Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion contains certain forward-looking statements that are subject to business and economic risks and uncertainties, and MyECheck's actual results could differ materially from those forward-looking statements. The following discussion regarding the financial statements of MyECheck should be read in conjunction with the financial statements and notes thereto.

MyECheck's prior full fiscal year ending December 31, 2014 is not indicative of MyECheck's current business plan and operations. Incorporated in October 2004, MyECheck currently has limited revenues and is deemed an early stage Company. This plan of operation will focus on MyECheck's business plan and operations current. There can be no assurance that MyECheck will generate positive cash flow and there can be no assurances as to the level of revenues, if any, MyECheck may actually achieve from its operations.

Implementation Plan

Following is an outline of MyECheck's plan to build a widely used payment system. The success of MyECheck depends on a number of factors including the careful selection and active participation of qualified Value Added Resellers ("VARs") and Payment Service Providers ("PSPs"). The VARs / PSPs commitment to MyECheck will depend on the commercial viability of MyECheck's solutions and web-based services.

MyECheck targets internet payment gateways and payments software and service providers for partnership and reseller opportunities. Early emphasis has been on building sales channels through partnerships. MyECheck has experienced early success in partnerships with Cardinal Commerce and is in discussions and other major PSPs.

In addition to its in-house direct sales department, MyECheck has engaged a number of specialized independent sales agents such as Sheffield Resource Network and others, who leverage their existing contacts for direct sales.

MyECheck has an active PR program and issues press releases on a regular basis which generate in-bound leads and interest from industry press. Company management conducts interviews with national press. MyECheck attends and exhibits at industry trade shows, conferences and other networking events.

MyECheck in-house sales force and independent sales agents also use email and cold calling marketing techniques, focusing on the industry's largest target companies. MyECheck is currently in discussion with large Independent Sales Organizations (ISOs) regarding partnership and representation opportunities.

In addition to the effective marketing and distribution of MyECheck's services, MyECheck's infrastructure must be able to support a significant increase in transaction volume. MyECheck plans to enhance its infrastructure by adding a new data center and new hardware in anticipation of increased transaction volume. MyECheck plans to continue to scale it's infrastructure in advance of the need.

The Company focus on completing its mobile application by completing its acquisition of Seergate which increase the R&D costs by 19% of total operating expenses. In addition the Company had legal fees associated with cancelling the 275,000,000 shares and professional fees for SEC filings of 15% of the operating expenses. The management, sales and operational salaries were 33%, rent, advertising, amortization, consulting, miscellaneous expenses were the remaining 33%.

MyEcheck, Inc.
A Wyoming Corporation
Quarterly Disclosure Statement for the Quarter Ended June 30, 2015

Liquidity and Capital Resources

As of June 30, 2015, we had cash and cash equivalents totaling $22,850 and a working capital deficit of $1,945,840. For the six-month period ended June 30, 2015, we had a net loss of $1,756,687, and at June 30, 2015, we had an accumulated deficit of $6,634,950 and total stockholders' equity of $1,345,559.

Cash Flows

June 30, 2015 and 2014

Cash provided by operating activities

At June 30, 2015, the Company generated revenue in the amount of $599,649 less deferred revenue of $25,000 and collected $66,540 of accounts receivable for a net operating cash revenue of $599,649. The Company paid operating expenses of $987,818, leaving net cash used by operating activities at $388,169.

At June 30, 2014 the Company generated revenues of $724,063 plus deferred revenue of $1,500 of which $189,457 was used to pay operating expenses, $572,252 in accounts receivable, $63,047 in loss on conversion of debt, prepaid expenses of $46,602 and the remaining $7,420 comprised accounts payable and accrued expenses for a net operating cash provided of $1,063,985.

Cash used in investing activities

We do not have any material commitments for capital expenditures during the next twelve months. Any required expenditure will be completed through internally generated funding or from proceeds from the sale of common or preferred stock.

6) Describe the Issuer's Business, Products and Services

A. A description of the issuer's business operations:

Business Summary

MyECheck is the pioneer of the fully electronic check, the leader in electronic check technology, and the trusted advisor in the rapidly evolving landscape of consumerism in the payments industry. Electronic checks are considered by many to be the fastest, safest and lowest cost payment method in America, providing secure, low cost, same day payments from any checking account. MyECheck offers a variety of electronic check services for almost any application including personal, business and government payments.

Focused on defining real time secure mobile payments, MyECheck offers a suite of mobile payment apps that can be downloaded onto any smart mobile device and used immediately with no special hardware requirements. MyECheck's merchant point-of-sale app can be downloaded and run from leading accounting software enabling mobile commerce for anyone, anywhere, anytime.

MyECheck is a leading mobile payment system licensor and develops custom mobile payment solutions for corporations and payment service providers.

Founded in 2004 the day Check 21 legislation became effective, MyECheck has evolved the payments landscape by creating the platforms that enable real-time mobile and online payments for all applications and users.

Summary History of MyECheck

MyECheck started processing transactions on version one of its software platform in July of 2005 and continued through March of 2006, after which it ceased processing in order to further develop and refine its service offerings.

During the period from March of 2006 through September 2007, MyECheck redesigned and developed its software platform to better suit the demands of its prospective customers and to ensure the accurate performance of the software.

MyECheck had been sponsored by First Regional Bank, and successfully completed approval and check image file (ANSI X9.37) testing with the Federal Reserve Bank in the second quarter of 2007. On January 29, 2010, the Company's sponsoring bank, First Regional Bank, was closed by the Federal Deposit Insurance Corporation (FDIC). The new bank acquiring the old bank from the FDIC obtained all rights to accept or reject former contracts. The new bank elected to reject the Company's agreement with the old bank. The Company is in the process of moving its customers to one of its other processing banks, such as JP Morgan Chase and Bank of America**.** While the Company does image cash letter deposits with JP Morgan Chase and Bank of America, there is currently no direct contractual relationship between MyECheck and JP Morgan Chase or Bank of America. The Company only makes deposits to their customer's accounts.

Summary History of MyECheck (Cont.)

MyECheck entered into a merger agreement in November 2007 with Sekoya Holdings Ltd., a non-trading Nevada corporation in the process of developing an online payment system for use in the Chinese online community. This agreement was amended on February 4, 2008, and became effective on March 14, 2008. Under the merger agreement, shareholders of Sekoya at the time of the merger would own approximately 40% of the shares of the surviving company and shareholders of MyECheck would own approximately 60% of the surviving company, with all parties being diluted by additional financing to be completed following the Merger (excluding 2,000,000 shares held in escrow as remedies for breaches of the Merger Agreement). Subsequent to the acquisition by MyECheck, Sekoya's operations were phased out.

MyECheck filed a Registration Statement with the SEC in February, 2008, to have its securities traded on the OTC:BB exchange. The Company engaged Berman & Co., PA as their auditors and became a fully reporting company in June, 2008. At that time, MyECheck commenced trading on the OTC:BB exchange. After the Company's sponsoring bank, First Regional Bank, shut down, MyECheck had very limited revenue and few prospects for capital. As a result, the Company was unable to maintain the costs associated with being a fully reporting company. On October 5, 2012, the Company filed Form 15 with the SEC to terminate its reporting obligations and has since been trading on the OTC:PK as a limited reporting company.

Revenue

Revenue is generated from transaction fees charged to companies that contract with MyECheck to utilize the Company's services. In addition, the Company also generates revenue from software licensing and maintenance fees. The Company charges a flat fee per transaction that is relatively low in comparison to card interchange rates plus fees. A transaction fee is charged per electronic check and per use of MyECheck's fraud control tools. Fees for fraud control vary according to the amount of fraud screening required per each merchant.

About Check 21

Check 21 was signed into law on October 28, 2003, and became effective on October 28, 2004. Check 21 is designed to foster innovation in the payments system and to enhance its efficiency by reducing some of the legal impediments to check truncation. The law facilitates check truncation and permits banks to truncate original checks and to process check information electronically. As a result, the check clearing system has transformed from a paper exchange system to an electronic exchange system, whereby financial institutions can now handle and process all checks electronically, increasing efficiencies and reducing time and costs.

MyECheck leverages Check 21 by utilizing the national electronic check clearing networks that were created as a result of the law. The Company uses the national electronic check clearing system to process and clear the fully electronic checks that it creates.

The Company is aware of other companies that have emerged as a result of the opportunities created by Check 21. To date these companies have not been direct competitors to MyECheck. Primarily because most companies engaged in the Check 21 related industries have been focused on imaging, formatting and clearing checks that originated as paper items while MyECheck has focused on the processing of the fully electronic checks.

MyECheck believes that competition in the fully electronic check space will increase in the near future as changes to Reg CC, the law that defines payment instruments, further enables fully electronic checks.

Emerging Growth Company

We are an "emerging growth company" as that term is used in the Jumpstart Our Business Startups Act of 2012 and, as such, have elected to comply with certain reduced public company reporting requirements for this registration statement and future filings.

As a company with less than $1.0 billion in revenue during our most recently completed fiscal year, we qualify as an "emerging growth company" as defined in Section 2(a) of the Securities Act of 1933, as amended, which we refer to as the Securities Act, as modified by the Jumpstart Our Business Startups Act of 2012, or the JOBS Act.

Emerging Growth Company (Cont.)

As an emerging growth company, we may take advantage of specified reduced disclosure and other requirements that are otherwise applicable, in general, to public companies that are not emerging growth companies. These provisions include:

- Reduced disclosure about our executive compensation arrangements;
- No non-binding shareholder advisory votes on executive compensation or golden parachute arrangements;
- Exemption from the auditor attestation requirement in the assessment of our internal control over financial reporting; and
- Reduced disclosure of financial information in this prospectus, including two years of audited financial information and two years of selected financial information.

We may take advantage of these exemptions for up to five years or such earlier time that we are no longer an emerging growth company. We would cease to be an emerging growth company if we have more than $1.0 billion in annual revenues as of the end of a fiscal year, if we are deemed to be a large-accelerated filer under the rules of the Securities and Exchange Commission, or if we issue more than $1.0 billion of non-convertible debt over a three-year-period.

The JOBS Act permits an emerging growth company to take advantage of an extended transition period to comply with new or revised accounting standards applicable to public companies. We are choosing to "opt out" of this provision.

MyECheck's Mobile Product Strategy

MyECheck's strong competitive advantage as an electronic payment platform is its exclusive ability to enable transfers from any checking account. And the transactions are faster, safer and lower cost than ACH and card transactions. The benefits are substantial making the MyECheck platform clearly superior in many ways for mobile payments.

MyECheck provides three types of mobile payment solutions for different applications:

1) As a backend or wholesale processor to Mobile Payment Service Providers (MPSP)s. These include payment processors, e-wallets, stored value, and large merchant proprietary payment systems. The MPSP integrates with MyECheck in the traditional manner.
2) As a MPSP with a comprehensive solution for POS purchases on mobile devices.
3) As a licensor of customized mobile payment solutions MyECheck will be launching new products in the coming weeks and months including an end-to-end turn-key mobile payments solution that any business can easily implement remotely. The retail Point Of Sale system will include user apps for Apple and Android devices, and a download merchant POS app that runs on Quickbooks accounting software. There are two mobile payment systems, one has higher security and has been developed for regulated industries. The other has been developed for retail sales, however the set-up and process flow is almost identical. The Merchant only requires an internet connected computer with Quickbooks and a bank account, the User only requires an internet connected mobile device or tablet and a checking account.

The process flow for remote registration apps the regulated industries system:

Step 1: Merchant downloads, installs and registers MyECheck Merchant App
Step 2: User downloads and installs MyECheck User App
Step 3: User selects Merchant in User App Merchant Menu
Step 4: User enters Registration Data and submits to Merchant App
Step 5: Merchant App validates Bank Data and Pre-Approves/Declines User Account
Step 6: User presents ID at Merchant Location, Merchant compares to Registration Data
Step 7: Merchant App displays QR code to User App containing User Account Token
Step 8: At POS Merchant App displays QR code to User App containing Invoice
Step 9: User App displays Transaction Detail and prompts authorization
Step 10: User authorizes payment by sending Token to Merchant App
Step 11: Merchant App verifies User Bank Account and Approves/Declines Transaction
Step 12: Merchant App sends receipt to User App

The process flow for remote registration apps the regulated industries system (Cont.):

Step 13: MyECheck backs up transaction data at an independent data warehouse.

With this uniquely broad range of capabilities, MyECheck can serve almost any customer in any market either directly or through one of MyECheck's licensees or MPSP partners. This model also enables growth through leveraging partners' existing customer base and sales and marketing resources.

Business Partners

In 2008, we entered into an agreement with Forever Living Products and Simplifile, the leading provider of electronic recording services. The agreement with Simplifile facilitates the MyECheck Electronic Check solution in the Simplifile e-recording service. The Forever Living Products and Simplifile agreement remains in effect as of the date of this filing.

In the second half of 2013 we signed independent licensing agreements with InterPay (a related party) and Sierra Global, which will allow them to develop and sell their own payment solutions using our technology.

During 2014 we are continuing to nurture existing and develop new partner relationships. During the first quarter GreenPay and Itonis licensed our software to develop their own Check21 payment solutions. We also added VX Gateway in the first quarter to our Electronic Check Service.

On March 31, 2014, Itonis, Inc. signed a Licensing Agreement with MyECheck, Inc. for Itonis to acquire a software license for MyECheck's patented mobile payment app that will facilitate point of purchase transactions. The license agreement calls for Itonis to pay a one-time licensing fee of $300,000 to MyECheck as well as a portion of the per-transaction fees collected at the point of sale. There is no expiration date on that license.

On February 24, 2014, MyECheck was selected by GreenPay, LLC to provide a comprehensive processing solution. MyECheck sold a continuous non-exclusive license and a mobile license to GreenPay for $1,000,000 and will share in a percentage of transaction fee revenue. On June 13, 2014, the Company announced that it would acquire GreenPay, LLC. The merger was completed on August 20, 2014. The net purchase price for the licenses sold to Sierra Global was determined to be $412,000 after the acquisition of GreenPay, LLC. The license issued to GreenPay, LLC on February 24, 2014 will remain with Sierra Global per the terms and conditions of the merger.

The patent license issued to GreenPay, LLC on February 24th, 2014 will remain with Sierra Global per the terms and conditions of the merger.

In October, 2014, the Software License and Services Agreement between the Company and Sierra Global, LLC, dated November 23, 2013, was amended to include a 2014 Software Module License Fee in the amount of $500,000. (See Exhibit 10.20)

The Company entered into a License Agreement with GreenPay, LLC on February 24, 2014. Subsequent to that Agreement, the Company and Sierra Global, LLC entered into business discussions, the point of which was the purchase of GreenPay by the Company. In anticipation of that transaction, the Company's CEO became an unpaid business consultant to GreenPay and was authorized to establish a bank account for GreenPay.

After the acquisition of GreenPay by the Company, the bank account was retained by Sierra Global (the Company executed a license under which Sierra Global was permitted to use the GreenPay trade name for limited purposes). During this time, the Company's CEO did not participate in any ownership of either Sierra Global or GreenPay. (See Exhibit 10.19).

The Company was able to utilize cash flow generated from operations to purchase 1,000,000,000 shares of MyECheck's Common stock from its major shareholder for $10,000.

In the second quarter of 2014, our longtime customer Simplifile renewed their contract and expanded their use of our payment processing services.

During the fiscal year ended December 31, 2014, three (3) of the Company's customers accounted for approximately 98% of the Company's revenues. The loss of any one of these customers or a sustained decrease in demand by any of such customers could result in a substantial loss of revenues and could have a material adverse effect on MyECheck's results of operations.

Business Partners (Cont.)

During the third and fourth quarters of 2014, MyECheck entered into Service Agreements with ten (10) customers. The Services Agreement required MyECheck to complete the integration process with MyECheck's bank partner, Avidia Bank. Under the terms of the Reseller Agreement between MyECheck and Avidia Bank executed on May 7, 2015, MyECheck agreed to authorize Avidia Bank to sell MyECheck's data processing services and its mobile payment system to Avidia's customers. The integration process with Avidia Bank has now been completed and the services contemplated under the aforementioned Service Agreements will now become operational. In the third quarter the Company signed Services Agreements with Monthly Filter Club, LLC, Cuallix Consumer Services, Inc. and ScionicMobile. During the fourth quarter of 2014 the Company executed Services Agreements with (i) Withum Smith & Brown, (ii) Dad's Roast Custom Coffee, (iii) New Age Telecom, Inc., (iv) Mesorah Heritage Foundation, (v) Artscroll Mesorah Publications, Ltd., (vi) Sushi Groove, LLC, and (vii) eze System, Inc. Under the terms of the Services Agreement, MyECheck will provide fully electronic check services to each customer.

During the third quarter of 2014, the Company's wholly owned subsidiary, GreenPay, LLC, also entered into a Software License and Services Agreement with MJ SafePay, LLC pursuant to which GreenPay agreed to provide payment data processing services to MJ SafePay. In addition, in the fourth quarter of 2014, GreenPay, LLC, executed an Authorized Reseller Agreement with Maverick Bankcard, LLC to sell GreenPay's Check 21 Electronic Check Services, Mobile Payment Applications and Consulting Services.

In 2013, Seergate entered into an agreement with Centric Gateway authorizing them to be a sales agent for their software license platform and services. Subsequently, in February of 2015, Centric Gateway entered into an agreement with a major bank in Africa to license the Seergate Software Platform and Services. The identity of the Bank is being redacted due to the confidentiality agreement between Centric Gateway and the Bank.

The first quarter of 2015 produced seven (7) executed Services Agreements, one (1) executed Reseller Agreement and one (1) executed Partnership Agreement. The customers executing Services Agreements with MyECheck during the first quarter were (i) truCrowd Texas, Inc., (ii) Lucid Integrated Systems, (iii) Boss Tech Support, LLC, (iv) Vergence Entertainment, LLC, (v) The Mother of All Kits, (vi) Credit Shop, Incorporated and (vii) Nutronix Revolution, Inc. a leading distributor of health and wellness products, pursuant to which MyECheck agreed to process payments from NXR Global's customers. MyECheck provides fully electronic check services to its customers under the Services Agreement. On January 25, 2015, MyECheck entered into a Partnership Agreement with Hercules Credit Union pursuant to which MyECheck agreed to integrate its electronic check processing technology into Hercules Credit Union's existing payment processing system. Subsequently, on March 5, 2015 the Company entered into an Authorized Reseller Agreement with Access Payment Systems, Inc. authorizing Access Payment Systems to sell MyECheck's Check 21 data processing services to its customers.

In addition to the new customers MyECheck acquired during the previous three quarters, during the second quarter of 2015 the Company continued the expansion of its customer base through the execution of four (4) Services Agreements and one (1) Reseller Agreement. The four Services Agreements were executed between MyECheck, Inc. and Fantasy Grudge, LLC, Elite Tech Help, LLC, Kokopay, Inc., and PacNet Services, Ltd. On April 17, 2015, the Company executed an Authorized Reseller Agreement with Peter Farinas DBA PK and Maverick, Inc. pursuant to which PK and Maverick was authorized to sell MyECheck's Check 21 data processing services to its customers.

The Company believes that the additional customers acquired during the previous four quarters will result in increased revenue for MyECheck during the fourth quarter of 2015.

We continue to explore additional banking relationships to support future growth and strategic flexibility.

Mergers and Acquisitions

Sekoya Holdings, Limited Transaction

MyECheck, Inc., a Wyoming corporation ("MEC") and Sekoya Holdings, Limited (a Nevada corporation) entered into a Merger Agreement in November 2007, which was amended and restated as of February 4, 2008, and was filed as an exhibit to the Report on Form 8-K filed on February 7, 2008 (the Report on Form 8-K and Merger Agreement are incorporated herein by reference). The merger was effective March 14, 2008.

Mergers and Acquisitions (Cont.)

A total of 2,000,000 shares otherwise issuable to MEC's shareholders were held back (the "Escrow Shares") for purposes of compensating MEC and its officers, directors, employees, agents and affiliates should they sustain any loss due to a breach of Company's representations, warranties, covenants or agreements contained in the Merger Agreement or any related document (a "Loss"). Subsequent to the acquisition by MyECheck, Sekoya's operations were phased out.

GreenPay, LLC Transaction

On August 20, 2014, MyECheck completed the acquisition of its licensee, GreenPay, LLC. GreenPay, LLC is now a wholly owned subsidiary of MyECheck, Inc. GreenPay assets are owned by MyECheck, however Greenpay will be operated as a separate entity and will move forward with an independent board of directors and management in 2015.

Seergate, Ltd. Transaction

On January 30, 2015, MyECheck signed an agreement to acquire 100% of the stock of Seergate, Ltd, developer of a comprehensive electronic payment platform for banks. The Seergate system will be integrated with the MyECheck payment systems adding multiple new capabilities to MyECheck's payment platform. The acquisition closed on May 6, 2015.

Regulation

Since MyECheck processes but does not conduct transactions, and does not directly hold or transfer cash, we are not subject to direct federal, state or local regulations regarding money transfer. We are also not subject to any regulation or law that applies to accessing or conducting Internet commerce. We are only subject to regulations applicable to general business conduct. However, there are no assurances that MyECheck will not be subject to financial regulations in the future.

Cost of Compliance with Environmental Regulation

MyECheck currently has no costs associated with compliance with environmental regulations. However, there can be no assurances that MyECheck will not incur such costs in the future.

Software Development

In April 2006, MyECheck entered into an open ended software development agreement with R Systems International Ltd., a software product development company. At December 31, 2007, MyECheck no longer utilized these services. MyECheck also develops some of its software in-house and utilizes independent contractors. Per the contractual agreements with the independent contractors, the Company owns all intellectual property created by the independent contractors. We have architected the MyECheck 'Engine' to run on the rock-solid RHEL

(Red Hat Enterprise Linux) platform. Security and scalability has been our priority from the beginning, resulting in a multi-threaded check engine that is capable of automatically scaling to any load.

By taking a modular approach to systems design, we will avoid being orphaned as new technologies emerge. This approach has served us well for the past 10 years, allowing us to improve our system without a complete redesign. An example of this is in our service APIs. Our original web services were created using SOAP (Simple Object Access Protocol). SOAP is a way for a program running in one operating system to communicate with a program with the same or different type of operating system. Current methods "consume" our web services based upon REST (REpresentational State Transfer). REST is a simple stateless architecture that generally runs over HTTP. REST is often used in mobile applications. SOAP and REST both allow us to roll-out new technologies without orphaning our existing customers.

With the acquisition of GreenPay LLC., in August of 2014, MyECheck has assumed primary responsibility for significantly improving the mobile payments platform. We believe this platform will greatly extend MyECheck's ability to leverage the ubiquity of smartphones and capitalize on the growth of mobile payments. We currently have both Android and iOS apps in our product pipeline. We have avoided some mobile technologies that have inherent security blind spots and embraced others that are more robust. We are creating products that will offer both complete security and ease of use.

Software Development (Cont.)

Our web site (www.MyECheck.com) is not only a community outreach and marketing tool, but has been securely designed as a merchant/user gateway to the MyECheck services. This gives our customers a comprehensive, single point of access to all their merchant needs and reporting.

During the past four years, research and development costs associated with the development of the software have been approximately $603,816. MyECheck owns proprietary software and intellectual property, and licenses patented technology from the Company founder Edward R. Starrs.

B. Date and State (or Jurisdiction) of Incorporation: Incorporated May 25, 2012 in the State of Wyoming. Originally incorporated in Nevada on May 19, 2005 as Sekoya Holdings, Ltd. until December 2007.

C. The issuer's primary and secondary SIC Codes: Primary — 6199; Secondary — 7389

D. The issuer's fiscal year end date: December 31

E. Principal products or services, and their markets:

MyECheck offers comprehensive, easily implemented solutions that include real-time check authorization, payment guarantee, check image creation and clearing and complete online reporting. Set out below are services that MyECheck provides or intends to provide as part of its business plan.

Electronic Check Service
Internet merchants and other companies wishing to accept payments online or over a telephone ("Merchants") can directly integrate with MyECheck's payment engine. Payer check data is collected by the Merchant either at the Merchant's website or over the telephone, and is transmitted in real-time to MyECheck for processing.

MyECheck uses patented technology, US Patent 7389913 – Method and apparatus for online check processing, to generate electronic checks in accordance with the Federal Reserve Check 21 specification. Electronic checks are formatted and are transmitted in near real-time to banks, or more commonly directly to the Federal Reserve for clearing on behalf of MyECheck's partner bank(s).

MyECheck believes that its electronic check service overcomes many of the shortcomings of Automated Clearing House ("ACH") based e-check systems and cost effectively provides higher transaction success rates, faster funds clearing and fewer returned items.

MyECheck believes that it is positioned to capture a significant market share of the payments industry with a viable alternative payment method for mobile and online payments.

Check Authorization Service
MyECheck offers Check Authorization Service that enables merchants to verify consumer provided data, check the status of the customer's bank account, provide evidence that the consumer has authorized the check and predict the likelihood of a check being returned unpaid. Businesses that accept payments online through MyECheck utilize this service to provide greater assurance that the check will clear. Transactions can be approved or declined based upon the results of the Check Authorization Service.

Check Guarantee Service
MyECheck co-markets with Giact Systems, Inc., Check Guarantee Provider, to offer Check Guarantee Services. On June 11, 2014, the Company entered into a Services Agreement with Giact Systems, Inc. for a term of one (1) year with automatic renewal for like periods unless either Party gives a 30 day written notice of its intent not to renew. See Exhibit 10.18.

The Check Guarantee Provider warranties all approved checks and reimburses the Payee for financial losses incurred as a result of returned checks. The Check Guarantee Provider buys the returned checks that have been warranted from merchants for the full face value of the returned checks. MyECheck merchants utilize Check Guarantee Service so that they can ship products or provide services immediately without having to wait for the check to clear.

E. Principal products or services, and their markets (Cont.):

Merchant Reporting
Through our Merchant interface, MyECheck provides the following reports:

- Detailed transaction history
  - Successful
  - Failed
- MyECheck fees and settlement statements

In addition to the above, pertinent information is returned at the end of each transaction to facilitate reporting on the Merchant side.

Mobile Payment Apps
MyECheck plans to launch mobile payment applications in the third quarter of 2015. The Mobile Payment Apps' launch is dependent upon one or more bank partners and that the bank partners are able to provide the services required by MyECheck. If the bank partners are unable to provide the services required by the Company, the launch of the Mobile Payments App may not occur or may be delayed. When launched, the Company expects that the mobile payments applications will enable secure mobile commerce between registered users. There is a User application and a Merchant application, each can be downloaded, registered and used in real time. The merchant application system will facilitate a complete merchant point of sale that is software only based, such that there are no additional hardware requirements such as NFC (near field communication). The Company believes the merchant application system will enable point of sale payments from anyone in the US with any smart mobile device at a very low cost without interchange fees or costly equipment.

Licensed Remote Payment Processing
MyECheck licenses its custom payment software solutions to payment processors, banks and enterprise clients.

G-Pay
MyECheck's G-Pay service is a fully electronic payment service for government entities. Management is unaware of any other similar system on the market that has the same capabilities as G-Pay. The G-Pay solution enables electronic check payments from any government account, allowing government entities to transfer money fully electronically, eliminating paper checks and wire transfers from their processes. G-Pay is designed to save time and money for any government entity.

E-commerce & The Mobile Payments Industry

The payments industry is going mobile, and the mobile payments industry is exploding with growth. Companies such as Apple, Google, Microsoft, Amazon and Starbucks, all companies not known for being payments companies, have entered the mobile payments arena. The industry could be the largest in the world, with trillions of dollars in processing at stake.

The coming payment systems will allow people to spend at retail locations without having to carry a traditional wallet with cash, cards and paper checks. The mobile device will replace the leather wallet, and transactions will originate from mobile devices, including consumer to business payments, business-to-business (B2B) and government payments.

MyECheck believes its product mix to be the optimum offering to engage in the mobile payments industry. The Company's fully electronic check service clears checks the same day from any checking account, therefore MyECheck believes that the electronic check is the fastest and safest method of loading money onto mobile wallets at a low cost. The Company's mobile app systems can be adopted by anyone, anywhere, and at any time enabling low cost, secure mobile commerce without any barriers to adoption such as swipe devices or NFC hardware.

Although many new payment schemes exist today with many more on the horizon, the vast majority of these systems continue to be based upon the two fundamental payment methods, credit and debit.

Successful payment solutions such as PayPal offer a slight twist to the traditional payment mechanism of credit cards. PayPal for example, offers consumer payment options consisting of either credit cards or bank debit through the ACH network.

E-commerce & The Mobile Payments Industry (Cont.)

Other e-check (online electronic check) solutions are based upon the ACH (automated clearing house) system. ACH transactions are bank electronic funds transfers whereby the consumer's bank account is debited and the recipients account is credited. ACH transactions work reasonably well in most instances, however the system does suffer from some shortcomings which have impacted adoption.

The ACH system was designed in the 1970s and has experienced multiple upgrades to add new capabilities. As a payment backbone, the ACH network is a robust and reliable system, and the NACHA rules provide a regulatory framework that protects the parties involved in transactions on the system. The marketplace is familiar and somewhat comfortable with ACH which causes a resistance to change the established process.

ACH transactions are governed by NACHA, (the National Automated Clearing House Association), which imposes a substantial number of rules and regulations upon the transactions and their users. Compliance with the many, and continuously updating, NACHA operating rules can be complicated for Merchants. The rules afford the ability for payers to easily reverse a transaction, if they believe it wasn't authorized, providing an easy charge back for the payer but leaving the merchant vulnerable to fraud.

ACH transactions take several days to clear through the system. During the clearing period the recipient has no way to determine if the transaction is even going to clear or if it will result in an administrative return. ACH has more than 60 reasons why a transaction can fail. Many times it is because the consumer's bank has chosen not to participate in ACH, or the subject account is an ineligible account type for ACH according to NACHA rules.

Checks in 2012, continue to be the number one non-cash payment method in the US. This ACH activity is the primary market focus of MyECheck.

Company Competition

MyECheck's competition includes other payment methods such as credit and debit card processing systems, Automated Clearing House (ACH) processing systems, paper checks and even cash, along with other electronic check processing systems.

A stream of alternative payment brands have emerged, some of which have experienced tremendous growth. However, virtually all of these payment services require consumers to pay using either a payment card or ACH-based e-Checks, and offer nothing substantially new with respect to a payment method.

Although there are a very large number of companies selling credit card services called Independent Sales Organizations (ISOs), virtually none of these sell electronic check services.

The Company has many competitive advantages over ACH based e-Checks. Since MyECheck does not use the ACH network, transactions are not subject to National Automated Clearing House Association ("NACHA") regulation, including their rules, fees and fines. Electronic checks are governed by Uniform Commercial Code and federal Check 21 regulations which are more favorable to the Payee than NACHA rules. Electronic checks work with more bank accounts than ACH payments, resulting in fewer items being returned unpaid. Electronic checks also clear at least a day faster than ACH items. However, ACH processing systems are more well-established within the marketplace, and the industry has invested considerable resources in ACH processing systems. ACH rules make it easier for a payer to reverse a transaction after it clears affording more convenient fraud protection for consumers but a much weaker fraud protection for the recipient of the payment.

Other fully electronic check services providers have merged and some are successful within the marketplace. These companies pose the most direct competitive threat to MyECheck. Some of these companies include CheckAlt, Check21.com and The ECheck to name a few. MyECheck believes that its rights to US Patent 7389913 will help stave off some direct competition. The Company recently filed a patent infringement lawsuit against a direct competitor, Zipmark. (See Exhibit 10.12)

MyECheck provides access to more US consumers than any other payment method because it can be used to clear checks from 100% of US checking accounts, including business accounts and accounts where ACH does not work. MyECheck facilitates fast funds clearing for the Merchant, providing same day or next day availability of funds to the merchant's bank. MyECheck does not charge interchange fees therefore it has a much lower cost than card processing systems.

MyEcheck, Inc.
A Wyoming Corporation
Quarterly Disclosure Statement for the Quarter Ended June 30, 2015

7) Describe the Issuer's Facilities

MyECheck's primary business operations have been established in greater Sacramento, CA area. The Issuer does not hold title to any real estate properties. Subsequently, the Issuer does not have any mortgages, liens or encumbrances against such properties.

On July 1, 2014, MyECheck, leased approximately 3700 square feet of Class A Office Space from Maidu Investment, LLC ("Maidu Investment") at the office development known as College Point Business Center, located at 2600 E. Bidwell Street in the City of Folsom, State of California as its corporate headquarters and primary product development center. This is a 42 month full service lease expiring on December 31, 2017 with an average rent per month of $4,866. The rent increases annually by $0.05 per square foot. Both physical and electronic security features are employed at this location.

On October 28, 2014, MyECheck amended its original lease agreement with Maidu Investment, LLC (Maidu Investment) at the office development known as College Point Business Center, located at 2600 E. Bidwell Street in the City of Folsom, State of California, to include an expansion space defined as Suite 190. The lease term on the expansion space is 42 months expiring on June 30, 2018 with an average combined rent per month of $10,998. MyECheck paid an additional security deposit in the amount of $20,000, for a combined deposit amount of $52,812.

In addition, MyECheck entered into a secured networking co-location lease with QTS Data Center. The term of this lease agreement is thirty nine (39) months, and the monthly lease payment is at $500. MyECheck uses the services of QTS Data Center, located about 90 miles from San Francisco in seismically-neutral Sacramento. The data center and the Folsom office are connected via a secure VPN, allowing the development staff to interact with the MyECheck development, test, and production equipment.

On January 27, 2015, MyECheck entered into a copier equipment lease with Caltronics Business Systems. The term of this lease agreement is thirty nine (39) months and the monthly lease payments are $155, with a fair market value buyout at the end of the thirty nine month lease.

On March 1, 2015, Seergate, Ltd. (a recently acquired subsidiary of the Company) entered into a sublease with YK. Multimedia, Ltd. renting one room within the offices of an Executive Suite located on level 1 at "Gamla Building in Park" in Ra'anana, Israel. This lease is open ended and can be terminated with a thirty day written notice of intent to vacate the premises at any time. The monthly rent is $900 U.S. and is prepaid in increments of three months in advance. There was no deposit or guarantee required.

8) Officers, Directors, and Control Persons

The goal of this section is to provide an investor with a clear understanding of the identity of all the persons or entities that are involved in managing, controlling or advising the operations, business development and disclosure of the issuer, as well as the identity of any significant shareholders.

A. Names of Officers, Directors and Control Persons. In responding to this item, please provide the names of each of the issuer's executive officers, directors, general partners and control persons (control persons are beneficial owners of more than five percent (5%) of any class of the issuer's equity securities), as of the date of this information statement.

Officers and Directors

As of June 30, 2015 the Company's sole Officers and Directors were:

President/Director	Edward R. Starrs
Executive Vice President/COO	James T. Fancher
CTO/Director	Robert S. Blandford
CFO	Bruce M. Smith

Name and Address of Beneficial Owners	Number of Shares of common stock Beneficially Owned	Percent of Class (%)
Edward Starrs	1,953,456,970	47.96%
PO Box 10712, Zephyr Cove NV, 89448		
	1,953,456,970	47.96%
Total Securities Outstanding	**4,073,145,067**	

Biographic Sketches

Ed Starrs, Founder, President and CEO

Ed Starrs has more than 24 years of experience as an international business executive with management experience in multiple industries. He has been an officer and director of MyECheck since its formation in 2004. From January, 2002 through October, 2004, Mr. Starrs was President of Digency, Inc., an online payment company engaged in credit card and eCheck transaction processing for Internet Merchants. Starrs was previously President of Starnet Systems International, Inc., a public company that processed more than $2 billion annually in Internet transactions through the year 2000 using its StarMX transaction processing engine. Starrs created comprehensive solutions for Internet payment processing including developing and implementing systems to control fraud, secure transactions, and increase global distribution for e-commerce merchants.

Biographic Sketches (Cont.)

James T. Fancher, Executive Vice President
Jim Fancher joined MyECheck in December 2014. Mr. Fancher brings over 20 years of financial services and payments technology experience. Fancher's prior roles include COO of Seergate, Inc., a real time payment processing company from 2010 to the present and General Manager for Endpoint Exchange from 2007 through 2009, an FIS company, where he had full P&L responsibility for the company's real time, check image exchange. Mr. Fancher went from Senior Business Development Manager in 2004 to Senior Accounts Executive in 2005 through 2006 for VECTORsgi, an FIS company. From 1995 to 2003 Fancher was CEO of G&A, Inc. where he created CheckMine, a Check Image Mining application.

Robert "Steve" Blandford, Vice President, Product Development, CTO and Board Member
Steve Blandford joined MyECheck in July 2004. He brings more than 25 years of experience as a senior information technology professional including serving as CTO for companies in the online entertainment and gaming industries. He is skilled at both business and technology adoption. His professional background includes i2 Corp., MXM Media, Maxim Entertainment Group, Perspective Technologies, Win Streak and others. From January, 2002 through October, 2004, Mr. Blandford was Chief Technology Officer for Digency, Inc., an online payment processing company engaged in credit card and eCheck transaction processing for Internet Merchants.

Bruce M. Smith, CPA, Vice President, Administration/Finance, Controller, and CFO
Bruce Smith is a Certified Public Accountant. He joined MyECheck in March 2014 where he brings a significant amount of executive and financial experience. He is a forensic auditor, business advisor and a seasoned financial professional with over 30 years of progressive accounting responsibility.

In 2004, Smith became a Principal of BBRS, LLP, one of the most prestigious accounting firms in the Sacramento region. In 2005, Smith became a Capital Partner in the firm. Mr. Smith remains a Partner in the firm and devotes approximately 10% of his time to this position. He oversees the Outsourced CFO and Controller Services, Small Business Consulting, and traditional CPA services for financial statements (Compiled, Reviewed, and Audited), and tax work. Prior to joining BBRS, LLP, Smith worked as a CPA consultant for hire, offering contract CFO, Controller, and Consulting services for small businesses. From 1999 through 2001, Smith was the Corporate Controller for eCongo.com, Inc., an ASP internet software developer specializing in creating on-line enterprises.

B. Legal/Disciplinary History. Please identify whether any of the foregoing persons have, in the last five years, been the subject of:

1. A conviction in a criminal proceeding or named as a defendant in a pending criminal proceeding (excluding traffic violations and other minor offenses); **NO**

2. The entry of an order, judgment, or decree, not subsequently reversed, suspended or vacated, by a court of competent jurisdiction that permanently or temporarily enjoined, barred, suspended or otherwise limited such person's involvement in any type of business, securities, commodities, or banking activities. **NO**

3. A finding or judgment by a court of competent jurisdiction (in a civil action), the Securities and Exchange Commission, the Commodity Futures Trading Commission, or a state securities regulator of a violation of federal or state securities or commodities law, which finding or judgment has not been reversed, suspended, or vacated; or **NO**

4. The entry of an order by a self-regulatory organization that permanently or temporarily barred suspended or otherwise limited such person's involvement in any type of business or securities activities. **NO**

C. Beneficial Shareholders. Provide a list of the name, address and shareholdings or the percentage or shares owned by all persons beneficially owning more than ten percent (10%) of any class of the issuer's equity securities. If any of the beneficial shareholders are corporate shareholders, provide the name and address of the person(s) owning or controlling such corporate shareholders and the resident agents of the corporate shareholders.

See Section 8 Above

9) Third Party Providers

Please provide the name, address, telephone number, and email address of each of the following outside providers that advise your company on matters relating to operations, business development and disclosure:

Legal Counsel

Name: Ephraim L. Michael, Esq.
Firm: The Michael Law Firm
Address 1: 10 Glenlake Parkway, Suite 130
Address 2: Atlanta, GA 30328
