Power Clouds Inc.

Supplemental Information

August 3, 2015

Regulation FD Disclosure

Power Clouds Inc. (the "**Company**") will be conducting meetings with third parties in which its Corporate Profile will be presented. The Corporate Profile is furnished as an Exhibit to this Supplemental Report and is incorporated herein by reference.

The furnishing of the information in this Supplemental Report is not intended to, and does not, constitute a representation that such furnishing is required by Regulation FD or that the information contained in this Supplemental Report constitutes material investor information that is not otherwise publicly available.

This Supplemental Report and exhibit may contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, and which involve risks, uncertainties and reflect the Company's judgment as of the date of this Supplemental Report. Forward-looking statements may relate to, among other things, operating results and are indicated by words or phrases such as "expects," "should," "will," and similar words or phrases. These statements are subject to inherent uncertainties and risks that could cause actual results to differ materially from those anticipated at the date of this Supplemental Report. Investors are cautioned not to rely unduly on forward-looking statements when evaluating the information presented within.

CORPORATE PROFILE

August 2015

OVERVIEW:

- **Utility Scale Solar ("USS") plants deliver Government backed, long-term revenue streams on fixed price supply contracts.**
- **Power Purchase Agreements (PPA) completed on 15 and 20 year fixed price supply contracts.**
- **Management has proven ability to build and operate solar plants internationally.**
- **Operationally profitable with minimal debt**
- **International operations - not limited to one geographic area or regulatory regime**

FINANCIAL HIGHLIGHTS:

Ticker	PWCL
Market Price (07/31/2015)	$0.14
Market Capitalization:	$13 m
52-week high:	$1.15
52-week low:	$0.05
Shares outstanding:	82.8m
Float	8.3m
Fiscal year end:	December

SPIN OUT OF TECHNOLOGY SUBSIDIARY – WORLD MEDIA & TECHNOLOGY (WRMT)

In April 2015, PWCL announced that it filed a Form S-1 with the US Securities and Exchange Commission (SEC) to spin out its subsidiary – World Media and Technology Corp. ("WRMT") that operates in the design, manufacture and sale of wearable technology products and the provision of MVNO (Mobile Virtual Network Operator) mobile voice and data services.

Shareholders of PWCL will receive 1 share of WRMT for every 6 shares held in PWCL, as a dividend, on the Record Date, which will be the date that the SEC deems the Form S-1 effective.

Power Clouds Inc.

Power Clouds Inc., an OTC listed company under ticker PWCL (the "Company" or "PWCL") develops renewable and sustainable energy projects internationally that provide solar energy to national power grids under long term, government supported, fixed price contracts. The Company has operational plants in Romania, and new projects underway in Japan and other worldwide locations. Power Clouds has a core team of experts operating at the international level, with specific expertise in photovoltaic solar parks, and a proven ability to deliver the highest technical and cutting-edge solutions across multiple locations. The Company is now entering a rapid expansion phase with a projects pipeline in Japan, Thailand, Panama and Brazil underpinning growth plans.

Achievements to Date

- Two plants completed and operational in Romania with 6MW combined capacity and annual energy output of 7,600 MWh/year.
- $1.1m recurring annual revenues and positive EBITDA from existing operational plants.
- Winner of the 2014 Solar Award for project development.
- First 2MW project in Japan acquired and under construction.
- Additional projects under consideration in Japan, Panama and Thailand.

Increasing Deal Pipeline due to New Project Approach

The Company has recently changed its project acquisition strategy, in order to speed deployment, by acquiring projects that are already in progress and that have the key elements in place such as: the land is assigned (owned or leased), permit permissions are granted and grid connection contracts are in place at subsidy rates above the current market rates. This approach shortens overall project timelines and accelerates the number of builds possible per year.

Utility Scale Brings Benefits Over 'Rooftop' Deployments

'Rooftop Solar' companies operate in a retail enviroment and experience competition from similar providers, existing utilty companies and changing tax legislation. They have high operational overhead in terms of sales & support, installation and maintenance costs over wide geographic areas. By buildig large scale plants connected to national grids at long-term fixed supply prices, Power Clouds enjoys greater economies of scale in operations without these operational overheads and external competitve factors. The Company remains vulnerable to future legislative changes that could impact the long-term rates committed in the grid supply contracts; however, to our knowledge, no such change has taken place retroactivley to date.

BALANCE SHEET EXTRACTS	FY 2013 (Audited)	FY 2014 (Unaudited)	Q1 2015 (Unaudited)
Fixed Assets	-	-	13,503
Cash on Hand	-	3,088	7,348
Working Capital	(288)	2,433	4,793
Shareholders Equity	(288)	2,583	18,195

OTC Listed: ***PWCL***

PROJECT DETAILS

The first Power Clouds solar plants were built in Romania between 2013 and 2014. Power Clouds constructed plants with total power capacity of 6.1MW. The plants are fully operational today and provide green energy to the national electricity grid. Combined, the plants produce enough green energy to power a town of over 7,000 inhabitants.

SCORNICESTI, ROMANIA	
Completed	Dec 2013
Photovoltaic (PV) Panels	15,069
Power Capacity	3.6 MW
Power Output	4,520 MW/hr
Full year Revenue (expected)	USD 675,000

NUCET, ROMANIA	
Completed	Dec 2013
Photovoltaic (PV) Panels	10,196
Power Capacity	2.5 MW
Power Output	3,000 MW/hr
Full year Revenue (expected)	USD 467,000

Power Clouds Inc., through its Japanese based subsidiary, is focused on developing green energy projects in Japan, with special attention on building solar plants. Following the first months of start-up stage, Power Clouds now owns important assets, strong know-how and permits to make a lasting business possible in this country.

OTARU, JAPAN (Under Construction)	
Completed	Pending 2015
Photovoltaic (PV) Panels	8,000
Power Capacity	2.0 MW
Power Output	2,400 MW/hr
Full year Revenue (expected)	USD 648,000

The Company currently has further projects under consideration in Japan, and is evaluating additional projects in Panama, Thailand and Brazil.
