile equipment market, the multinational firms that had an early presence in China, such as Motorola, Nokia Corp., Ericsson, Siemens AG, Sony Corp., Toshiba Corp. and Matsushita Electric Corp. have made China an important base for manufacturing, purchasing and research and development.

China Mobile Communications Corp., parent of the world's most valuable phone carrier, built a trial 4G mobile network for the 2010 Shanghai Expo, and won the government approval in December 2010 to expand the test to six cities including Shenzhen and Nanjing in 2011. The expansion of 4G telecommunication technology in China presents substantial opportunity for newly developed application software and value-added services that the Company now offers.

With year over year growth of 85% in 2012, China is the fastest-growing smartphone market by far according to recent research from Informa Telecoms & Media. Additionally, this growth is being driven by the explosive demand for Android phones. Sales in China of devices powered by this OS exceeded 50% penetration in the first half of 2012 and Informa estimates that two in every three handsets sold in China in 2012 are powered by Android. China also represented one third of all Android devices sold throughout the world in 2012. Industry experts estimate that more than 200 million additional devices operating on Android will be sold in China in 2013. The mobile application development market for the Android devices in particular is in its early stages of growth in China and represents a vast opportunity for Chinese applications developers.

We are a secondary distributor of electronic equipments and devices of a number of major brands including but not limited to Hewlett-Packard, Canon, EPSON, Brother, Fujixerox, Samsung, OKI, Ricoh, Minolta, Siemens, Schneider, Rockwell, Omron, and ABB. We are recognized by these brands as one of their distributors in China market. Though we do not have formal distribution contract with brands, we place purchase orders with brands' primary distributors for the products. When our sales hit certain benchmarks, the brands generally compensate us with an additional bonus for performance.

In December 2010, Shanghai Yazheng received the software enterprise registration certificate from Shanghai Economic and Information Technology Commission for its newly developed risk assessment system software platform for gas pipeline systems in China.

In fiscal year 2010, Shanghai Zhaoli received an Outstanding Achievement in Sales award from Hewlett-Packard. In fiscal year 2012, Shanghai Zhaoli was awarded by Hewlett-Packard as its Elite Foreign Distributor.

C. Management's Discussion and Analysis or Plan of Operation.

1. Plan of Operation.

Our business plan entails acquiring a majority interest in companies operating within the technology industry in the People's Republic of China. The Company has adopted a strategy of seeking opportunities to realize gains through the selective acquisition of subsidiaries. The Company believes this strategy provides the ability to create shareholder value. Our plan is to provide capital to support the growth in the Company's subsidiaries.

In December 2010, Shanghai Yazheng received the software enterprise registration certificate from Shanghai Economic and Information Technology Commission for its newly developed risk assessment system software platform for China's gas pipeline system, one of the first of its kind in China. During 2011, Shanghai Yazheng continued to launch three more software for Gas Network System including Emergency Recovery System, Geographic Information System (GIS), and Patrol Inspection System. Since 2010, the software series have continuously been applied in the Gas Network of North Shanghai Gas Business Co., Ltd, a state-owned company focus on Shanghai municipal gas supply, distribution, and transmission. By 2011, the software series have covered about 6,000 kilometers of pipelines that serves 5.76 million households and nearly 17 million users in Shanghai. In 2012, Shanghai Yazheng began enhancing the improvement of the performance of Gas Network software series and started promoting the product to the municipal gas supply companies located in the second and third tier cities in northwestern and southeastern part of China. In 2013, Shanghai Yazheng began adding new functions into GIS system and initiating new projects covering gas pipeline of more than 1000 kilometers long. In addition, Shanghai Yaszheng has received contracts for the installation of automated control systems at three water treatment plants in China, and has been selected by the Chinese Central Government as one of the participants in a national science and technology research project focusing on the application of safe and large-scale programmable logic controllers which is expected to begin in the first quarter of 2014 and last through 2015.

2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Revenues for the three and nine months ended September 30, 2014 totaled $5,032,186and $14,333,514, reflecting a increase of 5.1% and 1.4% over the comparable period of prior year. The increase was mainly attributable to over all better performance in the subsidiaries.

A summary comparison between the three and nine months ended September 30, 2014 and 2013 are as follows:

	Three Months Ended September 30,			
	2014	2013	$ Change	% Change
Net Revenues	$ 5,032,186	$ 4,787,643	$ 244,543	5.1%

Net income (loss) from operations	160,874	85,763	75,111	87.6%

	Nine Months Ended September 30,			
	2014	2013	$ Change	% Change
Net Revenues	$ 14,333,514	$ 14,134,287	$ 199,227	1.4%
Cost of sales	13,637,825	13,394,486	243,339	1.8%
Gross profit	695,689	739,801	(44,112)	-6.0%
Total operating expenses	388,650	390,700	(2,050)	-0.5%
Net income (loss) from operations	307,039	349,101	(42,062)	-12.0%

Other key indicators between the three month ended September 30, 2014 and 2013 are as follows:

	2014	2013	% Change
Cost of revenues as a percentage of revenues	95.3%	95.9%	-0.6%
Gross profit margin	4.7%	4.1%	0.6%
Selling expense as a percentage of revenues	0.6%	1.0%	-0.4%
General and administrative expenses as a percentage of revenues	0.9%	1.3%	-0.4%
Total operating costs as a percentage of revenues	1.5%	2.3%	-0.8%

Other key indicators between the nine months ended September 30, 2014 and 2013 are as follows:

	2014	2013	% Change
Cost of revenues as a percentage of revenues	95.1%	94.8%	0.3%
Gross profit margin	4.9%	5.2%	-0.3%
Selling expense as a percentage of revenues	0.9%	1.1%	-0.2%
General and administrative expenses as a percentage of revenues	1.8%	1.6%	0.2%
Total operating costs as a percentage of revenues	2.7%	2.8%	-0.1%

Cost of sales, as a percentage of revenues totaled 95.3% in the three months ended September 30, 2014, decreased 0.6% compared to 95.9 % in the same period last year. Cost of sales, as a percentage of revenues totaled 95.1% in the nine months ended September 30, 2014, increased 0.3% compared to 94.8 % in the same period last year.

Our selling expense as a percentage of revenues for the nine months ended September 30, 2014 decreased slightly over the comparable periods in 2013 by 0.2%. This decrease was primarily due to decrease in marketing expense and commission expense.

General and administrative expenses for the three and nine months ended September 30, 2014 as a percentage of revenues decreased by 0.4% and increased by 0.2% compared to the same period of 2013. General and administrative expenses amounted to $257,238 in the nine months ended September 30, 2014 compared to $232,539 in 2013. This increase of $24,699 was mainly due to the increase of stock-based compensation.

For the three and nine months ended September 30, 2014, we recorded net income of $160,874 and $307,039, comparing to the net income of $85,763 and $349,101 in the same period of 2013. The increase was mainly attributable to higher operating revenue and lower cost of sales. .

3. Off-Balance Sheet Arrangements.

As of the date of this report, we do not have any off-balance sheet arrangements that are likely to have a current or future effect on our financial condition material to our shareholders. In the ordinary course of business, we enter into operating lease commitments, purchase commitments and other contractual obligations. These transactions are recognized in our financial statements in accordance with generally accepted accounting principles in the United States.

Cautionary Note Regarding Forward-Looking Information and Factors That May Affect Future Results:

This unaudited report contains forward-looking statements. The Securities and Exchange Commission encourages companies to disclose forward-looking information so that investors can better understand a company's future prospects and

make informed investment decisions. This report and other written and oral statements that we make from time to time contain such forward-looking statements that set out anticipated results based on management's plans and assumptions regarding future events or performance. We have tried, wherever possible, to identify such statements by using words such as "anticipate", "estimate", "expect", "project", "intend", "plan", "believe", "will" and similar expressions in connection with any discussion of future operating or financial performance. In particular, these include statements relating to future actions, future performance or results of current and anticipated sales efforts, expenses, the outcome of contingencies, such as legal proceedings and financial results. A list of factors that could cause our actual results of operations and financial condition to differ materially is set forth below.

The loss of the services of any of our executive officers or the loss of services of any of our key persons responsible for the management, sales, marketing and operations efforts of our subsidiaries; our ability to successfully transition the internal operations of companies which we acquired in the PRC from their prior status as privately held Chinese companies to their current status as subsidiaries of a publicly-held U.S. company; our acquisition efforts in the future may result in significant dilution to existing holders of our securities; our ability to effectively integrate our acquisitions and manage our growth; the lack of various legal protections customary in certain agreements to which we are party and which are material to our operations which are customarily contained in similar contracts prepared in the United States; our dependence upon advisory services provided by a U.S. company due to our management's location in the Peoples Republic of China ("PRC"); intense competition in the computer software and electronic merchandise industries in the PRC; the impact of an economic downturn in the PRC on our revenues from our operations in the PRC; the impact of changes in the political and economic policies and reforms of the Chinese government; fluctuations in the exchange rate between the U.S. dollars and Chinese Renminbi; the limitation on our ability to receive and use our revenue effectively as a result of restrictions on currency exchange in China; the impact of changes to the tax structure in the PRC; our inability to enforce our legal rights in China due to policies regarding the regulation of foreign investments; the existence of extended payment terms which are customary in China; and uncertainties related to PRC regulations relating to acquisitions of PRC companies by foreign entities that could restrict or limit our ability to operate and could negatively affect our acquisition strategy.

We caution that the factors described herein and other factors could cause our actual results of operations and financial condition to differ materially from those expressed in any forward-looking statements we make and that investors should not place undue reliance on any such forward-looking statements. Further, any forward-looking statement speaks only as of the date on which such statement is made and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of anticipated or unanticipated events or circumstances. New factors emerge from time to time and it is not possible for us to predict all of such factors. Further, we cannot assess the impact of each such factor on our results of operations or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.
