ENCOUNTER CARE SOLUTIONS, INC. AND SUBSIDIARY
NOTES TO FINANCIAL STATEMENTS
June 30, 2015

Note 1. Organization and Significant Accounting Policies

Organization and Line of Business

Encounter Care Solutions, Inc. ("the Company") is a Delaware corporation organized March, 2000 and is an integrated healthcare company that operates its business through two divisions: Healthcare Technology Division and the Healthcare Services Division. Encounter Care Solutions, Inc.'s operating businesses offer a broad range of proprietary healthcare technology, products and services that address several very sizeable and rapidly growing target markets, including: the Telemedicine Market, Healthcare Information Technology Market, and Home Healthcare Market.

In July 2012, a new subsidiary of Encountercare was formed and incorporated in the state of Delaware by the name of Cyber Fuels, Inc. This subsidiary enters the company into the alternative fuels market.

Joint Venture Termination

In June 2008 we formed a joint venture with Authentidate Holding Corp., called ExpressMD TM Solutions LLC to provide in-home patient vital signs monitoring systems and services. The company and Authentidate Holding Corp. each owned fifty percent of the joint venture and neither party had any special rights under the joint venture agreement. ExpressMD Solutions did not have any assets or liabilities and Authentidate Holding Corp. did not have any recourse to our general credit. ExpressMD Solutions was consolidated in Authentidate Holding Corp.'s financial statements because Authentidate Holding Corp. elected to provide the majority of funding for the joint venture and was deemed to be the primary beneficiary.

On November 21, 2011, the company entered into a definitive Joint Venture Termination Agreement (the "Agreement") with Authentidate Holding Corp. (the "Buyer"), providing for the assignment and transfer to the company of all of the membership interests held by Seller in ExpressMD Solutions. At the closing on November 21, 2011, the joint venture agreement was terminated, ExpressMD Solutions became a wholly-owned subsidiary of Authentidate Holding Corp. and the company granted the company a license to use certain intellectual property. Pursuant to the Agreement, Authentidate Holding Corp. agreed to pay to the company $1,000,000 in cash and deliver to the company 1,500,000 shares of restricted common stock of Authentidate Holding Corp. The cash payment is due as follows: $50,000 was received prior to the date of the Agreement; $475,000 was received at the closing; $200,000 was received in April 2012; and $275,000 is due on or prior to October 1, 2012. In addition, upon the closing Authentidate Holding Corp. forgave the company approximately $800,000 for operating expenses advanced to the joint venture. The company recorded a gain on sale of equity method investment.

Principles of Consolidation

The consolidated financial statements for years ended June 30, 2015 and 2014 includes the accounts of Encountercare, Inc. and its wholly owned subsidiaries; Building Block Pediatric Home Health Services, Inc. and Cyber Fuels Inc. Significant intercompany accounts and transactions have been eliminated in consolidation.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities on the date of the financial statements and the reported amounts of revenues and expenses during the year. Estimates include the valuation allowance on deferred tax assets and valuation of stock issued for services. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Company considers all highly liquid temporary cash investments with an original maturity of twelve months or less to be cash equivalents. At June 30, 2015 and 2014, the Company had no cash equivalents. The Company at times has cash in banks in excess of FDIC insurance limits. At June 30, 2015 and 2014, cash balance exceeded these limits by none. The Company's cash balance totaled $115,295 and $0 as of June 30, 2015 and 2014 respectively.

In general, ASC No. 605 requires that four basic criteria must be met before revenue can be recognized: (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred or services rendered, (iii) the fee is fixed and determinable, and (iv) collectability is reasonably assured.

In accordance with ASC No. 350, Intangibles, Goodwill and Other, the Company requires that intangible assets with a finite life be amortized over their life and requires that goodwill and intangible assets be reviewed for impairment annually or more frequently if impairment indicators arise.

Income Taxes

The Company accounts for income taxes under FASB Codification Topic 740-10-25 ("ASC 740-10-25") Income Taxes. Under ASC 740-10-25, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Under ASC 740-10-25, the effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Note 1. Organization and Significant Accounting Policies- Cont.

The net deferred tax liability in the accompanying balance sheets includes the following amounts of deferred tax assets and liabilities:

	2015	2014
Deferred Tax Liability	$ -	$ -
Deferred tax asset		
Net operating Loss Carry Forward	23,766,579	23,246,099
Valuation Allowance	(23,766,579)	(23,246,099)
Net Deferred Tax asset	$ -	$ -
Net Deferred Tax Liability	$ -	$ -

The provision for income taxes has been computed as follows:

	2015	2014
Expected income tax recovery (expense) at the statutory rate of 35% - Federal	$ 566,310	$ 465,127
Expected income tax recovery (expense) at the statutory rate of 8.7% - State	140,769	115,617
Tax effect of expenses that are not deductible for income tax purposes	(186,599)	(186,720)
Change in valuation allowance	(520,480)	(394,024)
Provision for income taxes	$ -	$ -

The valuation allowance was established to reduce the deferred tax asset to the amount that will more likely than not be realized. This is necessary due to the Company's continued operating losses and the uncertainty of the Company's ability to utilize all of the net operating loss carry forwards before they will expire through the year 2035.

The net change in the valuation allowance for the years then ended June 30, 2015 and 2014 was a decrease of $520,480 and $394,024.

The components of income tax expense related to continuing operations are as follows:

	2015	2014
Federal		
Current	-	-
Deferred	$ -	$ -

ASC 820 defines fair value, establishes a framework for measuring fair value under GAAP, and expands disclosures about fair value measurements. Under GAAP, fair value of such securities is determined based upon a hierarchy that prioritizes the inputs to valuation techniques used to measure fair values into three broad levels.

The fair value of the Company's financial assets and liabilities reflects the Company's estimate of amounts that it would have received in connection with the sale of the assets or paid in connection with the transfer of the liabilities in an orderly transaction between market participants at the measurement date. In connection with measuring the fair value of its assets and liabilities, the Company seeks to maximize the use of observable inputs (market data obtained from sources independent from the Company) and to minimize the use of unobservable inputs (the Company's assumptions about how market participants would price assets and liabilities).

Note 10. Investments in marketable securities and fair value– Cont.

The following fair value hierarchy is used to classify assets and liabilities based on the observable inputs and unobservable inputs used in order to value the assets and liabilities:

Level 1: Quoted prices in active markets for identical assets or liabilities. An active market for an asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Observable inputs other than Level 1 inputs. Examples of Level 2 inputs include quoted prices in active markets for similar assets or liabilities and quoted prices for identical assets or liabilities in markets that are not active.

Level 3: Unobservable inputs based on the Company's assessment of the assumptions that market participants would use in pricing the asset or liability.

	Level 1: Quoted Prices in Active Markets for Identical Assets	Level 2: Quoted Prices in Inactive Markets for Identical Assets	Level 3: Significant Unobservable Inputs	Total at June 30, 2015
