## 1 Nature of Operations

CanAlaska Uranium Ltd. (the "Company" or "CanAlaska") and its subsidiaries are principally engaged in the exploration of uranium properties. The Company may bring the properties to production, structures joint ventures with others, option or lease properties to third parties or sell the properties outright. The Company has not determined whether these properties contain ore reserves that are economically recoverable and the Company is considered to be in the exploration stage. From time to time, the Company evaluates new properties and directs exploration on these properties based on the Board of Director's evaluation of financial and market considerations at the time. On December 30, 2013, the Company's shares commenced trading on the TSX Venture Exchange under the symbol "CVV" and ceased trading on the Toronto Stock Exchange. The Company's shares are also quoted on the OTCQB in the United States under the symbol "CVVUF" and the Frankfurt Stock Exchange under the symbol "DH7N". In May 2015, the Company deregistered from its reporting obligations with the United States Securities and Exchange Commission (the "SEC"). The Company's registered office is located at 625 Howe Street, Suite 1020, Vancouver, British Columbia, V6C 2T6, Canada.

## 2 Going Concern

These condensed interim consolidated financial statements have been prepared on a going concern basis. The going concern basis of presentation assumes that the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business. These condensed interim consolidated financial statements do not include any adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classification that would be necessary should the Company be unable to continue as a going concern. These adjustments could be material.

The recoverability of the amounts shown for mineral properties and related deferred costs is dependent upon the existence of economically recoverable mineral reserves, the ability of the Company to obtain the necessary financing to complete the development, and upon future profitable production or proceeds from disposition of the mineral properties. Due to increasingly difficult market conditions facing junior uranium exploration companies there is no assurance that the Company will be successful in raising additional financing. The amounts shown as mineral property costs represent acquisition costs incurred to date, net of recoveries.

At July 31, 2015, the Company had cash and cash equivalents of $1.4 million (April 30, 2015: $1.6 million) (note 4) and working capital of $1.6 million (April 30, 2015: $2.2 million). The Company does not earn revenues from its operations and has a deficit of $81.1 million at July 31, 2015. Management believes that the cash on hand is sufficient to meet corporate, administrative and selected exploration activities for at least the next twelve months. Management may either need to dilute its ownership in its properties or secure additional financing to continue to advance the development of its exploration projects. Management has taken steps to streamline non-discretionary expenditures and financial overheads and is working to option, joint venture or sell its individual exploration projects. The above factors may cast significant doubt regarding the Company's ability to continue as a going concern.

## 3 Basis of Consolidation and Presentation

### a) Statement of Compliance

These condensed interim consolidated financial statements of the Company, including comparatives, have been prepared in accordance with International Financial Reporting Standards 34 Interim Financial Reporting ("IAS 34") using the accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Boards ("IASB"). These condensed interim consolidated financial statements have been prepared on the basis of and using accounting policies, methods of computation and presentation consistent with those applied in the Company's April 30, 2015 consolidated annual financial statements.

In assessing control, potential voting rights that are presently exercisable or convertible, are taken into account in the assessment of whether control exists. Subsidiaries are consolidated from the date on which control is transferred to the Company. They are deconsolidated from the date on which control ceases. All inter-company transactions, balances, income and expenses have been eliminated on consolidation.

These condensed interim consolidated financial statements also include the Company's share of the jointly held assets, its jointly incurred liabilities, its share of the revenues and expenses of CanAlaska Korean Uranium Limited Partnership ("CKULP" or the "Partnership" or the "CKU Partnership") and CanAlaska Korean Uranium Limited.

## 9 Share Stock Options and Warrants (continued)

Option and warrant pricing models require the input of highly subjective assumptions including the expected volatility. Changes in the assumptions can materially affect the fair value estimate, and therefore, the existing models do not necessarily provide a reliable measure of the fair value of the Company's stock options and warrants. The Company's expected volatility is based on the historical volatility of the Company's share price on the Toronto Stock Exchange or the TSX Venture Exchange. The following assumptions were used in the Black-Scholes option pricing model to calculate the compensation expense for the three months ended July 31, 2015:

| | **Options** |
|---|---|
| Weighted average fair value | $0.12 |
| Forfeiture rate | 15.4% |
| Risk-free interest rate | 0.6% -0.7% |
| Expected life | 2.0 - 2.4 years |
| Expected volatility | 132.4% 133.3% |

The Company has sub leased its Vancouver office space to reduce its operating costs. However, the Company is committed for the full office lease amount.

## 12 Management of Capital

The Company considers its capital to consist of common shares, stock options and warrants. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.
