November 5th, 2015

STL Marketing Group, Inc.
Attn: Shareholders
10 Boulder Crescent, Suite 102
Colorado Springs, CO 80903

Dear Shareholders:

We wanted to update our shareholders through this letter on the status of various activities the Company has been working on throughout the year. Let me begin by stating that while I had hoped that my personal situation would not impede or slow the process we have been undertaking, the personal tragedies that struck my family this past April have certainly affected our progress. Under typical circumstances, I would have hired staff to help us overcome this, but considering we have not paid existing staff, or at best partially paid anyone in years, it seemed irresponsible to hire someone at this juncture. As such, the effects have been significant, more so since we are by any measure a very small Company.

The lack of sufficient operating capital continues to be a challenge, yet we do continue to work with the available resources to move the Company forward. Please note that the share structure and other data on the OTC is accurate, there have been no new issuances or new convertible notes since our last update. We have personally funded the Company to help it through this difficult period.

Business Status

- **Costa Rica/ Renewable Energy.** The situation in Costa Rica with regard to our renewable energy plans is intolerable. The government seems to have us on a permanent hold, not just STLK, but also the entire private generation industry (non government). As we have reported, the need is there, but the political party in power is of a socialist tenor and therefore against private generation. While the rates for electricity are climbing and industries are leaving the country as a result (e.g. Intel), the government is unlikely to change its attitude towards private generation. As such, we have accelerated some other initiatives. We have briefly outlined these initiatives below.

- **PhoneSuite Solutions.** Call Management Products, Inc. did secure the Hilton business as part of a small group of approved IP PBX vendors for Hilton's global owned & managed properties. Our agreement with CMP, is to handle any overseas business and we met with Hilton a few weeks ago to pursue overseas opportunities for this equipment. We are working to secure the proper infrastructure to house the cloud-based solution overseas. We are hoping to close at least half a dozen properties next year. On the downside the old business model of selling hardware is gone and replaced. This lowers our revenue for the year, but secures multi-annual revenue as the cloud-based sale is a sold as a monthly service on a multi year contract. We will update once we have a good gauge of the average monthly revenue per property.

- **Kinetos Software.** We are working on a Definitive Agreement, with Kinetos a developer of intelligent software designed for a variety of industries. The software is sold as "Software as a Service" or "SaaS". Kinetos' product can determine if a customer is getting ready to leave or change services before they actually leave and with enough time to take retention action. Additionally, the software is designed to take action and inform the organization based on algorithms customized to the business to ensure potential defections are handle appropriately within the client's organization. Powerful for banks, insurance and telecommunications/ service providers. The software is currently deployed primarily in Central America with major customers like Banco de Costa Rica, Banco Nacional and Claro. A Power Point is available on our OTC site.

F3TCH. STLK has signed a binding LOI with Camposagrado, Inc. to allow STLK to commercialize Camposagrado's patent under an exclusive licensing agreement. This Application is trademarked under the name F3TCH and has a patent pending under U.S. Pat. Application No. 14/877,595. F3TCH is a downloadable App that migrates a hotel guest room telephone to any smart device that is free to hotels and to users. During their stay, a hotel guest can now use their smart device for any hotel related service- e.g. order drinks pool side, receive telephone calls to their room at mobile device, order room service, contact the concierge, etc. In addition, nearby businesses like bars, restaurants and other goods and service providers can advertise specials for the guests in their area.

For advertising, we met with Google last week to explore how we could partner with them globally on the App. The idea would be to allow Google to use their infrastructure to advertise to the App. F3TCH can deploy globally through Amazon Web Services in an inexpensive and scalable manner. We are excited about this opportunity and believe it could be significant to STLK and to our stakeholders.

We are currently working on a proof of concept with Hilton and are in contact with other major chains as well. We believe once one major chain approves, all will likely migrate over in a short time. The global hotel room market is 200,000 hotels x 100 rooms on average or 20,000,000 rooms per day and if they are 50% occupied it gives us a total potential addressable market of 10,000,000 rooms/ day. While we are still in the early stages of discussions with Google, and do not yet have the prospective figures for revenue per hotel, the addressable market and demographics could provide a significant upside potential for revenue.

For more on this please see our very short Prezi:

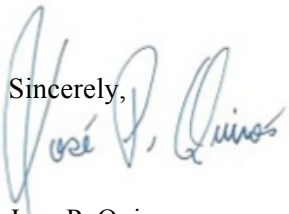

<iframe id="iframe_container" frameborder="0" webkitallowfullscreen="" mozallowfullscreen="" allowfullscreen="" width="550" height="400" src="https://prezi.com/embed/lv6atlnduh_v/?bgcolor=ffffff&lock_to_path=1&autoplay=0&autohide_ctrls=0&landing_data=bHVZZmNaNDBIWnNjdEVENDRhZDFNZGNIUE43MHdLNWp4eFBrV0JIL1Q0cTRkWTFkTXJ5K0lray9xV1BtSVJVNUdmS0p3Z0FOcUZyRDYvL1hqdVlHVDltMmRoVWZVMU15&landing_sign=5B3BxSY8tJBGyUOn2L-YC4_mC6WX9_y7QWag-xQ4OPc"></iframe>

In closing, we want to ensure the best for the Company and our shareholders. We want to give the above a chance to develop and see how the market responds. In addition, we are working on finalizing the FORM 10 giving us options for future investment and working capital.

There is a lot of work to do and we have good opportunities in front of us. Perhaps for the first time since we learned of the "hold" on our energy project in Costa Rica we have solid and actionable opportunities, opportunities that have truly tested our ability to manage and work under trying circumstances to say the least. While these are not in the renewable energy sector, they are in a familiar field to our team and we look forward to seeing how these develop to the benefit of the Company.

As always please direct any questions to us at info@v3rsant.com .

Sincerely,

Jose P. Quiros
CEO

This shareholder update contains forward-looking statements as defined by the Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements concerning plan, objectives, goals, strategies, future events or performance, and underlying assumptions and other statements that are other than statements of historical facts. These statements are subject to uncertainties and risks including, but not limited to, product and service demand and acceptance, changes in technology, economic conditions, the impact of competition and pricing, government regulation, and other risks described in statements filed from time to time with the Securities and Exchange Commission. All such forward-looking statements whether written or oral, and whether made by or on behalf of the Company, are expressly qualified by the cautionary statements that may accompany the forward-looking statements. In addition, the Company disclaims any obligation to update any forward-looking statements to reflect events or circumstances after the date hereof.
