NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection 4.3(3(a)), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the interim financial statements have not been reviewed by an auditor.

The accompanying unaudited interim financial statements of GreenPower Motor Company Inc. (the "Company") have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these interim financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements by an entity's auditor.

GREENPOWER MOTOR COMPANY INC.
Consolidated Condensed Interim Statements of Financial Position

Supplemental Cash Flow Disclosures - Note 13

(The accompanying notes are an integral part of these condensed interim financial statements)

1. Nature of Operations and Continuance of Operations

GreenPower Motor Company Inc. was incorporated in the Province of British Columbia on September 18, 2007. The Company is in the business of manufacturing and distributing green-tech charter buses and city buses.

The primary office is located at Suite 240-209 Carrall St., Vancouver, Canada.

Effective December 23, 2014, the Company acquired 100% of the issued and outstanding shares of Oakmont Minerals Corp. (the "Transaction"). Pursuant to the Transaction, Oakmont Minerals Corp. performed a two-for-one share consolidation. All numbers in these consolidated condensed interim financial statements have been presented on a post-consolidation basis. See Note 6 Reverse Takeover Transactions for more details.

The consolidated condensed interim financial statements were authorized by the Board of Directors on February 19, 2015.

These consolidated condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business.

The Company's continuing operations are dependent upon its ability to raise capital and generate cash flows. At December 31, 2014, the Company had working capital of $2,280,343, revenues of $14,000, and an accumulated deficit of $5,249,287. These consolidated condensed interim financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

2. Significant Accounting Policies

(a) Basis of presentation

The consolidated condensed interim financial statements of the Company are prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to interim financial information, as outlined in International Accounting Standard ("IAS") 34, Interim Financial Reporting, and using the accounting policies consistent with those in the audited consolidated financial statements as at and for the year ended March 31, 2014.

These consolidated condensed interim financial statements were prepared under the historical cost convention, except for certain items not carried at historical cost as discussed below. All amounts are expressed in Canadian dollars, unless otherwise stated.

(b) Basis of consolidation

The Consolidated Condensed Interim Financial Statements comprise the financial statements of the Company and its subsidiaries as at December 31, 2014.

2. Significant Accounting Policies (continued)

(b) Basis of consolidation (continued)

These Consolidated Condensed Interim Financial Statements include the accounts of the Company and all of its wholly-owned subsidiaries:

1. GP GreenPower Industries Inc. (registered in Canada)
2. GreenPower Motor Company, Inc. (registered in the United States)
3. 0939181 BC Ltd and Utah Manganese, Inc. (Note 5).

All intercompany balances, transactions, revenues and expenses are eliminated upon consolidation. Certain information and note disclosures which are considered material to the understanding of the Company's consolidated condensed interim financial statements are provided below.
Subsidiaries are consolidated from the date of acquisition, being the date on which the Group obtains control, and continue to be consolidated until the date when such control ceases. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies. All intra-group balances, transactions, unrealized gains and losses resulting from intra-group transactions and dividends are eliminated in full.

(c) Financial instruments

Financial assets are classified into one of the following categories based on the purpose for which the asset was acquired. All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: available-for-sale, loans-and-receivables, held-to-maturity or at fair value through profit or loss ("FVTPL"). Transaction costs associated with FVTPL financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

The Company's accounting policy for each category is as follows:

i. Loans-and-receivables

These assets are non-derivative financial assets resulting from the delivery of cash or other assets by a lender to a borrower in return for a promise to repay on a specified date or dates, on demand. They are initially recognized at fair value plus transaction costs that are directly attributable to their acquisition or issue and subsequently carried at amortized cost, using the effective interest rate method, less any impairment losses. Amortized cost is calculated taking into account any discount or premium on acquisition and includes fees that are an integral part of the effective interest rate and transaction costs. Gains and losses are recognized in the Statement of Operations when the loans and receivables are derecognized or impaired, as well as through the amortization process. The Company has classified its cash, bond deposit, loan receivable and other receivable as loans-and-receivables as at December 31, 2014 and March 31, 2014.

ii. Held-to-maturity investments

These assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. These assets are measured at amortized cost using the effective interest method. If there is objective evidence that the investment is impaired, determined by reference to external credit ratings and other relevant indicators, the financial asset is measured at the present value of estimated future cash flows. Any changes to the carrying amount of the investment, including impairment losses, are

2. Significant Accounting Policies (continued)

(c) Financial instruments (continued)

ii. Held-to-maturity investments (continued)
recognized in the Statement of Operations. The Company did not have any assets classified as held-to-maturity as at December 31, 2014 and March 31, 2014.

iii. Financial assets at fair value through profit or loss ("FVTPL")

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through the Statement of Operations. Regular way purchases and sales of FVTPL financial assets are accounted for at trade date, as opposed to settlement date. The Company did not have any assets classified as FVTPL as at December 31, 2014 and March 31, 2014.

iv. Available-for-sale assets ("AFS")

Non-derivative financial assets not included in the above categories are classified as available-for-sale. Available-for-sale assets are carried at fair value with changes in fair value recognized in accumulated other comprehensive loss/income. Where there is a significant or prolonged decline in the fair value of an available-for-sale financial asset (which constitutes objective evidence of impairment), the full amount of impairment, including any amount previously recognized in other comprehensive loss/income, is recognized in profit or loss. If there is no quoted market price in an active market and fair value cannot be readily determined, available-for-sale assets are carried at cost.

On sale or impairment, the cumulative amount recognized in other comprehensive loss/income is reclassified from accumulated other comprehensive loss/income to Statement of Operations. The Company did not have any assets classified as AFS as at December 31, 2014 and March 31, 2014.

v. Impairment of financial assets

At each reporting date the Company assesses whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is deemed to be impaired, if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or the group of financial assets. The Company did not record any impairments on financial assets during the three and nine month periods ended December 31, 2014.

Financial liabilities are classified into one of the following categories based on the purpose for which the liability was incurred.

i. Other financial liabilities ("OTL")

Financial liabilities classified as other financial liabilities are comprised of accounts payables and accrued liabilities, and advances from a related party. These liabilities are initially recognized at fair value net of any transaction costs directly attributable to the issuance of the instrument and are subsequently carried at amortized cost using the effective interest rate method. This ensures that any interest expense over the period to repayment is at a constant rate on the balance of the liability carried in the statement of financial position. Interest expense in this context includes initial

2. Significant Accounting Policies (continued)

(c) Financial instruments (continued)

i. Other financial liabilities ("OTL")

transaction costs and premiums payable on redemption, as well as any interest or coupon payable while the liability is outstanding. The Company did not have any assets classified as OTL as at December 31, 2014 and March 31, 2014.

ii. Financial liabilities at fair value through profit or loss ("FVTPL")

Financial liabilities classified as FVTPL are measured at fair value with unrealized gains and losses recognized through the Statement of Operations. The Company did not have any liabilities classified as FVTPL as at December 31, 2014 and March 31, 2014.

Derivative financial assets and liabilities are initially recognized at their fair value on the date the derivative contract is entered into and are subsequently re-measured at their fair value at each reporting period with changes in the fair value recognized in profit and loss. Derivative financial assets and liabilities include warrants purchased or issued by the Company denominated in a currency other than the Company's functional currency. As at December 31, 2014 and March 31, 2014, the Company did not have any derivative financial assets or liabilities.

(d) Cash and cash equivalents

Cash and cash equivalents usually consist of highly liquid investments which are readily convertible into cash with maturity of three months or less and are subject to an insignificant risk of change in value. As at December 31, 2014 and March 31, 2014, the Company had no cash equivalents.

(e) Deposits

The Company classifies as deposits payments made to the State authorities for drilling permits. The Company expects the deposit to be repaid within the next fiscal period.

(f) Revenue recognition

The Company, from time to time, earns rental fees from the rental of its developmental technologies. Revenue is recorded in the month the rentals are made. Revenue is only recognized when reasonableness of collection is assured. Rental assets have been capitalized to equipment on the statements of financial position.

Revenues from consulting services are recognized when the related service has been rendered, the fee is fixed or determinable and collectability is reasonably assured.

(g) Impairment of long-lived assets

At the end of each reporting period, the Company's assets are reviewed to determine whether there is any indication that those assets may be impaired. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present

2. Significant Accounting Policies (continued)

(g) Impairment of long-lived assets (continued)

value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the statement of comprehensive income (loss) for the period. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in the statement of operations and comprehensive loss. The Company has no impairment losses on long-lived assets during the three and nine month periods ended December 31, 2014.

(h) Foreign currency translation

The reporting currency of the Company is the Canadian dollar.

The functional currency of each of the parent Company and its subsidiaries is measured using the currency of the primary economic environment in which that entity operates. The consolidated condensed interim financial statements are presented in Canadian dollars which is the parent company's functional and presentation currency. The functional currency of the subsidiaries is also the Canadian dollar.

Transactions and balances:

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the date of the transaction. Foreign currency monetary items are translated at the period-end exchange rate. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items measured at fair value are reported at the exchange rate at the date when fair values were determined.

Exchange differences arising on the translation of monetary items or on settlement of monetary items are recognized in profit or loss in the statement of operations in the period in which they arise.

Exchange differences arising on the translation of non-monetary items are recognized in other comprehensive income in the statement of comprehensive income/loss to the extent that gains and losses arising on those non-monetary items are also recognized in other comprehensive income/loss. Where the nonmonetary gain or loss is recognized in profit or loss, the exchange component is also recognized in profit or loss.

Parent and Subsidiary Companies (Group):

The financial results and position of foreign operations whose functional currency is different from the presentation currency are translated as follows:

- assets and liabilities are translated at period-end exchange rates prevailing at that reporting date; and
- income and expenses are translated at average exchange rates for the period.

2. Significant Accounting Policies (continued)

(h) Foreign currency translation (continued)

Exchange differences arising on translation of foreign operations are transferred directly to the Group's foreign currency translation reserve in the statement of comprehensive income/loss. These differences are recognized in the profit or loss in the period in which the operation is disposed of.

(i) Inventory

Inventory is recorded at the lower of cost and net realizable value with cost determined on a specific item basis. The Company's inventory consists of bus prototypes in process.

In determining net realizable value for new buses, the Company primarily considers the age of the vehicles along with the timing of annual and model changeovers. For used buses, the Company considers recent market data and trends such as loss histories along with the current age of the inventory.

(j) Property, plant, and equipment

Property, plant and equipment ("PPE") are carried at cost, less accumulated depreciation and accumulated impairment losses. The cost of an item of PPE consists of the purchase price, any costs directly attributable to bringing the asset to the location and condition necessary for its intended use and an initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located. Depreciation is provided at rates calculated to write off the cost of PPE, less their estimated residual value, using the following rates/estimated lives and methods:

Computers	55%, declining balance basis
Diesel bus	7 years, straight line method

An item of PPE is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal of the asset, determined as the difference between the net disposal proceeds and the carrying amount of the asset, is recognized in profit or loss in the consolidated statement of operations and comprehensive loss. Where an item of PPE comprises major components with different useful lives, the components are accounted for as separate items of PPE. Expenditures incurred to replace a component of an item of PPE that is accounted for separately, including major inspection and overhaul expenditures are capitalized.

(k) Exploration and evaluation assets

Once a permit to explore an area has been secured, expenditures on exploration and evaluation activities are capitalized to exploration and evaluation assets. Property, plant, and equipment used in exploration and evaluation activities are likewise capitalized to exploration and evaluation assets.

Exploration expenditures relate to the initial search for deposits with economic potential and to detailed assessments of deposits or other projects that have been identified as having economic potential.

Management reviews the carrying value of capitalized exploration costs when facts and circumstances suggest that the carrying amount of an asset may exceed its recoverable amount. In the case of undeveloped projects, there may be only inferred resources to form a basis for the impairment review. The review is based on a status report regarding the Company's intentions for development of the undeveloped property.

2. Significant Accounting Policies (continued)

(k) Exploration and evaluation assets (continued)

Once an economically viable reserve has been determined for an area and the decision to proceed with development has been approved, exploration and evaluation assets attributable to that area are first tested for impairment and then reclassified to construction in progress within property, plant and equipment.

Subsequent recovery of the resulting carrying value depends on successful development or sale of the undeveloped project. If put into production, the costs of acquisition and exploration will be amortized over the life of the property, based on estimated economic reserves. If a project does not prove viable, all irrecoverable costs associated with the project net of any impairment provisions are written off. As at December 31, 2014 there is no production activity.

Mineral exploration and evaluation expenditures are classified as intangible assets.

(l) Restoration, rehabilitation, and environmental obligations

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration or development of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset, along with a corresponding liability as soon as the obligation to incur such costs arises. The timing of the actual rehabilitation expenditure is dependent on a number of factors such as the life and nature of the asset, the operating license conditions and, when applicable, the environment in which the mine operates.

Discount rates using a pre-tax rate that reflects the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either the unit-of-production or the straight line method. The corresponding liability is progressively increased as the effect of discounting unwinds creating an expense recognized in profit or loss.

Decommissioning costs are also adjusted for changes in estimates. Those adjustments are accounted for as a change in the corresponding capitalized cost, except where a reduction in costs is greater than the unamortized capitalized cost of the related assets, in which case the capitalized cost is reduced to nil and the remaining adjustment is recognized in profit or loss.

The operations of the Company have been, and may in the future be, affected from time to time in varying degree by changes in environmental regulations, including those for site restoration costs. Both the likelihood of new regulations and their overall effect upon the Company are not predictable.

The Company has no material restoration, rehabilitation and environmental obligations as the disturbance to date is insignificant.

(m) Loss per share

The Company presents basic and diluted loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted loss per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive.

2. Significant Accounting Policies (continued)

(n) Share capital

Common shares are classified as equity. Commissions paid to brokers, and other related share issue costs, such as legal, auditing, and printing, on the issue of the Company's shares are charged directly to share capital, net of any tax effects. During the period ended December 31, 2014 the Company recorded $440,398 in share issuance costs on its Statements of Changes in Equity in regards to the transaction with Oakmont Minerals Corp. (see Note 6). There were no share issuance costs for the period ended December 31, 2013.

(o) Income taxes

Income tax expense comprises current and deferred tax. Current and deferred tax are recognized in net income except to the extent that it relates to a business combination or items recognized directly in equity or in other comprehensive loss/income.

Current income taxes are recognized for the estimated income taxes payable or receivable on taxable income or loss for the current period and any adjustment to income taxes payable in respect to previous years. Current income taxes are determined using tax rates and tax laws that have been enacted or substantively enacted by the year end date.

Deferred tax assets and liabilities are recognized where the carrying amount of an asset or liability differs from its tax base, except for taxable temporary differences arising on the initial recognition of goodwill and temporary differences arising on the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction affects neither accounting nor taxable profit or loss.

Recognition of deferred tax assets for unused tax losses, tax credits, and deductible temporary differences is restricted to those instances where it is probable that future taxable profit will be available against which the deferred tax asset can be utilized. At the end of each reporting period the Company reassesses deferred tax assets. The Company recognizes a previously unrecognized deferred tax asset to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

(p) Critical accounting estimates and judgments

The preparation of these consolidated condensed interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These consolidated condensed interim financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated condensed interim financial statements, and may require accounting adjustments based on future occurrences. Revisions to consolidated accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical accounting estimates

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to,

2. Significant Accounting Policies (continued)

(p) Critical accounting estimates and judgments (continued)

but are not limited to the inputs used in the Black-Scholes option pricing model to measure stock-based compensation, and $nil provision for income taxes.

Critical accounting judgments

i. the assessment of the carrying value of the exploration and evaluation assets included in the consolidated condensed interim statements of financial position for indicators of impairment;
ii. the determination of categories of financial assets and financial liabilities; and
iii. the determination of the functional currency of each entity within the group.

(q) Share-based payment transactions

The company grants share-based awards to certain officers, employees, directors and other eligible persons. For equity settled awards, the fair value is charged to the consolidated condensed interim statement of operations and credited to the share-option reserve account, on a straight-line basis over the vesting period, after adjusting for the estimated number of awards that are expected to vest.

The fair value of the equity-settled awards is determined at the date of the grant. In calculating fair value, no account is taken of any vesting conditions, other than conditions linked to the price of the shares of the Company. Each tranche in an award is considered a separate award with its own vesting period and grant date fair value. The fair value is determined by using the Black-Scholes option pricing model. At each financial reporting date, the cumulative expense representing the extent to which the vesting period has expired and management's best estimate of the awards that are ultimately expected to vest is computed. The movement in cumulative expense is recognized in the consolidated condensed interim statement of operations with a corresponding entry against the related equity settled share-based payments reserve account. No expense is recognized for awards that do not ultimately vest.

Where equity instruments are granted to non-employees, they are recorded at the fair value of the goods or services received in the consolidated condensed interim statement of operations, unless they are related to the issuance of shares. Amounts related to the issuance of shares are recorded as a reduction of share capital. When the value of goods or services received in exchange for the share-based payment cannot be reliably estimated, the fair value is measured by use of valuation model. The fair value of stock options granted to non-employees is re-measured at the earlier of each financial reporting or vesting date, and any adjustment is charged or credited to operations upon re-measurement.

(r) Valuation of equity units issued in private placements

The Company has adopted a residual value method with respect to the measurement of shares and warrants issued as private placement units. The residual value method first allocated value to the more easily measurable component based on fair value and then the residual value, if any, to the less easily measurable component.

The fair value of the common shares issued in the private placement was determined to be the more easily measurable component and were valued at their fair value, as determined by the closing quoted bid price on the announcement date. The balance, if any, was allocated to the attached warrants. Any fair value attributed to the warrants is recorded as warrant reserve. If the warrants are exercised, the related

2. Significant Accounting Policies (continued)

(r) Valuation of equity units issued in private placements (continued)

amount is reclassified as share capital. If the warrants expire unexercised, the related amount remains in warrant reserve.

(s) Adoption of accounting standards

The following new or amended standards were adopted during the period ended December 31, 2014:

i. IAS 1 – "Presentation of Financial Statements" ("IAS 1")

Amendments to IAS 1 required that elements of other comprehensive income that may subsequently be reclassified through profit and loss be differentiated from those items that will not be reclassified. These amendments did not have a significant impact on the Company's disclosures in its consolidated financial statements.

ii. IAS 27 – "Separate Financial Statements" ("IAS 27")

IAS 27 prescribed the accounting and disclosure requirements for investments in subsidiaries, joint ventures, and associations when an entity prepares separate financial statements. The Company does not prepare separate financial statements.

iii. IAS 28 – "Investments in Associates and Joint Ventures" ("IAS 28")

IAS 28 prescribed the accounting for investments in associates and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures. The adoption of IAS 28 did not affect the Company's financial performance or its financial position.

iv. IFRS 7 – "Financial Instruments: Disclosures" ("IFRS 7")

Amendments to IFRS 7 introduced enhanced disclosure around any financial instruments which are offset in accordance with IAS 32. These amendments did not have a significant impact on the Company's disclosures in its annual consolidated financial statements.

v. IFRS 10 – "Consolidated Financial Statements" ("IFRS 10")

IFRS 10 required an entity to consolidate an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. IFRS 10 replaced SIC-12 "Consolidation—Special Purpose Entities" and parts of IAS 27, "Consolidated and Separate Financial Statements". The adoption of IFRS 10 did not affect the Company's financial performance or its financial position.

vi. IFRS 11 – "Joint Arrangements" ("IFRS 11")

IFRS 11 required a venture to classify its interest in a joint arrangement as a joint venture or joint operation. Joint ventures will be accounted for using the equity method of accounting, whereas for a joint operation, the venture will recognize its share of the assets, liabilities, revenue and expenses of the joint operation. IFRS 11 supersedes IAS 31, "Interests in Joint Ventures", and SIC-13, "Jointly Controlled Entities—Non-monetary Contributions by Venturers". The adoption of IFRS 11 did not affect the Company's financial performance or its financial position.

2. Significant Accounting Policies (continued)

(s) Adoption of accounting standards (continued)

vii. IFRS 12 – "Disclosure of Interests in Other Entities" ("IFRS 12")

IFRS 12 established disclosure requirements for interests in other entities, such as joint arrangements, associates, special purpose vehicles and off-balance sheet vehicles. The standard carried forward existing disclosures and also introduced significant additional disclosure requirements that address the nature of, and risks associated with, an entity's interests in other entities. The adoption of IFRS 12 did not have a significant impact on the Company's disclosures in its consolidated financial statements.

viii. IFRS 13 – "Fair Value Measurement" ("IFRS 13")

IFRS 13 is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS. The new standard clarified that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also established disclosures about fair value measurement. The adoption of

ix. IFRS 13 – "Fair Value Measurement" ("IFRS 13") (continued)

IFRS 13 did not have a significant impact on the Company's disclosures in its consolidated financial statements.

(t) Future accounting pronouncements

Certain new accounting standards and interpretations have been published by the IASB or the IFRS Interpretations Committee that are not mandatory for the December 31, 2014 reporting period. The following standards are not expected to have a significant impact on the Company's consolidated financial statements:

IFRS 7 - Financial Instruments: Disclosures, Mandatory Effective Dates and Transition Disclosures
IFRS 9 - Financial Instruments (New; to replace IAS 39 and IFRIC 9): Hedge Accounting, and Mandatory Effective Date and Transition Disclosures.
IAS 32 - Financial Instruments Presentation: Offsetting Financial Assets and Liabilities
IAS 36 - Impairment of Assets

These amendments are effective for annual periods beginning on or after January 1, 2014, except for IFRS 9 which is effective for annual periods beginning on or after January 1, 2018.

3. Inventory

The following is a listing of inventory as at March 31, 2014 and December 31, 2014:

	Production Bus	Direct Travel	Direct Charger	Direct Rent	Shipping	Customs	Direct Labour	Total
Balance, March 31, 2014	$337,410	$2,247	$ -	$ -	$ -	$ -	$29,100	$ 368,757
Additions	225,365	525	39,003	1,788	19,539	27,734	31,733	345,687
Balance, December 31, 2014	$562,775	$2,772	$39,003	$1,788	$19,539	$27,734	$60,833	$ 714,444

4. Property, Plant, and Equipment

The following is a summary of activities from March 31, 2014 to the period ended December 31, 2014:

Cost	Computers	Diesel Bus	Total
Balance, March 31, 2014	$ 2,846	$ 53,727	$ 56,573
Additions during the period ended December 31, 2014	-	5,235	5,235
Disposals	-	-	-
Balance, December 31, 2014	$ 2,846	$ 58,962	$ 61,808
Depreciation and impairment losses			
Balance, March 31, 2014	$ 2,300	$ 7,717	$ 10,017
Depreciation for the period ended June 30, 2014	151	1,942	2,093
Depreciation for the period ended September 30, 2014	151	1,936	2,087
Depreciation for the period ended December 31, 2014	151	1,936	2,087
Balance, December 31, 2014	$ 2,753	$ 13,531	$ 16,284
Carrying amounts			
As at March 31, 2014	$ 546	$ 46,010	$ 46,556
As at December 31, 2014	$ 93	$ 45,431	$ 45,524

5. Exploration and Evaluation Assets

The Company through its wholly-owned subsidiary Utah Manganese, Inc., which was incorporated in the State of Utah is in the business of owning, exploiting, exploring, developing and evaluating mineral properties, as well as future production and future disposal once production is completed. The Company owns interests in multiple mineral titles and claims in the southwest region of Utah. The Company's wholly owned subsidiary Utah Manganese, Inc. staked 150 claims at a cost of $29,957 on four properties near Moab, Utah including:

- Dubinky Well (50 claims)
- Duma Point (70 claims)
- Moab Fault (15 claims)
- Flat Iron (15 claims)

Title to mining properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing historic characteristic of many mining properties. The Company has filed for all of its mineral properties and, to the best of its knowledge, title to all of its properties are in good standing.

The impairment assessment of exploration and evaluation assets resulted in no amounts being written off the Company's properties.

6. Reverse Takeover Transactions

The Transaction with Oakmont Minerals Corp.

On November 21, 2013, Oakmont Minerals Corp. ("Oakmont") announced its intention to acquire 100% of the issued and outstanding shares of GreenPower Motor Company Inc. ("GPMC"). On December 23, 2014 Oakmont acquired 100% of the issued and outstanding common shares of GPMC by way of a share exchange whereby Oakmont performed a two-for-one share consolidation prior to the exchange. Pursuant to share purchase agreements entered into between Oakmont and each shareholder of GPMC, the issued and outstanding common shares in the capital of GPMC (58,032,149 common shares) were exchanged on a one-for-one basis for the common shares in the post-consolidation capital of Oakmont. As a result of this share issuance, the shareholders of GPMC obtained control of Oakmont and as a result, for accounting purposes, this transaction has been accounted for as reverse takeover transaction ("RTO") in accordance with the guidance provided in IFRS 2 Share-based Payment and IFRS 3 Business Combinations. As Oakmont did not qualify as a business according to the definition in IFRS 3, the RTO does not constitute a business combination; rather it is treated as an issuance of shares by the Company for the net assets of Oakmont and its pursuit of a public listing; accordingly, GPMC, has been treated as the accounting parent company (legal subsidiary) and Oakmont has been treated as the accounting subsidiary (legal parent) in these consolidated financial statements. As GPMC was deemed to be the acquirer for accounting purposes, its assets, liabilities and operations since incorporation are included in these consolidated financial statements at their historical carrying value. Subsequent to the completion of the RTO, Oakmont changed its name to GreenPower Motor Company Inc.

Oakmont's results of operations have been included since December 23, 2014 (the date of the RTO). For purposes of this transaction, the consideration received was the fair value of the net assets of Oakmont as at December 23, 2014 as follows:

Cash	$ 17,903
Loan receivable from GreenPower Motor Company Inc.	200,000
Interest receivable	7,030
GST receivable	8,279
Bond deposit	1,689
Deferred costs	226,549
Explorations and evaluation assets	693,595
Less: accounts payable & accrued liabilities	(70,799)
Less: accounts payable & accrued liabilities due to related parties	(32,813)
Less: shareholder loans payable	(116,271)
Net assets acquired	935,162

Consideration provided:

		Number of			
	Notes	Shares	Options	Warrants	Amount
Fair value of shares of Oakmont Minerals Corp. (at $0.25 per share)	(6a)	6,126,000			$ 1,531,500
Fair value of warrants issued and outstanding in Oakmont Minerals Corp.	(6b)			525,000	45,200
Fair value of options issued and outstanding in Oakmont Minerals Corp.	(6c)		450,000		62,100
Total consideration provided		6,126,000	450,000	525,000	1,638,800
Transaction costs	(6d)				117,400
					1,756,200
Listing expense					$ 821,038

6. Reverse Takeover Transactions (continued)

The Transaction with Oakmont Minerals Corp. (continued)

(a) Pursuant to the terms of the Transaction with Oakmont Minerals Corp., Oakmont Minerals Corp. performed a two-for-one share consolidation immediately prior to closing of the Transaction. There were 6,126,000 common shares outstanding on a post-consolidation basis.

(b) There were 525,000 warrants issued and outstanding in Oakmont Minerals Corp. prior to the closing of the Transaction (see Note 8). The following weighted-average assumptions were used for the Black-Scholes valuation of warrant grants:

	December 23, 2014
Risk-free interest rate	1.20%
Expected life of options	1.5 years
Annualized volatility[(1)]	100%
Dividend rate	n/a

(1) Expected volatility was determined by reference to historical volatility of similar entities following a comparable period of lives.

(c) There were 450,000 stock options issued and outstanding in Oakmont Minerals Corp. prior to the closing of the Transaction (see Note 8). The following weighted-average assumptions were used for the Black-Scholes valuation of stock option grants:

	December 23, 2014
Risk-free interest rate	1.20%
Expected life of options	1.5 to 3.5 years
Annualized volatility[(1)]	100%
Dividend rate	n/a

(1) Expected volatility was determined by reference to historical volatility of similar entities following a comparable period of lives.

(d) The Company incurred approximately $80,000 in legal and audit fees in regards to the closing of the Transaction and issued 284,620 broker stock options with a fair value of $37,400 (see Note 8). The following weighted-average assumptions were used for the Black-Scholes valuation of broker option grants:

	December 23, 2014
Risk-free interest rate	1.20%
Expected life of options	2 years
Annualized volatility[(1)]	100%
Dividend rate	n/a

(1) Expected volatility was determined by reference to historical volatility of similar entities following a comparable period of lives.

The public company listing cost does not meet the criteria for recognition of an intangible asset in accordance with IAS 38 “Intangible Assets”. Accordingly, the Company charged $821,038 to the statement of operations and comprehensive loss on the date of the RTO.

The RTO with Blackrock Resources Ltd.

On June 11, 2013, Blackrock Resources Ltd. (“Blackrock”) announced its intent to acquire 100% of the issued and outstanding shares of GP GreenPower Industries Inc. (“GPI”). On September 30, 2013 Blackrock acquired 100% of the issued and outstanding common shares of GPI by way of a share exchange. Pursuant to share purchase agreements entered into between Blackrock and each shareholder of GPI, the issued and outstanding common shares in the capital of GPI (47,534,402 common shares) were exchanged on a one-for-one basis for the common shares in the capital of the

6. Reverse Takeover Transactions (continued)

Blackrock. As a result of this share issuance, the shareholders of GPI obtained control of Blackrock and as a result, for accounting purposes, this transaction has been accounted for as reverse takeover transaction ("RTO") in accordance with the guidance provided in IFRS 2 Share-based Payment and IFRS 3 Business Combinations. As Blackrock did not qualify as a business according to the definition in IFRS 3, the RTO does not constitute a business combination; rather it is treated as an issuance of shares by the Company for the net assets of Blackrock and its pursuit of a public listing; accordingly, GPI, has been treated as the accounting parent company (legal subsidiary) and Blackrock has been treated as the accounting subsidiary (legal parent) in these consolidated financial statements. As GPI was deemed to be the acquirer for accounting purposes, its assets, liabilities and operations since incorporation are included in these consolidated financial statements at their historical carrying value. Subsequent to the completion of the RTO, Blackrock changed its name to GreenPower Motor Company Inc.

Blackrock's results of operations have been included since September 30, 2013 (the date of the RTO). For purposes of this transaction, the consideration received was the fair value of the net assets of Blackrock as at September 30, 2013 as follows:

Cash	$ 81,278
Loans receivable	35,000
GST/HST receivable	3,061
Prepaid expenses	15,000
Less: accounts payable & accrued liabilities	(43,743)
Net assets acquired	90,596

Consideration provided:

	Note	Number of Shares	Amount
Fair value of shares of Blackrock Resources Ltd. (at $0.10 per share)	(6a)	7,064,060	706,406
			706,406
Share-based payment expense in pursuit of a listing			$ 615,810

(a) There were 7,064,060 common shares outstanding in Blackrock Resources Ltd. immediately prior to the closing of the RTO with the Company.

The public company listing cost does not meet the criteria for recognition of an intangible asset in accordance with IAS 38 "Intangible Assets". Accordingly, the Company charged $615,810 to the statement of operations and comprehensive loss on the date of the RTO.

7. Share Capital

Authorized
Unlimited number of common shares without par value
Unlimited number of preferred shares without par value

On September 30, 2013 the Company acquired 100% of the issued and outstanding common shares of GPI by way of a share exchange (See Note 6). The Board determined the fair value of RTO shares to be $0.10 per common share at time of the RTO.

On December 23, 2014 the Company acquired 100% of the issued and outstanding common shares of Oakmont (the "Amalgamation") by way of a share exchange (See Note 6). The Board determined the fair value of RTO shares to be $0.25 per common share at time of the RTO.

7. Share Capital (continued)

In connection with the closing of the Amalgamation, the Company also completed the first tranche of a $0.25 common share private placement financing (the "0.25 Financing") for gross proceeds of $3,032,500. The common shares of the Company now trade under the symbol GPV on the Toronto Venture Exchange as a Tier II listed company. Subsequent to period end, the Company closed subsequent tranches of its $0.25 Financing. See Note 14 for more details.

In connection with the first closing of the $0.25 Financing the Company issued 40,000 common shares to brokers and incurred $440,398 in share issuance costs.

In December 2014, the Company made stock option grants to employees, advisors, and directors with a measured fair value of $58,883 (see Note 8). The fair value of the option grants were recorded as share-based payments on the Statements of Operations and Comprehensive Loss for the period ended December 31, 2014.

8. Stock Options

The Company has adopted an incentive stock option plan (the "Plan"), whereby it can grant options to directors, officers, employees, and consultants of the Company. The maximum number of shares that may be reserved for issuance under the Plan is limited to 10% of the issued common shares of the Company at any time. The exercise price of options granted under the Plan shall not be less than the minimum prevailing price permitted by the TSXV policies and the maximum term is 5 years.

Pursuant to the RTO with Oakmont Minerals Corp. (Note 6) the Company had the following options issued and outstanding at December 31, 2014:

Expiry Date	Exercise Price	Balance March 31, 2014	Granted	Exercised	Expired / Terminated	Balance December 31, 2014
June 21, 2016	$0.20	200,000	-	-	-	200,000
July 3, 2018	$0.40	250,000	-	-	-	250,000
December 23, 2016	$0.25	-	284,620	-	-	284,620
December 23, 2019	$0.25	-	550,000	-	-	550,000
December 23, 2016	$0.25	-	215,000	-	-	215,000
December 23, 2019	$0.25	-	4,684,717	-	-	4,684,717
December 23, 2019	$0.25	-	600,000	-	-	600,000
Total		450,000	6,334,337	-	-	6,784,337
Weighted Average Exercise Price		$ 0.31	$ 0.25	$ -	$ -	$ 0.25

Of the above issued and outstanding options, broker options of 284,620 were granted pursuant to the Transaction with Oakmont Minerals Corp. The broker options have a fair value of $37,400 and have been recorded as part of the transaction costs of the RTO with Oakmont Minerals (Note 6). The 200,000 options expiring June 21, 2016 and 250,000 options expiring July 3, 2018 were outstanding in Oakmont Minerals Corp. prior to the Transaction, and the fair value of these options have been included as part of the measurement of fair value of the Transaction (see Note 6). The remainder of the options were granted to employees, directors, and advisors on December 24, 2014 and the measured vested fair value of $58,883 recorded as share-based payments on the Statements of Operations and Comprehensive Loss for the period ended December 31, 2014.

8. Stock Options (continued)

The following weighted-average assumptions were used for the Black-Scholes valuation of stock option grants:

	December 24, 2014
Risk-free interest rate	1.20%
Expected life of options	2 to 5 years
Annualized volatility[(1)]	100%
Dividend rate	n/a

(1) Expected volatility was determined by reference to historical volatility of similar entities following a comparable period of lives.

9. Warrants

As at December 31, 2014, the Company had outstanding warrants, enabling the holders to acquire common shares as follows:

Expiry Date	Exercise Price	Balance March 31, 2014	Granted	Exercised	Expired / Terminated	Balance December 31, 2014
July 3, 2016	$0.40	525,000	-	-	-	525,000
Total		525,000	-	-	-	525,000
Weighted Average Exercise Price		$ 0.40	$ -	$ -	$ -	$ 0.40

The 525,500 warrants were outstanding in Oakmont Minerals Corp. prior to the Transaction (see Note 6).

10. Financial Instruments

The Company's financial instruments consist of cash, bond deposit, loan receivable, others receivables, accounts payable and accrued liabilities and advances from a related party.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1: Unadjusted quoted prices in active markets for identical assets and liabilities;
Level 2: Inputs other than quoted prices that are observable for the asset or liabilities either directly or indirectly; and
Level 3: Inputs that are not based on observable market data

The Company does not currently hold any financial instruments measured at fair value on the consolidated condensed interim statements of financial position.

The fair value of these financial instruments approximates their carrying value, unless otherwise noted.

Overview

The Company has exposure to the following financial instrument related risks.

10. Financial Instruments (continued)

Credit risk

The Company's exposure to credit risk is on its cash, loan receivable and other receivable. Cash consists of cash bank balances held in a major Canadian financial institution with a high credit quality and therefore the Company is exposed to minimal risk. The loan receivable is to an entity the Company will amalgamate with after the period end.

Liquidity risk

The Company ensures that there is sufficient capital in order to meet short-term business requirements, after taking into account the Company's holdings of cash. The Company's cash is invested in a bank and is available on demand.

Market risks

Market risk is the risk of loss that may arise from changes in market factors such as interest rates and foreign exchange. The Company believes interest rate risk is not material.

The Company is exposed to foreign exchange risk as its exploration and evaluation properties are located in the United States. Management monitors its foreign currency balances, the Company does not engage in any hedging activities to reduce its foreign currency risk.

At December 31, 2014 the Company was exposed to currency risk through the following monetary assets and liabilities in US Dollars.

	CAD$
Cash	$969
Bond deposit	$1,689
Accounts payable	$143,894
Advances from a related party	$121,741

Based on the net exposure and assuming all other variables remain constant, a 10% change in the appreciation or depreciation of the US dollar relative to the Canadian dollar would not have a material impact on the Company's comprehensive loss.

11. Capital Management

As the Company is seeking business opportunities, its principal source of capital is from the issuance of common shares. The Company's capital management objective is to obtain sufficient capital to develop new business opportunities for the benefit of its shareholders. To meet the objectives, management monitors the Company's ongoing capital requirements on specific business opportunities on a case-by-case basis. The capital structure of the Company consists of cash and equity attributable to common shareholders, consisting of issued share capital and deficit. There was no change to the Company's approach to capital management during the period. The company is not subject to extremely imposed capital requirements.

12. Related Party Transactions

A summary of compensation for directors, former directors and key management personnel is as follows:

	Three Month Period Ended		Nine Month Period Ended	
	December 31, 2014	December 31, 2013	December 31, 2014	December 31, 2013
Administrative and professional fees	$ 24,485	$ 201,225	$ 78,038	$ 335,093
Share-based payments (options)	47,783	-	47,783	-
	$ 72,268	$ 201,225	$ 125,821	$ 335,093

During the three month periods ended December 31, 2014, and December 31, 2013, the Company engaged the services of several shareholders of the Company to provide accounting, management consulting and director services. Services amounted to $24,485 (net of taxes) and $201,225 respectively, during the periods. The $24,485 and $201,225 in related party services for the three month periods ended December 31, 2014 and 2013 are classified as either Administrative fees or Professional fees on the Statements of Operations and Comprehensive Loss for each of the periods.

During the nine month periods ended December 31, 2014, and December 31, 2013, the Company engaged the services of several shareholders of the Company to provide accounting, management consulting and director services.
