NOTE 1. GENERAL ORGANIZATION AND BUSINESS ISSUES

Global Profit Technologies, Inc. ("GLPT.PK") is an E-Commerce company within the Financial Products and Services Sector and Continuing Education and Training segment of the financial community. GLPT.PK, predominantly through Proprietary Software, unique trading methodologies and revolutionary software applications, with the initial product (4X-DAT), will focus on the over-the-counter foreign currency markets and foreign currency trading in those markets.

It is anticipated that, as the current platform and its future iterations mature and critical mass is reached, the platform will ultimately be expanded to futures, commodities, equities and their respective derivatives' markets.

GLPT.PK's initial emphasis and primary focus is in developing, marketing and managing proprietary trading technologies with the initial emphasis on the FOREX Markets. The primary emphasis and focus is therefore to leverage Mr. Nemeth's technologies, sales and marketing network and competencies into a self-sustaining organically grown international e-commerce company.

The firm and its proprietary product (4X-DAT) was founded and developed by Mr. Jozef Nemeth.

Mr. Nemeth and his advisors believe what Mr. Nemeth envisioned, developed and is now implementing will be the second and only trading software application of its kind in the world and possibly the most advanced personal trading aid to date. 4X-DAT brings to any trader an unparalleled solution designed to automate the trading activities in the FOREX markets. Until recently, the FOREX Market was reserved only for the wealthiest companies and currency traders, requiring millions of dollars in order to participate. Currency trading in the FOREX market is currently and has been historically one of the most lucrative capital propositions and possibly the most profitable business activity of some of the world's largest banks and financial institutions.

GLPT.PK, formerly Fantastic Fun, Inc. (FTFN.PK), was acquired through a private transaction where Global Profit Holdings, a Nevada corporation, domiciled in Scottsdale, AZ and solely owned and controlled by Joseph Nemeth acquired 24,025,113 shares of FTFN, or approximately 94% of the total shares outstanding on September 26, 2007.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING

POLICIES Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reporting amounts of revenues and expenses during the reported period. Actual results will differ from those estimates.

NOTES TO UNAUDITED FINANCIAL STATEMENTS
SEPTEMBER 30, 2015

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(CONTINUED) Fixed Assets

Software and the related Education and Training software are recorded at cost and will be amortized on a straight-line basis over their estimated lives. Ongoing modifications are charged to expense as incurred. Significant modifications and betterments are capitalized. Management has determined that the estimated life of the software is fifteen years and the estimated life on the Education and Training software is five years. As of March 31, 2014, amortization began with one-half of the quarter charged and a full quarter charged during June 30, 2014 and all quarters subsequent to that date.

Treasury Stock

On August 29, 2010, GLPT.PK agreed to purchase 288,000 GLPT shares of at $0.20 to $0.25 per share. GLPT.PK uses the cost method for recording these repurchase agreements.

Off-Balance Sheet Arrangements

There are no off-balance sheet arrangements.

NOTE 3. INCOME TAXES

No income tax benefit has been recorded in the accompanying financial statements since the recoverability of such assets is not reasonably assured at this time.

NOTE 4. COMMON CONTROL

Global Profit Holdings, Inc. and Global Profit Technologies, Inc. have common control interests by Joseph Nemeth.

NOTE 5. RELATED PARTY TRANSACTIONS

Under a consulting agreement entered into on September 1, 2009, Mr. Nemeth will provide all the services required to launch the 4X-DAT™ software, including but not limited to software development, website development, user training modules inclusive of video production, market development and sales efforts. Beginning September 1, 2009 this five year agreement will pay Mr. Nemeth $360,000 per year. This agreement ended in September, 2014. The Consolidated Balance Sheet as of September 30, 2015 includes $1,690,435 in remaining payments due to Mr. Nemeth under the consulting agreement.

NOTE 6. REVENUE

4X-DAT was officially launched during the first quarter of 2015. Revenue was generated from users purchasing non-terminating software user licenses with limited duration account monitoring. In addition, commissions are paid for referrals. Revenues are shown net of commissions.

On January 15, 2015 the Switzerland National Bank announced that they would allow swiss franc to float against the euro. This surprise announcement had significant impact on several foreign exchange currency brokers worldwide. Some forex brokers were forced out of business due to losses incurred from this change, while others changed margin requirements for their trading clients, eliminated trading of certain foreign currencies, or took other steps to manage their business to appropriate risk tolerance levels.

While 4X-DAT™ trading strategies do not utilize the swiss franc and as such no users of Global Profit Technologies' software incurred any direct losses from this change by the Switzerland National Bank, this disruption in the foreign exchange market has had negative impact on certain foreign exchange brokers, one of whom is a brokerage firm that is among the list of forex brokers that 4X-DAT™ interfaces with.

Global Profit Technologies is currently in the process of initiating additional forex brokerage relationships to provide 4X-DAT™ software users increased flexibility and availability of forex brokerage houses to transact their foreign exchange trades.

NOTE 7. UNAUDITED FINANCIAL STATEMENTS

The financial statements presented are unaudited. The company believes that these financial statements present fairly, in all material respects, the financial position of GLPT.PK and the results of its operations and cash flows for the periods presented in accordance with U.S. generally accepted accounting principles ("U.S. GAAP").

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The results of operations for the three and nine months ended September 30, 2015 and September 30, 2014 are not necessarily indicative of the future results.

NOTE 8. SUBSEQUENT EVENTS

On October 21, 2015 Global Profit Technologies selected Automata FX, Ltd. as its brokerage of choice to offer the new platform and the two companies have formed a strategic partnership.With this partnership, GLPT will expand its presence in the retail Forex market by operating both the current B2C (Business to Consumer) component, which offers the 4X-DAT™ software as a third party “plug-in” for traders to purchase and use with the company’s current brokerage options, as well as the new B2B (Business to Business) operation, by licensing the new platform to Automata FX.

Global Profit Technologies, Inc.
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
SEPTEMBER 30, 2015

General

Global Profit Technologies, Inc.'s (GLPT.PK) is an E-Commerce company within the Financial Products and Services Sector and Continuing Education and Training segment of the financial community. GLPT.PK, predominantly through Proprietary Software, unique trading methodologies and revolutionary software applications, with the initial product (4X-DAT), will focus on the over-the-counter foreign currency markets and foreign currency trading in those markets.

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to provide information to assist in better understanding and evaluating our financial condition and results of operations. We recommend that you read this MD&A in conjunction with our condensed consolidated financial statements and the notes to those statements

Results of Operations:

The following should be read in conjunction with the presented financial statements and accompanying notes.

Revenues:

Gross revenues decreased 98% in the third quarter of 2015 compared to the third quarter of 2014, decreasing from $184,210 to $1,458. This decrease is the result of Global Profit purposely suspending software license sales of 4X-DAT software licenses until new forex brokerage relationships are generating revenue in the fourth quarter of 2015.

Gross revenues decreased 94% over the first nine months of 2015 from the first nine months of 2014, decreasing from $564,525 to $33,273. This decrease is the result of Global Profit purposely suspending software license sales of 4X-DAT software licenses until new forex brokerage relationships are generating revenue in the fourth quarter of 2015.

Net revenues decreased 98% in the third quarter of 2015 over the third quarter of 2014, decreasing from $70,885 to $1,458. This decrease is the result of Global Profit purposely suspending software license sales of 4X-DAT software licenses until new forex brokerage relationships are generating revenue in the fourth quarter of 2015.

Net revenues decreased 100% in the nine months of 2015 over the nine months of 2014, decreasing from $205,142 to $28,273. This decrease is the result of Global Profit purposely suspending software license sales of 4X-DAT software licenses until new forex brokerage relationships are generating revenue in the fourth quarter of 2015.

Gross Profits:

Gross profit losses increased 23% in the third quarter of 2015 over the third quarter of 2014, increasing from a loss of $282,449 to a loss of $346,239. This increase in gross profit losses was attributed to lower software license sales with fixed cost of goods amortization expenses.

Gross profit losses increased in the first nine months of 2015 over the first nine months of 2014, increasing from a loss of $693,512 to a loss of $1,021,437. This increase is the result of Global Profit purposely suspending software license sales of 4X-DAT software licenses until new forex brokerage relationships are generating revenue in the fourth quarter of 2015.

Selling, General, and Administrative Expenses:

Selling, general, and administrative expenses decreased by 89% during the third quarter of 2015 as compared to the third quarter of 2014, decreasing from $32,540 to $3,845. This decrease resulted from no operating activities of substance while establishing new forex brokerage relationships to generate revenue.

Selling, general, and administrative expenses decreased by 94% during the first nine months of 2015 as compared to the first nine months of 2014, decreasing from $291,870 to $17,117. This decrease resulted from no operating activities beginning in mid-January, 2015.

Net Income (Loss):

Net loss increased by 11% for the third quarter of 2015 as compared to the third quarter of 2014, increasing from a net loss of $314,988 to a net loss of $349,674. This decrease in loss primarily occurred due to the suspension of operating expenses until a new forex broker relationship is generating revenue.

Net loss increased by 5% for the first nine months of 2015 as compared to the first nine months of 2014, increasing from a net loss of $985,382 to a net loss of $1,038,554. This increase in loss primarily occurred due to the suspension of operating expenses until a new forex broker relationship is generating revenue.

Liquidity and Capital Resources:

At September 30, 2015, cash amounted to approximately $3,171 as compared to $83,813 at December 31, 2014. This decrease in loss primarily occurred due to losses from the suspension of software license sales until a new forex broker relationship is generating revenue.

Cash Flows from Operating Activities

During the three months ended September 30, 2015, net cash used by operations amounted to $375,535 as compared the $1,222,825 used by operations during the nine ended September 30, 2015.

Cash Flows from Financing Activities

During the three months ended September 30, 2015, the company sold 340,000 shares of common stock for $50,000. During the three months ended September 30, 2014, the Company

engaged the law firm of Sichenzia Ross Friedman Ference LLP (SRFF) to represent the Company in its plans for a $5,000,000 offering of securities to accredited investors and the preparation of investor documents involved with this planned private placement memorandum. Additionally, they will immediately begin representing the Company with respect to the Company's continuing Securities and Exchange Commission reporting requirements. Under this agreement, SRFF was awarded 50,000 shares of GLPT.PK.

There was no additional financing activity besides the above during the nine months ended September 30, 2015 or September 30, 2014.
