CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2014 and 2013

With Independent Auditor's Report

BerryDunn

INDEPENDENT AUDITOR'S REPORT

Board of Directors
First Colebrook Bancorp, Inc.

We have audited the accompanying consolidated financial statements of First Colebrook Bancorp, Inc. and Subsidiary (the Company), which comprise the consolidated balance sheets as of December 31, 2014 and 2013, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting standards generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of First Colebrook Bancorp, Inc. and Subsidiary as of December 31, 2014 and 2013, and the consolidated results of their operations and their cash flows for the years then ended, in accordance with accounting principles generally accepted in the United States of America.

The accompanying notes are an integral part of these consolidated financial statements.

Nature of Business

First Colebrook Bancorp, Inc. (the Company) is a Delaware corporation that was incorporated in 1984 to become the holding company of The First Colebrook Bank (the Bank). The Company's primary activity is to act as the holding company for the Bank. The Bank is a state chartered bank which was incorporated in 1889. The Bank conducts its operations in the state of New Hampshire, with headquarters in Colebrook, and branch offices in Concord, Amherst, and Portsmouth. The Bank is engaged principally in the business of attracting deposits from the general public and investing those deposits in residential and commercial real estate loans, and in consumer and small business loans.

1. Summary of Significant Accounting Policies

Basis of Presentation

The accounting and reporting policies of the Company and its subsidiary conform to accounting principles generally accepted in the United States of America (U.S. GAAP) and predominant practices within the banking industry. The consolidated financial statements were prepared using the accrual basis of accounting. The significant accounting policies are summarized below to assist the reader in better understanding the consolidated financial statements and other data contained herein.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses and the valuation of other real estate owned. In connection with the determination of the allowance for loan losses and the carrying value of other real estate owned, management obtains independent appraisals for significant properties and collateral securing significant loans. Accordingly, the ultimate collectability of a substantial portion of the Company's loan portfolio is susceptible to changes in local market conditions.

While management uses available information to recognize losses on loans, future additions to the allowance may be necessary based on changes in local economic conditions. In addition, regulatory agencies, as an integral part of their examination process, periodically review the Company's loan portfolio. Such agencies may require the Company to recognize additions to the allowance based on their judgments about information available to them at the time of their examination.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, the Bank. All significant intercompany accounts and transactions have been eliminated in the consolidation.

Cash and Cash Equivalents and Interest-Bearing Deposits

For purposes of reporting cash flows, cash and cash equivalents include cash on hand, cash items, due from banks, and federal funds sold.

The Company's due from bank accounts and interest-bearing deposits, at times, may exceed federally insured limits. The Company has not experienced any losses in such accounts. The Company believes it is not exposed to any significant risk on cash and cash equivalents.

Cash and due from banks as of December 31, 2014, includes $782,000 which is subject to withdrawals and usage restrictions to satisfy the reserve requirements of the Federal Reserve Bank (FRB). In addition, a total of $80,000 is required to be maintained at Banker's Bank Northeast (BBNE).

Securities

Debt securities that management has the positive intent and ability to hold to maturity are classified as held-to-maturity and carried at cost, adjusted for amortization of premiums and accretion of discounts over the period to call or maturity using methods approximating the interest method. Securities not classified as held-to-maturity, including equity securities with readily determinable fair values, are classified as available-for-sale and are carried at fair value. Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Unrealized gains and losses on securities available-for-sale are reported as a net amount in other comprehensive income or loss, net of tax.

For declines in the fair value of individual debt securities available-for-sale below their cost that are deemed to be other-than-temporary, where the Company does not intend to sell the security and it is more-likely-than-not that the Company will not be required to sell the security before recovery of its amortized cost basis, the other-than-temporary decline in the fair value of the debt security related to 1) credit loss is recognized in earnings, and 2) other factors is recognized in other comprehensive income or loss. Credit loss is deemed to exist if the present value of expected future cash flows using the effective rate at acquisition is less than the amortized cost basis of the debt security. For individual debt securities where the Company intends to sell the security or more-likely-than-not will be required to sell the security before recovery of its amortized cost, the other-than-temporary impairment is recognized in earnings equal to the entire difference between the security's cost basis and its fair value at the balance sheet date.

Declines in marketable equity securities below their cost that are deemed other-than-temporary are recognized in earnings as realized losses.

In estimating other-than-temporary impairment losses, management considers 1) the length of time and the extent to which the fair value has been less than cost, 2) the financial condition and near-term prospects of the issuer, and 3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value.

Gains and losses on the sale of securities are recorded on the trade date and are determined using the specific identification method.

As a member of the Federal Home Loan Bank (FHLB) of Boston, the Company is required to invest in $100 par value stock of FHLB of Boston. The carrying amount of the investment (at cost) was $751,100 and $712,900 at December 31, 2014 and 2013, respectively. Management evaluates the Company's investment in FHLB of Boston stock for other-than-temporary impairment at least on a quarterly basis and more frequently when economic or market conditions warrant such evaluation. Based on its most recent analysis of the FHLB of Boston as of December 31, 2014, management deems its investment in FHLB of Boston stock to be not other-than-temporarily impaired.

Loans

Loans receivable that management has the intent and ability to hold until maturity or payoff are reported at their outstanding principal balances adjusted for amounts due to borrowers on unadvanced loans, any charge-offs, the allowance for loan losses, and any deferred fees or costs on originated loans, or unamortized premiums or discounts on purchased loans.

Interest on loans is recognized on a simple interest basis.

Loan origination and commitment fees and certain direct origination costs are deferred, and the net amount amortized as an adjustment of the related loan's yield. The Company is amortizing these amounts over the contractual life of the related loans.

Residential real estate loans are generally placed on nonaccrual when reaching 90 days past due or in process of foreclosure. All closed-end consumer loans 90 days or more past due and any equity lines in the process of foreclosure are placed on nonaccrual status. Secured consumer loans are written down to realizable value and unsecured consumer loans are charged-off upon reaching 120 or 180 days past due depending on the type of loan. Commercial real estate loans and commercial business loans and leases which are 90 days or more past due are generally placed on nonaccrual status, unless secured by sufficient cash or other assets immediately convertible to cash. When a loan has been placed on nonaccrual status, previously accrued and uncollected interest is reversed against interest on loans. A loan can be returned to accrual status when all the principal and interest amounts contractually due are brought current, collectibility of principal is reasonably assured and the loan has performed for a period of time, generally six months.

Cash receipts of interest income on impaired loans are credited to principal to the extent necessary to eliminate doubt as to the collectibility of the net carrying amount of the loan. Some or all of the cash receipts of interest income on impaired loans are recognized as interest income if the remaining net carrying amount of the loan is deemed to be fully collectible. When recognition of interest income on an impaired loan on a cash basis is appropriate, the amount of income that is recognized is limited to that which would have been accrued on the net carrying amount of the loan at the contractual interest rate. Any cash interest payments received in excess of the limit and not applied to reduce the net carrying amount of the loan are recorded as recoveries of charge-offs until the charge-offs are fully recovered.

Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance for loan losses when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance for loan losses.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. The allowance for loan losses consists of general, allocated and unallocated components, as further described below.

General Component

The general component of the allowance for loan losses is based on historical loss experience adjusted for qualitative factors stratified by the following loan segments: residential real estate, commercial real estate, construction, commercial, manufactured housing and consumer. Management uses a rolling average of historical losses based on three years to capture relevant loss data for each loan segment. This historical loss factor is adjusted for the following qualitative factors: levels and trends in delinquencies; trends in volume and terms of loans; effects of changes in risk selection and underwriting standards and other changes in lending policies, procedures and practices; experience, ability and depth of lending management and staff; and national and local economic trends and conditions. There were no changes in the Company's policies or methodology pertaining to the general component of the allowance for loan losses during 2014.

The qualitative factors are determined based on the various risk characteristics of each loan segment. Risk characteristics relevant to each loan segment are as follows:

Residential real estate: The Company generally does not originate loans with a loan-to-value ratio greater than 80% and generally does not grant subprime loans. Loans with loan-to-value ratios greater than 80% require the purchase of private mortgage insurance. All loans in this segment are collateralized by owner-occupied residential real estate and repayment is dependent on the credit quality of the individual borrower. The overall health of the economy, including unemployment rates and housing prices, will have an effect on the credit quality in this segment.

Commercial real estate: Loans in this segment are primarily income-producing properties throughout New Hampshire. The underlying cash flows generated by the properties are adversely impacted by a downturn in the economy as evidenced by increased vacancy rates, which in turn, will have an effect on the credit quality in this segment. Management periodically obtains rent rolls and continually monitors the cash flows of these loans.

Construction loans: The loans in this segment are generally construction-to-permanent loans collateralized by commercial and residential real estate and repayment is dependent on the credit quality of the individual borrower. The overall health of the economy, including unemployment rates and housing prices, will have an effect on the credit quality in this segment.

Commercial loans: Loans in this segment are made to businesses and are generally secured by assets of the business. Repayment is expected from the cash flows of the business. A weakened economy, and resultant decreased consumer spending, will have an effect on the credit quality in this segment.

Manufactured housing: Loans in this segment are primarily collateralized by mobile homes located on leased or rented land and repayment is dependent on the credit quality of the individual borrower. The overall health of the economy, including unemployment rates and manufactured housing prices, will have an effect on the credit quality in this segment.

Consumer loans: Loans in this segment are generally secured and repayment is dependent on the credit quality of the individual borrower.

Allocated Component

The allocated component relates to loans that are classified as impaired. A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Impairment is measured on a loan-by-loan basis for commercial, commercial real estate and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, or the fair value of the collateral if the loan is collateral dependent. An allowance is established when the discounted cash flows (or collateral value) of the impaired loan is lower than the carrying value of that loan. Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual consumer and residential real estate loans for impairment disclosures, unless such loans are subject to a troubled debt restructuring (TDR) agreement.

The Company periodically may agree to modify the contractual terms of loans. When a loan is modified and a concession is made to a borrower experiencing financial difficulty, the modification is considered a TDR. All TDRs are classified as impaired loans.

Unallocated Component

An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating allocated and general reserves in the portfolio.

Credit Related Financial Instruments

In the ordinary course of business, the Company has entered into commitments to extend credit, including commitments under commercial and standby letters of credit. Such financial instruments are recorded when they are funded.

Premises and Equipment

Land is stated at cost. Premises and equipment are stated at cost, less accumulated depreciation and amortization. Cost and related allowances for depreciation and amortization of premises and equipment retired or otherwise disposed of are removed from the respective accounts with any gain or loss included in income or expense. Depreciation and amortization are calculated principally on the straight-line method over the estimated useful lives of the assets.

Other Real Estate Owned

Real estate properties acquired through or in lieu of loan foreclosure are initially recorded at fair value less estimated selling cost at the date of foreclosure. Any write-downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan losses.

After foreclosure, these assets are carried at the lower of their new cost basis or fair value less cost to sell. Costs of significant property improvements are capitalized, whereas costs relating to holding property are expensed. Valuations are periodically performed by management, and any subsequent write-downs are recorded as a charge to operations, if necessary, to reduce the carrying value of a property to the lower of its cost or fair value less cost to sell.

Advertising

The Company directly expenses costs associated with advertising as they are incurred.

Income Taxes

The Company recognizes income taxes under the asset and liability method. Under this method, deferred tax assets and liabilities are established for the temporary differences between the accounting basis and the tax basis of the Company's assets and liabilities at enacted tax rates expected to be in effect when the amounts related to such temporary differences are realized or settled.

Earnings Per Common Share

Earnings per common share excludes dilution and is computed by dividing income available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted earnings per common share, if any, reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the entity. There were no dilutive securities or other contracts during the two-year period ended December 31, 2014.

Reconciliation of the numerator and the denominator of the earnings per share computation is as follows for the years ended December 31:

	2014	2013
Net income as reported	$ 1,581,910	$ 1,247,640
Preferred stock dividends paid	(86,230)	(95,811)
Net income available to common stockholders	$ 1,495,680	$ 1,151,829
Weighted average common shares outstanding	748,216	745,509
Earnings per common share	$ 2.00	$ 1.55

Recently Issued Accounting Pronouncements

In January 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-04, Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40): *Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure*. The ASU was issued to clarify that an in substance repossession or foreclosure occurs, and a credit is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the credit obtaining legal title to the residential real estate property upon completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additionally, the ASU amendments require interim and annual disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The ASU is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014, and the ASU is to be adopted using either a modified retrospective transition method or a prospective transition method. The Company does not believe such ASU will have a material effect on the Company's consolidated financial statements, other than the additional disclosures required.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers*. The ASU was issued to clarify the principles for recognizing revenue and to develop a common revenue standard for U.S. GAAP and International Financial Reporting Standards. The ASU is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. The Company does not believe such ASU will have a material effect on the Company's consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-11, *Transfers and Servicing: Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures*. The ASU was issued to respond to concerns about current accounting and disclosures for repurchase agreements and similar transactions. The concern was that under current accounting guidance there is an unnecessary distinction between the accounting for different types of repurchase agreements. Under current guidance, the repurchase-to-maturity transactions are accounted for as sales with forward agreements, whereas repurchase agreements that settle before the maturity of the transferred financial asset are accounted for as secured borrowings. The ASU amendments require new disclosures for repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions accounted for as secure borrowings. The ASU is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. The ASU will not have a material effect on the Company's consolidated financial statements.

Reclassifications

Certain amounts in the 2013 financial statements have been reclassified to conform to the 2014 presentation.

Subsequent Events

For the purposes of the presentation of these financial statements in conformity with U.S. GAAP, management has considered transactions or events occurring through March 12, 2015, which is the date that the consolidated financial statements are available to be issued. Management has not evaluated subsequent events after that date for inclusion in the consolidated financial statements.

On February 3, 2015, the Bank purchased Abikay Payroll Solutions in the amount of $175,000 through an asset purchase.

On February 23, 2015, the Company declared a quarterly dividend of $0.125 per common share. The dividend is payable March 31, 2015 to shareholders of record on March 13, 2015.

2. Investments in Available-for-Sale Securities

Investments in available-for-sale securities have been classified in the consolidated balance sheets according to management's intent. The amortized cost of securities and their approximate fair values are as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2014				
U.S. Government sponsored agencies and corporations	**$ 3,000,000**	**$ 2,942**	**$ 47,885**	**$ 2,955,057**
State and political subdivisions	**19,143,279**	**47,808**	**230,475**	**18,960,612**
Corporate debt securities	**2,012,125**	**-**	**16,295**	**1,995,830**
Mortgage-backed securities	**15,621,061**	**13,129**	**171,766**	**15,462,424**
Marketable equity securities	**530,182**	**99,219**	**-**	**629,401**
	$ 40,306,647	**$ 163,098**	**$ 466,421**	**$ 40,003,324**
December 31, 2013				
U.S. Government sponsored agencies and corporations	$ 3,989,149	$ 1,391	$ 155,121	$ 3,835,419
State and political subdivisions	18,522,583	25,127	939,791	17,607,919
Corporate debt securities	3,840,816	47,571	1,641	3,886,746
Mortgage-backed securities	20,295,982	51,744	567,941	19,779,785
Marketable equity securities	555,182	202,109	41,892	715,399
	$ 47,203,712	$ 327,942	$ 1,706,386	$ 45,825,268

The scheduled maturities of debt securities were as follows as of December 31, 2014:

	Fair Value
Due within one year	$ 548,146
Due after one year through five years	11,079,707
Due after five years through ten years	10,625,355
Due after ten years	1,658,291
Mortgage-backed securities	15,462,424
	$ 39,373,923

Proceeds from sales of available-for-sale securities were $22,232,685 and $4,630,151 for the years ended December 31, 2014 and 2013, respectively. Gross realized gains from sales of available-for-sale securities were $455,231 and $118,023 with no gross realized losses for the years ended December 31, 2014 and 2013, respectively.

Securities with total carrying amounts of $19,456,347 and $20,699,528 as of December 31, 2014 and 2013, respectively, were pledged to secure public deposits, securities sold under agreements to repurchase and for other purposes as required or permitted by law.

There were no securities of issuers whose aggregate carrying amount exceeded 10% of stockholders' equity as of December 31, 2014.

The aggregate fair value and unrealized losses of securities that have been in a continuous unrealized-loss position for less than 12 months and for 12 months or more, and are considered temporarily impaired, are as follows:

	Less than 12 months		12 Months or Longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
December 31, 2014						
U.S. Government sponsored agencies and corporations	$ -	$ -	$ 1,952,115	$ 47,885	$ 1,952,115	$ 47,885
State and political subdivisions	4,999,663	33,854	6,977,047	196,621	11,976,710	230,475
Corporate debt securities	1,995,830	16,295	-	-	1,995,830	16,295
Mortgage-backed securities	4,420,888	23,534	9,193,274	148,232	13,614,162	171,766
Total temporarily impaired securities	$ 11,416,381	$ 73,683	$ 18,122,436	$ 392,738	$ 29,538,817	$ 466,421

	Less than 12 months		12 Months or Longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
December 31, 2013						
U.S. Government sponsored agencies and corporations	$ 1,922,197	$ 80,486	$ 925,365	$ 74,635	$ 2,847,562	$ 155,121
State and political subdivisions	10,316,376	564,373	3,536,036	375,418	13,852,412	939,791
Corporate debt securities	739,925	1,641	-	-	739,925	1,641
Mortgage-backed securities	11,527,536	364,782	4,831,744	203,159	16,359,280	567,941
Marketable equity securities	333,108	41,892	-	-	333,108	41,892
Total temporarily impaired securities	$ 24,839,142	$ 1,053,174	$ 9,293,145	$ 653,212	$ 34,132,287	$ 1,706,386

The investments in the Company's investment portfolio that are temporarily impaired as of December 31, 2014, consist of debt issued by states of the United States and political subdivisions of the states, U.S. corporations, and U.S. government sponsored agencies and corporations. The unrealized losses at December 31, 2014, related to debt securities, are attributable primarily to changes in market interest rates and current market inefficiencies in the pricing of these types of securities. Company management has the ability to hold these securities until cost recovery occurs and considers these declines to be temporary. Management does not intend to sell impaired securities that were previously written down in the near term and the Company has the ability to hold these securities until recovery to cost basis occurs. No other-than-temporary-impairment write-down was recorded in 2014 or 2013.

3. Loans

Loans consisted of the following as of December 31:

	2014	2013
Commercial, industrial and municipal	**$ 41,450,029**	$ 39,027,424
Real estate – construction	**3,719,424**	4,635,685
Real estate – residential	**36,449,178**	37,182,197
Real estate – commercial	**102,003,088**	97,778,891
Manufactured housing	**6,395,526**	7,729,083
Consumer	**1,160,064**	1,198,404
	191,177,309	187,551,684
Allowance for loan losses	**(1,579,437)**	(1,860,467)
Net loans	**$ 189,597,872**	$ 185,691,217

Certain directors and executive officers of the Company, and companies in which they have significant ownership interest, were customers of the Bank during 2014 and 2013. Total loans to such persons and their companies amounted to $1,070,140 and $1,225,800 as of December 31, 2014 and 2013, respectively. During the year ended December 31, 2014, $80,580 of principal advances were made and principal payments totaled $236,240. During the year ended December 31, 2013, $34,676 of principal advances were made and principal payments totaled $111,751.

An analysis of the allowance for loan losses follows for the years ended December 31, 2014 and 2013:

	Year ended December 31, 2014							
	Residential	Real Estate Construction	Commercial	Commercial, Industrial & Municipal	Manufactured Housing	Consumer	Unallocated	Total
Beginning balance	$ 267,531	$ 31,523	$ 1,018,737	$ 323,941	$ 97,401	$ 7,006	$ 114,328	$ 1,860,467
Charge-offs	(135,071)	-	(33,744)	-	(118,222)	(2,666)	-	(289,703)
Recoveries	-	-	-	7,305	-	1,368	-	8,673
Provision for (reduction in) loan losses	1,726	1,208	41,426	(72,179)	52,797	(2,758)	(22,220)	-
Ending balance	$ 134,186	$ 32,731	$ 1,026,419	$ 259,067	$ 31,976	$ 2,950	$ 92,108	$ 1,579,437

	Year ended December 31, 2013							
	Residential	Real Estate Construction	Commercial	Commercial, Industrial & Municipal	Manufactured Housing	Consumer	Unallocated	Total
Beginning balance	$ 277,390	$ 40,888	$ 1,033,120	$ 417,260	$ 165,047	$ 21,986	$ -	$ 1,955,691
Charge-offs	(124,685)	-	(134,802)	(22,960)	(131,837)	(13,202)	-	(427,486)
Recoveries	-	-	28,014	2,590	8,775	3,893	-	43,272
Provision for (reduction in) loan losses	114,826	(9,365)	92,405	(72,949)	55,416	(5,671)	114,328	288,990
Ending balance	$ 267,531	$ 31,523	$ 1,018,737	$ 323,941	$ 97,401	$ 7,006	$ 114,328	$ 1,860,467

The following tables present the allowance for loan losses and select loan information for the years ended December 31:

2014	Real Estate			Commercial, Industrial &	Manufactured			
	Residential	Construction	Commercial	Municipal	Housing	Consumer	Unallocated	Total
Allowance for loan losses:								
Individually evaluated for impairment	$ 666	$ -	$ 5,177	$ 14,522	$ -	$ -	$ -	$ 20,365
Collectively evaluated for impairment	133,520	32,731	1,021,242	244,545	31,976	2,950	92,108	1,559,072
Ending balance	$ 134,186	$ 32,731	$ 1,026,419	$ 259,067	$ 31,976	$ 2,950	$ 92,108	$ 1,579,437

Credit Quality Information

The Company utilizes a seven grade internal loan rating system for commercial real estate, construction and commercial loans as follows:

Loans rated 1 - 3: Loans in these categories are considered "pass" rated loans with low to average risk.

Loans rated 4: Loans in this category are considered "special mention." These loans are starting to show signs of potential weakness and are being closely monitored by management.

Loans rated 5: Loans in this category are considered "substandard." Generally, a loan is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligors and/or the collateral pledged. There is a distinct possibility that the Company will sustain some loss if the weakness is not corrected.

Loans rated 6: Loans in this category are considered "doubtful." Loans classified as doubtful have all the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, highly questionable and improbable.

Loans rated 7: Loans in this category are considered uncollectible ("loss") and of such little value that their continuance as loans is not warranted.

On an annual basis, or more often if needed, the Company formally reviews the ratings on all commercial real estate, construction and commercial loans. For residential real estate and consumer loans, the Company initially assesses credit quality based upon the borrower's ability to pay and subsequently monitors these loans based on the borrower's payment activity.

The following table presents the Company's loans by risk rating as of December 31, 2014 and 2013:

2014	Real Estate			Commercial, Industrial &	Manufactured		
	Residential	Construction	Commercial	Municipal	Housing	Consumer	Total
Pass	$ 35,302,789	$ 3,719,424	$ 94,547,843	$ 37,880,816	$ 6,349,356	$ 1,160,064	$ 178,960,292
Special mention	594,115	-	3,480,260	1,937,728	-	-	6,012,103
Substandard	552,274	-	3,974,985	1,631,485	46,170	-	6,204,914
Total	$ 36,449,178	$ 3,719,424	$102,003,088	$ 41,450,029	$ 6,395,526	$ 1,160,064	$ 191,177,309

2013	Real Estate			Commercial, Industrial &	Manufactured		
	Residential	Construction	Commercial	Municipal	Housing	Consumer	Total
Pass	$ 36,482,437	$ 4,635,685	$ 88,785,732	$ 33,816,838	$ 7,692,126	$ 1,198,404	$ 172,611,222
Special mention	205,026	-	4,867,196	2,264,882	-	-	7,337,104
Substandard	494,734	-	4,125,963	2,945,704	36,957	-	7,603,358
Total	$ 37,182,197	$ 4,635,685	$ 97,778,891	$ 39,027,424	$ 7,729,083	$ 1,198,404	$ 187,551,684

The following table sets forth information regarding nonaccrual loans and past-due loans as of December 31, 2014 and 2013:

2014	30-59 Days Past Due	60-89 Days Past Due	90 Days or More Past Due	Total Past Due	Current	Total Loans	90 Days and Accruing	Recorded Investment Nonaccrual Loans
Real estate:

TDRs

A loan modification constitutes a TDR if the Company, for economic or legal reasons related to the borrower's financial difficulties, grants a concession to the borrower that it would not otherwise consider. To determine whether or not a loan should be classified as a TDR, management evaluates a loan based upon the following criteria:

- The borrower demonstrates financial difficulty; common indicators include past due status with bank obligations, substandard credit bureau reports, or an inability to refinance with another lender, and

- The Company has granted a concession; common concessions include maturity date extension, interest rate adjustments to below market pricing, reduction of principal and deferment of payments.

The following table presents the recorded investment in TDRs as of December 31, based on payment performance status:

	Commercial and Industrial	Commercial Real Estate	Residential Real Estate	Manufactured Housing	Total
2014					
Performing	**$ 81,628**	**$ 213,888**	**$ 59,060**	**$ 13,356**	**$ 367,932**
2013					
Performing	$ 86,020	$ 266,908	$ 61,598	$ -	$ 414,526

TDRs are considered impaired. As of December 31, 2014 and 2013, there were no commitments to lend additional amounts to customers with outstanding loans that are classified as TDRs.

During the years ended December 31, 2014 and 2013, certain loan modifications were executed which constituted TDRs. Substantially all of these modifications included one or a combination of the following: (1) an extension of the maturity date at a stated rate of interest lower than the current market rate for new debt with similar risk, (2) temporary change in the scheduled payment amount, (3) reduction in principal and accrued interest, or (4) the extension of the maturity date. Management performs a discounted cash flow calculation or an evaluation of the fair value of the collateral if a loan is collateral dependent to determine the amount of impairment reserve (if any) required on each of the TDRs. Any reserve required is recorded through the provision for loan losses.

The following table summarizes TDRs that occurred during the years ended December 31:

2014	Number of Loans	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
Manufactured housing	**1**	**$ 13,356**	**$ 13,356**

2013	Number of Loans	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
Residential real estate	1	$ 60,818	$ 62,002
Commercial real estate	2	105,430	105,430
Total	3	$ 166,248	$ 167,432

A loan is considered to be in payment default once it is greater than 30 days contractually past due under the modified terms. There were no TDRs modified within the previous 12 months that have defaulted during the year ended December 31, 2014.

Loan Servicing Rights

Loans serviced for others are not included in the accompanying consolidated balance sheets. The unpaid principal balances of mortgage and other loans serviced for others were $11,318,174 and $10,404,694 at December 31, 2014 and 2013, respectively.

The Company has not recorded a mortgage servicing asset because the amount is not material to the consolidated financial statements.

4. Premises and Equipment

The following is a summary of premises and equipment as of December 31:

	2014	2013
Land	$ 812,036	$ 812,036
Building and improvements	5,323,635	4,829,817
Leasehold improvements	717,140	717,140
Capital lease – building	115,000	115,000
Furniture and equipment	3,541,590	3,195,936
	10,509,401	9,669,929
Accumulated depreciation	(5,564,195)	(5,257,731)
	$ 4,945,206	$ 4,412,198

As of December 31, 2014, the Bank was obligated under a non-cancelable operating lease for bank premises expiring in December 2016. The total minimum rental due in future periods under the existing agreement is as follows as of December 31, 2014:

2015	$ 66,998
2016	66,998
	$ 133,996

The lease contains provisions for escalation of minimum lease payments contingent upon percentage increases in the consumer price index. Total rental expense amounted to $63,296 and $61,284 for the years ended December 31, 2014 and 2013, respectively.

Capital Lease Obligation

The following is a schedule by years of future minimum lease payments under a capital lease together with the present value of the net minimum lease payments as of December 31, 2014:

2015	$ 11,904
2016	11,904
	23,808
Less amount representing interest	1,534
Present value of net minimum lease payments, included in other liabilities	$ 22,274

5. Deposits

The aggregate amount of time deposit accounts in denominations of $250,000 or more, as of December 31, 2014 and 2013, was $13,149,511 and $13,993,855, respectively.

At December 31, 2014, the scheduled maturities of time deposits are as follows:

2015	$ 36,657,306
2016	21,214,175
2017	10,434,911
2018	3,880,409
2019	2,181,361
	$ 74,368,162

Deposits from related parties held by the Company as of December 31, 2014 and 2013 amounted to $1,793,945 and $6,064,823, respectively.

6. Securities Sold Under Agreements to Repurchase

The securities sold under agreements to repurchase as of December 31, 2014 and 2013, are securities sold on a short-term basis by the Bank that have been accounted for not as sales but as borrowings. The securities consisted of obligations issued by U.S. Government sponsored agencies and corporations and state and political subdivisions. The securities were held in the Bank's safekeeping account at Wells Fargo under the control of the Bank and pledged to the purchasers of the securities. The purchasers have agreed to sell to the Bank substantially identical securities at the maturity of the agreements.

7. Borrowings

Advances consist of funds borrowed from the FHLB of Boston. Amounts owed as of December 31, 2014 and 2013 are $7,000,000 and $11,000,000, respectively.

Maturities of advances for the years ending after December 31, 2014 are summarized as follows:

2015	$ 4,000,000
2016	1,000,000
2018	2,000,000
	$ 7,000,000

Borrowings from the FHLB of Boston are secured by a blanket lien on qualified collateral, consisting primarily of loans with first mortgages secured by one- to four-family properties and bank-held securities.

At December 31, 2014, the interest rates on FHLB of Boston advances ranged from 0.65% to 1.40%, with a weighted average interest rate of 0.92% at December 31, 2014. At December 31, 2013, the interest rates on FHLB of Boston advances ranged from 0.18% to 1.59%, with a weighted average interest rate of 0.91% at December 31, 2013.

8. Income Taxes

The components of income tax expense are as follows for the years ended December 31:

	2014	2013
Current tax expense (benefit)		
Federal	$ 233,313	$ 548,346
State	(78,594)	112,444
Total current income tax expense	154,719	660,790
Deferred tax expense (benefit)		
Federal	322,405	(70,782)
State	31,897	(19,340)
Change in valuation allowance	-	(77,130)
Total deferred income tax expense (benefit)	354,302	(167,252)
Total income tax expense	$ 509,021	$ 493,538

The reasons for the differences between the statutory federal income tax rate and the effective tax rates are summarized as follows for the years ended December 31:

	% of Income	
	2014	2013
Tax at statutory rate	**34.0**	34.0
State income tax expense (benefit), net of federal expense	**(1.4)**	3.4
Tax-exempt interest	**(7.2)**	(7.6)
Dividend exclusion	**(0.4)**	(0.4)
Disallowed interest expense	**0.3**	0.4
Nondeductible expenses	**0.2**	0.2
Increase in cash surrender value of life insurance policies	**(1.7)**	(2.1)
Other	**0.1**	4.1
Change in valuation allowance	**-**	(4.3)
Effective tax rate	**23.9%**	27.7%

The Company had gross deferred tax assets and gross deferred tax liabilities as follows as of December 31:

	2014	2013
Deferred tax assets		
Bad debts	**$ 298,811**	$ 408,709
Deferred compensation	**287,273**	335,172
Interest on nonperforming loans	**77,143**	53,876
Tax credits	**529,640**	566,558
Write-down of securities	**-**	119,934
Write-down of OREO	**68,805**	68,805
Federal alternative minimum tax credit carryforward	**77,789**	77,789
Depreciation	**198,604**	279,850
Unrealized holding loss on available-for-sale securities	**120,146**	546,002
Other, net	**131,041**	112,715
Gross deferred tax assets	**1,789,252**	2,569,410
Deferred tax liabilities		
Other	**(3,191)**	(3,191)
Gross deferred tax liabilities	**(3,191)**	(3,191)
Net deferred tax asset	**$ 1,786,061**	$ 2,566,219

In assessing the realizability of deferred tax assets, management considers whether it is more-likely-than-not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the reversal of deferred tax liabilities and generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Based upon such information, management believes it is more likely than not the Company will realize the benefits of the deferred tax assets as of December 31, 2014.

It is the Company's policy to provide for uncertain tax positions and the related interest and penalties based upon management's assessment of whether a tax benefit is more-likely-than-not to be sustained upon examination by tax authorities. As of December 31, 2014 and 2013, there were no material uncertain tax positions related to federal and state income tax matters. The Company is currently open to audit under the statute of limitations by the Internal Revenue Service and state taxing authorities for the years ended December 31, 2011 through December 31, 2013.

9. Commitments and Contingent Liabilities

Data Processing Services

The Company entered into an agreement with a third party in which the third party is to provide the Company with data processing, and other miscellaneous services. The Company may cancel the agreement at any time, provided the Company pays an early termination fee as defined in the agreement.

Legal Contingencies

Various legal claims arise from time-to-time in the normal course of business which, in the opinion of management, will have no material effect on the Company's consolidated financial statements.

10. Financial Instruments with Off-Balance Sheet Risk

The Company is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to originate loans, commercial and standby letters of credit and unadvanced funds on loans. The instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheets. The contract amounts of those instruments reflect the extent of involvement the Company has in particular classes of financial instruments.

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for loan commitments and letters of credit is represented by the contractual amounts of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

Commitments to originate loans are agreements to lend to a customer provided there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies, but may include secured interests in mortgages, accounts receivable, inventory, property, plant and equipment and income-producing properties.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance by a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. As of December 31, 2014 and 2013, the maximum potential amount of the Company's obligation was $910,080 and $606,877, respectively, for commercial and standby letters of credit. The Company's outstanding letters of credit generally have a term of less than one year. If a letter of credit is drawn upon, the Company may seek recourse through the customer's underlying line of credit. If the customer's line of credit is also in default, the Company may take possession of the collateral, if any, securing the line of credit.

The notional amounts of financial instrument liabilities with off-balance sheet credit risk are as follows as of December 31:

	2014	2013
Commitments to originate loans	**$ 7,685,125**	$ 8,451,664
Commercial and standby letters of credit	**910,080**	606,877
Overdraft protection	**2,857,687**	2,875,193
Unadvanced portion of loans:		
Home equity loans	**3,467,683**	3,379,302
Commercial loans	**19,146,102**	19,270,446
Municipal loans	**905,000**	1,755,000
Residential construction	**1,130,615**	1,815,500
	$ 36,102,292	$ 38,153,982

11. Significant Group Concentration of Credit Risk

The Company's operations are affected by various risk factors, including interest rate risk, credit risk, and risk from geographic concentration of lending activities. Management attempts to manage interest rate risk through various asset/liability management techniques designed to match maturities of assets and liabilities. Loan policies and administration are designed to provide assurance that loans will only be granted to creditworthy borrowers, although credit losses are expected to occur because of subjective factors beyond the control of the Company. Although the Company has a diversified loan portfolio and economic conditions are stable, most of its lending activities are conducted within the state of New Hampshire. As a result, the Company and its borrowers may be especially vulnerable to the consequences of changes in the local economy. In addition, a substantial portion of the Company's loans are secured by real estate located in the state of New Hampshire.

12. Employee Benefits

Deferred Compensation Plans

The Company has deferred compensation plans for key employees providing for the payment of benefits upon retirement or death. Under the plans, these employees may elect to receive specific retirement payments for a term of five or ten years with payments made to either the employee or their beneficiaries. The plans also provide for reduced benefits upon early retirement or termination of employment. The Company has purchased whole life insurance policies on each of the participant's lives to assist in the administration of the plans. The participants and their beneficiaries have no ownership interest in such policies and have no greater interest in the benefits under the plans other than that of an unsecured creditor of the Company.

The Company has Director Fee Continuation Agreements with its directors which are unfunded arrangements maintained to provide supplemental retirement benefits for directors. Under the agreements, directors shall be 100% vested in their benefits after having served five years on the Company's Board starting with date of first service.

The total liability for the deferred compensation plans amounted to $725,253 and $846,180 at December 31, 2014 and 2013, respectively. Deferred compensation expense charged to operations for the plans during the years ended December 31, 2014 and 2013 was $39,528 and $80,112, respectively.

The Company recognizes a liability for the Company's future postretirement benefit obligations under the endorsement split-dollar life insurance arrangements related to the above deferred compensation plans. The total liability for the arrangements included in other liabilities was $273,747 and $274,947 at December 31, 2014 and 2013, respectively.

401(k) Plan

The Company maintains a contributory 401(k) pension plan covering all employees who meet certain age and service requirements. Contributions to the plan are voluntary by the eligible participants up to certain limits. Employee contributions are matched up to 5% of the participant's salary. Contributions to the plan by the Company for the years ended December 31, 2014 and 2013 amounted to $137,453 and $136,115, respectively.

Change in Control Agreements

Four officers of the Bank have entered into change in control agreements with the Bank. These agreements provide that if a "change in control" has occurred, the Bank and/or its successor shall pay the officer a lump-sum payment equal to between one and three times the officer's base salary or final compensation, as defined in the agreements.

13. Employee Stock Ownership Plan

Effective January 1, 2011, the Company adopted The First Colebrook Bank Employee Stock Ownership Plan (ESOP). An acquisition loan may be used by the ESOP to finance the purchase of Company common stock. Company contributions for any plan year shall be paid in an amount determined by the Board of Directors in its sole discretion. The Company made a 2013 plan year contribution to the ESOP in the amount of $45,000 in 2014 and a 2012 plan year contribution to the ESOP of $40,000 in 2013.

Any shares of the Company's common stock purchased by the ESOP are subject to the accounting specified by Accounting Standards Codification (ASC) 718-40. Under the standard, as any shares purchased from borrowed funds are released from collateral, the Company reports compensation expense equal to the current market price of the shares and the shares are outstanding for earnings-per-share computations. Also, as the shares are released, any related dividends will be recorded as a reduction of retained earnings and dividends on the unallocated shares will be recorded as a reduction of any debt and accrued interest. The ESOP purchased 2,000 and 1,800 shares of common stock of the Company during 2014 and 2013, respectively. As of December 31, 2014 and 2013, the ESOP had no debt.

To participate in the plan an employee must (a) be employed on the last day of the plan year unless the employee has died, retires at normal retirement age or becomes disabled during the plan year, and (b) have at least 1,000 hours of service during the plan year.

Eighty percent (80%) of Company contributions and forfeitures shall be allocated in the ratio that the compensation of each eligible participant bears to the total compensation of all eligible participants. Twenty percent (20%) of Company contributions and forfeitures shall be allocated in the ratio that the number of full years of employment of each eligible participant bears to the total number of full years of employment of all eligible participants.

Any cash dividends paid on shares of Company common stock allocated to participants' Company stock accounts and remitted to the ESOP trust fund will, at the discretion of the plan administrator and prior to the close of the plan year in which paid, be either (1) applied to repayment of an outstanding acquisition loan relating to the Company common stock upon which the dividend is received, (2) distributed to participants in cash, or (3) allocated to each participant's Company contribution account.

14. Other Noninterest Income and Expenses

The components of other noninterest income and expenses which are in excess of 1% of total revenues (total interest and dividend income and noninterest income) and not shown separately in the statements of income are as follows for the years ended December 31:

		2014		2013
Noninterest income				
Master money income	$	**241,409**	$	249,195
Cash surrender value of life insurance income		**109,506**		111,926
Noninterest expenses				
Other real estate owned expense	$	**115,535**	$	106,349
Directors' fees		**227,950**		194,800
Examination and audit expense		**207,550**		177,000
Debit card expense		**113,822**		120,466

15. Regulatory Matters

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of its assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. Capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier 1 capital (as defined) to average assets (as defined). Management believes, as of December 31, 2014 and 2013, that the Bank meets all capital adequacy requirements to which it is subject.

As of December 31, 2014, the most recent notification from the Federal Deposit Insurance Corporation categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the table. There are no conditions or events since that notification that management believes have changed the Bank's category. The Bank's and the Company's actual capital amounts and ratios are also presented in the table. The Company is subject to similar minimum capital requirements, except bank holding companies are not subject to prompt corrective action provisions.

	Actual		Minimum Capital Requirement		Minimum To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
	(Dollars in thousands)					
December 31, 2014						
Total capital to risk weighted assets:

16. Fair Value Measurements and Disclosures

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. U.S. GAAP also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The three levels of inputs that may be used to measure fair value are:

Level 1: Quoted prices (unadjusted) or identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to all of the Company's assets and liabilities carried at fair value at December 31, 2014 and 2013. The Company did not have any significant transfers of assets between Level 1 and Level 2 of the fair value hierarchy during the years ended December 31, 2014 and 2013.

The Company's marketable equity securities are generally classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices.

The Company's investment in mortgage-backed securities and other debt securities available-for-sale is generally classified within Level 2 of the fair value hierarchy. For these securities, management obtains fair value measurements from independent pricing services. The fair value measurements consider observable market data that may include dealer quotes, market spreads, cash flows, the U.S. treasury yield curve, trading levels, market consensus prepayment speeds, credit information and the instrument's terms and conditions. Level 3 of the fair value hierarchy is for positions that are not traded in active markets or are subject to transfer restrictions, valuations are adjusted to reflect illiquidity and/or non-transferability, and such adjustments are generally based on available market evidence. In the absence of such evidence, management's best estimate is used. Subsequent to inception, management only changes Level 3 inputs and assumptions when corroborated by evidence such as transactions in similar instruments, completed or pending third-party transactions in the underlying investment or comparable entities, subsequent rounds of financing, recapitalization and other transactions across the capital structure, offerings in the equity or debt markets, and changes in financial ratios or cash flows.

The fair values of the Company's impaired loans are estimated based on the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 2 inputs based upon appraisals of similar properties obtained from a third party using market information. For Level 3 inputs, fair value is based upon management estimates of the value of the underlying collateral.

Other real estate owned values are estimated using Level 2 inputs based upon appraisals of similar properties obtained from a third party using market information. For Level 3 inputs, fair values are based on management estimates.

The following summarizes assets measured at fair value as of December 31, 2014 and 2013.

Assets measured at fair value on a recurring basis using a market approach:

		Fair Value Measurement Using		
	Total	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2014				
U.S. Government sponsored agencies and corporations	**$ 2,955,057**	**$ -**	**$ 2,955,057**	**$ -**
State and political subdivisions	**18,960,612**	**-**	**18,960,612**	**-**
Corporate debt securities	**1,995,830**	**-**	**1,995,830**	**-**
Mortgage-backed securities	**15,462,424**	**-**	**15,462,424**	**-**
Marketable equity securities	**629,401**	**629,401**	**-**	**-**
Totals	**$ 40,003,324**	**$ 629,401**	**$ 39,373,923**	**$ -**

		Fair Value Measurement Using		
	Total	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2013				
U.S. Government sponsored agencies and corporations	$ 3,835,419	$ -	$ 3,835,419	$ -
State and political subdivisions	17,607,919	-	17,607,919	-
Corporate debt securities	3,886,746	-	3,886,746	-
Mortgage-backed securities	19,779,785	-	19,779,785	-
Marketable equity securities	715,399	715,399	-	-
Totals	$ 45,825,268	$ 715,399	$ 45,109,869	$ -

Assets measured at fair value on a nonrecurring basis:

Under certain circumstances the Bank makes adjustments to fair value for assets and liabilities although they are not measured at fair value on an ongoing basis. The following table presents the assets carried on the consolidated balance sheet by caption and by level in the fair value hierarchy at December 31, 2014 and 2013, for which a nonrecurring change in fair value has been recorded:

		Fair Value Measurements Using		
	Total	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2014				
Other real estate owned	**$ 732,288**	**$ -**	**$ -**	**$ 732,288**
Impaired loans	**99,338**	**-**	**99,338**	**-**
December 31, 2013				
Other real estate owned	$ 771,680	$ -	$ -	$ 771,680
Impaired loans	331,775	-	331,775	-

The following table reconciles activity for the years ended December 31, 2014 and 2013 of other real estate owned measured at fair value on a nonrecurring basis using significant unobservable Level 3 inputs:

	2014	2013
Beginning balance	**$ 771,680**	$ 882,779
Additions	**-**	86,736
Disposals	**(39,392)**	(197,835)
Ending balance	**$ 732,288**	$ 771,680

ASC 825, *Financial Instruments*, requires that the Company disclose estimated fair value for its financial instruments. Fair value methods and assumptions used by the Company in estimating its fair value disclosures for financial instruments not discussed above are as follows:

Cash and cash equivalents: The carrying amounts reported in the balance sheets for cash and cash equivalents approximate those assets' fair values.

Interest-bearing deposits with banks: The fair values of interest-bearing deposits with banks are estimated using discounted cash flow analyses using interest rates currently being offered for deposits with similar terms to investors.

FHLB of Boston stock: The carrying value of FHLB of Boston stock approximates fair value based on the redemption provisions of the FHLB of Boston.

Loans receivable: For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. The fair values of fixed rate loans, and those variable rate loans that do not reprice frequently, are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality.

Accrued interest receivable: The carrying amount of accrued interest receivable approximates its fair value.

Deposits: The fair values disclosed for demand deposits (e.g., interest and non-interest checking, passbook savings and money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). Fair values for fixed-rate certificate accounts are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on certificate accounts.

Borrowings: Fair values for borrowings are estimated using a discounted cash flow technique that applies interest rates currently being offered on advances to a schedule of aggregated expected monthly maturities.

Securities sold under agreements to repurchase: The carrying amounts reported on the consolidated balance sheets for securities sold under agreements to repurchase approximate their fair values.

Off-balance sheet instruments: The fair value of commitments to originate loans is estimated using the fees currently charged to enter similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments and the unadvanced portion of loans, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligation with the counterparties at the reporting date.

The estimated fair values of the Company's financial instruments, all of which are held or issued for purposes other than trading, are as follows as of December 31, 2014:

			Fair Value Measurements Using		
	Carrying Amount	Fair Value	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Financial assets					
Cash and cash equivalents	$ 8,950,965	$ 8,950,965	$ 8,950,965	$ -	$ -

Borrowings	11,000,000	11,003,193	-	11,003,193	-
Securities sold under agreements to repurchase	1,344,539	1,344,539	-	1,344,539	-

The carrying amounts of financial instruments shown in the above table are included in the consolidated balance sheets under the indicated captions.

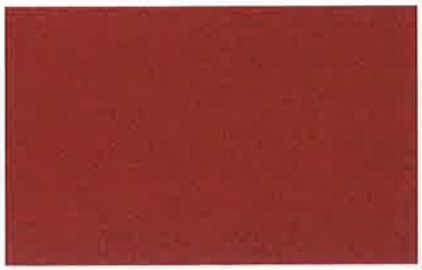

17. Preferred Stock

On September 22, 2011, as part of the U.S. Treasury Department (Treasury) Small Business Lending Fund (SBLF) program, the Company entered into a Securities Purchase Agreement with the Treasury pursuant to which the Company issued and sold to the Treasury 8,623 shares of the Company's non-cumulative perpetual preferred stock, Series C, par value $0.01 per preferred share, having a liquidation preference of $1,000 per preferred share for a total purchase price of $8,623,000 (the Series C Preferred Stock). The SBLF is the Treasury's effort to bring Main Street banks and small businesses together to help create jobs and promote economic growth in local communities. The Company used $4,725,000 of the proceeds to redeem the Series A and B Preferred Stock previously issued to the Treasury.

Under the SBLF program, the initial dividend rate payable on SBLF capital is, at most 5%, and the dividend rate falls to 1% after two years if a participating bank's level of Qualified Small Business Lending (QSBL) increases by 10% or more over the two-year period. Banks that increase their lending by less than 10%, but more than 2.5%, pay dividend rates between 2% and 4%. If a bank's lending does not increase in the first two years, however, the dividend rate increases to 7%. After two years, the dividend rate in effect is fixed for the next 2.5 years.

The Company has increased its QSBL by more than 10% to qualify for a 1% dividend rate for the 2.5-year period from September 30, 2013 to March 22, 2016. After 4.5 years, the total dividend rate increases to 9% regardless of the amount of small business lending activities. The dividend will be paid only when declared by the Company's Board of Directors. The Series C Preferred Stock has no maturity date, is non-voting, except in limited circumstances, and ranks senior to Common Stock with respect to the payment of dividends and distributions and amounts payable upon liquidation, dissolution and winding up of the Company.

The SBLF Preferred Stock may be redeemed at any time by the Company, subject to the approval of its federal banking regulator. The redemption price is the aggregate liquidation preference of the SBLF Preferred Stock plus accrued but unpaid dividends and pro rata portion of any lending incentive fee. All redemptions must be in an amount at least equal to 25% of the number of originally issued shares of SBLF Preferred Stock, or 100% of the then-outstanding shares if less than 25% of the number of shares originally issued.

BerryDunn
