QUARTERLY REPORT
AMERICAN PREMIUM WATER CORPORATION
NOTES TO FINANCIAL STATEMENTS
September 30, 2015

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Accounting Basis

The Company uses the accrual basis of accounting and accounting principles generally accepted in the United States of America ("GAAP" accounting). The Company has adopted a December 31 fiscal year end.

Basis of Presentation

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for financial statements. In the opinion of management, all adjustments necessary for the financial statements to be not misleading for the periods presented have been reflected herein.

Going Concern

The accompanying financial statements have been prepared on a going concern basis of accounting, which contemplates continuity of operations, realization of assets and liabilities and commitments in the normal course of business. The accompanying financial statements do not reflect any adjustments that might result if the Company is unable to continue as a going concern. The Company does not generate significant revenue, has negative cash flows from operations, which raise substantial doubt about the Company's ability to continue as a going concern. The ability of the Company to continue as a going concern and appropriateness of using the going concern basis is dependent upon, among other things, additional cash infusion.

Cash and Cash Equivalents

American Premium Water Corporation considers all highly liquid investments with maturities of three months or less to be cash equivalents. At September 30, 2015 and December 31, 2014, the Company had $982 and $2,068 of cash, respectively. The Company has no cash equivalents at either date.

Inventories

Inventories consist of glass bottled water and shipping containers. The Company stores the final products in regional warehouses around the United States which are owned and operated by third parties. When sales are made the final product is shipped from the warehouse to the customer. Inventories are maintained at a minimal level since production cycles are very short. At September 30, 2015 and December 31, 2014, the Company had $2,285 and zero of product inventory on hand, respectively.

Fair Value of Financial Instruments

The Company's financial instruments consist of cash, a vendor deposit, accounts payable, other liabilities, accrued interest, notes payable, and an amount due to a related party. The carrying amount of these financial instruments approximates fair value due either to length of maturity or interest rates that approximate prevailing market rates unless otherwise disclosed in these financial statements.

Income Taxes

Income taxes are computed using the asset and liability method. Under the asset and liability method, deferred income tax assets and liabilities are determined based on the differences between the financial reporting and tax bases of assets

and liabilities and are measured using the currently enacted tax rates and laws. A valuation allowance is provided for the amount of deferred tax assets that, based on available evidence, are not expected to be realized.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates. Most significant estimates in the accompanying unaudited financial statements include the valuation of deferred tax assets, valuation of stock-based advisor and vendor awards, valuation of warrants issued with debt, and the measurement of derivative liabilities. The Company bases its estimates on historical experience and on various other assumptions that the Company considers reasonable given the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources.

Property and Equipment

Capital assets would be depreciated over their estimated useful lives, three to seven years using the straight-line method of depreciation for book purposes. Currently, the Company has no capital assets.

Revenue Recognition

The Company recognizes revenue when there is persuasive evidence of that an arrangement exists, the revenue is fixed or determinable, the products are fully delivered and collection is reasonably assured.

Concentration of Credit Risks

The Company maintains its cash and cash equivalents in bank deposit accounts, which could, at times, exceed federally insured limits. The Company has not experienced any losses in such accounts; however, amounts in excess of the federally insured limit may be at risk if the bank experiences financial difficulties.

Basic Income (Loss) Per Share

Basic income (loss) per share is calculated by dividing the Company's net loss applicable to common shareholders by the weighted average number of common shares during the period. Diluted earnings per share is calculated by dividing the Company's net income available to common shareholders by the diluted weighted average number of shares outstanding during the year. The diluted weighted average number of shares outstanding is the basic weighted number of shares adjusted for any potentially dilutive debt or equity. At September 30, 2015 the Company had convertible notes outstanding that could be converted into approximately 31,426,714 common shares. These are not presented in the statement of operations since the company incurred a loss and the effect of these shares is anti-dilutive.

Stock-Based Compensation

The Company accounts for share-based awards in accordance with ASC Topic 505-50, *Equity Based Payments to Non-Employees.*

Recent Accounting Pronouncements

American Premium Water Corporation does not expect the adoption of recently issued accounting pronouncements to have a significant impact on the Company's results of operations, financial position or cash flow.

Derivative Instruments

Historically, the Company entered into financing arrangements that consisted of freestanding derivative instruments or are hybrid instruments that contain embedded derivative features. The Company accounts for these arrangements in accordance with Accounting Standards Codification topic 815, Accounting for Derivative Instruments and Hedging

Activities ("ASC 815") as well as related interpretation of this standard. In accordance with this standard, derivative instruments are recognized as either assets or liabilities in the balance sheet and are measured at fair values with gains or losses recognized in earnings. Embedded derivatives that are not clearly and closely related to the host contract are bifurcated and are recognized at fair value with changes in fair value recognized as either a gain or a loss in earnings. The Company determines the fair value of derivative instruments and hybrid instruments based on available market data using appropriate valuation models, considering all of the rights and obligations of each instrument.

We estimate fair values of derivative financial instruments using various techniques (and combinations thereof) that are considered consistent with the objective measuring fair values. In selecting the appropriate technique, we consider, among other factors, the nature of the instrument, the market risks that it embodies and the expected means of settlement. For less complex derivative instruments, such as freestanding warrants, we generally use the Black-Scholes model, adjusted for the effect of dilution, because it embodies all of the requisite assumptions (including trading volatility, estimated terms, risk free rates, and dilution) necessary to fair value these instruments. Estimating fair values of derivative financial instruments requires the development of significant and subjective estimates that may, and are likely to, change over the duration of the instrument with related changes in internal and external market factors. In addition, option-based techniques (such as Black-Scholes model) are highly volatile and sensitive to changes in the trading market price of our common stock. Since derivative financial instruments are initially and subsequently carried at fair values, our income (expense) going forward will reflect the volatility in these estimates and assumption changes. Under the terms of the new accounting standard, increases in the trading price of the company's common stock and increases in fair value during a given financial quarter result in the application of non-cash derivative expense. Conversely, decreases in the trading price of the Company's common stock and decreases in trading fair value during a given financial quarter result in the application of non-cash derivative income.

NOTE 2 – PROPERTY AND EQUIPMENT

Currently the Company owns no tangible property.

NOTE 3 – NOTES PAYABLE

The Company has issued one promissory note during 2015. This note was issued to acquire 800,000 Series A Preferred shares and retire $93,024 in notes and advances and the associated derivative liabilities from a former Officer of the Company. The Company also has two convertible promissory notes totaling $38,000 issued for services outstanding at September 30, 2015. The notes are presented in the table below:

	Balance Due at September 30, 2015	Balance Due at December 31, 2014
On December 31, 2012 the Company executed a one year promissory note for $30,000 to the former CEO of the Company to settle $30,000 of accrued salary which had been recorded as expense by the Company. The note bears interest at 8 % and is secured by the common stock of the Company. The note is convertible into common stock of the Company. The number of shares to be received is computed by calculating the three day average bid price of the stock on the three days prior to conversion, deducting 90 % of that price and dividing the resulting price into the amount of principal and interest due. The Company could not determine if there were enough shares available to convert all obligations. Accordingly, a derivative liability was recorded using the Black Scholes Method to compute the liability. Assumptions were a Risk Free Interest rate of .0015, volatility of 287%, and an assumed dividend rate of 0%. The note was retired under a settlement agreement dated April 27, 2015 described below.	$	$ 30,000
On March 31, 2013 the Company executed a one year promissory note for $30,000 to the former CEO of the Company to settle $30,000 of accrued salary which had been recorded as expense by the Company. The note bears interest at 8 % and is secured by the common stock of the Company. The note is convertible into common stock of the Company. The number of shares to be received is computed by calculating the three day average bid price of the stock on the three days prior to conversion, deducting 90 % of that price and dividing the resulting price into the amount of principal and interest due. The Company could not determine if there were enough shares available to convert all obligations. Accordingly, a derivative liability was recorded using the Black Scholes Method to compute the liability. Assumptions were a Risk Free Interest rate of .0014, volatility of 159%, and an assumed dividend rate of 0%. The note was retired under a settlement agreement dated April 27, 2015 described below.	$	$ 30,000

NOTE 3 – NOTES PAYABLE (Continued)

On July 30, 2013 the Company executed a promissory note for $20,000. The note bears interest at The note bears interest at 8 % and is secured by the common stock of the Company. The note is convertible into common stock of the Company. The number of shares to be received is computed by determining the lowest closing bid price of the stock for the twenty days prior to conversion, deducting 50 % of that price and dividing the resulting price into the amount of principal and interest due. The Company could not determine if there were enough shares available to convert all obligations. Accordingly, a derivative liability was recorded using the Black Scholes Method to compute the liability. Assumptions were a Risk Free Interest rate of .0012, volatility of 136%, and an assumed dividend rate of 0%. The note was retired under a settlement agreement dated April 27, 2015 described below.	$	$ 20,000
On November 11, 2013 the Company executed a one year promissory note for $20,000 for services provided. The note bears interest at 8 % and is secured by the common stock of the Company. The note is convertible into common stock of the Company. The number of shares to be received is computed by calculating the three day average bid price of the stock on the three days prior to conversion, deducting 20 % of that price and dividing the resulting price into the amount of principal and interest due. The Company could not determine if there were enough shares available to convert all obligations. Accordingly, a derivative liability was recorded using the Black Scholes Method to compute the liability. Assumptions were a Risk Free Interest rate of .0013, volatility of 107%, and an assumed dividend rate of 0%.	$ 20,000	$ 20,000
On January 07, 2014 the Company executed a one year promissory note for $18,000 for services provided. The note bears interest at 8 % and is secured by the common stock of the Company. The note is convertible into common stock of the Company. The number of shares to be received is computed by calculating the three day average bid price of the stock on the three days prior to conversion, deducting 20 % of that price and dividing the resulting price into the amount of principal and interest due. The Company could not determine if there were enough shares available to convert all obligations. Accordingly, a derivative liability was recorded using the Black Scholes Method to compute the liability. Assumptions were a Risk Free Interest rate of .0013, volatility of 126%, and an assumed dividend rate of 0%.	$ 18,000	$ 18,000
On April 27, 2015 the Company reached an agreement with a former officer of the Company to acquire 800,000 shares of Class A Preferred Stock owned by the officer and to settle a number of convertible notes and other obligations previously issued to or assigned to the officer by thrid parties. Under the agreement the Company would issue a convertible promissory note for $850,000 dated April 05, 2015. The note bears interest at 8 %, matures April 05, 2016 and is secured by the common stock of the Company. The note is convertible into common stock of the Company. The number of shares to be received is computed by calculating the three day weighted average price of the stock on the three days prior to conversion, deducting 15 % of that price, and dividing the resulting price into the amount of principal and/or interest to be converted into common stock. The note includes features creating a derivative liability of the Company. Accordingly, a derivative liability was recorded using the Black Scholes Method to compute the liability. Assumptions were a Risk Free Interest rate of .0023%, volatility of 126%, and an assumed dividend rate of 0%. The note also included a put pernium of $150,000 which will be amortized over the life of the note.	$ 699,175	$
Unamortized debt discount on derivative liabilities	$ (73,802)	$ (123)
Total convertible notes outstanding, net of unamortized discounts	$ 663,373	$ 117,877

NOTE 4 – STOCKHOLDERS' EQUITY

The Company has 500,000,000 shares of common stock authorized with a par value of $0.0001 and 20,000,000 shares of Preferred stock with a par value of $0.001. The chart below details the amount and nature of stock issued by the Company.

Common stock issued	
5,063,550	Conversion of preferred stock issued for capital.
4,900,000	Promotional activities
2,830,000	Conversion of note issued for retirement of preferred stock.
1,250,000	Legal services
650,200	Technical services/communications
400,000	Advisory services - product development
250,200	Sales & Promotional activities
100,000	Public relations
30,000	Logistical services
1,000	Conversion of preferred stock issued for service.
485	Advisory services
155	Start up capital - administrative support
15,475,590	Total Common Issued

Non-Public Preferred stock issued	
13,000,000	Start up capital
1,900,000	Incentive
170,100	Marketing & promotional activities
165,000	Advisory services
68,200	Additional capital
20,200	Sales Support
15,323,500	Total Preferred Issued

NOTE 5 – COMMITMENTS AND CONTINGENCIES

In October 2014 the Company signed a lease for office space in Delray Beach, Florida. The lease is for a term of two years with monthly rent is $230. The lease was transferred by the landlord to the new office location for the Company in Playa Vista, California.

NOTE 6 – GOING CONCERN

The accompanying consolidated financial statements have been prepared in conformity with generally accepted accounting principles, which contemplate continuation of the Company as a going concern. However, the Company had limited revenues during 2015 and currently has a working capital deficit.

Management believes that the Company will be dependent, for the near future, on additional equity capital to fund operating expenses. The Company intends to position itself so that it may be able to raise additional funds through the capital markets. However, there are no assurances that the Company will be successful.

NOTE 7 – INCOME TAXES

As of September 30, 2015, the Company had net operating loss carry forwards of approximately $5,035,000 that may be available to reduce our tax liability in future years. We estimate the benefits of this loss carry forward at $1,700,000 if the Company produces sufficient taxable income. No adjustments to the financial statements have been recorded for this potential tax benefit. Further, the Company has contacted the United States Treasury Department in an attempt to obtain copies of the Federal Income Tax Returns filed for 2012 and prior years. These were not provided to current management by the former owners at the time of transition and are necessary in order to file the returns for 2012, 2013, and 2014.

NOTE 8 – FAIR VALUE MEASUREMENT

The Company has adopted the guidance under ASC Topic 820 for financial instruments measured on a fair value on a recurring basis. ASC Topic 820 establishes a fair value hierarchy, giving the highest priority to quoted prices in active markets and the lowest priority to unobservable data and requires disclosures for assets and liabilities measured at fair value based on their level in the hierarchy. Further authoritative accounting guidance (ASU No. 2009-05) under ASC Topic 820, provides clarification that in circumstances in which a quoted price in an active market for the identical liabilities is not available, a reporting entity is required to measure fair value using one or more of the techniques provided for in this update.

The standard describes a fair value hierarchy based on three levels of input, of which the first two are considered observable and the last unobservable, that may be used to measure fair value, which are the following:

Level 1 – Quoted prices in active markets for identical assets and liabilities.

Level 2 – Input other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets of liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liabilities.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

NOTE 8 – FAIR VALUE MEASUREMENT (Continued)

The Company analyzes all financial instruments with features of both liabilities and equity under ASC 480, "Distinguishing Liabilities from Equity" and ASC 815, "Derivatives and Hedging". Derivative liabilities are adjusted to reflect fair value at each period end, with any increase or decrease in the fair value being recorded in the results of operations as adjustments to fair value of derivatives. The effects of interactions between embedded derivatives are calculated and accounted for in arriving at the overall fair value of the financial instruments. In addition, the fair value of freestanding derivative instruments such as warrant and option derivatives are valued using the Black-Scholes model.

The Company uses Level 3 inputs for its valuation methodology for the embedded conversion option liabilities as their fair value as their fair value were determined by using the Black-Scholes option-pricing model based on various assumptions. The Company's derivative liabilities are adjusted to reflect fair value at each period end, with any increase or decrease in the fair value being recorded in results of operations as adjustments to fair value of derivatives.

The following table sets forth the liabilities at September 30, 2015, which is recorded on the balance sheet at fair value on a recurring basis by level within the fair value hierarchy. As required, these are classified based on the lowest level of input that is significant to the fair value measurement:

The Company recorded derivative liabilities as follows:

Financial Agreement	Date of Agreement		Ending Liability 12/31/2014
Convertible Promissory Note	July 30, 2013	$	34,623
Convertible Promissory Note	December 31, 2012	$	301,076
Convertible Promissory Note	March 31, 2013	$	301,079
Convertible Promissory Note	November 12, 2013	$	11,698
Convertible Promissory Note	January 7, 2014	$	10,529
	Balance at December 31, 2014	$	659,005
Convertible Promissory Note	April 5, 2015	$	515,435
Change in Value of derivative liabilities nine months ended September 30, 2015		$	170,142
Change in Value of derivative liabilities retired nine months ended September 30, 2015		$	(630,018)
	Balance at September 30, 2015	$	714,564

The Company recorded debt discount as follows:

Unamortized debt discount at December 31, 2014	$	(123)
Debt discount on notes issued during 2015	$	(150,000)
Amortization of debt discount nine months ended September 30, 2015	$	76,321
Unamortized debt discount at September 30, 2015	$	(73,802)

NOTE 9 – SUBSEQUENT EVENTS

During the three months ended September 30, 2015 a former officer of the Company, who owns a convertible note described previously, executed additional conversions under that note agreement. He converted $5,269 of accrued interest and $37,431 of principal into 2,000,000 shares (two million shares) of common stock of the Company.

Accordingly, $699,175 of principal under this note remains outstanding as of September 30, 2015. On October 13, 2015 an additional conversion was executed. This included $11,953 of accrued interest and $13,247 of principal. These were converted into 1,800,000 shares (one million eight hundred thousand shares) of common stock of the Company. At October 30, 2015 there remains $685,928 of principal outstanding under this note agreement.

6) **Describe the Issuer's Business, Products and Services**

A. American Premium Water, formally Expert Group, Inc., has developed a new water source to produce high alkaline bottled water and is currently marketing the product throughout the United States. The Company has obtained several contracts with high end restaurants.

B. Date and State (or jurisdiction) of Incorporation; Issuer was incorporated in Nevada as Goldsearch Corporation on February 17, 1989

C. the issuer's primary and secondary SIC Codes; 108963328

D. the issuer's fiscal year end date; December 31

E. principal products or services, and their markets;

Bottled water which will be marketed on a retail and wholesale basis. Customers will include individuals, schools, high end restaurants, private clubs, and health clubs.

7) **Describe the Issuer's Facilities**

Currently the company leases office space in Playa Vista, California. The lease requires payments of $109 per month and expires October 2016. The lease was transferred by the landlord from Delray Beach, Florida when the Company relocated the headquarters.

8) **Officers, Directors, and Control Persons**

A. Names of Officers and Directors

Mr. James Cook, Chief Executive Officer

Mr. Cook owns 220,000 shares of Series A Preferred stock.

The preferred shares are convertible into common shares at a ratio of 1 preferred shares for 100 common shares.

Mr. Alferd Culbreth, EVP
Mr. Culbreth owns or controls 15,992,090 shares of Series A Preferred stock which represents 80.3 % of that class. He also owns 1,340,305 shares of common stock which represents 6.6% of that class.

B. Control Persons Owning 5 % or more of a class of stock.

Carmen Gallegos – Investor, creditor

Ms. Gallegos controls 389,000 shares of Series A Preferred stock and 1,180,553 shares of common stock.

8) Officers, Directors, and Control Persons (continued)

Mr. T. Dillard, Spokesperson

Mr Dillard controls 39,500 shares of Series A Preferred stock and 1,502,300 shares of common stock.

Mr. Mark Batson, Spokesperson

Mr Batson controls 20,000 shares of Series A Preferred stock and 2,000,000 shares of common stock.

Mr. David Schechtmann, Legal Advisor

Mr Schechtmann controls 99,925 shares of Series A Preferred stock and 1,307,700 shares of common stock.

Ms. Adriana De Moura, Spokesperson

Ms. De Moura owns 1,200,650 shares of common stock.

Carpathia, LLC, Creditor

Carpathia, LLC owns 1,800,000 shares of common stock.

Stewardship, LLC, Administrator

Stewardship LLC owns 282,200 shares of Series A Preferred stock (1.4%) and 1,180,505 shares of common stock (5.8%).

Jax Capital Growth, LLC

Jax Capial Growth, LLC owns 1,000,000 shares of common stock. It holds no shares of Series A Preferred stock.

Constantine Financial Management, LLC

Constantine Financial Management LLC 1,000,000 shares of common stock. It holds no shares of Series A Preferred stock.

FMW Media Works Corporation, Service Provider

FMW Media Works Corporation holds 1,000,000 shares of common stock. It holds no shares of Series A Preferred stock.

C. Legal/Disciplinary History

1. None of the forgoing persons have been involved in a criminal proceeding or named as a defendant in a pending criminal proceeding

2. None of the forgoing persons have been involved in nor named in any order, judgment, or decree by any court which enjoined, barred, suspended nor limited them to participate in any type of business activity.

3. None of the forgoing persons have been named in any finding or judgment by any court, the Securities and Exchange Commission, the Commodity Futures Trading Commission, nor any state securities regulator as to a violation of federal or state securities or commodities law.

4. None of the forgoing persons have been named in any order by a self-regulatory organization that barred, suspended, or otherwise limited their involvement in any type of business or securities activity.

9) Third Party Providers

Legal Counsel

Simon Kogan, Esq.
171 Wellington Court, #1 J
Staten Island, NY 10314
Phone: (718) 984 3789
Fax: N/A
email: simonkogan@verizon.net

10) Issuer's Certifications

November 9, 2015

I, Alferd Culbreth, Chief Executive Officer, certify that:

I have reviewed this 2015 Quarterly Report of American Premium Water Corporation.

Based on my knowledge, this disclosure statement does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this disclosure statement; and

Based on my knowledge, the financial statements, and other financial information included or incorporated by reference in this disclosure statement, fairly present in all material respects the financial condition, results of operation and cash flows of the issuer as of, and for, the periods presented in this disclosure statement.

"/s/ Alferd Culbreth"
Chief Executive and Chief Financial Officer
