ENCOUNTER CARE SOLUTIONS, INC. AND SUBSIDIARY
NOTES TO FINANCIAL STATEMENTS
March 31, 2015

Note 1. Organization and Significant Accounting Policies

Organization and Line of Business

Encounter Care Solutions, Inc. ("the Company") is a Delaware corporation organized March, 2000 and is an integrated healthcare company that operates its business through two divisions: Healthcare Technology Division and the Healthcare Services Division. Encounter Care Solutions, Inc.'s operating businesses offer a broad range of proprietary healthcare technology, products and services that address several very sizeable and rapidly growing target markets, including: the Telemedicine Market, Healthcare Information Technology Market, and Home Healthcare Market.

In July 2012, a new subsidiary of Encountercare was formed and incorporated in the state of Delaware by the name of Cyber Fuels, Inc. This subsidiary enters the company into the alternative fuels market.

Joint Venture Termination

In June 2008 we formed a joint venture with Authentidate Holding Corp., called ExpressMD TM Solutions LLC to provide in-home patient vital signs monitoring systems and services. The company and Authentidate Holding Corp. each owned fifty percent of the joint venture and neither party had any special rights under the joint venture agreement. ExpressMD Solutions did not have any assets or liabilities and Authentidate Holding Corp. did not have any recourse to our general credit. ExpressMD Solutions was consolidated in Authentidate Holding Corp.'s financial statements because Authentidate Holding Corp. elected to provide the majority of funding for the joint venture and was deemed to be the primary beneficiary.

On November 21, 2011, the company entered into a definitive Joint Venture Termination Agreement (the "Agreement") with Authentidate Holding Corp. (the "Buyer"), providing for the assignment and transfer to the company of all of the membership interests held by Seller in ExpressMD Solutions. At the closing on November 21, 2011, the joint venture agreement was terminated, ExpressMD Solutions became a wholly-owned subsidiary of Authentidate Holding Corp. and the company granted the company a license to use certain intellectual property. Pursuant to the Agreement, Authentidate Holding Corp. agreed to pay to the company $1,000,000 in cash and deliver to the company 1,500,000 shares of restricted common stock of Authentidate Holding Corp. The cash payment is due as follows: $50,000 was received prior to the date of the Agreement; $475,000 was received at the closing; $200,000 was received in April 2012; and $275,000 is due on or prior to October 1, 2012. In addition, upon the closing Authentidate Holding Corp. forgave the company approximately $800,000 for operating expenses advanced to the joint venture. The company recorded a gain on sale of equity method investment.

Principles of Consolidation

Estimates include the valuation allowance on deferred tax assets and valuation of stock issued for services. Actual results could differ from those estimates.

Note 9. Related Party Transactions- Cont.

ASC 820 defines fair value, establishes a framework for measuring fair value under GAAP, and expands disclosures about fair value measurements. Under GAAP, fair value of such securities is determined based upon a hierarchy that prioritizes the inputs to valuation techniques used to measure fair values into three broad levels.

The fair value of the Company's financial assets and liabilities reflects the Company's estimate of amounts that it would have received in connection with the sale of the assets or paid in connection with the transfer of the liabilities in an orderly transaction between market participants at the measurement date. In connection with measuring the fair value of its assets and liabilities, the Company seeks to maximize the use of observable inputs (market data obtained from sources independent from the Company) and to minimize the use of unobservable inputs (the Company's assumptions about how market participants would price assets and liabilities).

The following fair value hierarchy is used to classify assets and liabilities based on the observable inputs and unobservable inputs used in order to value the assets and liabilities:

Level 1: Quoted prices in active markets for identical assets or liabilities. An active market for an asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Observable inputs other than Level 1 inputs. Examples of Level 2 inputs include quoted prices in active markets for similar assets or liabilities and quoted prices for identical assets or liabilities in markets that are not active.

Level 3: Unobservable inputs based on the Company's assessment of the assumptions that market participants would use in pricing the asset or liability.

	Level 1: Quoted Prices in Active Markets for Identical Assets	Level 2: Quoted Prices in Inactive Markets for Identical Assets	Level 3: Significant Unobservable Inputs	Total at March 31, 2015
Marketable Securities	$ 405	-	-	$ 405
