1. Nature and Continuance of Operations and Ability to Continue as a Going Concern

Viscount Mining Corp (formerly Faith Spring Venture Inc.) (the "Company") was incorporated under the British Columbia Business Corporations Act on October 26, 2011 and was classified as a Capital Pool Company as defined in Policy 2.4 of the TSX Venture Exchange ("TSXV").

On July 23, 2013, the Company completed a share exchange (the "Share Exchange") with Viscount Mining Resources Ltd. (formerly Viscount Mining Ltd.) ("Viscount") and all of the shareholders of Viscount, whereby the Company acquired all of the issued and outstanding common shares of Viscount and former Viscount's shareholders received equal number of common shares of the Company.

Concurrent with the Share Exchange, the Company changed its name to Viscount Mining Corp. and completed a consolidation of its common shares on the basis of one post-consolidation share for every two pre-consolidation shares, as approved by TSXV. All common shares and per share amounts have been restated to give retroactive effect to the share consolidation. For accounting purposes, the Share Exchange has been treated as a Reverse Takeover ("RTO"), whereby Viscount is considered the acquirer and the Company is considered the acquiree. The condensed interim consolidated financial statements are a continuation of the financial statements of Viscount and references of the Company will mean the combined entity subsequent to the Share Exchange on July 23, 2013 and to Viscount prior to July 23, 2013 (Notes 8 and 11).

The Company had cash and cash equivalents of $130,689 at November 30, 2013(August 31, 2013 - $281,801) and working capital of $339,286 (August 31, 2013 - $523,965), but management cannot provide assurance that the Company will ultimately achieve profitable operations or become cash flow positive, or raise additional debt and/or equity capital. For the three months ended November 30, 2013, the Company had no source of operating revenues, incurred an operating loss of $311,459 (2012 - $167,525) and, as at that date, had an accumulated deficit of $1,893,471 (August 31, 2013 - $1,582,012). If the Company is unable to raise additional capital in the future, management expects that the Company will need to curtail operations, liquidate assets, seek additional capital on less favourable terms and/or pursue other remedial measures. Management is aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern.

These condensed interim consolidated financial statements do not include any adjustments related to the recoverability and classification of assets or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

The Company is an exploration stage company and its principal business activity is natural resource exploration, focusing on resources located in the state of Nevada in the USA. Mining and exploration involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The Company has no source of revenue, and has significant cash requirements to conduct its planned exploration, meet its administrative overhead and maintain its resource interests.

The recoverability of the Company's investment in and expenditures on resource properties is dependent on several factors, including the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development of these properties, and future profitable production or proceeds from disposition of resource interests.

The Company's registered office is located at Suite 600 – 666 Burrard Street, Vancouver, BC, V6C 3P6.

2. Significant Accounting Policies

Statement of Compliance

The condensed interim consolidated financial statements of the Company, including comparatives, have been prepared in accordance with and using accounting policies in full compliance with International Financial Reporting Standards ("IFRS") and International Accounting Standards ("IAS") issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), effective for the Company's reporting for the three months ended November 30, 2013.

Basis of Preparation

The unaudited condensed interim consolidated financial statements were authorized for issue on January , 2014 by the directors of the Company.

Statement of Compliance and conversion to International Financial Reporting Standards

These condensed interim consolidated financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standard 34 "*Interim Financial Reporting*" ("IAS 34"). These condensed interim consolidated financial statements follow the same accounting policies and methods of computation as compared with the most recent annual financial statements, being for the year ended August 31, 2013, using accounting policies consistent with the International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretations of the IFRS Interpretations Committee ("IFRIC").

These condensed consolidated interim financial statements do not include all of the information required of a full annual financial report and should be read in conjunction with the annual financial statements of the Company for the year ended 31 August 2013.

Principles of Consolidation

The condensed interim consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, Viscount Nevada Holdings Ltd. Control is achieved when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the period are included in the condensed interim consolidated statement of loss and comprehensive loss from the effective date of acquisition or up to the effective date of disposal, as appropriate.

All inter-company transactions, balances, income and expenses are eliminated in full on consolidation.

Significant Accounting Judgments, Estimates and Assumptions

The preparation of the Company's condensed interim consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the condensed interim financial statements and reported amounts of income and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

Areas requiring a significant degree of estimation and judgment relate to the fair value measurements for financial instruments, the recoverability of the carrying value of the properties, the recognition and valuation of provisions for decommissioning liabilities, the recoverability and measurement of deferred tax assets and liabilities, and ability to continue as a going concern. Actual results may differ from those estimates and judgments.

New and Revised Accounting Standards

The following new and revised standards and amendments are effective for annual periods beginning on or after January 1, 2013, and accordingly have now been adopted by the Company. The adoption of these standards and amendments has had no significant impact on the Company's interim condensed consolidated financial statements.

- IFRS 10 *'Consolidated Financial Statements'* is a new standard effective for annual periods beginning on or after January 1, 2013 that replaces consolidation requirements in IAS 27 (as amended in 2008) and SIC-12.

- IFRS 11 *'Joint Arrangements'* is a new standard effective for annual periods beginning on or after January 1, 2013 that replaces IAS 31 and SIC-13.

- IFRS 12 *'Disclosure of Interests in Other Entities'* is a new standard effective for annual periods beginning on or after January 1, 2013 that replaces disclosure requirements in IAS 27 (as amended in 2008), IAS 28 (as revised in 2003) and IAS 31.

- IFRS 13 *'Fair Value Measurement'* is a new standard effective for annual periods beginning on or after January 1, 2013 that replaces fair value measurement guidance in other IFRSs.

- IAS 19 (Amendment) *'Employee Benefits'* is effective for annual periods beginning on or after January 1, 2013 and revises recognition and measurement of post-employment benefits.

- IAS 27 (Amendment) *'Separate Financial Statements'* is effective for annual periods beginning on or after January 1, 2013 that prescribes the accounting and disclosure requirements for investments in subsidiaries, joint ventures and associates when an entity prepares separate financial statements.

- IAS 28 (Amendment) *'Investments in Associates and Joint Ventures'* is effective for annual periods beginning on or after January 1, 2013 that prescribes the accounting for investments in associates and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures.

New Accounting Standards and Interpretations Not Yet Adopted

At the date of authorization of these condensed interim consolidated financial statements, the IASB and IFRIC have issued the following new and revised standards, amendments and interpretations which are not yet effective during the three months ended November 30, 2013.

The following standards have been issued but are not yet effective:

- IFRS 9 *'Financial Instruments: Classification and Measurement'* is a new financial instruments standard effective for annual periods beginning on or after January 1, 2015 that replaces IAS 39 and IFRIC 9 for classification and measurement of financial assets and financial liabilities.

- IAS 32 (Amendment) *'Financial Instruments: Presentation'* is effective for annual periods beginning on or after January 1, 2014 and revises certain aspects of the requirements on offsetting.

The Company has not early adopted these standards, amendments and interpretations and anticipates that the application of these standards, amendments and interpretations will not have a material impact on the financial position and financial performance of the Company.

Reserves

Warrant reserve

The warrants reserve represents the fair value of warrants issued on their issue date until such time that they are exercised, at which time the corresponding amount will be transferred to share capital. If warrants expire unexercised, the amount recorded remains in the account.

Option reserve

The options reserve records the fair value of items recognized as share-based payment expense on their issuance date until such time that the stock options are exercised, at which time the corresponding amount will be transferred to share capital. If options expire unexercised, the amount recorded remains in the reserve.

Stock Option Plan

On April 4, 2012, the Company adopted a stock option plan (the "Plan") that allows the Company to issue options to certain directors, officers, employees and consultants of the Company. Options issued under the Plan shall not exceed 10% of shares issued and outstanding at the time of granting of the options. Options granted under the Plan may have a maximum term of ten years. The exercise price of options granted under the Plan will not be less than the market price of the shares (defined as the last closing market price of the Company's shares on the last day shares are traded prior to the grant date), less the applicable discount permitted by the TSXV rules. Stock options granted under the Plan vest immediately subject to vesting terms, which may be imposed at the discretion of the directors.

As at July 23, 2013, the date of the RTO, the Company had 200,000 stock options outstanding with an exercise price of $0.20 (Note 11).

On August 21, 2013, the Company granted 1,250,000 five-year stock options at a purchase price of $0.20 per share to its directors and officers. The weighted average fair value of the 1,250,000 options granted was estimated at $233,762 at the grant date using the Black-Scholes Option Pricing Model, of which $13,092 has been expensed during the year ended August 31, 2013 and $115,548 is expensed during the three months ended 30 November 2013.

The fair value of the stock options has been estimated using the Black-Scholes Option Pricing Model assuming a risk free interest rate of 1.79% per annum, an expected life of 5.00 years, an expected volatility of 163.27%, and no expected dividend. The expected volatility was determined using the average historical volatility of similar listed entities on the basis that the Company has limited historical information.

On September 2, 2013, the Company granted 150,000 five-year stock options at a purchase price of $0.20 per share to its directors and officers. The weighted average fair value of the 150,000 options granted was estimated at $28,209 at the grant date using the Black-Scholes Option Pricing Model, of which $14,296 has been expensed during the three months ended November 30, 2013.

The fair value of the stock options has been estimated using the Black-Scholes Option Pricing Model assuming a risk free interest rate of 1.79% per annum, an expected life of 5.00 years, an expected volatility of 166.65%, and no expected dividend. The expected volatility was determined using the average historical volatility of similar listed entities on the basis that the Company has limited historical information.

The following is a summary of the changes in the Company's stock options for the three months ended November 30, 2013 and August 31, 2013:

9. Supplemental Cash Flow Information

The Company made the following cash payments for interest and income taxes:

	November 30, 2013 $	November 30, 2012 $
Interest paid (received)	-	-
Taxes paid	-	-
Total cash payment	-	-

Included in trade payables and accrued liabilities as at November 30, 2013 is $1,560 (August 31, 2013 - $9,544) trade payables balance acquired upon RTO (Notes 6 and 11).

Included in trade payables and accrued liabilities at November 30, 2013 is $29,326 (230 August 2013 - $46,714) incurred on exploration and evaluation property expenditures (Note 6).

During the three months ended November 30, 2013, the Company accrued interest of $2,310 (2012 - $Nil) related to the promissory notes (Note 7).

On July 23, 2013, a total of 1,600,000 founder shares of the Company were cancelled for consideration of $Nil (Note 8).

On March 24, 2013, the Company issued 375,000 common shares valued at $75,000 related to the Cherry Creek 1 Property (Notes 5 and 8).

On November 18, 2011, the Company cancelled and returned to treasury 150,000 common shares in the amount $15,000 in relation to share subscriptions which were receivable as of August 31, 2011 (Note 8).

On November 17, 2011, the Company issued 200,000 common shares to settle $40,000 related to overpayment of share subscriptions amounts (Note 8).

10. Commitments and Contingency

The Company is committed to making cash payments, incurring exploration expenditures and/or issuing common shares pursuant to its exploration and evaluation property agreements (Note 5).

The Company is committed to making cash repayments pursuant to its related party promissory note agreements (Note 7).

The Company is disputing the attempt of a third party to charge certain consulting charges in the amount of $2,820. Management does not consider these amounts to be payable and these amounts have not been recorded in the condensed interim consolidated financial statements. However, there is no assurance that a formal claim will not be made against the Company for some or all of these amounts in the future.

11. Share Exchange

The Company completed the Share Exchange with Viscount on July 23, 2013. Pursuant to the Share Exchange, the Company acquired all of the issued and outstanding common shares of Viscount whereby former Viscount's shareholders received one common share of the Company for each Viscount common share held (Notes 1 and 8).

As a result of the Share Exchange, the shareholders of Viscount owned approximately 87% of the issued and outstanding common shares of the Company on a diluted basis. For accounting and reporting purposes, Viscount is the accounting acquirer and the Company is the accounting acquiree because of the significant holdings and influence of the control group of Viscount before and after the Share Exchange. The Company did not meet the definition of a business for accounting purposes because it is a shell company with no ongoing business operations and, accordingly, the RTO has been accounted for as a share-based payment transaction. As a result, the difference between the fair value of the consideration deemed to have been paid by the accounting acquirer and the fair value of the identifiable net assets of the accounting acquiree is expensed.

The results of operations of the Company are included in the condensed interim consolidated financial statements from July 23, 2013, the date of the RTO.

The net assets acquired at fair value on July 23, 2013 are as follows:

Description	Amount $
Consideration paid	
2,250,000 common shares	450,000
200,000 stock options	40,000
100,000 warrants	20,000
	510,000
Less: Value of Net Assets	
Cash	54,440
Trade payables	(9,544)
	44,896
Listing expense	465,104

The fair values of the stock options and warrants have been estimated using the Black-Scholes Option Pricing Model assuming a risk free interest rate of 1.14% per annum, an expected life ranging from 1.26 to 9.27 years, an expected volatility ranging from 135.77% to 162.97%, and no expected dividend. The expected volatility was determined using the average historical volatility of similar listed entities on the basis that the Company has limited historical information.

12. Financial Risk Management

(a) Overview

	As at November 30, 2013 $	As at August 31, 2013 (Audited) $

Total financial liabilities	127,617	64,022

The Company has exposure to credit risk, liquidity risk, foreign currency risk, and market risk from its use of financial instruments.

This note presents information about the Company's exposure to each of these risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

(b) Credit Risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash and cash equivalents. The Company limits its exposure to credit risk on liquid financial assets through investing its cash and cash equivalents with high-credit quality financial institutions.

The carrying value of the Company's cash and cash equivalents represent the maximum exposure to credit risk.

(c) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company ensures that there is sufficient capital in order to meet short term business requirements, after taking into account cash flows from operations and the Company's holdings of cash. The Company's cash and cash equivalents are currently invested in business and savings accounts with high-credit quality financial institutions which are available on demand by the Company for its programs. As at November 30, 2013, the Company had cash and cash equivalents balance of $130,689 to settle current liabilities of $126,617. All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

(d) Market Risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

(e) Interest Rate Risk

The Company is subject to interest rate risk with respect to its investments in cash. However, the Company does not hold any interest-bearing debt. The Company's current policy is to invest cash at floating rates of interest and cash reserves are to be maintained in cash in order to maintain liquidity, while achieving a satisfactory return for shareholders. Fluctuations in interest rates when cash balances mature impact interest income earned.

(f) Foreign Currency Risk

As at November 30, 2013, the Company's expenditures are in Canadian dollars, any future equity raised is expected to be predominantly in Canadian dollars. The Company believes it has no significant foreign currency risk.

(g) Capital Management

The Company's policy is to maintain a strong capital base so as to maintain investor and creditor confidence and to sustain future development of the business. The capital structure of the Company consists of equity, comprising share capital, net of accumulated deficit. The Company manages the capital structure and makes adjustments to it in light of changes in the economic conditions and the risk characteristics of the underlying assets. The Company manages its capital structure through the issuance of new shares, acquisition or disposition of assets or adjustment of cash. The Company does not have any major capital expenditures committed for the coming year. Management reviews the capital structure on a regular basis to ensure that the above-noted objectives are met. There were no changes in the Company's approach to capital management during the period. The Company is not subject to any externally imposed capital requirements other than disclosed in Note 1.

(h) Fair Value

The fair value of financial assets and financial liabilities at amortized cost is determined in accordance with generally accepted pricing models based on discounted cash flow analysis or using prices from observable current market transactions. The Company considers that the carrying amount of all its financial assets and financial liabilities recognized at amortized cost in the condensed interim consolidated financial statements approximates their fair value due to the demand nature or short term maturity of these instruments.

The following table provides an analysis of the Company's financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level 1 to 3 based on the degree to which the inputs used to determine the fair value are observable.

- Level 1 fair value measurements are those derived from quoted prices in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1, that are observable either directly or indirectly.
- Level 3 fair value measurements are those derived from valuation techniques that include inputs that are not based on observable market data.

As at November 30, 2013	**Level 1**	**Level 2**	**Level 3**	**Total**
	$	**$**	**$**	**$**
