RainEarth Inc.

(A Development Stage Company)
NOTES TO FINANCIAL STATEMENTS
For the Periods ended July 31, 2014 and 2013

Note 1. Organization and Business Operations

RainEarth Inc. (the "Company") was incorporated in the State of Nevada on March 14, 2006 under the name of Gold Rock Resources Inc. In April 2006 (see Note 4), the Company acquired a mineral claim in British Columbia, Canada; the claim was forfeited April 19, 2009. On March 25, 2009 (see Note 5), the Company entered into a Business Cooperation Agreement with Beijing RainEarth Technology Co. Ltd. ("Beijing RainEarth") to jointly conduct a Hollow Fiber Membrane Materials application and manufacturing business. On March 27, 2009, the Company changed its name to RainEarth Inc. In August 2010 (see Note 5), the Business Cooperation Agreement was terminated. In June, 2013 the Company entered into a letter of Intent to acquire an interest in an Austrian Resort enterprise for which it issued 10,000, 000 common stock, plus a further 6,000,000 common stock as a finders fee.

On July 11, 2008, the Company effected a 10 for 1 forward stock split of its common stock, On May 17, 2013, the Company effected a 1 for 50 reverse stock split of its common stock. The financial statements have been retroactively adjusted to reflect this stock split.

The financial statements have been prepared on a going concern basis, which implies that the Company will continue to realize its assets and discharge its liabilities in the normal course of business. At July 31, 2014, the Company had cash of $541 and negative working capital of $96,301. For the periods ended July 31, 2014 and 2013, the Company had net losses of $15,068 and $20,139, respectively. These factors raise substantial doubt as to the Company's ability to continue as a going concern. The Company plans to raise additional capital and achieve profitable operations through future business ventures. However, there is no assurance that the Company will accomplish these objectives. The financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

Note 2. Summary of Significant Accounting Policies

a) Basis of Presentation

These financial statements and related notes are presented in accordance with accounting principles generally accepted in the United States, and are expressed in U.S. dollars.

b) Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

a. Basic and Diluted Net income (Loss) Per Share

The Company computes net income (loss) per share in accordance with Accounting Standards Codification ("ASC") Topic 260, "*Earnings per Share*". ASC Topic 260 requires presentation of both basic and diluted earnings per share (EPS) on the face of the income statement. Basic EPS is computed by dividing net income (loss) available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. Diluted EPS gives effect to all dilutive potential common shares outstanding during the period using the treasury stock method and

convertible preferred stock using the if-converted method. In computing Diluted EPS, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options or warrants. Diluted EPS excludes all dilutive potential shares if their effect is antidilutive.

d) Comprehensive Loss

ASC Topic 220, "Comprehensive Income," establishes standards for the reporting and display of comprehensive loss and its components in the financial statements. For the period ended July 31, 2014 and 2013 and for the period March 14, 2006 (inception) to July 31, 2014, except for net loss, the Company had no items that represent comprehensive income (loss) and, therefore, has not included a schedule of comprehensive income (loss) in the financial statements.

e) Cash and Cash Equivalents

The Company considers all highly liquid instruments with a maturity of three months or less at the time of issuance to be cash equivalents.

f) Mineral Claim Costs

Mineral claim acquisition costs are capitalized and reviewed periodically for impairment. Exploration costs are expensed as incurred. When it has been determined that a mineral property can be economically developed as a result of establishing proven and probable reserves, the costs incurred to develop such property are capitalized. Such costs will be amortized using the units-of-production method over the estimated life of the probable reserve. If mineral properties are subsequently abandoned or impaired, any capitalized costs will be charged to operations.

g) Financial Instruments

The fair values of financial instruments, which include cash, accounts payable and accrued liabilities and due to related party, approximate their carrying values due to the immediate or short-term maturity of these financial instruments. The Company's operations are outside the United States which results in exposure to market risks from changes in foreign currency rates. The financial risk is the risk to the Company's operations that arise from fluctuations in foreign exchange rates and the degree of volatility of these rates. Currently, the Company does not use derivative instruments to reduce its exposure to foreign currency risk.

h) Income Taxes

Potential benefits of income tax losses are not recognized in the accounts until realization is more likely than not. The Company has adopted ASC Topic 740, "Income Taxes", as of its inception. Pursuant to ASC Topic 740, the Company is required to compute tax asset benefits for net operating losses carried forward. Potential benefit of net operating losses have not been recognized in these financial statements because the Company cannot be assured it is more likely than not it will utilize the net operating losses carried forward in future years.

i) Foreign Currency Translation

The Company's functional and reporting currency is the United States dollar. Monetary assets and liabilities denominated in foreign currencies are translated in accordance with ASC Topic 830, "Foreign Currency Matters", using the exchange rate prevailing at the balance sheet date. Gains and losses arising on settlement of foreign currency denominated transactions or balances are included in the determination of income. Foreign currency transactions are primarily undertaken in Canadian dollars. The Company has not, to the date of these financials statements, entered into derivative instruments to offset the impact of foreign currency fluctuations.

j) Investment in Resort Undertaking

The Company having entered into an initial undertaking to acquire an Austrian resort, which as at the date of these annual financial statements had not as yet been finalized, so the Company is showing such as an Investment and the ten million shares issued have been accounted for at the common stock price of $0.12 per common share closing price on June 15, 2013, hence $1,200,000 and not valued at the $1 per share per the letter of intent, as we do not as yet have any

independent valuation to value such resort at the higher value

Note 3. Related Party Balances/Transactions

a) During the periods ended July 31, 2014 and 2013, the Company recognized a total of $Nil for donated services at $Nil per month and $6,000 for donated rent at $500 per month provided by the President of the Company at no cost.

b) At July 31, 2014, the Company is indebted to a former director of the Company (who resigned September 4, 2008) for $45,021 and to a current director for $4,304. Both liabilities are non-interest bearing, unsecured and due on demand.

Note 4. Mineral Claim

In April 2006, the Company, through its former President and director, acquired 100% of the rights, title and interest in a mining claim representing 14 contiguous cells and covering an area of 725 acres. The property is situated on the eastern-flank of the Summers Creek Valley. It lies about the Rampart Lake road approximately 11 miles due north of the Town of Princeton (formerly known as Vermillion Forks), British Columbia, Canada. Payment of $3,062 was required to record this mining claim and was paid on April 7, 2006. ITEM 6. ISSUER'S BUSINESS, PRODUCTS, AND SERVICES

Date and State of Incorporation

The Company as incorporated in the State of Nevada on March 14, 2006. We are a developing stage corporation.

Issuers Fiscal Year End Date

The Issuer's fiscal year end is April 30.

Primary and Secondary SIC Codes

Primary SIC Code: 1040

Description of the Issuer's Business Operations

In April 2006, Shu-heng Wang, our former president acquired one mining claim containing fourteen cells in British Columbia, Canada (Property) by arranging the registration of the same through James W. McLeod a nonaffiliated third party geologist. A claim is a grant from the Crown of the available land within the cells to the holder to remove and sell minerals. A cell is an area which appears electronically on the British Columbia Internet Minerals Titles Online Grid. The online grid is the geographical basis for the cell. Mr. McLeod is a self-employed contract stoker, field worker and professional geologist residing in British Columbia.

Our exploration target was to find an ore body containing gold. Our success depended upon finding mineralized material. Mineralized material is a mineralized body, which has been delineated by appropriate spaced drilling or underground sampling to support sufficient tonnage and average grade of metals to justify removal. This included a determination by our consultant if the property contained reserves.

As a continuation of the exploration program, Sookochoff Consultants Inc. completed a prospecting on the Property in November 2008. The purpose of the prospecting program was to locate any indications of copper or gold mineralization or coal bearing horizons with the rocks that are indicated to outcrop on the Property. In this prospecting program, adequate coverage of the property was made to locate outcrop or float material which could have provided indications of copper or gold mineralization and/or coal bearing sediments.

Unfortunately, in the few outcrops found and examined in the northeast, the basalts were fresh with no mineralization or alteration. As a result of this prospecting program, the Property did not warrant any additional exploration and/or expenditures and was recommended to be allowed to expire.

Based on the recommendation from the geologist consultant, the Company started to look for other business opportunities. On March 25, 2009, the Company and Beijing RainEarth Technology Co. Ltd., a company organized and existing under the laws of the People's Republic of China ("China RainEarth"), entered into a Business Cooperation Agreement (the "Agreement") for a term of twenty years. The purpose of the Agreement was to jointly conduct Hollow Fiber Mambrane Materials' application and manufacturing business in China.

The Company was to provide Advice and assistance relating to development of marketing and provision of consultancy services, particularly as related to the Business to China RainEarth, and take such action as may be reasonably required to raise up to RM 136 million ($ 20 million U.S. Dollar).

China RainEarth retained the services of the Company in relation to the current and proposed operations of China RainEarth's business in the People's Republic of China. China RainEarth was to give 60% of its revenue after deduction of direct operating costs, expenses and taxes to the Company in consideration of the Company's services.

On March 27, 2009, the Company changed its name to RainEarth Inc. to better reflect this business. In August 2010, the Business Cooperation Agreement was terminated. The Company decided to retain this name pending other business interests it is investigating and on completion of due diligence it will change its name to reflect such.

We have been issued a going concern opinion and rely upon the sale of our securities and loans from our officers and directors to fund operations.

We may not have enough money to complete our business plan. If it turns out that we have not raised enough money to complete our business plan, we will try to raise additional funds from a second public offering, a private placement or loans. At the present time, we have not made any plans to raise additional money and there is no assurance that we would be able to raise additional money in the future. If we need additional money and cannot raise it, we will have to suspend or cease operations.
