Basis of Presentation

In the opinion of management, the accompanying balance sheets and related interim statements of income, cash flows,

and stockholders' equity include all adjustments, consisting only of normal recurring items, necessary for their fair presentation in conformity with accounting principles generally accepted in the Unites States of America (U.S. GAAP). Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, and expenses. Actual results and outcomes may differ from management's estimates and assumptions.

Allowance for Doubtful Accounts

The Company does not have significant collection history with its customers. However, where the Company is aware of circumstances that may impair a specific customer's ability to pay, the Company will reduce the receivable to net realizable value by recording an appropriate allowance. At December 31, 2014 and 2013no allowance for doubtful accounts was required.

Revenue Recognition

Revenues are recognized as services are performed in accordance with the terms of customer contracts. Customer advances for future website presentations and data collection services are deferred and recognized as the services contracted for have been performed. Costs directly related to the development and data collection services, which

include but are not limited to subcontractors, domain acquisition, and other costs directly related, are included in the cost of goods sold.

Impairment of Long-Lived Assets

The Company regularly reviews long-lived assets for indicators of impairment. Management's judgments regarding the existence of impairment indicators are based on performance. Future events could cause management to conclude that impairment indicators exist and that the value of long-lived assets is impaired. When events or circumstances indicate that the carrying amount of an asset may not be recoverable, the fair value of the asset is compared to its carrying value. Impairment losses are measured as the amount by which the carrying value of an asset exceeds its estimated fair value.

Intangible Assets

The Company has capitalized the purchase/development cost of its revenue producing web-sites and application. The Company amortized these assets over their estimated useful lives beginning January 1, 2014. A summary of assets follows:

Goodwill: Big Pants	85,000	20 Years

GOING CONCERN

The accompanying financial statements have been prepared assuming that the company will continue as a going concern. The Company commenced operations in the first quarter of 2003. Since inception, it has incurred losses and negative cash flows from operations. The Company has been dependent upon external financing, including private sales of securities and borrowings from its CEO to fund operations. For the year ended December 31, 2014 the Company had revenue of $146,551and for the year ended December 31, 2013 $197,634with an inception to date accumulated deficit of $4,099,752. Of the accumulated deficit, $3,423,782 was for non-cash transaction wherein stock was issued for services or interest on settlement of debt. This raises doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments that might result from this uncertainty.

Management has been seeking the opportunity to obtain a business that would enhance its profitability and cash flow. In January 2015 subsequent to the reporting period of these financials the Company executed a purchase agreement with the Italian Food and Beverage Company. The Company will exchange 10,000,000 of its outstanding preferred shares in exchange for 100% of the issued and

outstanding shares of the Italian Company. Management believes this acquisition will result in a significant increase in its profitability and cash flow.

Management continues to seek additional debt or equity funding. There is no assurance that its efforts will be successful, or that the Company will be able to obtain additional debt or equity financing on terms acceptable to the Company. Failure to raise needed funds on satisfactory terms could have a material adverse impact on the Company's business, operating results or financial condition.
