2014
ANNUAL REPORT

First BancTrust Corporation

Today, Tomorrow, Together

FINANCIAL HIGHLIGHTS

Chart 1

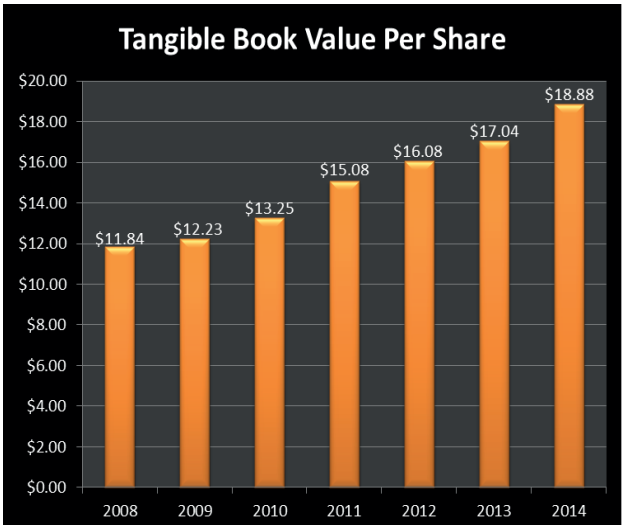

Chart 2

Chart 1 demonstrates the movement in the Company's price per share over the past seven years. Since the low point in 2009, the price of your stock has exhibited a pattern of consistent increase over the ensuing years. At the same time, the tangible book value per share (Chart 2), a measure of value which we believe to be a conservative measure, has shown consistent growth year over year.

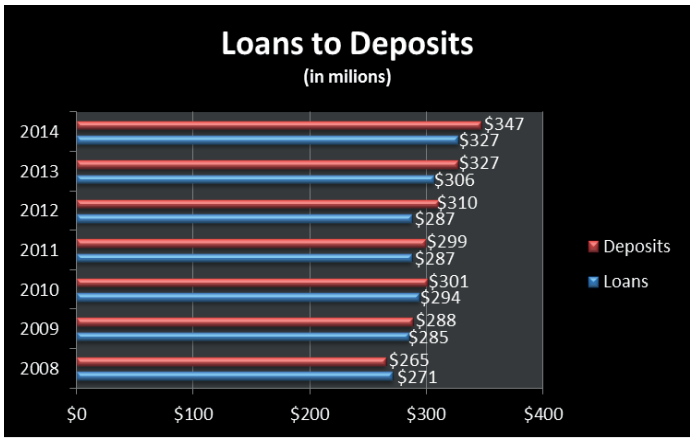

Chart 3

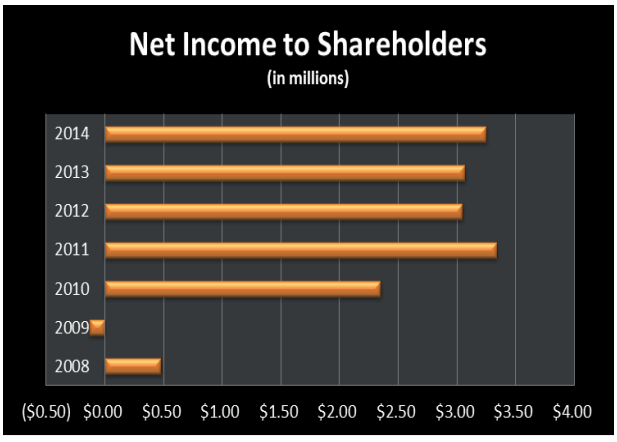

Chart 4

Charts 3 and 4 illustrate the key metrics that continue to drive shareholder value. Chart 3 illustrates the most basic measure of growth in our industry, loans to deposits. What is noticeable is the progression from a net deposit deficit to a positive loan to deposit relationship while at the same time growing both incrementally. This contributed to additional net income (Chart 4) with a consistent modest growth pattern despite a depressed interest rate environment.

March 9, 2015

Dear Fellow Shareholders,

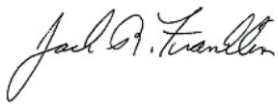

2014 continued to be a year of positive movement away from the great recession. Our balance sheet performance exhibited consistent growth with loans increasing by $20.46 million or 6.69% and total assets increasing by $26.41 million or 6.48%. For the year, deposits also increased $20.33 million or 6.22% over 2013. This organic growth was particularly satisfying since it was spread across all our markets which translated into increased earnings by 5.87% year over year. Even as we have continued our disciplined organic loan and deposit growth, profit margins continued to be squeezed due to the ongoing period of abnormally low interest rates. It appears as though we will finally be entering a rising rate interest environment later this year which will bring its own initial challenges, but will eventually be beneficial to the industry.

The Company remains committed to operating efficiently for our shareholders while at the same time providing the products and services that our customers require and deserve. We firmly believe investments in technology, personnel, and new products are critical for the Company's long term health and growth. To that end, we undertook a major technological upgrade this past year in the form of a complete core data processor conversion. While we are confident the new products and services available to our customers will be extremely well-received, the initial rollout was more disruptive to our customer base than we had anticipated. We sincerely appreciated our customers' patience throughout this process. While this was not the ideal integration that we had planned, it did reinforce my confidence in our management and employees with their high level of commitment and relentless focus on service to our customers exhibited throughout the transition.

Management has also taken significant steps to adapt to the current economic environment to build and enhance shareholder value as we move forward. We have not only focused on strengthening our balance sheet, but also on ensuring efficient capital allocation to both meet our customer's needs and to be able to generate strong returns for our shareholders. Our fortified capital position has allowed us to organically grow while at the same time to return capital to our shareholders. In addition to increased dividends in 2014, we have initiated a stock repurchase program to increase overall shareholder value through both higher returns and growth in earnings per share. Our priority is to enhance shareholder return and we believe that we are well-positioned to provide a positive future as the economic cycle continues to evolve.

Management and the Board of Directors recognize that we must perpetually look forward to continue our Company's progress and growth. In February 2015, as part of our long-term commitment to strengthen our market presence, our third branch was opened in Champaign/Savoy, our fastest growing market. We believe that a consistent strategy properly executed is important for the Company's long term success. Our strategies have been successful and we will continue to diligently manage the Company to provide proper returns for you – our shareholders. On behalf of our management team and the Board of Directors, I would like to express our deep appreciation to our shareholders for your continued loyal support.

Sincerely,

Jack R. Franklin
President and Chief Executive Officer

"Safe Harbor" Statement

In addition to historical information, forward-looking statements are contained herein that are subject to risks and uncertainties that could cause actual results to differ materially from those reflected in the forward-looking statements. The forward-looking statements are identifiable by the use of the terms "believes," "expects," "anticipates," "estimates," or similar expressions. Factors that could cause future results to vary from current expectations, include, but are not limited to, the impact of economic conditions (both generally and more specifically in the markets in which the Company operates); the impact of competition for the Company's customers from other providers of financial services; the impact of government legislation and regulation (which changes from time to time and over which the Company has no control); and other risks detailed in this Annual Report. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect management's analysis only as of the date hereof. The Company undertakes no obligation to publicly revise these forward-looking statements to reflect events or circumstances that arise after the date hereof.

Financial Overview

First Bank and Trust, S,.B., also known as First Bank, is an Illinois-chartered stock savings bank, which currently operates offices in Paris, Marshall, Savoy, Rantoul, Champaign, and Martinsville, Illinois. First Bank is the principal operating subsidiary of First BancTrust Corporation ("The Company"). The Company is a financial services holding company chartered in the state of Delaware. Our primary business activities are concentrated on providing financial services to households, agriculture, and small businesses in east-central Illinois through First Bank. These activities are supplemented by the activities of our other operating subsidiary, ECS Service Corporation doing business as Edgar County Title Company which provides abstracting and land title insurance and closing agency services from its office in Paris, Illinois. In September, 2009, ECS Service Corporation expanded to open a second title and abstracting services company, Cornerstone Community Title Company, in Marshall, Illinois. The remaining subsidiary company, First Charter Service Corporation, which had been inactive since the latter part of 2004, was reorganized in 2011 to provide crop insurance products to the Bank's agricultural customers.

In 2014, net income was $3.2 million, or $1.53 per diluted share. While the net income was a 5.86% or $180,000 increase in net income over the 2013 total of $3.1 million, diluted earnings per share for 2014 was 4.8% greater than the $1.45 per diluted share for 2013. Total assets experienced a moderate increase of $26.5 million or 6.5% to $433.8 million at December 31, 2014 from $407.3 million at December 31, 2013. Total loans, net of allowance for loan losses, increased by $20.5 million to $326.3 million at December 31, 2014 compared to $305.8 million at December 31, 2013. Total deposits, on the other hand, increased by $20.4 million to $347.3 million at December 31, 2014, compared to total deposits of $326.9 million at December 31, 2013.

Financial Condition

The $26.4 million increase in assets in 2014 was primarily attributable to an increase in the loan portfolio, and to a lesser effect, to an increase in cash and cash equivalents. The overall increase in assets was predominantly funded by an increase in deposits, and by an additional Federal Home Loan bank advance issued in October, 2014.

Cash and cash equivalents increased by $7.6 million or 55.9% from $13.6 million at December 31, 2013 to $21.2 million at December 31, 2014. Cash and due from banks declined by $3.4 million, while interest-bearing deposits increased by $11.0 million from $5.8 million at December 31, 2013 to $16.8 million at December 31, 2014, as cash surged in the last weeks of the year. Federal funds sold remained stable at December 31, 2014 totaling $880,000 with a minimal increase over the 2013 balance of $878,000, and interest-bearing time deposits in banks remained at a constant level of $1.2 million for both year ends. All time deposits are covered by FDIC insurance coverage in amounts less than the coverage limit of $250,000.

Available-for-sale securities at December 31, 2014 experienced a minimal decrease of $162,000 from the December 31, 2013 total of $56.1 million to the December 31, 2014 total of $56.0 million. Purchases of $9.3 million in available-for-sale investments consisted primarily of mortgage-backed securities and municipal bonds. The purchases were offset by $10.4 million generated by calls, maturities, and pre-payments and premium amortization of $485,000. In the last twelve months, the market value of the securities portfolio in comparison to the carrying value increased by $1.4 million. Held-to-maturity securities decreased $203,000 from $601,000 at December 31, 2013 to $398,000 at December 31, 2014 due to repayments on securities. The Company has the positive intent and ability to hold these securities until maturity.

There were no loans held for sale at December 31, 2013 compared to the December 31, 2014 balance of $221,000. Secondary market activity continued to contract and saw another significant decrease in loan sales from the prior year, as long-term interest rates began to rise in the first half of the year before tapering back down slightly in the third quarter through year end. In addition, activity during the first quarter was severely depressed due to the harsh effect of winter weather in January and February. Proceeds from loans sold during 2014 totaled $17.1 million compared to $25.6 million proceeds from secondary market loan sales in 2013. Loans sold during 2014 consisted of single family residential mortgages sold to Federal Home Loan Mortgage Corporation with servicing retained, and a few loans sold to Illinois Housing Development Authority servicing-released, and one loan participation sold to another financial institution relating to a commercial construction project. Loans sold in 2013 included several commercial real estate loans sold to other financial institutions and one farmland loan sold to Farmer Mac in addition to single family residential loans sold to Federal Home Loan Mortgage Corporation.

The net loan portfolio increased by $20.5 million, or 6.7%, from $305.8 million at December 31, 2013 to $326.3 million at December 31, 2014. Gross loans increased by $21.0 million from $309.8 million at December 31, 2013 to $330.8 million at December 31, 2014, while the allowance for loan losses increased by $546,000 to $4.5 million at December 31, 2014.

The loan portfolio experienced a significant rise in the level of volume during 2014 although the proportionate mix of the portfolio by segments was not significantly changed from 2013 year-

end. The increase in the loan portfolio was well balanced being spread across almost all segments of the portfolio and was primarily a result of increases in residential loans of $9.2 million, $4.7 million in commercial and agricultural real estate loans, and $2.3 million in commercial and industrial loans. In addition, construction loans increased by $5.0 million, while consumer loans increased $4.1 million, which was partially offset by a $2.6 million decrease in agricultural production finance loans. The $9.2 million increase in residential real estate loans resulted primarily from a $5.0 million increase in one-to-four family residential loans, and an increase in multifamily loans of $4.2 million. The robust loan growth was spread across all markets, with Clark and Champaign counties each generating significant growth of $9.3 million and $7.8 million respectively, with the balance of the expansion in the loan portfolio coming from the Edgar County market. All markets, but especially the Champaign County market, continue to experience intense competition for quality credits.

At December 31, 2014 the allowance for loan losses was $4.5 million or 1.35% of the total loan portfolio compared to $3.9 million or 1.27% at December 31, 2013. The allowance for loan losses is a calculated estimate of inherent future losses contained within the loan portfolio based on conditions at this point in time. Net chargeoffs in 2014 of $218,000 were at a ten-year low, while net chargeoffs of $919,000 in 2013 were at more normalized levels. Net chargeoffs in 2014 primarily consisted of $162,000 in residential mortgages and $124,000 in consumer loans, which was partially offset by the net recoveries of $73,000 in commercial and industrial loans. Non-performing loans, which include loans overdue by 90 days or more and nonaccrual loans, at December 31, 2014 totaled $1.2 million or 0.37% of total loans, compared to $1.1 million or 0.35% of total loans at December 31, 2013. Loans delinquent by 90 days or more and accruing at December 31, 2014 total $762,000 compared to $125,000 at December 31, 2013, and primarily include residential real estate loans. Nonaccrual loans at December 31, 2014 total $470,000 compared to $967,000 at December 31, 2013, and primarily consist of $358,000 in one-to-four family residential mortgage loans, $94,000 in commercial real estate mortgage loans, and $16,000 in commercial and industrial loans.

The allowance for loan losses reflects management's analysis of the Company's loan portfolio based on information available at that time. Management meets at least quarterly to review the adequacy of the allowance for loan losses by classifying loans in compliance with regulatory classifications. Classified loans are individually evaluated to arrive at specific reserve levels for those loans, by determining an estimate of the collateral shortage. Once the specific portion for each loan is determined, management calculates an adjusted historical portion for each category of loans not classified based on a combination of loss history adjusted for factors including current national and local economic conditions, trends in delinquencies and chargeoffs, trends in volume, changes in underwriting standards, and industry conditions. We have seen continued improvement in the level of troubled loans through 2014 and have the expectation that these levels will continue in 2015, although with the continued slow recovery of the overall economy, we may continue to experience a certain level of commercial and consumer borrowers in financial distress. While chargeoffs for 2014 were exceedingly low which was primarily due to a $211,000 recovery on a past commercial loss, we anticipate that we should continue to experience reduced levels of troubled loans and subsequent chargeoffs for the coming year, although probably not augmented with a substantial recovery as in 2014. The Company continues to evaluate troubled borrowers on an individual basis to determine if terms can be modified to provide some temporary relief and to mitigate losses. The Company continues its extensive internal credit review function for new credits as well as significant existing credits to

identify potential weakness in borrowers or credits on a timely basis, and to ensure that the allowance is adequately funded.

While management believes that the allowance for loan losses is sufficient based on information currently available, no assurances can be made that future events, conditions, or regulatory directives will not result in increased provisions for loan losses or additional chargeoffs which may adversely affect net income.

Premises and equipment decreased by $156,000 from $11.8 million at December 31, 2013 to $11.7 million at December 31, 2014. This slight decrease primarily resulted from 2014 depreciation taken on existing fixed assets of $882,000, which was partially offset by purchases of premises and equipment totaling $726,000.

Federal Home Loan Bank stock remained stable at $2.6 million at December 31, 2014, and consists of two subclasses of stock, B1 and B2, both with par value of $100 per share as designated in their Amended and Restated Capital Plan. In the plan, Federal Home Loan Bank has defined membership stock requirement as the greater of 1% of the member's mortgage assets or $10,000. In addition, all borrowings from Federal Home Loan Bank of Chicago must be supported by capital stock holdings of not less than 5% of borrowings. Stock activity thresholds designated by the Federal Home Loan Bank of Chicago will indicate the amount of B1 stock that can collectively be held by all member institutions. Currently, the Company has $345,000 of B1 stock which last paid a dividend rate of 2.25% in mid-November, and the remaining $2.3 million is in B2 stock which last paid a dividend rate of 0.5% in mid-November.

Foreclosed assets held for sale decreased significantly at December 31, 2014 totaling $261,000, down $731,000 from the December 31, 2013 total of $992,000. Real estate and other property acquired in settlement of loans during 2014 totaled $385,000, down significantly from the prior year total of $1.2 million. Foreclosed assets at December 31, 2014 include two single family residential properties, one commercial real estate property, and other repossessed assets, primarily vehicles. Foreclosed assets are carried at the lower of cost or net realizable value.

Interest receivable was relatively stable at $2.5 million at both December 31, 2014 and December 31, 2013, with only a minimal change of $67,000. Deferred income taxes decreased by $422,000 from $2.5 million at December 31, 2013 to $2.1 million at December 31, 2013 mostly due to a decrease in deferred tax assets primarily those resulting from an increase in the market value of the available for sale securities portfolio. Cash surrender value of life insurance increased by $266,000 from $7.5 million at December 31, 2013 to $7.7 million at December 31, 2014 primarily due to the increase in cash surrender value.

Loan servicing rights decreased $96,000 during 2014 from $477,000 at December 31, 2013 to $381,000 at December 31, 2014. The 20.0% decrease resulted from amortization of loan servicing rights in 2014 of $228,000 which was partially offset by the creation of new servicing rights of $132,000 in connection with loans sold in 2014. Loan servicing rights are carried at the lower of cost or current market value which is determined through a quarterly independent value of the servicing assets. At December 31, 2014, the independent valuation indicated that the fair value of the loan servicing rights to be $1.0 million.

Core deposit intangibles decreased by the amount of amortization of $68,000 during 2014 from the December 31, 2013 balance of $149,000 to the December 31, 2014 balance of $81,000. Goodwill remains on the books at $541,000, and other assets declined by $226,000 primarily due a decrease in the level of prepaid income taxes.

Total liabilities at December 31, 2014 totaled $393.2 million, a $22.6 million increase compared to the December 31, 2013 total of $370.6 million. This 6.1% increase consisted primarily of a $20.4 million increase in deposits and by a $2.0 million increase in Federal Home Loan Bank advances.

Total deposits increased by $20.4 million from $326.9 million at December 31, 2013 to $347.3 million at December 31, 2014, a 6.2% increase. The overall deposit growth consisted of a $8.3 million increase in savings, NOW, and money market accounts, a $9.3 million increase in certificates of deposit, and by a $2.9 million increase in brokered time deposits, which was partially offset by a reduction of $68,000 in demand accounts. Depositors generally continue to remain short-term in maturities in this ongoing low rate environment with the persistent hope of rates rising in the near future. Brokered time deposits are generally used as a temporary funding source of funds, although occasionally they can also be used to supplement longer term funding needs if the rates are favorable compared to the deposit rates in local markets or rates on other borrowings. Internal policy defines acceptable levels of brokered policies as a percent of total deposits. The current low level of non-core brokered deposits at the end of 2014 will allow us the flexibility to use this funding source in the future if it is cost-effective.

The Company occasionally utilizes short-term borrowings through the purchase of Federal Funds in accordance with established agreements with correspondent banks to supplement temporary cash shortages incurred by the bank through normal operations. With the high level of cash on hand, this source of funding was not needed at year end. The Company has obtained a line of credit with a financial institution for $1 million which is secured by 100% of the Bank's stock and is available to supplement temporary cash flow needs at the corporate level.

Federal Home Loan Bank advances increased by $2.0 million during 2014 from $34.0 million at December 31, 2013 to $36.0 million at December 31, 2014. A new five-year term advance for $2.0 million was negotiated in October, 2014 with a fixed rate of 1.89%. All previous outstanding borrowings with Federal Home Loan Bank are convertible advances which are past the initial lock-out period, and are subject to potential conversion to an adjustable rate advance on a quarterly basis. The first maturity of $14 million will not occur until September 2016, and then the remaining convertible advances will mature in 2017 and 2018, with the new fixed-rate advance maturing in October, 2019. The Company has utilized the Federal Home Loan Bank to issue two public unit deposit letters of credit totaling $10.2 million as an alternate means of collateralizing public entity deposits which remain in effect at the end of 2013 and 2014. All of the Federal Home Loan Bank advances are collateralized by a blanket pledge on all eligible one-to-four family loans, including first mortgages, second mortgages, and home equity lines of credit, and specific securities from the investment portfolio.

The junior subordinated debentures remained stable at $6.2 million, although quarterly interest rate adjustments occur based on the 90-day LIBOR rate. As of December 31, 2014, the interest rate on this debt issue was 1.94%, with the next rate adjustment date in March, 2015. The

debentures allow for the optional repayment of principal in any amount at any interest payment date, and have a final maturity date of June 15, 2035.

Stockholders' equity increased by $3.8 million from $36.7 million at December 31, 2013 to $40.5 million at December 31, 2014. Retained earnings increased by net income of $3.2 million, which was offset by dividends paid to common shareholders of $296,000. Common stock of $22,000 and additional paid in capital of $6.3 million remained constant at December 31, 2014 in comparison to the prior year. Accumulated other comprehensive income increased by $876,000 primarily as a result of an increase in the market value of the available for sale securities portfolio.

Results of Operations

Net income for 2014 of $3.2 million was a 5.9% increase or $180,000 over the prior year. Diluted earnings per share was $1.53 for the year 2014 compared to $1.45 diluted earnings per share for the 2013 calendar year. The moderate increase in net income was primarily due to a $725,000 increase in net interest income, and to reductions of $215,000 in the provision for loan losses and $213,000 in total noninterest expense, which was partially offset by a $380,000 decline in noninterest income and a $167,000 increase in income tax expense.

Net interest income increased by $725,000 from $13.3 million for the year ended December 31, 2013 to $14.0 million for the year ended December 31, 2014. This was primarily a result of a $740,000 increase in interest income, slightly offset by a $15,000 increase in interest expense. The $740,000 increase in total interest and dividend income was mainly attributable to an increase in loan interest income of $573,000 and, to a lesser extent, to an increase in income from securities of $165,000. Total interest expense increased slightly by $15,000 as a result of an increase in deposit interest expense of $44,000 partially offset by a decrease in interest expense from borrowings of $29,000. The increase in net interest income was most affected by the increase in volume in the average earning assets of $26.4 million from 2013 to 2014 while the volume of average earning liabilities also saw a substantial increase of $21.1 million. Net interest margin decreased by 6 basis points to 3.55% for 2014 compared to 3.61% for 2013. Interest spread also decreased by 5 basis points from 3.50% in 2013 to 3.45% in 2014. The primary reason for these rate reductions is that the average rate earned on assets declined by 11 basis points, while the average rate paid on liabilities only declined by 5 basis points.

The $573,000 increase in loan interest income from 2013 to 2014 resulted from an increase in the loan average balance of $26.2 million, which was partially offset by an average rate reduction of 24 basis points. The average rate earned from investments increased by 24 basis points while the average balance of investment portfolio increased $1.1 million. The average balance of deposits with financial institutions decreased $820,000 while the rate earned on these deposits increased by 3 basis points. The average rate earned on Federal Home Loan Bank stock increased by 27 basis points while volume remained constant.

Total interest expense increased slightly by $15,000 to $3.0 million for the year ended December 31, 2014. The primary reason for this small increase was due to the increase in interest paid on deposits of $44,000, which was partially offset by a decrease in interest expense from borrowings of $29,000. The average balance of deposits increased $21.2 million, while the average rate paid on deposits declined by 2 basis points. Average borrowings in 2014 decreased

$84,000 from 2013 average borrowings, while the average rate paid on borrowings slightly decreased by 6 basis points from 2013 to 2014.

The provision for loan losses decreased from $979,000 for the year ended December 31, 2013 to $764,000 for the year ended December 31, 2014, a decrease of $215,000. The 2014 net chargeoffs of $218,000 million was considerably less than the 2013 net chargeoffs of $919,000. Net losses incurred in 2014 included $162,000 in one-to-four residential properties relating primarily to seven individual owner-occupied home loans, and $124,000 from losses on various consumer loans and overdrawn checking accounts. Net recoveries collected in 2014 included $73,000 in net recoveries on commercial loans which primarily consisted of a partial recovery on a loss from a failed business during the height of the recession. As the provision for loan losses is the funding vehicle for the allowance for loan losses, when the analysis of the allowance for loan losses indicates that higher levels are needed to absorb losses, this can result in extra expense to the provision to allocate to the allowance for loan losses. Conversely, if the existing allowance for loan losses is excessive compared to the levels indicated by the current analysis, then Management may elect to reduce or eliminate future provision amounts. During 2014 analysis of the loan portfolio and the associated risk as well as the existing levels of the allowance warranted a reduction in the monthly charge to the provision in comparison to the prior year. Management reviews the adequacy of the allowance for loan losses quarterly, and believes that its allowance is adequate; however, the Company cannot assure that future chargeoffs and/or provisions will not be necessary.

Total noninterest income decreased by $380,000 from $4.3 million for the year ended December 31, 2013 to $4.0 million for the year ended December 31, 2014. The 8.8% decrease resulted primarily from reductions in net gains on loan sales, abstract and title fees, and net loan servicing fees, as well as reduced customer service fees, which was partially offset by an increase in other service charges and fees. Customer service fees decreased $77,000 primarily due to a decrease in non-sufficient fund and overdraft fee income. Other service charges and fees increased by $81,000 resulting primarily from increases in debit card fee income and commissions earned on the sale of crop insurance, partially offset by a decrease in loan related fees from single family residential loans sold into the secondary market.

Net gains on loan sales decreased 26.4% or $170,000 from $646,000 in 2013 to $476,000 in 2014, which is attributable to a significant decrease in income generated in the sale of single family residential loans sold to Federal Home Loan Mortgage Corporation (“Freddie Mac”) and Illinois Housing Development Authority (“IHDA”). Secondary market activity for single family residential loans experienced a $6.70 million decrease in loan sales from the prior year. Total proceeds from single family residential loans sold in 2014 totaled $16.3 million compared to $23.0 million generated from the 2013 loan sales of single family residential loans. Loans sold during 2014 also included $852,000 in a commercial participation loan sold to a correspondent bank. Net loan servicing fees decreased by $99,000 to $304,000 for 2014 as the amount of average servicing spread on the portfolio has declined from the prior year, although the volume of loans serviced for others, primarily single family residential loans sold to Federal Home Loan Mortgage Corporation has remained relatively stable. Loans serviced for others at December 31, 2014 totaled $133.0 million compared to $133.7 million at December 31, 2013.

Abstract and title fees declined by $77,000 from the 2013 total of $466,000 to the 2014 total of $389,000 primarily due to a decrease in commissions earned from the sale of title insurance as

well as a decrease in abstracting fees. This is primarily due to the decreased mortgage volume resulting from a reduced level of secondary market activity in 2014 in comparison to 2013. The decrease in cash surrender value of life insurance was minimal resulting from a decline in interest rates, while other noninterest income remained declined by $26,000 from year to year primarily due to reduced closing fees earned by the Title Company subsidiaries.

Total noninterest expense increased by $213,000 or 1.8% from 2013 to 2014 primarily due to increases in salaries and benefits, data processing fees, equipment expenses, and other expenses, partially offset by decreases in foreclosed assets expenses and amortization of loan servicing rights. Salaries and employee benefits expense increased $297,000 or 4.70% resulting from increases in salaries and related employment taxes primarily due to the addition of three full-time employees and one part-time employee, and to regular salary increases. In addition, the elevated personnel expenses were also attributable to the preparation and training for the core data processing system conversion which occurred in late August.

Net occupancy expense rose slightly in comparison to the prior year, while equipment expense also increased slightly due to upgrades to computer equipment. Data processing fees increased by $116,000 or 13.9% primarily due to the fees associated with the core processor change to a new operating system, and conversion-related expenses incurred in converting customer data.

Professional fees experienced a decrease of $37,000 due to decreases in both legal fees and consulting expense, partially offset by an increase in audit and accounting expense. Foreclosed assets expense decreased by $283,000 due to a greatly reduced level of foreclosed residential properties handled during 2014. Additionally, in 2013, new independent appraisals were obtained for several properties in other real estate which had been held for periods greater than one year, and the reduced valuations required the recognition of impairment through a charge to expense of $168,000 and a corresponding reduction to the carrying value of the properties. These properties were liquidated in early 2014 with no significant additional loss. Marketing expense increased by $24,000, or 6.5% primarily due to additional communications with customers regarding the change in the core processing system. Amortization of loan servicing rights continued to decline, decreasing by $31,000 from 2013 to 2014 as the level of capitalized servicing rights also decreased due to reduced mortgage activity in the secondary market. Single family residential loans serviced for others at December 31, 2014 total $126.0 million. FDIC insurance premiums experienced a nominal decrease from 2013 to 2014, while other expenses increased by $64,000 or 4.9%.

Income tax expense increased by $167,000 from $1.6 million for the year ended December 31, 2013 to $1.8 million for the year ended December 31, 2014. The increase was primarily a result of a $346,000 increase in income before income tax for the year 2014 of $5.1 million compared to $4.7 million for the year 2013, and to a lesser extent, changes in permanent tax differences for the year. The effective tax yield for 2014 was 35.9%, which is slightly higher than the 2013 effective tax yield of 35.0%.

Net income was $180,000 greater for 2014 at $3.2 million than 2013 net income of $3.1 million, which was a 5.9% increase year over year. Earnings per share also increased by 7 cents or 4.8% from $1.46 per share in 2013 compared to $1.53 per share in 2014, as there was no change in the number of outstanding shares from 2013 to 2014.

Summary

Another year of sustained performance was validated by the 2014 net income of $3.2 million, with an increase of $180,000 over 2013 net income of $3.1 million. While the return on average assets for 2014 of 0.77% was relatively stable compared to 0.78% from 2013, the return on average equity dropped slightly to 8.40% for 2014 compared to 2013 return on average equity of 8.58%. The reduced return on equity ratio was a product of the slightly elevated level of net income divided by a 9.9% increased average level of stockholders' equity, while the change in return on assets was due to a slightly increased income level and a $24.3 million or 6.2% increase in average assets. The primary contributing factor to the increase in net income was a $725,000 increase in net interest income and by a $215,000 reduction in the provision for loan losses, although this was partially offset by a $380,000 reduction in noninterest income and by an increase in income tax expense and a slight increase in noninterest expense.

The $725,000 increase in net interest income was basically a by-product of increased volume with a slight offset resulting from a reduction in average rates. Average interest-bearing assets for 2014 increased by $26.4 million which was primarily fueled by growth in the loan portfolio, while the average interest-bearing liabilities increased by $21.1 million. This sizable growth was negatively influenced by an 11 basis point reduction in average rate earned on average interest-bearing assets versus a 5 basis point reduction in average rates paid on average interest-bearing liabilities. The effect of the larger increase in asset volume with the overall drop in our average rates earned affecting income versus rates paid affecting expense was to compress our interest margin by 5 basis points for 2014, although the pace of compression has slowed in 2014 compared to the 25 basis point drop in 2013. Interest margin, which is net interest income divided by average interest-earning assets for 2014 was 3.55% for 2014 compared to 3.61% for 2013, while interest spread, which is the average rate on interest-earning assets minus the average rate on interest-earning liabilities for 2014 was 3.45% compared to 3.50% for 2013.

Our core business experienced healthy expansion in 2014 with balanced growth in both the loan portfolio and deposits. While net loans grew $20.5 million from December 31, 2013 to December 31, 2014, deposits grew at almost the same pace at $20.3 million from December 31, 2013 to December 31, 2014. The loan portfolio growth was fairly evenly distributed among the different segments with no significant shifts in the portfolio composition. At December 31, 2014 approximately 37.6% of the portfolio consisted of residential loans, both single-family and multi-family property loans. Approximately 12.4% of the portfolio includes agricultural loans secured by farmland, and another 6.0% is in agricultural production finance loans. Commercial business and industrial loans comprise another 11.2% of the loan portfolio, and loans secured by commercial real estate loans are 19.0% of the overall loan portfolio. The balance of the portfolio is rounded out with consumer loans, construction loans, and other loans.

Overall average deposit balances increased by $21.2 million year over year, with the average balances showing increases in time deposits and demand accounts, and to a lesser extent slight growth in savings accounts. Depositors have returned to investments in certificates of deposit in an attempt to pick up yield, but generally are reluctant to commit to terms in excess of one year at current market rates. While the average balance of time deposits did increase by $15.2 million for the year, average brokered time deposits increased by $1.6 million, with the balance of the growth in the retail market. The average rate paid on all time deposits declined by 5 basis points year over year, while interest-bearing demand deposits experienced only a 2 basis point reduction for the same time period. Deposits will have limited potential for further rate reduction

in average rate for 2015 as the majority of deposits have already repriced to the current low rate levels. With the majority of the deposits in liquid demand or savings accounts, or in short-term time deposits, any rise in the rate environment may impact the margin with further compression.

During 2014 as in 2013, we experienced competitive pressures regarding both existing and potential quality credits in the loan portfolio. Competition for quality credits remains very intense as many financial institutions aggressively search for quality loans to add to the loan portfolio balance to deploy excess cash at yields exceeding investment options. In addition, rates earned on the investment portfolio have experienced some recovery in the past year, as the market rates on securities inched up, which in turn positively impacted the yield on investments added to the portfolio during the year. When the Federal Reserve completed the final stages of tapering their level of ongoing investment purchases, the market began a cycle of building in anticipated rate increases which would then experience a correction as contradictory national and worldly economic data was publicized. Many investment purchases in 2014 were able to take advantage of the occasional uptick in yield which resulted in the 24 basis point average rate increase for the year.

Loan demand is stronger, and the resulting shift of interest-earning assets into loans from securities and cash will continue to have a positive impact on earnings. The credit review department continues to evaluate new credits by conducting an independent analysis of the borrower's financial position and cash flows, and they review all significant credits annually to monitor and identify any credits which experience significant change in the level of risk. In addition, a third-party review of all significant credit relationships is conducted annually to ensure proper classification.

The quality of the loan portfolio remains high, as evidenced by the stable non-performing loan ratio of 0.37% at the end of 2014 compared to 0.35% at 2013 year end. The non-performing loan ratio is identified as the sum of loans which are more than 90 days delinquent and loans which have been placed on non-accrual status divided by the total loan portfolio. In addition, net chargeoffs for 2014 of $218,000 were at a ten-year low compared to 2013 net chargeoffs of $919,000. The net chargeoffs in 2014 related primarily to residential and consumer loans, while the commercial loans experienced a net recovery of $73,000. At December 31, 2014 the allowance for loan losses was 1.35% of the loan portfolio or $4.5 million. With the sustained improvement in the overall quality of the loan portfolio, we were able to reduce the monthly expense for provision for loan losses for 2014. We anticipate that we will be able to continue the lower monthly levels to the provision for 2015 primarily to ensure that loan growth is supported by adequate levels of the allowance for loan losses. We will continue to evaluate the loan portfolio quarterly to ensure that the allowance for loan losses continues to be adequately funded.

Other real estate owned declined by $731,000 to $261,000 at year end 2014, and at year end consisted of two single family residences and one commercial property, and several repossessed vehicles. At the end of 2013, 23 properties, mostly residential properties were on the books, with the majority of these sold in early 2014. Levels of real estate owned remained low for the remainder of the year, and as a result, foreclosed asset expenses for 2014 were greatly reduced from 2013 levels with a $283,000 decrease year over year. We expect that this trend will continue into 2015 with the low current level of non-performing loans.

Noninterest income decreased significantly primarily due to a decline in the secondary residential mortgage market which directly affected gains on loan sales, loan servicing income

and abstract and title fees. While the interest rates did not experience major fluctuations in 2014, new originations were not heavily influenced by high levels of refinancing as in past years, and were more dependent upon financing for real estate transfers. As the economy slowly rebounds, housing market activity is on the rise which should maintain current volume levels. In addition, our recent 2015 expansion in Champaign will allow us to market to additional homeowners to supplement lending in the Champaign market.

We have increased our footprint in Champaign County with the addition of a branch on the west side of Champaign which opened in early February, 2015. For 2015 and beyond, this will further balance our presence in Champaign County and allow more servicing options for both new and existing customers. The branch is located adjacent to areas of recent residential growth and development in Champaign. We look forward to establishing beneficial relationships with our new neighbors in this area as we provide convenient financial services and products.

A major focus of our collective efforts in 2015 was preparing for and executing the plan for the conversion of our customer data as we upgraded to a new core processing system in late August. The new system is all-encompassing as it has eliminated many third-party vendors and products which had been interfaced into the prior data processing system. As we move forward, this will increase efficiencies and the savings from the elimination of multiple third-party vendors will somewhat offset the additional processing expense. Data processing expense and equipment expense were elevated in 2015 due to expenses incurred in the conversion and the exchange of data from the old system to the new system. Additional personnel-related expenses were incurred as we planned for the upgrade through preparation and employee training in an attempt for the transition to be as seamless to our customer base as possible. The electronic delivery systems including mobile and internet banking are more robust with the new system and allow more functionality to the end users. The new system allows us to offer more flexibility and features in our products and services to our customer base, and in 2015 we will continue to modify existing products to take advantage of these benefits.

We continue to look for efficiencies and other economies to control expenses, without compromising our high level of customer service. In addition, we explore new revenue sources to supplement compressing interest margins, and to fulfill the financial needs of our customers in an efficient manner with cutting edge technology.

The employees, officers and directors remain committed to the enhancement of share value for you, our shareholders, through continued positive financial performance and results. The sustained levels of high performance continue to be reflected by an increase in the common share market price. At year end, the price per common share of $16.20 was 11.0% greater than the prior year end of $14.60, and the average share price for 2014 of $15.00 was 14.9% in excess of the average price for 2013 of $13.05. Book value per share has also appreciated to $19.17 at the end of 2014 compared to $17.36 at the end of 2013. We announced a share repurchase program in early December 2014 whereby the Corporation is authorized to repurchase up to five percent of the Company's outstanding shares in the open market to promote trading activity for our stock. The average daily volume of stock activity for 2014 was 1,123 shares per market trading day compared to an average daily volume of 370 per market trading day for 2013. As planned, we were able to again increase our dividend level in 2014 to $0.14 cents per share compared to $.08 cents per share for 2013. We intend to continue this course of action in 2015 until dividends are restored to pre-recession levels. We are grateful for your confidence and support, and remain vigilant to protect your investment in our Company.

Independent Auditor's Report

Board of Directors
First BancTrust Corporation
Paris, Illinois

We have audited the accompanying consolidated financial statements of First BancTrust Corporation (Company), which comprise the consolidated balance sheets as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Praxity MEMBER GLOBAL ALLIANCE OF INDEPENDENT FIRMS

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of First BancTrust Corporation as of December 31, 2014 and 2013, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

First BancTrust Corporation
Notes to Consolidated Financial Statements
December 31, 2014 and 2013

Note 1: Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations

First BancTrust Corporation (Company) is a financial holding company whose principal activity is the ownership and management of its wholly-owned subsidiaries, First Bank & Trust, S.B. (Bank), ECS Service Corporation, and First Charter Service Corporation. FBTC Statutory Trust I (Trust) is an unconsolidated wholly owned subsidiary of the Company. The Trust was formed to issue cumulative preferred securities. The Company owns all of the securities of the Trust that possess general voting powers. The Bank is primarily engaged in providing a full range of banking and financial services to individual and corporate customers in East Central Illinois. The Company also provides title services through its subsidiary, ECS Service Corporation. The Company also has a subsidiary, First Charter Service Corporation, which provides crop insurance to agricultural customers in the market area. The Company and Bank are subject to competition from other financial institutions. The Company and Bank are subject to the regulation of certain federal and state agencies and undergo periodic examinations by those regulatory authorities.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company, Bank, ECS Service Corporation, and First Charter Service Corporation. All significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change are the determination of the allowance for loan losses, the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans, fair values of financial instruments and valuation of loan servicing rights.

Cash Equivalents and Credit Risk

The Company considers all liquid investments with original maturities of three months or less to be cash equivalents. At December 31, 2014 and 2013, cash equivalents consisted primarily of interest and noninterest-bearing cash accounts and federal funds sold.

At December 31, 2014, the Company's cash accounts exceeded federally insured limits by approximately $9,300.

Interest-bearing Time Deposits in Banks

Interest-bearing time deposits in banks mature within terms of one to eight months and are carried at cost, which approximates fair value. The Company's interest bearing deposits are held at various financial institutions and are covered under the FDIC insurance limits as the individual balances are below $250,000.

Securities

Certain debt securities that management has the positive intent and ability to hold to maturity are classified as "held to maturity" and recorded at amortized cost. Securities not classified as held to maturity, including equity securities with readily determinable fair values, are classified as "available for sale" and recorded at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income (loss). Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Gains and losses on the sale of securities are recorded on the trade date and are determined using the specific identification method.

For debt securities with fair value below amortized costs when the Company does not intend to sell a debt security, and it is more likely than not the Company will not have to sell the security before recovery of its cost basis, it recognizes the credit component of an other-than-temporary impairment of a debt security in earnings and the remaining portion in other comprehensive income (loss). For held-to-maturity debt securities, the amount of an other-than-temporary impairment recorded in other comprehensive income (loss) for the noncredit portion of a previous other-than-temporary impairment is amortized prospectively over the remaining life of the security on the basis of the timing of future estimated cash flows of the security.

For equity securities, when the Company has decided to sell an impaired available-for-sale security and the entity does not expect the fair value of the security to fully recover before the expected time of sale, the security is deemed other-than-temporarily in the period in which the decision to sell is made. The Company recognizes an impairment loss when the impairment is deemed other than temporary even if a decision to sell has not been made.

Loans Held for Sale

The Company currently sells one-to-four family residential loans primarily to the Federal Home Loan Mortgage Corporation and Illinois Housing Development Authority.

Loans originated and intended for sale in the secondary market are carried at the lower of cost or fair value in the aggregate. Net unrealized losses, if any, are recognized through a valuation allowance by charges to noninterest income. Gains and losses on loan sales are recorded in noninterest income, and direct loan origination costs and fees are deferred at origination of the loan and are recognized in noninterest income upon sale of the loan.

Loans

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoffs are reported at their outstanding principal balances adjusted for unearned income, charge-offs, the allowance for loan losses and any unamortized deferred fees or costs on originated loans.

For loans amortized at cost, interest income is accrued based on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, as well as premiums and discounts, are deferred and amortized as a level yield adjustment over the respective term of the loan.

The accrual of interest on loans is discontinued at the time the loan is 90 days past due unless the credit is well-secured and in process of collection. Past due status is based on contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not collected for loans that are placed on nonaccrual or charged off are reversed against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to income. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of allocated and general components. The allocated component relates to loans that are classified as impaired. For those loans that are classified as impaired, an allowance is established when the collateral value of the impaired loan is lower than the carrying value of that loan. The general component covers nonclassified loans and is based on historical charge-off experience and expected loss given default derived from the Company's internal risk rating process. Other adjustments may be made to the allowance for pools of loans after an assessment of internal or external influences on credit quality that are not fully reflected in the historical loss or risk rating data.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price or the fair value of the collateral if the loan is collateral dependent.

Groups of loans with similar risk characteristics, including individually evaluated loans not determined to be impaired, are collectively evaluated for impairment based on the group's historical loss experience adjusted for changes in trends, conditions and other relevant factors that affect repayment of the loans. Accordingly, the Company does not separately identify individual consumer and residential loans for impairment measurements.

Premises and Equipment

Depreciable assets are stated at cost less accumulated depreciation. Depreciation is charged to expense using the straight-line method over the estimated useful lives of the assets. Leasehold improvements are capitalized and depreciated using the straight-line method over the terms of the respective leases or the estimated useful lives of the improvements, whichever is shorter. Expected terms include lease option periods to the extent that the exercise of such options is reasonably assured.

The estimated useful lives for each major depreciable classification of premises and equipment are as follows:

Buildings and improvements	35-40 years
Leasehold improvements	5-10 years
Equipment	3-5 years

Federal Home Loan Bank Stock

Federal Home Loan Bank (FHLB) stock is a required investment for institutions that are members of the Federal Home Loan Bank system. The required investment in the common stock is based on a predetermined formula, carried at cost and evaluated for impairment.

Foreclosed Assets Held for Sale

Assets acquired through, or in lieu of, loan foreclosure are held for sale and are initially recorded at fair value less cost to sell at the date of foreclosure, establishing a new cost basis. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at net realizable value. Revenue and expenses from operations and changes in the valuation allowance are included in net income or expense from foreclosed assets.

Goodwill

Goodwill is evaluated annually for impairment or more frequently if impairment indicators are present. A qualitative assessment is performed to determine whether the existence of events or circumstances leads to a determination that it is more likely than not the fair value is less than the carrying amount, including goodwill. If, based on the evaluation, it is determined to be more likely than not that the fair value is less than the carrying value, then goodwill is tested further for impairment. If the implied fair value of goodwill is lower than its carrying amount, a goodwill impairment is indicated and goodwill is written down to its implied fair value. Subsequent increases in goodwill value are not recognized in the financial statements.

Core Deposit Intangibles

Core deposit intangibles are being amortized on the straight-line and accelerated basis over periods ranging from five to ten years. Such assets are periodically evaluated to the recoverability of their carrying value.

Loan Servicing Rights

Loan servicing assets are recognized separately when rights are acquired through purchase or through sale of financial assets. Under the servicing assets and liabilities accounting guidance, Accounting Standards Codification (ASC) Topic 860-50, servicing rights resulting from the sale or securitization of loans originated by the Company are initially measured at fair value at the date of transfer. The Company subsequently measures each class of servicing asset using either the fair value or the amortization method. Under the amortization method, servicing rights are amortized in proportion to and over the period of estimated net servicing income. The amortized assets are assessed for impairment or increased obligation based on fair value at each reporting date.

Each class of separately recognized servicing assets subsequently measured using the amortization method are evaluated and measured for impairment. Impairment is determined by stratifying rights into tranches based on predominant characteristics, such as interest rate, loan type and investor type. Impairment is recognized through a valuation allowance for an individual tranche, to the extent that fair value is less than the carrying amount of the servicing assets for that tranche. The valuation allowance is adjusted to reflect changes in the measurement of impairment after the initial measurement of impairment. Changes in valuation allowances are reported with noninterest expense on the income statement. Fair value in excess of the carrying amount of servicing assets for that stratum is not recognized.

Servicing fee income is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal or a fixed amount per loan and are recorded as income when earned. The amortization of mortgage servicing rights is netted against loan servicing fee income.

Transfers of Financial Assets

Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity or the ability to unilaterally cause the holder to return specific assets.

Income Taxes

The Company accounts for income taxes in accordance with income tax accounting guidance (ASC 740, *Income Taxes*). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. The Company determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur.

Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized.

Tax positions are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances and information available at the reporting date and is subject to the management's judgment.

The Company recognizes interest and penalties on income taxes as a component of income tax expense.

The Company files a consolidated income tax return with its subsidiaries.

Earnings Per Share

Basic earnings per share represents net income divided by the weighted-average number of common shares outstanding less nonvested incentive plan shares during each period. Diluted earnings per share reflects additional potential common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance.

Comprehensive Income

Comprehensive income consists of net income and other comprehensive income (loss), net of applicable income taxes. Other comprehensive income (loss) includes unrealized appreciation (depreciation) on available-for-sale securities and changes in the funded status of defined benefit pension plans.

Note 2: Securities

The amortized cost and approximate fair values, together with gross unrealized gains and losses, of securities are as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Available-for-sale securities:				
December 31, 2014:				
Mortgage-backed, GSE residential	$ 41,915,418	$ 612,198	$ (499,436)	$ 42,028,180
State and political subdivisions	13,901,657	299,034	(270,407)	13,930,284
Equity securities	1,126	10,240	—	11,366
	$ 55,818,201	$ 921,472	$ (769,843)	$ 55,969,830
December 31, 2013:				
U.S. Government and federal agency and Government-sponsored enterprises (GSEs)	$ 561,924	$ 11,237	$ —	$ 573,161
Mortgage-backed, GSE residential	44,660,716	422,084	(1,292,318)	43,790,482
State and political subdivisions	11,668,951	209,996	(607,660)	11,271,287
Equity securities	483,529	13,150	—	496,679
	$ 57,375,120	$ 656,467	$ (1,899,978)	$ 56,131,609

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Held-to-maturity securities:				
December 31, 2014:				
Mortgage-backed, GSE residential	$ 398,469	$ 17,981	$ —	$ 416,450
December 31, 2013:				
Mortgage-backed, GSE residential	$ 601,052	$ 30,915	$ —	$ 631,937

The amortized cost and fair value of available-for-sale and held-to-maturity securities at December 31, 2014, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Fair Value	Adjusted Carrying Value	Fair Value
Within one year	$ 2,008,092	$ 1,965,899	$ —	$ —
One to five years	3,142,991	3,230,720	—	—
Five to ten years	4,909,736	5,061,211	—	—
Over ten years	3,840,838	3,672,454	—	—
	13,901,657	13,930,284	—	—
Mortgage-backed, GSE residential	41,915,418	42,028,180	398,469	416,450
Equity securities	1,126	11,366	—	—
Totals	$ 55,818,201	$ 55,969,830	$ 398,469	$ 416,450

The carrying value of securities pledged as collateral, to secure public deposits, Federal Home Loan Bank advances and for other purposes, was $13,334,600 at December 31, 2014 and $15,875,932 at December 31, 2013.

There were no gross gains or losses resulting from sales of available-for-sale securities realized for 2014 or 2013.

Certain investments in debt and marketable equity securities are reported in the consolidated financial statements at an amount less than their historical cost. Total fair value of these investments at December 31, 2014 and 2013, was $27,926,725 and $36,517,641, which is approximately 50% and 65%, respectively, of the Company's investment portfolio. These declines primarily resulted from recent increases in market interest rates.

Management believes the declines in fair value for these securities are temporary.

The following table shows the Company's investments' gross unrealized losses and fair value of the Company's investments with unrealized losses that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at December 31, 2014 and 2013:

Description of Securities	Less Than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
December 31, 2014:						
Mortgage-backed, GSE residential	$ 1,453,162	$ (4,391)	$21,157,143	$ (495,045)	$ 22,610,305	$ (499,436)
State and political subdivisions	1,859,458	(21,616)	3,456,962	(248,791)	5,316,420	(270,407)
Total temporarily impaired securities	$ 3,312,620	$ (26,007)	$24,614,105	$ (743,836)	$ 27,926,725	$ (769,843)
December 31, 2013:						
Mortgage-backed, GSE residential	$ 7,591,260	$ (528,862)	$23,706,972	$ (763,456)	$ 31,298,232	$(1,292,318)
State and political subdivisions	3,146,500	(556,613)	2,072,909	(51,047)	5,219,409	(607,660)
Total temporarily impaired securities	$ 10,737,760	$ (1,085,475)	$ 25,779,881	$ (814,503)	$ 36,517,641	$ (1,899,978)

Mortgage-backed, GSE Residential

The unrealized losses on the Company's investment in mortgage-backed, GSE residential securities were caused by interest rate increases. The Company expects to recover the amortized cost basis over the term of the securities. Because the decline in market value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell the investments and it is not more likely than not the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider those investments to be other-than-temporarily impaired at December 31, 2014.

State and Political Subdivisions

The unrealized losses on the Company's investments in securities of state and political subdivisions were caused by interest rate increases. The contractual terms of those investments do not permit the issuer to settle the securities at a price less than the amortized cost bases of the investments. Because the Company does not intend to sell the investments and it is not more likely than not the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider those investments to be other-than-temporarily impaired at December 31, 2014.

Note 3: Loans and Allowance for Loan Losses

Classes of loans at December 31, include:

	2014	2013
Commercial and industrial	$ 37,057,520	$ 34,741,806
Agricultural production financing	19,813,740	22,405,600
Real estate construction	7,477,146	2,477,778
Commercial and agricultural real estate	104,078,681	99,400,049
Residential real estate	124,329,707	115,363,261
Consumer	35,921,476	31,901,884
Other	2,733,107	4,104,722
Total loans	331,411,377	310,395,100
Less		
Net deferred loan fees	(602,873)	(635,753)
Undisbursed portion of loans	(38,862)	(295)
Allowance for loan losses	(4,475,702)	(3,929,691)
Net loans	$ 326,293,940	$ 305,829,361

At December 31, 2014 and 2013, the Company held $19,813,740 and $22,405,600 in agricultural production loans and $41,154,883 and $35,609,949, respectively, in agricultural real estate loans in Edgar, Clark, Vermillion and Champaign counties. Generally, those loans are collateralized by assets of the borrower. The loans are expected to be repaid from cash flows or from proceeds of the sale of selected assets of the borrower.

At December 31, 2014 and 2013, the Company held $62,923,798 and $63,790,100 in commercial real estate primarily in Edgar, Clark, Vermillion and Champaign counties. The loans are collateralized by the real estate properties and are expected to be repaid from cash flows of the borrower.

The Company maintains lending policies and procedures designed to focus lending efforts on the type, location and duration of loans most appropriate for its business model and markets. The Company's principal lending activity is the origination of residential, commercial and agricultural real estate loans, commercial and industrial loans, agricultural production loans, and various types of consumer loans. The primary lending market is within Edgar, Clark and Champaign Counties in the State of Illinois. Generally, loans are collateralized by assets of the borrower, and may be guaranteed by principals of the borrowing entity. The Company will analyze cash flow as part of the underwriting process to ensure that the primary source of repayment should be from cash flow with the collateral providing a secondary source of repayment.

The Board of Directors reviews and approves the Company's loan policy on at least an annual basis. In addition, the Board reviews information regarding loans originated, delinquencies, problem loans, non-accrual loans, other real estate and other repossessed collateral, and charge-offs monthly. The Board of Directors also reviews the calculation of the adequacy of the allowance for loan losses on a quarterly basis.

The Company does not accrue interest on any asset which is maintained on a cash basis because of deterioration in the financial position of the borrower, any asset for which payment in full of interest or principal is not expected, or any asset upon which principal or interest has been in default for a period of ninety days or more unless it is both well secured and in the process of collection. A nonaccrual asset may be restored to an accrual status when principal and interest are no longer due and unpaid, or the loan otherwise becomes both well secured and in the process of collection.

The Company's credit review department conducts independent analysis of all significant new credit relationships as these applicants are thoroughly analyzed and risk reviewed for presentation at various loan committee levels. In addition, using the same criteria, all loans in excess of a set threshold are reviewed on an annual basis to validate the current risk grading of the credit. The Company engages an independent outside accounting firm to perform a loan review whereby large credit relationships are reviewed for compliance, risk grading and impairment.

The following tables present the balance in the allowance for loan losses and the recorded investment in loans based on portfolio segment and impairment method as of December 31, 2014 and 2013:

	Commercial and Industrial	Agricultural Production Financing	Real Estate Construction	Commercial and Agricultural Real Estate	Residential Real Estate	Consumer	Other	Unallocated	Total
December 31, 2014:									
Allowance for loan losses:									
Balance, beginning of year	$ 909,761	$ 27,079	$ 28,256	$ 1,626,559	$ 1,043,945	$ 228,887	$ 65,204	$ —	$ 3,929,691
Provision charged to expense	41,389	2,436	32,097	(5,340)	542,139	177,433	(25,704)	—	764,450

Management's opinion as to the ultimate collectability of loans is subject to estimates regarding future cash flows from operations and the value of property, real and personal, pledged as collateral. These estimates are affected by changing economic conditions and the economic prospects of borrowers.

Allowance for Loan Losses

The allowance for loan and lease losses ("allowance") represents management's estimate of the reserve necessary to adequately account for probable losses that could ultimately be realized from current loan exposures. In determining the adequacy of the allowance, management relies predominately on a disciplined credit review and approval process. The review process is directed by overall lending policy and is intended to identify, as the earliest possible stage, borrowers who might be facing financial difficulty.

Loans for which it is probable that the Company will not collect all principal and interest due according to the contractual terms are identified as impaired. The impairment for each applicable loan is quantified, and specific loss exposures are allocated within the allowance calculation. Loans that are in nonaccrual status are generally considered impaired. The asset classification committee validates the classification and grade of each impaired loan by reviewing the written information and analysis and the liquidation value of the collateral for each credit.

The loans not identified as impaired are collectively evaluated by groups with similar characteristics for impairment based on the group's historical loss experience adjusted for changes in trends, conditions, the current economic environment, and other relevant factors.

The Company categorizes loans into risk rating based on relevant information about the ability of borrowers to service their debt such as current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. All loans are assigned an initial rating when originated, renewed, or refinanced according to established loan grading guidelines. Officers and loan committees approving loan requests review the loan grade and classification as part of the approval process. Significant commercial relationships are reviewed annually by the credit analysis department, and grade changes are made as necessary.

Credit Quality Indicators

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. This analysis is performed on all loans at origination. In addition, lending relationships over $350,000, new commercial and commercial real estate loans, and watch list credits are reviewed annually by our loan review department in order to verify risk ratings. The Company uses the following definitions for risk ratings:

Special Mention – Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

Substandard – Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful – Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loss – Loans classified as loss are the portion of the loan that is considered uncollectible so that its continuance as an asset is not warranted. The amount of the loss determined will be charged-off.

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be Pass rated loans.

Risk characteristics applicable to each segment of the loan portfolio are described as follows.

Commercial and Industrial: The commercial and industrial portfolio includes loans to commercial customers for use in financing working capital needs, equipment purchases and expansions. The loans in this category are repaid primarily from the cash flow of a borrower's principal business operation. Credit risk in these loans is driven by creditworthiness of a borrower and the economic conditions that impact the cash flow stability from business operations.

Agricultural Production and Agricultural Real Estate Loans: Agricultural loans are generally comprised of seasonal operating lines to grain farmers to plant and harvest corn and soybeans and term loans to fund the purchase of equipment. Agricultural real estate loans are primarily comprised of loans for the purchase of farmland. Specific underwriting standards have been established for agricultural-related loans including the establishment of projections for each operating year based on industry developed estimates of farm input costs and expected commodity yields and prices. Operating lines are typically written for one year and secured by the crop. Loan-to-value ratios on loans secured by farmland generally do not exceed 75% and have amortization periods limited to twenty five years. Federal government-assistance lending programs through the Farm Service Agency and U.S. Department of Agriculture are used to mitigate the level of credit risk when deemed appropriate.

Commercial Real Estate: Commercial real estate loans typically involve larger principal amounts, and repayment of these loans is generally dependent on the successful operations of the property securing the loan or the business conducted on the property securing the loan. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Credit risk in these loans may be impacted by the creditworthiness of a borrower, property values and the local economies in the Company's market areas.

Real Estate Construction: Construction and land development real estate loans are usually based upon estimates of costs and estimated value of the completed project and include independent appraisal reviews and a financial analysis of the developers and property owners. Sources of repayment of these loans may include permanent loans, sales of developed property or an interim loan commitment from the Company until permanent financing is obtained. These loans are considered to be higher risk than other real estate loans due to their ultimate repayment being sensitive to interest rate changes, general economic conditions and the availability of long-term financing. Credit risk in these loans may be impacted by the creditworthiness of a borrower, property values and the local economies in the Company's market areas.

Residential Real Estate: The residential real estate are generally secured by owner-occupied 1-4 family residences. Repayment of these loans is primarily dependent on the personal income and credit rating of the borrowers. Credit risk in these loans can be impacted by economic conditions within the Company's market areas that might impact either property values or a borrower's personal income. Risk is mitigated by the fact that the loans are of smaller individual amounts and spread over a large number of borrowers.

Consumer and Other: The consumer loan portfolio consists of various term and line of credit loans such as automobile loans and loans for other personal purposes. Repayment for these types of loans will come from a borrower's income sources that are typically independent of the loan purpose. Credit risk is driven by consumer economic factors (such as unemployment and general economic conditions in the Company's market area) and the creditworthiness of a borrower.

The following tables present the credit risk profile of the Company's loan portfolio based on internal rating category and payment activity as of December 31, 2014 and 2013:

	Commercial and Industrial	Agricultural Production Financing	Real Estate Construction	Commercial and Agricultural Real Estate	Residential Real Estate	Consumer	Other

A loan is considered impaired, in accordance with the impairment accounting guidance (ASC 310-10-35-16), when based on current information and events, it is probable the Company will be unable to collect all amounts due from the borrower in accordance with the contractual terms of the loan. Impairment is measured on a loan-by-loan basis by either the present value of the expected future cash flows, the loan's observable market value or, for collateral-dependent loans, the fair value of the collateral adjusted for market conditions and selling expenses.

The following tables present impaired loans for the years ended December 31, 2014 and 2013:

	2014

Interest income recognized on impaired loans includes interest accrued and collected on the outstanding balances of accruing impaired loans as well as interest cash collections on non-accruing impaired loans for which the ultimate collectability is not certain.

The following table presents the Company's nonaccrual loans at December 31, 2014 and 2013. This table excludes performing troubled debt restructurings.

	2014	2013
Commercial and industrial	$ 16,027	$ 98,622
Agricultural production financing	—	—
Real estate construction	—	—
Commercial and agricultural real estate	94,311	546,607
Residential real estate	358,126	321,719

December 31, 2013:				
Commercial and industrial	$ —	$ —	$ —	$ —
Agricultural production financing	—	—	—	—
Real estate construction	—	—	—	—
Commercial and agricultural real estate	293,698	—	293,698	—
Residential real estate	4,968,885	4,674,426	194,114	100,345
Consumer	—	—	—	—
Other	—	—	—	—
Total	$ 5,262,583	$ 4,674,426	$ 487,812	$ 100,345

At December 31, 2014 and 2013, twenty and eighteen loans designated as TDR were on accrual status, respectively. Performing troubled debt restructurings had performed in accordance with modified terms for a period of 6 months or more.

Newly classified troubled debt restructurings during 2014 and 2013:

	Number of Loans	2014 Pre-Modification Recorded Balance	Post-Modification Recorded Balance
Commercial and industrial	1	$ 61,950	$ 61,377
Agricultural production financing	—	—	—
Real estate construction	—	—	—
Commercial and agricultural real estate	1	43,277	44,150
Residential real estate	3	1,207,413	1,220,101
Consumer	—	—	—
Other	—	—	—
	5	$ 1,312,640	$ 1,325,628

The troubled debt restructurings described above increased the allowance for loan losses by $251,844 and resulted in charge offs of $54,251 during the year ended December 31, 2014.

	2013		
	Number of Loans	Pre-Modification Recorded Balance	Post-Modification Recorded Balance
Commercial and industrial	—	$ —	$ —
Agricultural production financing	—	—	—
Real estate construction	—	—	—
Commercial and agricultural real estate	—	—	—
Residential real estate	3	204,340	200,576
Consumer	—	—	—
Other	—	—	—
	3	$ 204,340	$ 200,576

The troubled debt restructurings described above increased the allowance for loan losses by $0 and resulted in charge offs of $18,681 during the year ended December 31, 2013.

Newly restructured loans by type of modification during 2014 and 2013:

	2014			
	Reduce Principal	Term	Interest Rate	Total Modification
Commercial and industrial	$ —	$ —	$ 61,377	$ 61,377
Agricultural production financing	—	—	—	—
Real estate construction	—	—	—	—
Commercial and agricultural real estate	—	—	44,150	44,150
Residential real estate	—	—	1,220,101	1,220,101
Consumer	—	—	—	—
Other	—	—	—	—
	$ —	$ —	$ 1,325,628	$ 1,325,628

	2013			
	Reduce Principal	Term	Interest Rate	Total Modification
Commercial and industrial	$ —	$ —	$ —	$ —
Agricultural production financing	—	—	—	—
Real estate construction	—	—	—	—
Commercial and agricultural real estate	—	—	—	—
Residential real estate	40,208	—	160,368	200,576
Consumer	—	—	—	—
Other	—	—	—	—
	$ 40,208	$ —	$ 160,368	$ 200,576

During the year ended December 31, 2014 and 2013, there were no defaults of loans that had been modified as a troubled debt restructuring in the 12 month period prior to default.

Note 4: Premises and Equipment

Major classifications of premises and equipment, stated at cost, are as follows:

	2014	2013
Land	$ 1,617,386	$ 1,617,386
Buildings and improvements	13,631,551	13,473,110
Leasehold improvements	23,899	465,730
Equipment	4,433,347	4,954,408
	19,706,183	20,510,634
Less accumulated depreciation	8,035,646	8,683,796
Net premises and equipment	$ 11,670,537	$ 11,826,838

Note 5: Core Deposit Intangibles

The carrying basis and accumulated amortization of core deposit intangibles of December 31, 2014 and 2013 were:

	2014		2013	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Core deposit intangibles	$ 889,617	$ 809,037	$ 889,617	$ 740,277

Amortization expense for the years ended December 31, 2014 and 2013 was $68,760 and $79,091, respectively. Estimated amortization expense for each of the following two years is:

2015	$ 48,595
2016	31,985

Note 6: Loan Servicing

Loans serviced for others are not included in the accompanying consolidated balance sheets. The risks inherent in loan servicing assets relate primarily to changes in prepayments that result from shifts in loan interest rates. The unpaid principal balances of serviced loans consist of the following:

	2014	2013
One-to-four family residential loans		
FHLMC	$ 126,035,111	$ 126,106,810
Agricultural loans		
Farmer Mac	733,040	761,465
Commercial loans		
Other financial institutions	6,185,579	6,808,895
	$ 132,953,730	$ 133,677,170

The following summarizes the activity pertaining to loan servicing rights measured using the amortization method:

	2014	2013
Loan servicing rights		
Balance at beginning of year	$ 476,737	$ 543,923
Additions	132,386	191,306
Amortization	(227,646)	(258,492)
Balance at end of year	$ 381,477	$ 476,737
Fair value disclosures		
Fair value as of the beginning of the period	$ 476,737	$ 543,923
Fair value as of the end of the period	$ 381,477	$ 476,737

Custodial escrow balances maintained in connection with the foregoing loan servicing, and included in demand deposits, were $700,051 and $783,895 at December 31, 2014 and 2013, respectively.

Note 7: Interest-Bearing Deposits

Interest-bearing deposits in denominations of $100,000 or more were $149,362,491 on December 31, 2014 and $132,347,534 on December 31, 2013.

At December 31, 2014, the scheduled maturities of time and brokered time deposits are as follows:

2015	$ 115,584,511
2016	40,983,573
2017	5,418,690
2018	6,531,198
2019	3,371,586
Thereafter	1,338,392
	$ 173,227,950

Note 8: Short Term Borrowings

The Company has a line of credit with a financial institution. There was no outstanding balance as of December 31, 2014 or 2013 and the Company could borrow up to $1,000,000. The line of credit is secured by 100% of the Bank's stock.

Note 9: Federal Home Loan Bank Advances

	2014	2013
Federal Home Loan Bank advances, fixed rates ranging from 1.89% to 4.29%, due at various dates through October 2019	$ 36,000,000	$ 34,000,000

The Federal Home Loan Bank advances are secured by qualified first and second mortgage loans, home equity lines of credit, certain mortgage and other investment securities, and all Federal Home Loan Bank stock owned by the Company. Advances are subject to restrictions or penalties in the event of prepayment. Convertible advances of $34,000,000 are past the initial lock-out period, and are subject to possible conversion to an adjustable rate advance on a quarterly basis. Two public unit letters of credit through Federal Home Loan Bank were previously issued for $10.2 million for one and three year terms to collateralize two public entity deposits.

Aggregate annual maturities of Federal Home Loan Bank advances at December 31, 2014 are:

2016	$ 14,000,000
2017	10,000,000
2018	10,000,000
2019	2,000,000
	$ 36,000,000

Note 10: Junior Subordinated Debentures

On June 15, 2005, the Company completed the issuance and sale of $6.0 million of trust preferred securities through FBTC Statutory Trust I (the "Trust"), a statutory business trust and wholly-owned subsidiary of the Company, as part of a pooled offering. The Company established the Trust for the purpose of issuing the trust preferred securities and investing the proceeds from the sale of such trust preferred securities in the debentures. The $6.0 million in proceeds from the trust preferred issuance and an additional $186,000 for the Company's investment in the common equity of the Trust, a total of $6,186,000 was invested in the junior subordinated debentures of the Company. The debentures issued by the Company to the Trust are redeemable, in whole or part, and mature on June 15, 2035. Interest was fixed at 5.80% for a period of five years ending June 15, 2010 and has converted to a floating rate based on the 90 day LIBOR, which is adjusted quarterly. The interest rate as of December 31, 2014 was 1.94%. Interest payments are made quarterly.

As required by ASC Topic 810, the Company has not consolidated the investment in the Trust. The debentures held by the Trust are the sole assets of the Trust. Distributions of the trust preferred securities are payable at a rate of interest which is equal to the interest rate being earned by the Trust on the debentures, and are recorded as interest expense by the Company. The trust preferred securities are subject to mandatory redemption, in whole or in part, upon repayment of the debentures. The trust preferred securities issued by the trust are included as Tier I capital of the Company for regulatory capital purposes.

Note 11: Income Taxes

The Company files consolidated income tax returns in the U.S. federal jurisdiction and the States of Illinois and Indiana. The Company is no longer subject to U.S. federal, Illinois, or Indiana income tax examinations by tax authorities for years before 2011. During the years ended December 31, 2014 and 2013, the Company has not recognized any interest or penalties in expense.

The provision for income taxes includes these components:

	2014	2013
Taxes currently payable	$ 1,983,639	$ 1,765,957
Deferred income taxes	(169,111)	(118,063)
Income tax expense	$ 1,814,528	$ 1,647,894

A reconciliation of income tax expense at the statutory rate to the Company's actual income tax expense is shown below:

	2014	2013
Computed at the statutory rate (34%)	$ 1,720,408	$ 1,602,638
Increase (decrease) resulting from		
Tax exempt interest	(122,792)	(113,706)
State income taxes	142,580	117,324
Increase in cash surrender value of life insurance	(90,524)	(92,992)
Other	164,856	134,630
Actual tax expense	$ 1,814,528	$ 1,647,894

The tax effects of temporary differences related to deferred taxes shown on the consolidated balance sheets were:

	2014	2013
Deferred tax assets		
Allowance for loan losses	$ 1,737,409	$ 1,584,535
Reserve for uncollected interest	—	63,132
Deferred compensation	577,916	523,703
Net operating losses	348,968	409,515
Unrealized losses on available-for-sale securities	—	501,135
Other	302,033	274,364
	2,966,326	3,356,384
Deferred tax liabilities		
Depreciation	(214,537)	(210,207)
Federal Home Loan Bank stock dividends	(243,375)	(252,783)
Capitalized loan servicing rights	(148,013)	(197,647)
Unrealized gains on available-for-sale securities	(61,106)	—
Other	(240,003)	(214,441)
	(907,034)	(875,078)
Net deferred tax asset	$ 2,059,292	$ 2,481,306

The Company received net operating losses from an acquisition. The remaining federal loss carryover of $894,000 expires in 2020.

Retained earnings at December 31, 2014 and 2013, include approximately $2,573,000 for which no deferred federal income tax liability has been recognized. This amount represents an allocation of income to bad debt deductions for tax purposes only. Reduction of amounts so allocated for purposes other than tax bad debt losses or adjustments arising from carryback of net operating losses would create income for tax purposes only, which would be subject to the then-current corporate income tax rate. The deferred income tax liabilities on the preceding amounts that would have been recorded if they were expected to reverse into taxable income in the foreseeable future were approximately $998,324 at December 31, 2014 and 2013.

Note 12: Accumulated Other Comprehensive Income (Loss)

The components of accumulated other comprehensive income (loss) included in stockholders' equity, are as follows:

	2014	2013
Net unrealized gain (loss) on securities available-for-sale	$ 151,629	$ (1,243,511)
Defined benefit pension plan deferred amounts	(54,245)	(125,915)
	97,384	(1,369,426)
Tax effect	39,246	(551,879)
Accumulated other comprehensive income (loss), net of taxes	$ 58,138	$ (817,547)

Note 13: Changes in Accumulated Other Comprehensive Income (AOCI) by Component

Amounts reclassified from AOCI and the affected line items in the statements of income during the years ended December 31, 2014, were as follows:

	Amounts Reclassified from AOCI 2014	Affected Line Item in the Statements of Income
Actuarial losses	$ 71,669	Components are included in the computation of net periodic pension cost
Total reclassified amount before tax	71,669	
Tax benefit	28,883	
Total reclassifications out of AOCI	$ 42,786	

Note 14: Regulatory Matters

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Furthermore, the Bank's regulators could require adjustments to regulatory capital not reflected in these consolidated financial statements.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier I capital to average assets (as defined). Management believes, as of December 31, 2014 and 2013, that the Bank meets all capital adequacy requirements to which it is subject.

As of December 31, 2014, the most recent notification from regulatory agencies categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier I risk-based and Tier I leverage ratios as set forth in the table. There are no conditions or events since that notification that management believes have changed the Bank's category.

The Bank's actual capital amounts and ratios are also presented in the following table.

	Actual		Minimum Capital Requirement		Minimum to Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
	(dollars in thousands)					
As of December 31, 2014						
Total capital (to risk-weighted assets)	$ 46,749	14.5%	$ 25,795	8.0%	$ 32,244	10.0%
Tier I capital (to risk-weighted assets)	42,713	13.3	12,898	4.0	19,346	6.0
Tier I capital (to average assets)	42,713	9.9	17,234	4.0	21,543	5.0
As of December 31, 2013						
Total capital (to risk-weighted assets)	$ 44,765	14.6%	$ 24,534	8.0%	$ 30,668	10.0%
Tier I capital (to risk-weighted assets)	40,930	13.4	12,267	4.0	18,401	6.0
Tier I capital (to average assets)	40,930	10.3	15,931	4.0	19,913	5.0

The Bank is permitted to pay dividends to the Company in an amount equal to its net profits in any fiscal year; however, in the event that capital is less than 6% to total assets, the Bank can pay up to 50% of its net profits for that year without prior approval of the State of Illinois Department of Financial and Professional Regulation. In addition, the Bank is unable to pay dividends in an amount which would reduce its capital below the greater of (i) the amount required by the FDIC or (ii) the amount required by the Bank's liquidation account. The FDIC and the Commissioner also have the authority to prohibit the payment of any dividends by the Bank if they determine that the distribution would constitute an unsafe or unsound practice. At December 31, 2014, $1,705,000 of retained earnings were available for dividend declaration without prior regulatory approval.

Note 15: Related Party Transactions

At December 31, 2014 and 2013, the Company had loans outstanding to executive officers, directors, significant stockholders and their affiliates (related parties), in the amount of $3,850,209 and $2,191,704, respectively.

In management's opinion, such loans and other extensions of credit were made in the ordinary course of business and were made on substantially the same terms (including interest rates and collateral) as those prevailing at the time for comparable transactions with other persons. Further, in management's opinion, these loans did not involve more than normal risk of collectibility or present other unfavorable features.

Note 16: Employee Benefits

The Company has a retirement savings 401(k) covering substantially all employees. The Company may contribute to the plan at the discretion of the Board of Directors. Employer contributions charged to expense for 2014 and 2013 were $108,305 and $105,102, respectively.

The Company has a noncontributory defined postretirement plan covering all employees who meet the eligibility requirements. Eligible employees who retire may elect to continue medical coverage by paying the full cost of the coverage.

The Company has a deferred director and employee fee plan covering certain directors and officers. Each director may elect to defer their annual fees while certain officers may defer up to 5% of their annual salary. For the years ended December 31, 2014 and 2013, fees deferred and interest expense related to the plan totaled $198,780 and $190,634, respectively. The liability related to these plans was $1,489,473 and $1,299,510 as of December 31, 2014 and 2013 and included in other liabilities.

The Company has a noncontributory defined benefit postretirement plan covering two former directors of an acquired institution relating to the reimbursement of health insurance premiums for life. The Plan is unfunded with actual premium payments being paid as incurred. The accumulated postretirement benefit was immaterial as of December 31, 2014 and 2013.

The Company also has deferred compensation agreements with certain directors and officers of the former Rantoul First Bank, SB. The agreements, which include specific service requirements, provide benefits to certain retired directors and officers upon attainment of specified ages, disability or death. The deferred compensation charged to earnings were $16,684 and $16,008 for the year ended December 31, 2014 and 2013. The deferred compensation liability, included in other liabilities, related to these agreements was $26,060 and $41,360 as of December 31, 2014 and 2013.

Note 17: Employee Stock Ownership Plan

The Company has an employee stock ownership plan (ESOP) covering substantially all employees who work 20 or more hours per week. As of December 31, 2014, all ESOP shares have been released to participants.

The Company is obligated at the option of each beneficiary to repurchase shares of the ESOP upon the beneficiary's termination or after retirement. At December 31, 2014, the fair value of the 151,874 allocated shares held by the ESOP is $2,460,359.

Note 18: Incentive Plan

The Company has a stock award program or incentive plan which provides for the award and issuance of up to 121,670 shares of the Company stock to members of the Board of Directors and management. The incentive plan purchased 121,670 shares of the Company stock in the open market in 2002. The Company believes that such awards better align the interests of its employees and Board of Directors with those of its stockholders.

At December 31, 2014 and 2013, 70,012 shares had been awarded of which all have vested.

As of December 31, 2014 and 2013, there was no unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the Plan.

Note 19: Stock Option Plan

The Company has a fixed option plan, which is stockholder approved, under which the Company may grant options that vest over five years to selected employees for up to 304,174 shares of common stock. The Company believes that such awards better align the interests of its employees with those of its shareholders. The exercise price of each option is intended to equal the fair value of the Company's stock on the date of grant. An option's maximum term is ten years. As of December 31, 2014, all of the stock options were fully vested.

The fair value of each option award is estimated on the date of grant Black-Scholes option pricing model. Expected volatility is based on historical volatility of the Company's stock and other factors. The Company uses historical data to estimate option exercise and employee termination within the valuation model; separate groups of employees that have similar historical exercise behavior are considered separately for valuation purposes. The expected term of options granted is derived from the output of the option valuation model and represents the period of time that options granted are expected to be outstanding; the range given below results from certain groups of employees exhibiting different behavior. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

At December 31, 2014 and 2013, the Plan had no shares that are outstanding and exercisable. There were 183,300 shares exercised at $9.87 per share during 2013. The remaining 48,500 options expired on May 15, 2013.

Note 20: Leases

The Company has several noncancellable operating leases, including leases for other various types of equipment, including copiers and postage machines. The equipment operating leases expire over the next five years, and generally contain renewal options for one year to five years. Total rental expense for all operating leases was $54,302 and $55,854 for the years ended December 31, 2014 and 2013.

Future minimum lease payments under operating leases are:

2015	$ 14,663
2016	10,422
2017	9,226
2018	2,157
Total minimum lease payments	$ 36,468

Note 21: Earnings Per Share

Earnings per share (EPS) were computed as follows:

	Year Ended December 31, 2014		
	Income	Weighted-Average Shares	Per Share Amount
Net income	$ 3,245,495	2,114,761	
Basic earnings per share			$ 1.53

The Company had no dilutive securities during 2014.

	Year Ended December 31, 2013		
	Income	Weighted-Average Shares	Per Share Amount
Net income	$ 3,065,747	2,100,174	
Basic earnings per share			
Income available to common stockholders			$ 1.46
Effect of dilutive securities		11,240	
Diluted earnings per share			
Income available to common stockholders and assumed conversions	$ 3,065,747	$ 2,111,414	$ 1.45

Note 22: Disclosures about Fair Value of Assets

Fair value is the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date. Fair value measurements must maximize the use of observable inputs and minimize the use of unobservable inputs. There is a hierarchy of three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets

Level 3 Unobservable inputs supported by little or no market activity and are significant to the fair value of the assets

Recurring Measurements

The following table presents the fair value measurements of assets recognized in the accompanying consolidated balance sheets measured at fair value on a recurring basis and the level within the fair value hierarchy in which the fair value measurements fall at December 31, 2014 and 2013:

	2014			
		Fair Value Measurements Using		
	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Mortgage-backed, GSE residential	$ 42,028,180	$ —	$ 42,028,180	$ —
State and political subdivision securities	13,930,284	—	13,930,284	—
Equity securities	11,366	11,366	—	—
	$ 55,969,830	$ 11,366	$ 55,958,464	$ —

	2013			
		Fair Value Measurements Using		
	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
U.S. Government federal agency and Government-sponsored enterprises (GSEs)	$ 573,161	$ —	$ 573,161	$ —
Mortgage-backed, GSE residential	43,790,482	—	43,790,482	—
State and political subdivision securities	11,271,287	—	11,271,287	—
Equity securities	496,679	14,275	482,404	—
	$ 56,131,609	$ 14,275	$ 56,117,334	$ —

Following is a description of the valuation methodologies and inputs used for assets measured at fair value on a recurring basis and recognized in the accompanying consolidated balance sheets, as well as the general classification of such assets pursuant to the valuation hierarchy. There have been no significant changes in the valuation techniques during the year ended December 31, 2014.

Available-for-sale Securities

Where quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. If quoted market prices are not available, then fair values are estimated by using quoted prices of securities with similar characteristics or independent asset pricing services and pricing models, the inputs of which are market-based or independently sourced market parameters, including, but not limited to, yield curves, interest rates, volatilities, prepayments, defaults, cumulative loss projections and cash flows. Such securities are classified in Level 2 of the valuation hierarchy. In certain cases where Level 1 or Level 2 inputs are not available, securities are classified within Level 3 of the hierarchy. There were no securities classified as Level 3 as of December 31, 2014.

Nonrecurring Measurements

The following table presents the fair value measurement of assets measured at fair value on a nonrecurring basis and the level within the fair value hierarchy in which the fair value measurements fall at December 31, 2014 and 2013:

		Fair Value Measurements Using		
	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2014				
Collateral-dependent impaired loans	$ 4,798,257	$ —	$ —	$ 4,798,257
December 31, 2013				
Collateral-dependent impaired loans	$ 5,885,745	$ —	$ —	$ 5,885,745
Foreclosed assets held for sale	411,200	—	—	411,200

Following is a description of the valuation methodologies and inputs used for assets measured at fair value on a nonrecurring basis and recognized in the accompanying consolidated balance sheets, as well as the general classification of such assets pursuant to the valuation hierarchy. For assets classified within Level 3 of the fair value hierarchy, the process used to develop the reported fair value is described below.

Collateral-dependent Impaired Loans, Net of ALLL

The estimated fair value of collateral-dependent impaired loans is based on the appraised fair value of the collateral, less estimated cost to sell. Collateral-dependent impaired loans are classified within Level 3 of the fair value hierarchy.

The Company considers the appraisal or evaluation as the starting point for determining fair value and then considers other factors and events in the environment that may affect the fair value. Appraisals of the collateral underlying collateral-dependent loans are obtained when the loan is determined to be collateral-dependent and subsequently as deemed necessary by management. Appraisals are reviewed for accuracy and consistency by management. Appraisers are selected from the list of approved appraisers maintained by management. The appraised values are reduced by discounts to consider lack of marketability and estimated cost to sell if repayment or satisfaction of the loan is dependent on the sale of the collateral. These discounts and estimates are developed by management by comparison to historical results.

Foreclosed Assets Held for Sale

Other real estate owned acquired through loan foreclosure are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. Due to the subjective nature of establishing the fair value when the asset is acquired, the actual fair value of the other real estate owned or foreclosed asset could differ from the original estimate and are classified within Level 3 of the fair value hierarchy.

Unobservable (Level 3) Inputs

The following table presents quantitative information about unobservable inputs used in recurring and nonrecurring Level 3 fair value measurements.

	Fair Value at 12/31/14	Valuation Technique	Unobservable Inputs	Range (Weighted Average)
Collateral-dependent impaired loans	$ 4,798,257	Market comparable properties	Marketability discount	10% – 15% (12%)

	Fair Value at 12/31/13	Valuation Technique	Unobservable Inputs	Range (Weighted Average)
Foreclosed assets held for sale	$ 411,200	Market comparable properties	Comparability adjustments (%)	Not available
Collateral-dependent impaired loans	5,885,745	Market comparable properties	Marketability discount	10% – 15% (12%)

Fair Value of Other Financial Instruments

The following table presents estimated fair values of the Company's other financial instruments at December 31, 2014 and 2013.

	December 31, 2014		December 31, 2013	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets				
Cash and cash equivalents	$ 21,152,186	$ 21,152,186	$ 13,567,830	$ 13,567,830
Interest-bearing time deposits in banks	1,245,000	1,245,000	1,245,000	1,245,000
Held-to-maturity securities	398,469	416,450	601,052	631,937
Loans held for sale	221,000	229,707	—	—
Loans, net allowance of loan losses	326,293,940	339,158,422	305,829,361	308,031,332
Federal Home Loan Bank stock	2,610,490	2,610,490	2,610,490	2,610,490
Interest receivable	2,450,615	2,450,615	2,517,410	2,517,410
Financial liabilities				
Deposits	347,250,019	339,089,644	326,922,660	324,667,428
Federal Home Loan Bank advances	36,000,000	38,243,821	34,000,000	37,170,519
Junior subordinated debentures	6,186,000	6,186,000	6,186,000	6,186,000
Pass through payments received on loans sold	—	—	81,111	81,111
Advances from borrowers for taxes and insurance	395,367	395,367	381,148	381,148
Interest payable	330,962	330,962	285,184	285,184
Unrealized financial instruments (net of contract amount)				
Commitments to originate loans	0	0	0	0
Lines of credit	0	0	0	0

The following methods were used to estimate the fair value of all other financial instruments recognized in the accompanying consolidated balance sheets at amounts other than fair value.

Cash and Cash Equivalents, Interest-Bearing Time Deposits in Banks, Interest Receivable and Federal Home Loan Bank Stock

The carrying amount approximates fair value.

Held-to-maturity Securities

Fair value is based on quoted market prices, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

Loans Held For Sale

For homogeneous categories of loans, such as loans held for sale, fair value is estimated using the quoted market prices for securities backed by similar loans, adjusted for differences in loan characteristics.

Loans

The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Loans with similar characteristics were aggregated for purposes of the calculations.

Deposits

Deposits include demand deposits, savings accounts, NOW accounts and certain money market deposits. The carrying amount approximates fair value. The fair value of fixed-maturity time deposits is estimated using a discounted cash flow calculation that applies the rates currently offered for deposits of similar remaining maturities.

Pass Through Payments Received on Loans Sold, Interest Payable and Advances from Borrowers for Taxes and Insurance

The carrying amount approximates fair value.

Federal Home Loan Bank Advances and Junior Subordinated Debentures

Rates currently available to the Company for debt with similar terms and remaining maturities are used to estimate the fair value of existing debt.

Commitments to Originate Loans and Lines of Credit

The fair value of commitments to originate loans is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. The fair value of lines of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate or otherwise settle the obligations with the counterparties at the reporting date.

Note 23: Significant Estimates and Concentrations

Accounting principles generally accepted in the United States of America require disclosure of certain significant estimates and current vulnerabilities due to certain concentrations. Estimates related to the allowance for loan losses, the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans, fair value or financial instruments, and valuation of loan servicing rights are reflected in their respective notes. Current vulnerabilities due to certain concentrations of credit risk are discussed in the note on commitments and credit risk. Other significant estimates and concentrations not discussed in those notes include:

Goodwill

As discussed in Note 1, the Company annually tests its goodwill for impairment. At the most recent testing date, the fair value of the reporting unit exceeded its carrying value. Estimated fair value of the reporting unit was based principally on forecasts of future income. Due to the volatility of the current economic environment, coupled with the Company's recent loan loss experience, management's forecasts of future income are subject to significantly more uncertainty than during more stable environments. Management believes it has applied reasonable judgment in developing its estimates; however, unforeseen negative changes in the national, state or local economic environment may negatively impact those estimates in the near term.

Note 24: Commitments and Credit Risk

The Company generates commercial, mortgage and consumer loans and receives deposits from customers located primarily in Edgar, Clark, Vermilion and Champaign counties as well as the surrounding communities. The Company's loans are generally secured by specific items of collateral including real property, consumer assets and business assets. Although the Company has a diversified loan portfolio, a substantial portion of its debtors' ability to honor their contracts is dependent upon economic conditions in the agricultural industry.

Commitments to Originate Loans

Commitments to originate loans are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since a portion of the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Each customer's creditworthiness is evaluated on a case-by-case basis. The amount of collateral obtained, if deemed necessary, is based on management's credit evaluation of the counterparty. Collateral held varies, but may include accounts receivable, inventory, property, plant and equipment, commercial real estate and residential real estate.

At December 31, 2014 and 2013, the Company had outstanding commitments to originate loans aggregating approximately $4,508,520 and $11,733,150, respectively. The commitments extended over varying periods of time with the majority being disbursed within a one-year period. Loan commitments at fixed rates of interest amounted to $4,203,920 and $11,368,350 at December 31, 2014 and 2013, respectively, with the remainder at floating market rates.

Lines of Credit

Lines of credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Lines of credit generally have fixed expiration dates. Since a portion of the line may expire without being drawn upon, the total unused lines do not necessarily represent future cash requirements. Each customer's creditworthiness is evaluated on a case-by-case basis. The amount of collateral obtained, if deemed necessary, is based on management's credit evaluation of the counterparty. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, commercial real estate and residential real estate. Management uses the same credit policies in granting lines of credit as it does for on-balance-sheet instruments.

At December 31, 2014, the Company had granted unused lines of credit to borrowers aggregating approximately $23,331,504 and $8,606,082 for commercial lines and open-end consumer lines, respectively. At December 31, 2013, unused lines of credit to borrowers aggregated approximately $23,923,233 for commercial lines and $7,748,249 for open-end consumer lines.

Other Credit Risks

The Company had a concentration of funds on deposit with the Federal Home Loan Bank totaling $5,803,436 and $962,810 at December 31, 2014 and 2013. The Company had deposits from four customers totaling $19,284,013 as of December 31, 2014 and from three customers totaling $14,014,472 as of December 31, 2013.

Note 25: Subsequent Events

Subsequent events have been evaluated through the date of the Independent Auditor's Report, which is the date the consolidated financial statements were available to be issued.

FIRST BANCTRUST CORPORATION
SHAREHOLDER INFORMATION

Stock Listing and Price Information

The Company's common stock trades on the Pink Sheets under the symbol "FIRT". The number of outstanding shares of common stock of the Company at the close on March 2, 2015, totaled 2,152,719. These shares were held by 119 persons or entities, which does not individually count each person or entity holding stock in nominee of street name through various brokers or banks.

The following schedule shows the high and low bid prices for each of the quarters in 2013 and 2014:

Quarter Ended:	High	Low
March 31, 2013	11.75	11.00
June, 30 2013	13.50	12.35
September 30, 2013	14.85	12.75
December 31, 2013	14.85	13.25
March 31, 2014	14.70	14.00
June, 30 2014	14.95	14.00
September 30, 2014	15.00	14.00
December 31, 2014	16.20	15.00

At March 2, 2015, the closing price of a common share was $16.15. Such prices do not necessarily reflect retail markups, markdowns, or commissions. During the years ended December 31, 2013 and 2014, the Company declared common share dividends as follows:

Date Declared	Record Date	Payment Date	Amount
February 21, 2013	March 11, 2013	March 22, 2013	$0.02
April 22, 2013	June 3, 2013	June 14, 2013	$0.02
July 22, 2013	September 5, 2013	September 16, 2013	$0.02
October 25, 2013	December 2, 2013	December 13, 2013	$0.02
February 20, 2014	March 10, 2014	March 21, 2014	$0.03
April 28, 2014	June 2, 2014	June 16, 2014	$0.03
July 17, 2014	September 5, 2014	September 16, 2014	$0.04
October 24, 2014	December 1, 2014	December 12, 2014	$0.04
