NOTES TO THE FINANCIAL STATEMENTS

NOTE 1 - ORGANIZATION AND DESCRIPTION OF BUSINESS

Brilliant Sands Incorporated (hereinafter “BRSD” or “the Company”) was incorporated as Helena Silver Mines in May 1888 under the laws of the State of Montana. In July 2006, Helena Silver Mines Inc. completed a share acquisition agreement with Dome Copper, Inc. The acquisition was accounted for as a reverse merger with Helena Silver Mines, Inc. being the accounting acquirer and Dome Copper, Inc. surviving as a wholly owned subsidiary. At the time of the acquisition, the name of the Company was changed to Consolidated Goldfields Corporation. On January 12, 2015 the Company held a Special Meeting of Stockholders to change the name of the Company to Brilliant Sands Incorporated which became effective on March 16, 2015.

The Company is an exploration stage company engaged in the acquisition, exploration and development of frac sand and mining properties. The Company’s year-end is December 31.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The financial statements are prepared using the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

The financial statements are prepared in accordance with accounting guidance for development stage entities as it devotes substantially all of its efforts to acquiring and developing mining interests that will eventually provide sufficient net profits to sustain the Company’s existence. Until such interests are engaged in major commercial production, the Company will continue to prepare its financial statements and related disclosures in accordance with entities in the development stage.

In conjunction with development stage disclosure requirements, inception to date figures are included in the financial statements.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make complex and subjective estimates and assumptions that affect the reported amounts in the Company’s financial statements and notes thereto for items such as potential impairment of investments available for sale and long-lived assets, the valuation of stock based compensation and determination of deferred income taxes. On a regular basis, management evaluates these estimates and assumptions. Actual results may differ materially from these estimates.

The Company believes the estimates used are reasonable and appropriate based on current facts and circumstances. It is possible, however, that other parties applying reasonable judgment to the

NOTES TO THE FINANCIAL STATEMENTS

same facts and circumstances could develop different estimates. Additionally, changes in actual experience or changes in other qualitative factors could cause estimates to fluctuate.

Cash and Cash Equivalents

For the purposes of the statements of cash flows and balance sheets, the Company considers any highly liquid investments purchased with a maturity of three months or less to be cash equivalents.

Earnings Per Share

Basic net income/ (loss) per share is computed by dividing the net income (loss) by the weighted average number of shares outstanding during the year. The weighted average number of shares is calculated by taking the number of shares outstanding and weighting them by the amount of time they were outstanding. The following options, warrants and convertible debt equitable shares were excluded from the computation of diluted earnings per share for years ended December 31, 2014 and 2013 because they were anti-dilutive:

	December 31, 2014	December 31, 2013
Options	2,780,368	2,313,698
Warrants	1,554,030	1,554,030
Convertible Debt	99,667	99,667
	<u>4,434,065</u>	<u>3,967,395</u>

Investments in Debt and Equity Securities

At acquisition, the Company classifies debt securities and equity securities into one of the following three categories:

Held to Maturity – the positive intent and ability to hold to maturity. Amounts are reported at amortized cost, adjusted for amortization of premiums and accretion of discounts.

Trading Securities – bought principally for purpose of selling them in the near term. Amounts are reported at fair value, with unrealized gains and losses included in earnings.

Available for Sale – not classified in one of the above categories. Amounts are reported at fair value, with unrealized gains and losses excluded from earnings and reported separately as a component of stockholders' equity.

BRILLIANT SANDS INCORPORATED
(An Exploration Stage Company)
Financial Statements for the Year Ending December 31, 2014
(unaudited)
NOTES TO THE FINANCIAL STATEMENTS

The Company periodically reviews its investments for indications of other than temporary impairment considering many factors, including the extent and duration to which a security's fair value has been less than its cost, overall economic and market conditions, and the financial condition and specific prospects for the issuer. Impairment of investment securities results in a charge to income when a market decline below cost is other than temporary.

The Company held securities classified as available for sale at December 31, 2014 and 2013. See "Note 3, Investments – Available for Sale" for further details.

Fair Value Measurements

The Company discloses the following information for each class of assets and liabilities that are measured at fair value:

- a. the fair value measurement;
- b. the level within the fair value hierarchy in which the fair value measurements in their entirety fall, segregating fair value measurements using quoted prices in active markets for identical assets or liabilities (Level 1), significant other observable inputs (Level 2), and significant unobservable inputs (Level 3);
- c. for fair value measurements using significant unobservable inputs (Level 3), a reconciliation of the beginning and ending balances, separately presenting changes during the period attributable to the following:
 - 1) total gains or losses for the period (realized and unrealized), segregating those gains or losses included in earnings, and a description of where those gains or losses included in earnings are reported in the statement of operations;
 - 2) the amount of these gains or losses attributable to the change in unrealized gains or losses relating to those assets or liabilities still held at the reporting period date and a description of where those unrealized gains or losses are reported;
 - 3) purchases, sales, issuances, and settlements (net); and
 - 4) transfers into and/or out of Level 3.
- d. The amount of the total gains or losses for the period in (c)(1) included in earnings that are attributable to the change in unrealized gains or losses relating to those assets and liabilities still held at the reporting date and a description of where those unrealized gains or losses are reported in the statement of operations; and
- e. In annual periods only, the valuation technique(s) used to measure fair value and a discussion of changes in valuation techniques, if any, during the period.

Mineral Exploration and Development Costs

All exploration expenditures are expensed as incurred. Expenditures to develop new mines, to define further mineralization in existing ore bodies, and to expand the capacity of operating mines, are capitalized and amortized on a unit of production basis over proven and probable reserves.

BRILLIANT SANDS INCORPORATED
(An Exploration Stage Company)
Financial Statements for the Year Ending December 31, 2014
(unaudited)
NOTES TO THE FINANCIAL STATEMENTS

Mineral Properties and Interests

Significant payments related to the acquisition of mineral properties, mineral rights, and mineral leases are capitalized (see Note 4). Costs to maintain the mineral rights and leases are expensed as incurred. When a property reaches the production stage, the related capitalized costs will be amortized using the units of production method on the basis of periodic estimates of ore reserves.

Should an interest be abandoned, its capitalized costs are charged to operations. When mineral interests are sold, the capitalized costs are eliminated from the accounts and any resulting gain or loss is reflected in operations. If a part of the mineral interest is sold, the amount received is treated as a recovery of capitalized cost. Mineral properties and interests are periodically assessed for impairment of value and any diminution in value.

Accounting for Investments in Joint Ventures

For joint ventures, whether incorporated or unincorporated, in which the Company does not have joint control and significant influence, the cost method is used. Under the cost method, these investments are carried at the lower of cost or fair value. For those joint ventures in which there is joint control between the parties and the Company has significant influence, the equity method is utilized whereby the Company's share of the ventures' earnings and losses is included in the statement of operations as earnings in joint ventures and its investments therein are adjusted by a similar amount.

For joint ventures where the Company holds more than 50% of the voting interest and has significant influence, the joint venture will be consolidated with the presentation of noncontrolling interest. In determining whether significant influence exists, the Company considers its participation in policy-making decisions and its representation on the venture's management committee.

Stock Based Compensation

For issuance of shares of the Company's common stock for services or other consideration, the shares are valued at the market price of the Company's common stock or the fair value of the services or consideration received, whichever is more readily determinable.

For issuances of options to purchase shares of the Company's common stock, stock based compensation is recognized in the financial statements based on the grant date fair value of the award. The fair value is determined by the Binomial Lattice option pricing model. The Company believes that this model provides the best estimate of fair value due to its ability to incorporate inputs that change over time, such as volatility and interest rates, and to allow for the actual exercise behavior of option holders. The compensation cost is recognized over the requisite service period which is equal to the vesting period.

NOTES TO THE FINANCIAL STATEMENTS

Provision for Taxes

The Company recognizes deferred tax liabilities and assets for the expected future tax consequences of events that have been included in the financial statements or tax returns. Accordingly, deferred tax liabilities and assets are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted rules in effect for the year in which differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

A valuation allowance is established to reduce the deferred tax assets when the Company determines it is more likely than not that the related tax benefits will not be realized. The Company periodically reviews the valuation of deferred tax assets in light of expected future operating results.

Asset Retirement Obligations and Remediation Costs

Mineral properties are subject to standards for mine reclamation that have been established by various governmental agencies. Asset retirement obligations are related to the retirement of the mine, if a reasonable estimate of fair value can be determined. These obligations are initially measured at fair value with the resulting cost capitalized at the present value of estimated reclamation costs. An asset and a related liability are recorded for the present value of these costs. The liability is accreted and the asset amortized over the life of the related asset. Adjustments are made for changes resulting from either the timing or amount of the original present value estimate underlying the obligation. If there is an impairment to an asset's carrying value and a decision is made to permanently close the property, changes to the liability are recognized and charged to the provision for closed operations and environmental matters. The Company had no asset retirement obligations as of December 31, 2014 and at December 31, 2013.

Liquidating Trust

On October 22, 2013 the Company announced that its board of directors has approved the creation of a trust ("the Trust") for the purpose of holding three million common shares of Teras Resources Inc. currently held by the Company. The sole purpose of the Trust will be to liquidate the Teras Shares and distribute the cash proceeds of the liquidation from time to time to record holders of common stock of the Company as of the close of business on December 16, 2013. No holders of the Company's common stock other than the record holders will be entitled to any distributions from the Trust. The Trust will have no objective to continue or engage in the conduct of a trade or business.

It is expected that the liquidation of the Teras Shares will begin upon the earlier of:

- eighteen months after the effective date of the Trust;
- Teras common shares achieving trading price targets to be set forth in the trust agreement;
- certain circumstances relating to the change in control of Teras to be set forth in the trust agreement; or
- certain circumstances relating to the change in ownership of certain Teras' assets, including the Teras' interest in the Cahuilla property, to be set forth in the trust agreement.

Thereafter, the trust agreement will authorize the trustee to sell a portion of the Teras Shares held in the Trust on a monthly basis according to the terms of the trust agreement and to distribute the cash proceeds of those sales from time to time to the record holders on a pro rata basis. It is anticipated that the term of the trust will be for no longer than three years, subject to extensions at the discretion of the trustee if the trustee determines that an extension is reasonably necessary to wind up the affairs of the Trust.

The Trust, at this time, has not been formally executed and the shares have not been transferred from Teras to the Company. The Company has not yet chosen a trustee, determined trustee

compensation or finalized the terms of the trust agreement. The Company is continuing to evaluate the terms of the Trust and the various issues involved in the creation and maintenance of the Trust, which may include, among other things, issues relating to the tax, securities and other regulatory aspects of the arrangement. The creation of the Trust and the grant of the Teras Shares to the Trust continue to be subject to the further discretion of the Company's board of directors, and there can be no assurance that the Trust will be created or that distributions will be made to the Company's shareholders.

In addition, the Company entered into a Production Royalty Agreement on the Canadian properties. The Company will pay a two (2%) percent production royalty of actual proceeds from the sale or other disposition of the product commencing on the date on which commercial production is achieved. The Company has agreed to an advance minimum royalty ("AMR") to begin on the one year anniversary of the closing date and continuing yearly up to the date of commercial production in the amount of \$225,000 annually. The annual AMR will be paid on a quarterly basis in four equal installments. AMR's paid prior to commercial production for each property will be credited against future production royalties on each property on a dollar for dollar basis up to the maximum rate per quarter. The AMR's paid shall be non-refundable.

King Solomon

On November 4, 2014, and December 3, 2014, the Company entered into an Exploration and Mining Lease with Option to Purchase Agreement on the King Solomon project with Mountain Gold Claims LLC Series 9, which is owned by a former director and officer of the Company and a private individual, respectively. The property consists of a total 66 unpatented mining claims situated in Nye County Nevada. Lease payments are payable to each party as outlined below:

- On signing of the agreement, 8,334 shares of the Company's common stock were issued to the private individual
- On signing of the agreements, a total of \$5,000 (paid November and December 2014, respectively)
- On or prior to each anniversary date, to each party:

Fisher Canyon

On January 26, 2011, the Company entered into an Exploration and Mining Lease Agreement and Option to Purchase Royalty Agreement for the Fisher Canyon Project with Mountain Gold Claims Series 7 ("Mountain Gold"), which is owned by a former officer and director of the Company and a current director and former officer of the Company, who each hold a 50% interest in the property. The property consists of 87 unpatented mining claims situated in Pershing County Nevada. The Company previously held 123 unpatented mining claims and after further review the Company has decided to drop the additional 36 claims which were staked in February 2012. Lease payments for the property are outlined below:

- On signing of the agreement: 100,000 shares of Teras common stock owned by the Company ("Teras Shares") which had a fair value of \$50,225 on the date of the agreement. The difference between the fair value and the cost basis of the Teras Shares of \$31,552 was recognized as a gain during the year ended December 31, 2011.
- On or prior to each anniversary date:
 - 1st: \$5,000 and 100,000 Teras Shares (paid February 2012). The Company also paid a penalty of 5,000 Teras Shares. See Note 3.
 - 2nd: \$10,000 and 100,000 Teras Shares (paid January 2013)
 - 3rd: \$15,000 and 100,000 Teras Shares (please see note below regarding the renegotiated 3rd anniversary).
 - 4th: \$20,000 and 100,000 Teras Shares (paid January 2015)
 - 5th and thereafter: \$25,000 and 100,000 Teras Shares
- Pay various state and federal claim-related fees

The lease agreement also requires minimum work commitments on or prior to each anniversary date as follows:

- 1st: \$10,000 (\$7,213 spent)
- 2nd: \$25,000 (\$185,970 spent, excludes annual claim fees)

NOTES TO THE FINANCIAL STATEMENTS

On February 26, 2014, the Company renegotiated the 3rd Anniversary of the Exploration and Mining Lease Agreement and Option to Purchase Royalty Agreement for the Fisher Canyon Project with Mountain Gold Claims Series 7 (“Mountain Gold”), which is owned by a former officer and director of the Company and a current director and former officer of the Company, who each hold a 50% interest in the property. The terms on the 3rd anniversary (January 26, 2014) will be changed accordingly:

- The cash payment of \$15,000 is removed and will not apply at any time.
- The stock distribution of 100,000 (one hundred thousand) common shares of Teras Resources will be reduced to 50,000 (fifty thousand), to be divided equally among the owners.
- CDGF will quitclaim to Thomas Callicrate (Mountain Gold Claims LLC) the unpatented lode claims that represent the Golden Mile property consisting of 13 unpatented mining claims. All costs for transfer and maintenance will be the responsibility of Mr. Callicrate.

Pyramid Mine

The Pyramid Mine project consists of five unpatented claims encompassing 100 acres located in Churchill County, Nevada which are 100% owned by the Company. No proven or probable reserves have been identified on the property.

In April 2009, the Company entered into an Option-to-Purchase Royalty Agreement (“the Purchase Agreement”) with Trend Mining Company giving the Company the option to purchase a 1.5% Net Smelter Return (“NSR”) Royalty on the unpatented mining claims of the Pyramid Mine. Under the Purchase Agreement the Company issued 33,334 shares of common stock at \$0.18 per share. To complete the purchase, the Company agreed to pay an additional \$44,000 in cash or common stock by February 16, 2011. On January 28, 2011, the Company completed the final payment of \$44,000 by issuance of 54,321 shares of common stock with a fair value of \$0.81 per share.

Total exploration expenses for the Pyramid Mine project for the years ended December 31, 2014 and 2013 were \$882 and \$12,108, respectively.

One of the Company’s former directors was an affiliate of Trend Mining Company.

Koegel Hills

The Koegel Hills project consists of 71 unpatented claims encompassing 1,420 acres located in Mineral County, Nevada which are 100% owned by the Company. The project is an extensive copper-gold bearing porphyry system manifested by intense surface alteration that extends for more than six square miles.

Total exploration expenses for the Koegel Hills project for the years ended December 31, 2014 and 2013 were \$12,463 and \$10,687, respectively.

Rose Gulch

On August 27, 2012, the Company entered into an Exploration and Mining Lease and Option to Purchase Agreement on the Rose Gulch Property with a private individual. The property consists of 460 acres of private land located in Pershing County, Nevada. Lease payments for the property are outlined below:

- On signing of the agreement \$10,000 (paid July 2012)
- On or prior to each anniversary date:
 - 1st: \$15,000 (paid August 2013)
 - 2nd: \$20,000 (lease terminated September 2014)
 - 3rd: \$25,000
 - 4th: \$30,000
 - 5th and thereafter: \$40,000

The lease also requires minimum work commitments on or prior to each anniversary date as follows:

- 1st: \$5,000 (\$26,441 spent)
- 2nd: \$15,000 (\$12,800 spent as of September 30, 2014)
- 3rd: \$25,000
- 4th: \$50,000
- 5th and thereafter: \$75,000

All work expenditures made by the Company during any lease year in excess of the work commitment expenditures required for such lease year will be credited against work commitment requirements for any subsequent lease year.

Total exploration expenses for the Rose Gulch project as of the years ended December 31, 2014 and 2013 were \$1,992 and \$24,925, respectively.

As of September 10, 2014, the Company has abandoned its interest in the Rose Gulch property.

Four Mile Basin

The Four Mile Basin property is located in Nye County, Nevada. The Company owns a 100% interest in two unpatented claims that are surrounded by another mining company that controls an extensive land position throughout the district.

On February 26, 2013 the Company entered into an Exploration and Option to Purchase Agreement with Wolfpack Gold (Nevada) Corporation for the two unpatented Four Mile Basin claims. The term of the Four Mile Basin Agreement shall be for a period of twenty (20) years.

The lease also requires minimum work commitments on or prior to each anniversary date as follows:

- 1st: waived
- 2nd: \$10,000
- 3rd: \$12,000
- 4th and thereafter \$15,000

All work expenditures made by Lessee during any Lease Year in excess of the work commitment expenditures required for such Lease Year shall be credited against work commitment requirements for any subsequent Lease Year.

On February 25, 2015, the Company was given notice that the lease holder was abandoning the Four Mile Basin project.

Muskox Data Inventory

The Company has acquired the Muskox Data Inventory from Prize Mining Corporation. The Data consists of years worth of work on the Ni-Cu-Pd-Pt bearing Muskox Layered Intrusion in Nunavut, Canada. The Muskox Intrusion was first worked on in the 1960's and 1970's by the Geological Survey of Canada and by Inco Mining. Prize began working on the project in 1998 and has spent over \$16 million on the project through 2004. In addition, Prize accumulated data from its joint venture partners Anglo American and Silvermet Mining in the 2000's valued at roughly \$8 million.

The purchase price for the Data was \$1 million, paid by the issuance of 3,703,334 shares of the Company's common stock. In addition, the Company has agreed to pay an additional \$50,000 in cash in satisfaction of certain Canadian tax obligations incurred by Prize as a result of the transaction, however it has been determined that minerals are exempt from the Canadian goods and service tax. One of the Company's directors is currently President, CEO and a director and

shareholder of Prize Mining Corporation. As stated in the Chairman of the Board's incentive package for generating a property the Board votes to accept and acquire the Chairman was granted 333,334 shares of common stock with a value of \$350,000 in January 2014.

Cahuilla Gold Project

On December 1, 2006, and as amended and restated on August 5, 2010, the Company executed a formal Exploration and Option to Lease Agreement ("the Cahuilla Agreement" or "Earn-in Agreement") for the Cahuilla Gold Project in Imperial County, California, the majority of which is situated on the Torres Martinez Desert Cahuilla Indian Reservation. Under the terms of the Cahuilla Agreement the Company has the exclusive rights to explore, develop and conduct mining operations on more than two square miles situated on Tribal lands. The Company is required to pay escalating lease payments and meet minimum work obligations for a period of five years beginning in 2010. The Cahuilla Agreement is cancelable by the Company at any time by giving 30 days written notice.

On February 10, 2010 Consolidated entered into an Earn-In Agreement with Teras Resources, Inc. ("Teras") whereby Teras could earn 65% undivided interest in the Cahuilla property. Pursuant to the terms of the Earn-in Agreement and subject to certain conditions being met in accordance with the Earn-In Agreement, Teras issued 4,000,000 common shares to Consolidated and deposited \$800,000 into an account in 2010 for the exclusive use of exploration, development and maintenance expenditures on the property. In 2011, Teras issued an additional 5,000,000 shares to Consolidated and deposited \$1,000,000 for additional expenditures on the property.

In addition, in order to exercise the option and earn its 65% interest in the Cahuilla project Teras must issue an additional 5,300,000 common shares to Consolidated. The exercise of the option by the issuance of the additional common shares is at the sole discretion of Teras.

Additionally under the agreement, the Company receives a management fee of \$10,000 per month. The Company received \$80,000 in management fees during the year ended December 31, 2011. Management fees terminated in August 2011.

The Company is accounting for the Earn-In Agreement using joint venture accounting principles. Because the Company does not have majority control nor significant influence over the venture, it is accounting for the Earn-In Agreement using the cost method.

As of August 31, 2011, Teras fulfilled its obligations under the Earn-In Agreement and now holds a 65% interest in the Cahuilla project. The Company elected to postpone the receipt of the 5,300,000 shares of Teras common stock as required under the agreement to a later date.

On September 14, 2011 the Company signed an Exploration and Earn-in Agreement with Teras Resources, Inc. on the Cahuilla Project. The terms of the agreement specify that Teras will have

a 24-month option to earn the remaining 35% interest of the Cahuilla gold project and 100% interest in four other gold projects. Teras can exercise the option at any time within the 24-month period by issuing 10 million common shares of Teras stock to the Company and spending \$1,000,000 in work commitment on the Cahuilla project within that period.

During September 2013 Teras Resources, Inc. has fulfilled its obligations under the Earn-In Agreement to earn the remaining 35% interest in the Cahuilla gold project. The Company has elected to postpone the receipts of the 10 Million shares of Teras common stock as required under the agreement to a later date.

During May 2014 the Company formally requested the issuance of the 5,300,000 shares of Teras common stock for the 65% interest in the Cahuilla project and the 10,000,000 shares of Teras common stock for the remaining 35% interest in the Cahuilla project. The 5,300,000 shares and the 10,000,000 shares were received by the Company on May 29, 2014 and June 4, 2014, respectively.

During negotiations and prior to completion of the initial Earn-In Agreement, the Company's then President, CEO and director accepted an officer position with Teras and in June 2010, the President of Teras accepted a board position with the Company.

Prior to 2010, the Company entered into six mineral lease agreements on the Cahuilla Gold Project area. These lease agreements give the Company the right to explore, develop and produce gold and other minerals from the properties for periods specified in the agreements. These lease agreements have initial terms of 10 to 40 years and may be extended under certain circumstances. The lease agreements are cancelable at the option of either the Company or the lessor. Under these lease agreements, the Company would be required to make royalty payments if it produces minerals. Effective with the Earn-In Agreement described above, the joint venture made the lease payments beginning February 2010 and continuing through the year ending December 31, 2013.

Of these Cahuilla leases, the most significant is the agreement that the Company has with the Torres Martinez Desert Cahuilla Indians (the "TMDCI Agreement"). The TMDCI Agreement was amended on August 5, 2010 and requires the Company to make the following payments:

- Upon initiating permitting for the first phase of Exploration and Development Operations: \$10,000
- First Anniversary: \$20,000
- Second Anniversary: \$30,000
- Third Anniversary: \$40,000
- Fourth Anniversary: \$50,000

Total payments are \$150,000.

 NOTES TO THE FINANCIAL STATEMENTS

In addition, an amendment to the TMDCI Agreement called for the following payments upon completion and approval of five exploration and development phases (as defined in the TMDCI Agreement):

Phase Completion	Cash payment	Options to purchase shares of the Company's common stock
First	\$ 30,000	40,000
Second	40,000	60,000
Third	70,000	100,000
Fourth	80,000	120,000
Fifth	110,000	160,000

Approval of each phase is required by the Secretary of Interior of the United States of America. During the year ended December 31, 2011, the Company received approval for the first and second phase. In accordance with the agreement, as amended, the Company issued 100,000 options to purchase shares of its common stock to the Torres Martinez Desert Cahuilla Indians. The options were granted December 16, 2011, have an exercise price of \$0.10 and a term of ten years. The fair value of these options was \$6,695. The required cash payment of \$70,000 was paid by the joint venture. The Company is currently working on phase three with an estimated completion date in the 2nd quarter of 2014.

In November 2013, Consolidated assigned the six mineral lease agreements to Teras Resources, Inc.

In September 2014, Consolidated assigned the Exploration and Option to Lease Agreement with the Torres Martinez Desert Cahuilla Indians to Teras Resources, Inc.

Other

The Company controls additional mining properties in Nevada. None of these properties have ongoing mineral lease payment commitments nor do the properties have identified proven or probable reserves.

NOTE 5 – RELATED PARTY CONVERTIBLE NOTES

Related party convertible notes for the years ended December 31, 2014 and December 31, 2013 consisted of the following:

	December 31, 2014	December 31, 2013
Thomas Callicrate, former officer and director	\$ 0	\$ 0
Thomas Mancuso, former president and current director	50,000	50,000
	<u>\$ 50,000</u>	<u>\$ 50,000</u>

The 2008 Notes

The Company issued six convertible notes payable totaling \$106,300 to two officers during the year ended December 31, 2008 (the “2008 Notes”). In exchange for these Notes, the holders received one share of common stock for every two dollars of principal. A total of 17,718 shares valued at \$27,436 were issued and resulted in a discount on the original notes.

The interest rate on the 2008 Notes was increased during 2009 from 8% to 20%. Interest accrues monthly and is due with the principal on the maturity dates. All of the notes were for an original term of six months and matured at various dates from January to June 2009. All of the notes were extended several times during 2009, 2010, 2011 and 2012 (see “note extensions” below). During 2010, two of the notes totaling \$13,800, were paid in full with interest. The remaining four notes, totaling \$85,706, mature at various dates in 2013. On November 30, 2012 the Company reached an agreement with Thomas Callicrate, a former officer and director, to repay the convertible notes by making an initial payment of \$14,830 on accrued interest with equal monthly principal and interest payments beginning in December 2012 of \$10,000 for six months plus accrued interest to be added to the final sixth payment.

As of May 30, 2013 the Company has fulfilled its obligations under the Mutual Release and Settlement Agreement entered into with Mr. Callicrate on November 30, 2012.

Each note is convertible at the note holder’s option into shares of the Company’s common stock. The number of shares that the note can be converted into will be determined as follows:

Prior to the Maturity Date – The balance of the unpaid principal plus all accrued interest will be divided by 90% of the offering price of the Company’s most recent equity offering or \$0.15 if there have been no recent equity offerings. The conversion rate was \$0.90 at December 31, 2013, and 2012.

NOTES TO THE FINANCIAL STATEMENTS

At the Maturity Date – The balance of the unpaid principal plus all accrued interest will be divided by \$0.15.

The fair value of the related conversion option at December 31, 2014, and 2013 was nil due to the relatively short term to maturity date and the effective ‘prior to maturity date’ conversion rate approximating the fair value of the Company’s common share at each year end.

Accrued interest

Accrued interest related to the outstanding notes was \$39,701 and \$39,701 for the years ended December 31, 2014 and 2013. Interest expense related to the outstanding notes was \$10,140 and \$12,839 for the years ended December 31, 2014 and 2013, respectively. In March of 2013 the Company began paying Mr. Mancuso the amount of interest accrued each month.

Note extensions

As disclosed above the notes have been extended several times. Each extension required issuance of shares of the Company’s common stock and, in some cases, an increase in the interest rate. The Company considered the impact of ASC 470-50 “Debt-Modifications and Extinguishments” on the accounting treatment for these extensions. ASC 470-50 states that a transaction resulting in a significant change in the nature of a debt instrument should be accounted for as an extinguishment of debt. The difference between the reacquisition price and the net carrying amount of the extinguished debt is recognized currently in income of the period of extinguishment. The Company concluded that the extensions constituted a substantial modification. During the year ended December 31, 2012 the Company issued 190,004 shares of its common stock in connection with these extensions and recognized losses on note extensions of \$174,667 representing the difference between the fair value of the amended note, including consideration and fees, and the carrying value of the original note, including related unamortized discount. In addition, during January 2013 the Company issued 37,779 shares of its common stock in connection with the extensions, which was a common stock payable at December 31, 2012 because the issuance related to an extension which occurred in 2012.

As of March 2013, Mr. Mancuso has elected to no longer receive Company common stock for the extension of notes due to the acceptance of monthly interest payments as noted above.

NOTE 6 – STOCKHOLDERS EQUITY

NOTES TO THE FINANCIAL STATEMENTS

Common Stock

During the year ended December 31, 2014, the board of directors and shareholders approved an increase in the number of authorized shares of common stock from 100,000,000 shares with a par value of \$0.001 per share, to 200,000,000 shares of common stock with a par value of \$0.001 per share. Each holder of common stock is entitled to one vote for each share of common stock held on all matters which holders of common stock are entitled to vote.

Subsequent to December 31, 2014, our board of directors and stockholders approved a one-for-three reverse stock split of the Company's common stock. After the reverse stock split, effective March 16, 2015, each holder of record held one share of common stock for every 3 shares held immediately prior to the effective date. As a result of the reverse stock split, the number of shares underlying outstanding stock options and warrants and the related exercise prices were adjusted to reflect the change in the share price and outstanding shares on the date of the reverse stock split.

Following the effective date of the reverse stock split, the par value of the common stock remained at \$0.001 per share. As a result, we have reduced the common stock in the balance sheets and statement of stockholders' equity included herein on a retroactive basis for all periods presented, with a corresponding increase to additional paid-in-capital.

During the year ended December 31, 2014, the Company issued the following shares of its common stock:

- 200,000 shares valued at \$.93 per share (total of \$186,000) to a former director in accordance with the performance bonus program.

During the year ended December 31, 2013, the Company issued the following shares of its common stock:

- 100,000 shares valued at \$.93 per share (total of \$93,000) to a director/officer in accordance with the performance bonus program.
- 75,000 shares valued at \$1.05 per share (total of \$78,750) to a director in accordance with the terms of the consulting services agreement.
- 183,334 shares valued at \$1.05 per share (total of \$192,500) as an incentive for joining the Company's Board of Directors as Chairman.
- 37,779 shares valued at \$0.93 per share (total of \$35,667) in connection with the 2012 extensions to a director and a former officer in accordance with terms to extend convertible notes payable. See Note 5.

Warrants

The Company has issued warrants that enable the holder to purchase a stated number of shares of common stock at a certain price within a certain time period.

In connection with a private placement completed on May 31, 2010, the Company issued 760,683 warrants exercisable into one share of common stock at an exercise price of \$0.75 per share. The warrants expire two years from the date of issuance. In April 2012, 116,669 of these warrants were exercised for total proceeds of \$87,500. The remaining warrants were extended to December 2015.

In connection with a private placement completed on June 30, 2010, the Company issued 910,017 warrants exercisable into one share of common stock at an exercise price of \$0.75 per share. The warrants expire two years from the date of issuance. The remaining warrants were extended to December 2015.

NOTES TO THE FINANCIAL STATEMENTS

The weighted average contractual term of the options granted during the years ended December 31, 2014 and 2013 was 4.69 years and 4.55 years, respectively. As of the year ended December 31, 2014, all of the options were fully vested. At December 31, 2014, the stock options had an intrinsic value of \$0 based upon the market price of the Company's stock on that date.

Expenses related to the granting and vesting of stock options were \$19,480 and \$82,274 for the years ended December 31, 2014 and 2013. Such expenses are included in payroll and related expenses on the statement of operations and comprehensive income (loss).

The Company estimates the fair value of options granted by using the Binomial Lattice option pricing model with the following assumptions used for grants:

	<u>2014</u>	<u>2013</u>
Dividend yield	-	-
Expected volatility	75.81% - 100%	76.25% - 100%
Risk-free interest rate	0.84% - 2.17%	0.84% - 1.99%
Expected life (years)	4.25 - 7.67	4.25 - 7.86

The expected volatility is based on the historical volatility of comparable companies for a period approximating the expected life, due to the limited trading history of the Company's common stock. The risk-free interest rate is based on the implied yield available on U.S. Treasury zero-coupon issues over equivalent lives of the options.

The expected life of employee stock options represents the weighted-average period the stock options are expected to remain outstanding and is a derived output of the Binomial Lattice model. The expected life of employee stock options is impacted by all of the underlying assumptions and calibration of the Company's model. The Binomial Lattice model estimates the probability of exercise as a function of these two variables based on the entire history of exercises and cancellations on all past option grants made by the Company.

NOTE 7 – INCOME TAXES

The components of the Company's tax benefit are as follows:

	<u>2013</u>	<u>2012</u>
Current tax benefit	\$307,600	\$148,900
Non-deductible items	(800)	(300)
Change in valuation allowance	(306,800)	(148,600)
	<u>-</u>	<u>-</u>

The Company did not record federal or state tax provisions for the years ended December 31, 2013 or 2012, due to the Company's continued net operating losses. No deferred tax provision

NOTES TO THE FINANCIAL STATEMENTS

(benefit) has been recorded at December 31, 2013 or 2012 due to a full valuation allowance against the deferred tax assets. Realization of the Company's deferred tax assets depends on generating sufficient taxable income in future years in appropriate tax jurisdictions to obtain benefit from net operating loss carryforwards. Due to the uncertainty of the timing and the amount of such realization, management concluded that a full valuation allowance was required.

Significant components of the deferred tax assets for the years ended December 31, 2013 and December 31, 2012 are as follows:

	<u>2013</u>	<u>2012</u>
Deferred tax asset:		
Net operating loss carryforward	\$710,900	\$510,300
Stock based compensation	168,500	138,900
Exploration costs	137,700	61,100
Total deferred tax asset	<u>1,017,100</u>	<u>710,300</u>
Deferred tax liability		
Investment basis difference	<u>(249,600)</u>	<u>(249,600)</u>
Net deferred tax asset	767,500	460,700
Valuation allowance	<u>(767,500)</u>	<u>(460,700)</u>
	<u>-</u>	<u>-</u>

The Company recorded a deferred tax liability of \$540,572 at December 31, 2012 which is associated with the unrealized gain on investments available for sale reflected in other comprehensive income. No deferred tax asset or liability exists for the unrealized loss on investments available for sale on December 31, 2013.

At December 31, 2013, the Company has net operating loss carryforwards for federal income tax purposes of approximately \$1,857,745 to offset future taxable income which expire from 2027 to 2033. As of December 31, 2013, state net operating losses were immaterial.

The Company is subject to federal statutory tax rate of 35%; a tax rate of 36% is applied to deferred taxes to include the impact of state income tax rates. The main difference between the statutory rate and the effective tax rate of 0% is the increase in the valuation allowance for deferred taxes.

The Company has concluded that the guidance regarding accounting for uncertainty in income taxes had no significant impact on results of operations or financial position as of December 31, 2013 or 2012. Therefore, there is no accrual for uncertain tax positions as of December 31, 2013 or 2012. If interest and penalties were to be assessed, interest would be charged to interest expense, and penalties to other operating expense. It is not anticipated that unrecognized tax benefits would significantly increase or decrease within 12 months of the reporting date. Fiscal years 2011 through 2013 remain subject to examination by state and federal tax authorities.
