Since formation, the Company's principal activities have consisted of development of the proprietary software and market testing the product. Once the software was developed, the Company sought and secured strategic alliances that will help fund and market the Company's services. The Company has secured agreements to pilot test its program, and following such pilot programs, the Company intends to build industry related accounts leveraging the anticipated success of the pilot programs. Within the next 12 months the Company may begin marketing to affiliates of its clients in one or more nations.

3. Increase sales and distribution
4. Introduce new products into the marketplace
5. Hire additional key employees to help strengthen the Company

B. Management's Discussion and Analysis of Financial Condition and Results of Operations.

For the Period Ending December 31, 2014 and 2013

Revenues

We had no revenue in the years of 2014 and 2013. We will only recognize revenue when persuasive evidence of an arrangement exists, transfer of title has occurred or services have been rendered, the selling price is fixed or determinable and collectability is reasonably assured.

Operating Expenses

We had operating expenses of \$147,460 and \$66,397 for the years ended December 31, 2014 and 2013, respectively. Operating expenses were in connection with our daily operations, including but not limited to, consulting and advising fees, accounting fees, compensation, rent, amortization of website development and others. The increase in operating expenses during 2014 was due primarily to the increase in amortization expense of website development from \$49,184 in 2013 to \$86,429 in 2014. We also had stock based compensation of \$25,000 in 2014 due to the issuance of 25,000,000 shares of Convertible Preferred Series A Stock to the President of the Company for his services in connection with reorganization of the Company.

Both operating costs and expected revenue generation are difficult to predict. There can be no assurance that revenues will be sufficient to cover future operating costs, and it may be necessary to continuously raise additional capital to sustain operations.

We expect our operating expenses will significantly increase in 2015 resulting from the addition of marketing and client service staff and professional services.

Income/Losses

Net losses were \$147,460 and \$66,397 for the years ended December 31, 2014 and 2013, respectively. The net loss was primarily attributable to the development costs of the Company's software program, marketing and administrative fees.

We expect to become profitable the second half of 2016. However, there can be no assurance that we will achieve or maintain profitability, or that any revenue growth will take place in the future.

Impact of Inflation

We believe that inflation has had a negligible effect on operations since inception. We believe that we can offset inflationary increases in the cost of operations by increasing sales and improving operating efficiencies.

Liquidity And Capital Resources

During the years ended December 31, 2014 and 2013, net cash flows provided by operating activities were \$46,750 and \$131,061, respectively. Positive cash flows in 2014 was due primarily to the increase in accounts payable and other payable by \$31,196 and \$47,294, respectively, plus the non-cash expenses of \$111,429, including amortization expense of website development in amount of \$86,429, and stock based compensation of \$25,000. Comparatively, positive cash flows in 2013 was due primarily to the increase in other payable by \$161,024, plus the non-cash expenses of \$49,184 due to amortization expense of website development, partially offset by the net loss of \$66,397 and increase in accounts receivable of \$15,000.

During the years ended December 31, 2014 and 2013, net cash flows used in investing activities were \$113,032 and \$147,553, respectively, due primarily to website development in both years. Our principal business is the marketing of Revenue Generating Entertainment Hubs to cause related organizations. The web-based programs are developed with proprietary software.

During the years ended December 31, 2014 and 2013, net cash flows provided by financing activities were \$136,258 and \$16,492, respectively. We had proceeds from sales of stock of \$128,233 and proceeds from loans payable of \$8,025 in 2014. Positive cash flows from financing activities in 2013 were solely due to proceeds from loans payable.

We had cash of \$69,976 on hand as of December 31, 2014. On the short-term basis, we will be required to raise a significant amount of additional funds over the next 12 months to sustain operations. On the long-term basis, we will potentially need to raise capital to grow and develop our business.

It is likely that we will require significant additional financing within the next 12 months and if we are unable to raise the needed funds on an acceptable basis, we may be forced to cease or curtail operations.
