Item 4 Issuance History

Preferred Stock

A. The nature of each offering (e.g., Securities Act Rule 504, intrastate, etc): All preferred share issuances by the issuer have been issued in accordance with Section 4 (2) of the Securities Act. These securities were issued to investors in return for cash paid. No services were provided by these investors.

   In May of 2014, Go Green Global Technologies Corp.'s management discovered that its previously issued Preferred Stock was not done in accordance with Nevada law. Go Green rectified this issue by receiving proper authority from its common stockholders through a shareholder vote, and making an offer of rescission to the owners of the Preferred Stock owners. Only one Preferred Stock owner chose to accept the offer of rescission.

   Go Green received funds for an additional 220,000 preferred shares in 2014 that have yet to be issued. The company expects to issue these shares in 2015.

B. Any jurisdictions where the offering was registered or qualified: NONE.

D. The number of shares sold: 5,176,000.
E. The price at which the shares were offered and the amount actually paid to the issuer: $0.25/share offered and paid.
F. The trading status of the shares: All preferred share issuances by the issuer were initially issued as "restricted securities" as defined by Rule 144. The Series A Preferred Stock shall automatically convert to Common Stock upon a qualified public offering of the Company's Common Stock based upon the size and price of such public offering or a sale of all or substantially of the Company's assets. In the event of a reorganization, share exchange, sale, conveyance, or reclassification, in a transaction or series of related transactions, including where there is a shift in more than fifty percent of the voting power of the Corporation ("Change of Control"), each share of Series A Preferred Stock shall, after such reorganization, share exchange or reclassification, be convertible at the option of the holder into the kind and number of shares of stock and/or other securities, cash or other property which the holder of such share of Series A Preferred Stock would have been entitled to receive if the holder had held the Common Stock issuable immediately prior to such reorganization, share exchange or reclassification. In the event of a merger or consolidation to which the Corporation is a party which results in a Change of Control, each share of Series A Preferred Stock shall, after such merger or consolidation, be convertible at the option of the holder into the kind and number of shares of stock and/or other securities, cash or other property which the holder of such share of Series A Preferred Stock would have been entitled to receive if the holder had held the Common Stock issuable upon conversion of such share of Series A Preferred Stock immediately prior to such consolidation or merger plus all accrued and

unpaid dividends on such shares of Series A Preferred Stock through the conversion.

G. Whether the certificates or other documents that evidence the shares contain a legend (1) stating that the shares have not been registered under the Securities Act and (2) setting forth or referring to the restrictions on transferability and sale of the shares under the Securities Act: All preferred share issuances were initially issued as restricted securities as defined by Rule 144. Each certificate had a standard restricted legend stamp.

Item 6 Describe the Issuer's Business, Products and Services

Describe the issuer's business so a potential investor can clearly understand the company. In answering this item, please include the following:

A. A description of the issuer's business operations;

Go Green Global Technologies Corp. is a U.S. water and fuel technology manufacturing, licensing, marketing and development company. We have a portfolio of intellectual property, which includes three U.S. patents with additional patents pending. Through our wholly owned subsidiary, Go Green Technologies Corp., a Nevada corporation located in Connecticut, we provide solutions worldwide utilizing the proprietary patented Sonical™ process for both non-chemical water treatment and fuel combustion applications. Our proprietary technology applies the fundamental principles of electromagnetic induction to cause molecular-level changes in both water and petroleum distillates to deliver unique and significant benefits. The Sonical™ device's unique coil designs and configurations are precisely engineered to create a "forced sequential rephrasing" arrangement that optimizes the effects of the electromagnetic waves on fluids passing through the field.

The Company was established in 2009 and merged with a publicly traded shell in early 2012. Our Common Stock is publicly traded on the OTC Pink Sheets under the ticker "GOGR."

The Company was originally incorporated under the name Photomatica, Inc. on February 22, 2006, pursuant to the laws of the State of Nevada. On August 12, 2008, it changed its name to Secure Runway Systems Corp., and on June 22, 2010, changed its name again to Diversified Secure Ventures Corp. On February 22, 2012, the Company acquired Go Green Technologies Corp. and shortly thereafter changed its corporate name to Go Green Global Technologies Corp.

As noted above, the Company has one wholly-owned subsidiary, Go Green Technologies Corp., which is its principal operating subsidiary.

Additional patents and solutions are created as needed.

B. Date and State (or Jurisdiction) of Incorporation:
February 22, 2006 in Carson City Nevada

C. the issuer's primary and secondary SIC Codes;
3569

D. the issuer's fiscal year end date;
12/31/2014

E. principal products or services, and their markets;
The **Sonical™ Water Treatment System** is designed to prevent and eliminate scale build-up that causes damage to equipment and decreases energy efficiency. It also eliminates bacteria and other harmful microorganisms from a water system without the addition of harmful chemicals (including salts, resins, chlorine, and

others) and without removing beneficial minerals present within the water. A next generation device will also remove arsenic from drinking water, while still providing all the same benefits as the original technology.

The **Sonical™ Fuel Charger** is a pre-combustion device that refines the fuel supply, resulting in more complete and effective combustion. Real world results show that the Sonical™ Fuel Charger can increase fuel economy, improve horsepower, reduce emissions, extend engine longevity, and possibly reduce the need for higher cetane & octane fuels. The device can treat fuel immediately before combustion, or within the storage tank itself. It works for most liquid fuels including: diesel, gasoline, heating oil and bunker fuel.

Item 7 Describe the Issuer's Facilities

The Company began renting a larger facility in April of 2015 from an unaffiliated third party. The location of this facility is 580 Pepper St., Monroe CT 06468. The facility is roughly 12,000 square feet and has an annual monthly rental of roughly $7,500. The Company left its previous facility during the 2nd quarter.

For purposes of the statement of cash flows, the Company considers all short-term instruments purchased with a maturity of three months or less to be cash equivalents.

Accounts Receivable
Accounts receivable are recorded when invoices are issued and are presented in the balance sheet net of the allowance for doubtful accounts. Accounts receivable are written off when they are determined to be uncollectible.

Allowance for Doubtful Accounts
Management provides for estimated losses on accounts receivable based on prior bad debt experience and a review of the existing receivables. It is management's judgment that all accounts receivable were collectible as of June 30, 2015

Inventory
Inventory is stated at the lower of cost, determined using the first-in, first-out ("FIFO") method, or market. Inventory includes the cost of packaging materials. Obsolete or unsalable inventory is reflected at its estimated realizable value.

Shipping and Handling Costs
All amounts billed to customers relating to shipping and handling are classified as revenue. Shipping and handling costs incurred by the Company are classified as costs of goods sold.

Advertising Costs
Advertising and promotion costs are expensed as incurred.

NOTE 1
SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

Property and Equipment
Property and equipment is recorded at cost and is depreciated using the straight-line method over the estimated useful lives of the assets as follows:

Asset	Estimated Useful Lives
Leasehold improvements	15 years
Machinery and equipment	10 years
Office equipment	5-10 years
Vehicles	5 years

Depreciation expense amounted to $11,449 for the 3 months ended September 30, 2015 compared to $7,652 for the 3 months ended September 30, 2014. The increase is the result of additional asset purchases made in 2014. Expenditures for repairs, maintenance and renewals are charged to expense as incurred. Expenditures which improve an asset or extend its estimated useful life are capitalized and depreciated over the assets remaining useful life. When properties are retired or otherwise disposed of, the related cost and accumulated depreciation are removed from the accounts and any gain or loss is included income.

Use of Estimates
The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Accordingly, actual results could differ from those estimates. Such estimates include amounts for the allowance for doubtful accounts, inventory valuation reserves and deferred tax assets and liabilities.

Revenue Recognition
Revenue from the sale of by the Company is recognized upon shipment to the customer, when the transfer of legal title, which is defined and generally accepted in the standard terms, and conditions, arises between the Company and the customer. Costs and related expenses are recorded as cost of sales when the related revenue is recognized. Revenue is recorded net of any applicable sales tax.

Income Taxes
Income taxes are provided for the tax effects of the transactions reported in the financial statements and consist of taxes currently due plus deferred taxes related primarily to differences in accumulated depreciation and net operating loss carryforwards. The deferred tax assets and liabilities represent future tax return consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled. Deferred tax assets and liabilities are reflected at income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes.
