FORWARD LOOKING STATEMENTS

Statements made in this Form 10-Q that are not historical or current facts are forward-looking statements. These statements often can be identified by the use of terms such as "may," "will," "expect," "believe," "anticipate," "estimate," "approximate" or "continue," or the negative thereof. We wish to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. Any forward-looking statements represent management's best judgment as to what may occur in the future. However, forward-looking statements are subject to risks, uncertainties and important factors beyond our control that could cause actual results and events to differ materially from historical results of operations and events and those presently anticipated or projected. Among the factors that could cause actual results to differ materially from the forward-looking statements are the following: the Company's ability to obtain necessary capital, the Company's ability to meet anticipated development timelines, the Company's ability to protect its proprietary technology and knowhow;, the Company's ability to successfully consummate future acquisitions and such other risk factors identified from time to time in the Company's reports filed with the Securities and Exchange Commission, including those filed with this Form 10-Q quarterly report. Overview

The Company will attempt to locate and negotiate with a business entity for the combination of that target company with the Company. The combination will normally take the form of a merger, stock-for-stock exchange or stock-for-assets exchange. No assurances can be given that the Company will be successful in locating or negotiating with any target business.

Evolution Technology Resources is a business development stage company that is focused on acquiring intellectual property and assets for the manufacturing of biomass processing equipment for the production of energy. The Company intends to acquire intellectual property and capability to produce technology for the biomass-to-energy sector.

In implementing a structure for a particular business acquisition, the Company may become a party to a merger, consolidation, reorganization, joint venture, or licensing agreement with another corporation or entity.

It is anticipated that any securities issued in any such business combination would be issued in reliance upon exemption from registration under applicable federal and state securities laws. In some circumstances, however, as a negotiated element of its transaction, the Company may agree to register all or a part of such securities immediately after the transaction is consummated or at specified times thereafter. If such registration occurs, it will be undertaken by the surviving entity after the Company has entered into an agreement for a business combination or has consummated a business combination. The issuance of additional securities and their potential sale into any trading market which may develop in the Company's securities may depress the market value of the Company's securities in the future if such a market develops, of which there is no assurance.

The Company will participate in a business combination only after the negotiation and execution of appropriate agreements. Negotiations with a target company will likely focus on the percentage of the Company which the target company shareholders would acquire in exchange for their shareholdings. Although the terms of such agreements cannot be predicted, generally such agreements will require certain representations and warranties of the parties thereto, will specify certain events of default, will detail the terms of closing and the conditions which must be satisfied by the parties prior to and after such closing and will include miscellaneous other terms. Any merger or acquisition effected by the Company can be expected to have a significant dilutive effect on the percentage of shares held by the Company's shareholders at such time.

Results of Operations

The Company has not generated any revenue. Expenses for the year ended December 31, 2014 was $7,701,027 which was attributed primarily to stock base compensation of $7,698,927.

Liquidity

The Company has no working capital as of December 31, 2014. Funds used in operating activities during the year ended December 31, 2014 was $2,100 while funds provided from financing activities were $2,100.
