THE MOVIE STUDIO, INC
(FORMERLY DESTINATION TELEVISION, INC.)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
APRIL 30, 2015

Note 1 – Description of Business

The Movie Studio, Inc. (the "Company") was incorporated in the State of Delaware 1961 under the name Magic Fingers, Inc. The company is a vertically integrated motion picture production company that develops, manufactures and distributes independent motion picture content for worldwide consumption on a multitude of devices.

The Company has operated under various names since incorporation, most recently Destination Television, Inc. from February 2007 to November 2012, when the name was changed to The Movie Studio, Inc.

From October 31, 2001, the Company's focus was on the developing a private television network, in high traffic locations such as bars and nightclubs. During this development period, the Company received incidental revenue from the sale of advertising and the production of commercials. In 2010, the Company began implementation of its current business model, using the technology previously developed for the private television network.

Note 2 – Summary of significant Accounting Policies

Basis of Presentation

The accompanying unaudited consolidated quarterly financial statements have been prepared on a basis consistent with generally accepted accounting principles in the United States ("GAAP") for interim financial information and pursuant to the rules of the Securities and Exchange Commission ("SEC"). In the opinion of management, the accompanying unaudited financial statements reflect all adjustments, consisting of only normal and recurring adjustments, necessary for a fair presentation of the results of operations, financial position and cash flows for the periods presented. The results of operations for the periods are not necessarily

indicative of the results expected for the full year or any future period. These statements should be read in conjunction with the Entity's Annual Report on Form 10-K for the year ended October 31, 2013 as filed with the SEC on November 29, 2014 (the "2013 Annual Report").

The consolidated financial statements include the accounts of The Movie Studio, Inc. (Formerly Destination Television, Inc.), a Delaware corporation, and its wholly owned subsidiary Destination Television, Inc., a Florida corporation. All significant inter-company account balances and transactions between the Company and its subsidiary have been eliminated in consolidation.

Long-Lived Assets

In accordance with Financial Accounting Standard Board ("FASB") Accounting Standards Codification ("ASC") Topic 360 *Property, Plant, and Equipment,* the Company records impairment losses on long-lived assets used in operations when indicators of impairment are present and the undiscounted cash flows estimated to be generated by those assets are less than the assets' carrying amounts. There were no impairment charges during the quarter ended April 30, 2015 and the year ended October 31, 2014.

Note 2 – Summary of significant Accounting Policies (continued)

Fair Value of Financial Instruments

The fair values of the Company's assets and liabilities that qualify as financial instruments under FASB ASC Topic 825, *Financial Instruments*, approximate their carrying amounts presented in the accompanying consolidated statements of financial condition at April 30, 2015 and October 31, 2014.

Revenue recognition

In accordance with the FASB ASC Topic 605, *Revenue Recognition,* the Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, and collectability is reasonably assured.

Income Taxes

The Company accounts for income taxes in accordance with FASB ASC Topic 740 *Income Taxes,* which requires accounting for deferred income taxes under the asset and liability method. Deferred income tax asset and liabilities are computed for differences between the financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on the enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce the deferred income tax assets to the amount expected to be realized.

In accordance with GAAP, the Company is required to determine whether a tax position of the Company is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation processes, based on the technical merits of the position. The Company files an income tax return in the U.S. federal jurisdiction, and may file income tax returns in various U.S. state and local jurisdictions. Generally the Company is no longer subject to income tax examinations by major taxing authorities for years before 2009. The tax benefit to be recognized is measured as the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. De-recognition of a tax benefit previously recognized could result in the Company recording a tax liability

that would reduce net assets. This policy also provides guidance on thresholds, measurement, de-recognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition that is intended to provide better financial statement comparability among different entities. It must be applied to all existing tax positions upon initial adoption and the cumulative effect, if any, is to be reported as an adjustment to stockholder's equity as of January 1, 2009. Based on its analysis, the Company has determined that the adoption of this policy did not have a material impact on the Company's financial statements upon adoption. However, management's conclusions regarding this policy may be subject to review and adjustment at a later date based on factors including, but not limited to, on-going analyses of and changes to tax laws, regulations and interpretations thereof.

Comprehensive Income

The Company complies with FASB ASC Topic 220, *Comprehensive Income,* which establishes rules for the reporting and display of comprehensive income (loss) and its components. FASB ASC Topic 220 requires the Company's change in foreign currency translation adjustments to be included in other comprehensive loss, and is reflected as a separate component of stockholders' equity.

Note 2 – Summary of significant Accounting Policies (continued)

Stock-Based Compensation

The Company complies with FASB ASC Topic 718 *Compensation – Stock Compensation,* which establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments. FASB ASC Topic 718 focuses primarily on accounting for transactions in which an entity obtains employee services in share-based payment transactions. FASB ASC Topic 718 requires an entity to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award (with limited exceptions). That cost will be recognized over the period during which an employee is required to provide service in exchange for the award (usually the vesting period). No compensation costs are recognized for equity instruments for which employees do not render the requisite service. The grant-date fair value of employee share options and similar instruments will be estimated using option-pricing models adjusted for the unique characteristics of those instruments (unless observable market prices for the same or similar instruments are available). If an equity award is modified after the grant date, incremental compensation cost will be recognized in an amount equal to the excess of the fair value of the modified award over the fair value of the original award immediately before the modification. No employee stock options or stock awards vested during 2015 or 2014 under FASB ASC 718.

Nonemployee awards

The fair value of equity instruments issued to a nonemployee is measured by using the stock price and other measurement assumptions as of the date of either: (i) a commitment for performance by the nonemployee has been reached; or (ii) the counterparty's performance is complete. Expenses related to nonemployee awards are generally recognized in the same period as the Company incurs the related liability for goods and services received. The Company recorded stock compensation of approximately $-0- and $-0- during the six months ended April 30, 2015 and 2014, respectively, related to consulting services.

Recently Adopted Accounting Pronouncements

The Company has adopted the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 105-10, *Generally Accepted Accounting Principles – Overall* ("ASC 105-10"), which was formerly known as SFAS 168. ASC 105-10 establishes the FASB Accounting Standards Codification (the "Codification") as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with U.S. GAAP. Rules and interpretive

releases of the Securities and Exchange Commission (the "SEC") under authority of federal securities laws are also sources of authoritative U.S. GAAP for SEC registrants. All guidance contained in the Codification carries an equal level of authority. The Codification superseded all existing non-SEC accounting and reporting standards and all other non-grandfathered, non-SEC accounting literature not included in the Positions or Emerging Issues Task Force Abstracts. Instead, it will issue Accounting Standards Updates ("ASUs"). The FASB will not consider ASUs as authoritative in their own right. ASUs will serve only to update the Codification, provide background information about the guidance and provide the basis of conclusions on the change(s) in the Codification. References made to FASB guidance throughout this document have been updated for the Codification.

Note 2 – Summary of significant Accounting Policies (continued)

Recently Adopted Accounting Pronouncements (continued)

ASU 2011-04. In May 2011, the FASB issued Accounting Standards Update 2011-14, *Fair Value Measurement* (Topic 820). This Update will improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with US GAAP and International Financial Reporting Standards ("IFRS"). The amendments in this Update result in common fair value measurement and disclosure requirements in U.S. GAAP and IFRSs and they explain how to measure fair value and they do not require additional fair value measurements and are not intended to establish valuation standards or affect valuation practices outside of financial reporting. The amendments in this Update apply to all reporting entities that are required or permitted to measure or disclose the fair value of an asset, a liability, or an instrument classified in a reporting entity's shareholders' equity in the financial statements.

The amendments in this update are to be applied prospectively. For public entities, the amendments are effective during interim and annual periods beginning after December 15, 2011. Early application by public entities is not permitted. The adoption of ASU 2011-04 is not expected to have any material impact on our financial position, results of operations or cash flows.

ASC 480, In March of 2012, the FASB issued Accounting Standards Update, *Distinguishing Liabilities from Equity* ; primarily originated from FAS 150 and related interpretations. This subtopic establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. The guidance applies to freestanding financial instruments, thus reinforcing the importance of this determination.

The Company has reviewed all other recently issued, but not yet adopted, accounting standards in order to determine their effects, if any, on its results of operation, financial position or cash flows. Based on that review, the Company believes that none of these pronouncements will have a significant effect on its consolidated financial statements.

Loss Per Common Share

The Company complies with the accounting and disclosure requirements of FASB ASC 260, *Earnings Per Share.* Basic loss per common share is computed by dividing net loss available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted loss per common share incorporates the dilutive effect of common stock equivalents on an average basis during the period.

Note 3 – Going Concern

The accompany financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assume that The Movie Studio, Inc. will continue in operation for at least one year and realize its assets and discharge its liabilities in the normal course of operations.

Several conditions cast doubt about the Company's ability to continue as a going concern. The Company has an accumulated deficit of approximately $9.54 million as of April 30, 2015, has limited cash available for payment of operating expenses, no source of revenue, and requires additional financing in order to finance its business activities as a going concern. The Company's future capital requirements will depend on numerous factors, including but not limited to continued progress in the pursuit of business opportunities. The Company is actively pursuing alternative financing and has discussions with various third parties, although no firm commitments have been obtained. In the interim, the principal shareholder has committed to meeting any operating expenses incurred by the Company. The Company believes that actions it is presently taking to revise its operating and financial requirements provide it with the opportunity to continue as a going concern.

The accompanying financial statements have been prepared in conformity with generally accepted accounting principles, which contemplate continuation of the Company as a going concern. While we believe that the actions already taken or planned, will mitigate the adverse conditions and events which raise doubt about the validity of going concern assumption used in preparing these financial statements, there can be no assurance that these actions will be successful. If the Company were unable to continue as a going concern, then substantial adjustments would be necessary to the carrying values of the reported liabilities.

Note 4 - Acquired Amortizable Intangible Assets

As of October 31, 2006, the Company invested $3,280 in establishing trademarks associated with its Bar TV concept. The Company amortizes the costs of these intangibles over their estimated useful lives unless such lives are deemed indefinite. Amortizable intangible assets are also tested for impairment based on undiscounted cash flows and, if impaired, written down to fair value based on either discounted cash flows or appraised values. Intangible assets with indefinite lives are tested for impairment, at least annually, and written down to fair value as required.

Expected annual amortization expense related to amortizable intangible assets is as follows:

As of October 31,			
2014		280	
Thereafter		0	

Total expected annual amortization expense	$ 0

Note 5 - Income Taxes

The Company has approximately $9.54 million in net operating loss carryovers available to reduce future income taxes. These carryovers expire at various dates through the year 2031. The Company has adopted FASB ASC Topic 740 which provides for the recognition of a deferred tax asset based upon the value the loss carry-forwards will have to reduce future income taxes and management's estimate of the probability of the realization of these tax benefits. The Company's management determined that it was more likely than not that the Company's net operating loss carry-forwards would not be utilized; therefore, a valuation allowance against the related deferred tax asset has been established.

A summary of the deferred tax asset presented on the accompanying balance sheets is as follows:

	April 30, 2015	October 31, 2014

Item 4 Controls and Procedures

(a) Evaluation of disclosure controls and procedures.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Securities Exchange Act of 1934 (Exchange Act) as a process designed by or under the supervision of, our principal executive and principal financial officers and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

Pertain to the maintenance of records that is in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets

Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of our management and directors: and

Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's Internal Control over financial reporting as of April 30, 2015. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in this Internal Control-Integrated Framework.

Based on our assessment, we believe that, as of April 30, 2015 our internal control over financial reporting was not effective.

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that are designed to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Our management, with the participation of our chief executive officer and chief financial officer, has evaluated the effectiveness of our disclosure controls and procedures as of April 30, 2015. Based on their evaluation, our chief executive officer and chief financial officer have concluded that, as of April 30, 2015, our disclosure controls and procedures were not effective.
