PROMITHIAN GLOBAL VENTURES, INC.
Notes to Financial Statements
September 30, 2015
(Unaudited)

NOTE 1 – ORGANIZATION AND DESCRIPTION OF BUSINESS

The Company was incorporated in the State of Nevada, under the name Tripod International Inc., on February 6, 2008 and established a fiscal year end of March 31. On April 27, 2009 the Company changed its name to Midex Gold Corp. On May 6, 2013 the Company changed its name to Promithian Global Ventures, Inc.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation
The Company's unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. These unaudited financial statements should be read in conjunction with the unaudited financial statements and footnotes for the year ended March 31, 2015. The results of the six months ended September 30, 2015 are not necessarily indicative of the results to be expected for the full year ending March 31, 2016.

Management further acknowledges that it is solely responsible for adopting sound accounting practices, establishing and maintaining a system of internal accounting control and preventing and detecting fraud. The Company's system of internal accounting control is designed to assure, among other items, that 1) recorded transactions are valid; 2) valid transactions are recorded; and 3) transactions are recorded in the proper period in a timely manner to produce financial statements which present fairly the financial condition, results of operations and cash flows of the Company for the respective periods being presented.

Cash equivalents
The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. There were no cash equivalents for the six months ended September 30, 2015 or the year ended March 31, 2015.

Stock-based Compensation
We account for equity-based transactions with nonemployees under the provisions of ASC Topic No. 505-50, *Equity-Based Payments to Non-Employees* ("ASC 505-50"). ASC 505-50 establishes that equity-based payment transactions with nonemployees shall be measured at the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable. The fair value of common stock issued for payments to nonemployees is measured at the market price on the date of grant. The fair value of equity instruments, other than common stock, is estimated using the Black-Scholes option valuation model. In general, we recognize the fair value of the equity instruments issued as deferred stock compensation and amortize the cost over the term of the contract.

We account for employee stock-based compensation in accordance with the guidance of FASB ASC Topic 718, *Compensation—Stock Compensation,* which requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on their fair values. The fair value of the equity instrument is charged directly to compensation expense and credited to additional paid-in capital over the period during which services are rendered.

Fair Value of Financial Instruments

The carrying amount of cash, notes receivable, accounts payable, accrued liabilities and notes payable, as applicable, approximates fair value due to the short-term nature of these items. The use of different assumptions or methodologies may have a material effect on the estimates of fair values.

ASC Topic 820, "Fair Value Measurements and Disclosures," requires disclosure of the fair value of financial instruments held by the Company. ASC Topic 825, "Financial Instruments," defines fair value, and establishes a three-level valuation hierarchy for disclosures of fair value measurement that enhances disclosure requirements for fair value measures. The carrying amounts reported in the balance sheets for receivables and current liabilities each qualify as financial instruments and are a reasonable estimate of their fair values because of the short period of time between the origination of such instruments and their expected realization and their current market rate of interest. The three levels of valuation hierarchy are defined as follows:

- Level 1: Observable inputs such as quoted prices in active markets;
- Level 2: Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and
- Level 3: Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The Company does not have any assets or liabilities measured at fair value on a recurring or a non-recurring basis.

Income taxes

The Company follows Section 740-10-30 of the FASB Accounting Standards Codification, which requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax assets and liabilities are based on the differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the fiscal year in which the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the fiscal years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the Statements of Income in the period that includes the enactment date.

The Company adopted section 740-10-25 of the FASB Accounting Standards Codification ("Section 740-10-25") with regards to uncertainty income taxes. Section 740-10-25 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under Section 740-10-25, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent (50%) likelihood of being realized upon ultimate settlement. Section 740-10-25 also provides guidance on de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures. The Company had no material adjustments to its liabilities for unrecognized income tax benefits according to the provisions of Section 740-10-25.

Net income (loss) per common share

Net income (loss) per common share is computed pursuant to section 260-10-45 of the FASB Accounting Standards Codification. Basic net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during the period. Diluted net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock and potentially outstanding shares of common stock during the period. The weighted average number of common shares outstanding and potentially outstanding common shares assumes that the Company incorporated as of the beginning of the first period presented. As of September 30, 2015 and 2014 there were no potentially dilutive shares.

Recently issued accounting pronouncements

In August 2014, the FASB issued Accounting Standards Update "ASU" 2014-15 on "Presentation of Financial Statements Going Concern (Subtopic 205-40) – Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern". Currently, there is no guidance in U.S. GAAP about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern or to provide related footnote disclosures. The amendments in this Update provide that guidance. In doing so, the amendments are intended to reduce diversity in the timing and content of footnote disclosures. The amendments require management to assess an entity's ability to continue as a going concern by incorporating and expanding upon certain principles that are currently in U.S. auditing standards. Specifically, the amendments (1) provide a definition of the term *substantial doubt*, (2) require an evaluation every reporting period including interim periods, (3) provide principles for considering the mitigating effect of management's plans, (4) require certain disclosures when substantial doubt is alleviated as a result of consideration of management's plans, (5) require an express statement and other disclosures when substantial doubt is not alleviated, and (6) require an assessment for a period of one year after the date that the financial statements are issued (or available to be issued). The amendments in this Update are effective for public and nonpublic entities for annual periods ending after December 15, 2016. Early adoption is permitted.

The Company has implemented all new accounting pronouncements that are in effect. These pronouncements did not have any material impact on the financial statements unless otherwise disclosed, and the Company does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations.

NOTE 3 – ACCOUNTS PAYABLE

During the year ended March 31, 2015, a service provider forgave $6,227 due to them for professional fees incurred in prior years. As a result the Company has recognized other income of $6,227.

NOTE 4 – PREFERRED STOCK

On September 15, 2014, the Company approved a restatement of the Company's articles of incorporation that included changing the par value of all of the Company's preferred stock to $0.001. This change resulted in an increase to the applicable preferred stock accounts and corresponding reduction in additional paid in capital and is reported through retrospective application in these financial statements.

On December 30, 2014, the Company approved a one for 10,000 reverse split of the Company's Series B preferred stock. All shares issued of Series B preferred have been retroactively restated to reflect the split.

The Company is currently authorized to issue up to 10,000,000 shares of Series A preferred stock, par value $0.001, 90,000,000 shares of Series B preferred stock, par value $0.001, and 20,000,000 shares of Series C preferred stock, par value $0.001.

Each share of Series A Preferred Stock has a price of $1.00. The Series A Preferred Stock has no conversion rights, is entitled to ten (10) votes per share owned, and is entitled to dividends.

Each share of Series B Preferred Stock has a price of $5.00. The Series B Preferred Stock shall be convertible at any time and/or from time to time, into ten (10) shares of the Corporation's common stock. The holders of Series B are entitled to ten (10) votes per share owned, and is entitled to dividends.

Each share of Series C Preferred Stock has a price of $2.50. The Series C Preferred Stock shall be convertible at any time and/or from time to time, into five (5) shares of the Corporation's common stock. The holders of Series C are entitled to five (5) votes per share owned, and is entitled to dividends.

On September 22, 2014, the Company converted $38,000 that was due to Philip Wheelton, CEO, into 15,200 shares of Series C Preferred Stock.

On September 24, 2014, the Company issued 54,800 shares of Series C Preferred Stock for the purchase of Promithian Mining (Nevada), Inc., and all of its mineral claims, for a total purchase price of $137,000.
On December 30, 2014, the Company converted $19,500 that was due to Philip Wheelton, CEO, into 7,800 shares of Series C Preferred Stock.

On March 31, 2015, the Company converted $10,000 that was due to Philip Wheelton, CEO, into 4,000 shares of Series C Preferred Stock.

On June 30, 2015, the Company converted $4,575 that was due to Philip Wheelton, CEO, into 1,830 shares of Series C Preferred Stock.

On September 30, 2015, the Company converted $20,712 that was due to Philip Wheelton, CEO, into 8,285 shares of Series C Preferred Stock.

NOTE 5 - RELATED PARTY TRANSACTION

As of March 31, 2015, the Company owed Philip Wheelton, CEO $214. During the six months ended September 30, 2015, he loaned the Company an additional $25,080. As of September 30, 2015, the Company converted $25,287 of this debt into 10,115 shares of Series C Preferred Stock. The balance due to Mr. Wheelton of $7 was forgiven and credited to additional paid in capital.

NOTE 6 – GOING CONCERN

The Company's financial statements are prepared in accordance with generally accepted accounting principles applicable to a going concern. This contemplates the realization of assets and the liquidation of liabilities in the normal course of business. Currently, the Company does not have sufficient working capital, nor does it have operations or a source of revenue sufficient to cover its operating costs and allow it to continue as a going concern. The Company has an accumulated deficit of $239,034. The Company will be dependent upon the raising of additional capital through placement of our common stock in order to implement its business plan, or merge with an operating company. There can be no assurance that the Company will be successful in either situation in order to continue as a going concern. These financial statements do not include any adjustments relating to the recoverability and classification of recorded assets or the amounts of and classification of liabilities that might be necessary in the event the company cannot continue in existence. Accordingly, these factors raise substantial doubt as to the Company's ability to continue as a going concern.

NOTE 7 - SUBSEQUENT EVENTS

The Company has evaluated subsequent events, in accordance with the provisions of ASC 855 noting no reportable subsequent events.
