NOTES TO UNAUDITED FINANCIAL STATEMENTS

DECEMBER 31, 2014

Note 1. Organization and Basis of Presentation Organization and Line of Business

CleanPath Resources Corp. (the "Company") was organized as "Boulder Creek Explorations, Inc." on June 7, 2004. Boulder Creek Explorations, Inc. continued to make filings with the Securities and Exchange Commission until approximately November 3, 2006. As CanAm Uranium Corp., the company continued to make filings until November 18, 2009. On October 28, 2008, the name of the company was changed to CleanPath Resources, Inc. On February 3, 2009, the company was no longer required to file reports with the Securities and Exchange Commission (by operation of an SEC 15-12G filing).

CleanPath Resources Corp. transitioned from a mining and natural resource exploration to a nutraceutical corporation and more recently has discontinued its nutraceutical line to focus on the marking a line of proprietary waters. The Company licenses the water treatment process of Ferris Holding, Inc. (FHI). FHI is the developer of a patent pending experimental process for relieving pain, decreasing swelling, increasing range of motion in sore limbs and improving blood circulation. The experimental process has been tested extensively on humans, horses, dogs and cats with no apparent negative side effects. The process is noninvasive and there is no direct contact between the equipment and the patient.

In April of 2014, the Company began several transition phases. The first of these was to transition from prior ownership controlling the corporation; the second was to transition to new management; and, the third was to change the focus of the business to beverages.

Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

Diluted earnings per share is based on the assumption that all dilutive convertible shares and stock options were converted or exercised. There are neither convertible shares, options, or warrants that need to be factored into the calculation. There are no options or warrants. Dilution is computed by applying the treasury

stock method, Under this method, options and warrants are assumed to be exercised at the beginning of the period (or at the time of issuance, if later), and as if funds obtained thereby were used to purchase common stock at the average market price during the period.
