5. Financial Statements

The Issuer is providing financial statements for the most recent period ending December 31, 2013 and the most recent fiscal year ending December 31, 2013, and the fiscal year ended December 31, 2012.

A. Balance Sheet
B. Statement of Operations
C. Statement of Cash Flows; and
D. Financial Notes

These unaudited financial statements are incorporated by reference herein and attached as Exhibit 1.

The financial statements have been retroactively adjusted to account for the reverse split April 2013.

6. Issuer's Business, Products and Services.

Business operations:

Terra Energy Resources, Ltd., is engaged in the process of polymer based recycling and reformation. The Company operates a 25,000 square foot processing facility whereby it reduces and re-circulates oil based polymer compounds back to useable functioning process streams, thereby diverting oil based compounds from waste streams and contaminations. The Company produces a variety of different oil based polymer materials that are sent back to manufacturers for re-use. The Company produces on-going back-end services and support and recycling to a New York Stock Exchange listed company.

Date; State; and Jurisdiction of Incorporation:

On August 14, 2013, the company re-domiciled to Wyoming.

Delaware, February 2008. Prior to domesticating in the State of Delaware, the Company originally incorporated in the jurisdiction of New Jersey in April 2004.

Issuer's Primary and Secondary SIC Codes;

3081– Miscellaneous Plastics
5162- Plastic materials and basic forms

Issuer's Fiscal Year's End Date:

December 31

Principal Products or services, and their markets.

Plastic recycling is the process of recovering scrap or waste polymer compounds and reprocessing the material into useful products, sometimes completely different in form from their original state. Plastics are also recycled/reprocessed during the manufacturing process of plastic goods. Recycled plastics are used by a myriad of industries, including, but not limited to, the food industry, maritime, auto, construction

A new study from a Cleveland-based industry market research firm forecasts that the US demand for recycled plastics will increase by 6.5% per year and reach 3.5 billion pounds by 2016. Demand is being driven by a number of factors, including a growing emphasis on sustainability among packaging and

consumer product manufacturers, advancements in processing and sorting technologies allowing a wider variety of plastic to be recycled into high quality resins, and an improved collection infrastructure which raises the plastic recycling rate.

Continued support by federal, state, and local governments for recycling efforts will also provide a significant boost to recycled plastic collection, processing, and demand. Packaging continues to be the leading market for recycled plastic. Bottles will remain the leading source of plastic for recycling, accounting for over half of all plastic collected.

The Market:

As the national economy sputtered in recent years, the total amount of trash produced by Americans fell alongside consumption. During that same period, however, recycling totals actually climbed slowly, according to recent figures from the U.S. Environmental Protection Agency.

The EPA's report, "Municipal Solid Waste in the United States: 2011 Facts and Figures," shows that 66.2 million tons of MSW were recovered for recycling in 2011, the most recent year for which EPA-generated stats are available. That's an increase of 1.24 million tons compared with the total from 2010 and an increase of 3 million tons from 2007. Overall MSW generation by Americans in 2011, meanwhile, was 250.42 million tons, down slightly from 250.5 million tons generated in 2010 and the 256.5 million tons generated in 2007.

In short, from 2007 to 2011, as the country's total MSW generation slid by 2.4 percent, the nation's total recycling haul went up by 5 percent.

According to the EPA report, paper and paperboard continue to be far and away the materials most recycled within the U.S. MSW stream. In 2011, 45.9 million tons of paper and paperboard were recovered through recycling – that number represents nearly 66 percent of the total weight of paper and paperboard waste generated by Americans. Metals were the next most recycled material with 7.51 million tons (or 34.2 percent) of steel, aluminum and other nonferrous metals being recovered.

The EPA defines MSW as "everyday items," including product packaging, grass clippings, furniture, bottles, food scraps, newspapers and appliances and does not include construction or demolition waste, which can help explain the low tonnage of the metals portion of the MSW stream.

On the plastics front, Americans generated 31.84 tons of plastics in their MSW streams in 2011, and of that, 2.65 million tons (or 8.3 percent) was recovered through recycling. The plastics numbers saw tiny upticks from 2010 to 2011. In the 2010 report, overall generation of the material was 31.04 million tons, and the recycling rate was 8.2 percent.

The agency's report shows that total MSW generation was 4.4 pounds per person, per day (a 6 percent decrease from 2007), and the recycling rate was 1.53 pounds per person, per day – in 2007, that figure was 1.54 pounds.

Overall gains in recycling numbers have in the past decade begun to level off as collection programs and consumer awareness become more well established in municipalities across the country.

"There may be varying reasons why there has been a plateau, from limited expansion, enhancement of recycling infrastructure and programs to limited resources," the EPA said in a statement to *Plastics Recycling Update*. "This is why EPA has been focusing our attention on sustainable materials management, which encourages the use and reuse of materials in the most productive and sustainable way across their entire life cycle."

The 2013 National Postconsumer Non-Bottle Rigid Plastic Recycling Report has been released by the Plastics Recycling Conference on behalf of the American Chemistry Council (ACC). The report found that 61 percent of rigid plastics collected in the U.S. were recycled in Canada or the United States, which is a drastic change from previous years. The large number of recycling is due in part to the recent increase in communities that collect many types or rigid plastics, along with their bottle collections. In the newest consumer access report, Plastic Recycling Collection: National Reach Study, 2012 Update, it was found that more than 1,400 cities and 200 counties in the U.S. collect all rigid plastic containers.

According to some estimates, plastics make up about 10% of the waste stream in the United States. Most plastics are made using natural gas or some other kind of petrochemical product, so the more plastic is used, the more petroleum products are needed -- and the environmental impacts of the petrochemical industry have been well documented.

7. Describe the Issuer's Facilities.

The Company is provided with office space at its New York address within the office space of one of its principal shareholders at no cost. It has a 25,000 square foot facility located in the province of Ontario, Canada, where it maintains its recycling operations.

8. Officers, Directors, and Control Persons

Names of Officers and Directors:

Chair of Board of Directors/President/Secretary: Rodrigo Von Unger, 38

Beneficial Ownership: 2,000,000 shares
Compensation:

Control Persons:
Mr. Von Unger is a native of Chile and has spent experience as an entrepreneur and venture capitalist throughout Latin America. He has managed large projects for both national and multi-national corporations throughout Mexico and Chile. He accustomed to working with and has been responsible for large budges, executing multi-million dollar strategies in the food and pharmaceutical industries. He is a graduate of Hult International School of Business with an MBA in Corporate Finance.

Name - 33, Karthik Shetty, Treasurer
Beneficial Ownership: None

Mr. Shetty is a native of Banglore India, and has spent the past seven years involved in the construction and development of recycling systems in China and India.

Legal/Disciplinary History:

1. A conviction in a criminal proceeding or named as a defendant in a pending criminal proceeding (excluding traffic violations and other minor offenses):

NONE

2. The entry of an order, judgment or decree, not subsequently suspended or vacated, by a court of competent jurisdiction that permanently or temporarily enjoined, barred, suspended or otherwise limited such person's involvement in any type of business, securities, commodities, or banking activities.

TERRA ENERGY RESOURCES, LTD.

NOTES TO UNAUDITED FINANCIALS

Three months and nine months ended September 30, 2015 and year ended December 31, 2014

NOTE 1 - ORGANIZATION AND BASIS OF PRESENTATION

Interim Financial Information

The accompanying unaudited consolidated financial statements of Terra Energy Resources, Ltd. (the "Company" or "we") have been prepared in accordance with principles generally accepted in the United States of America for interim financial information and applicable rules of Regulation S-X. Accordingly, they do not include all of the information and notes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The interim financial statements and notes should be read in conjunction with the financial statements and notes thereto included in annual report ending December 31, 2013.

Acquisitions

In July of 2013, the Company acquired the subsidiary Energy Recyclers Inc., in a tax-free exchange of common shares, 189,147,000 shares of common voting stock of the Company for 100% of the voting common shares of Energy Recyclers Inc. Effective with the year-end financial statement of December 31, 2012, the Company has begun to report its financial operations on a consolidated basis.

Basis of Consolidation

The consolidated financial statements include the accounts of Energy Recyclers, Inc.

Development Stage Activities

With acquisition of Energy Recyclers, Inc., the Company has exited the development stage. The Company has begun to experience operational gains during the last two quarters of year ended December 31, 2014. Nonetheless, management anticipates that it will require additional capital resources, including the net proceeds from additional equity and debt financing transactions, to generate revenue and achieve positive cash flows from operations.
The Company's has been able to generate positive cash flows, however, continuing that trend depends upon a variety of factors, including the acceptance in the market for the Company's products and various other factors, some of which may be beyond the Company's control. There can be no assurance that necessary financing transactions will be consummated or that sufficient revenue will be generated.

On January 29, 2015, a reverse split of the Company's common stock became effective, the financial statements herein have been adjusted to reflect that reverse. See NOTE 6 below for details of this action.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Cash

Cash consists principally of currency on hand, and demand deposits at commercial banks. The Company had cash of $274,776 September 30, 2015 and $276,232 on June 30, 2015; $258,447 on March 31, 2014 and $258,607 on December 31. 2014.

Revenue Recognition

The Company follows the guidance of Accounting Standards Codification ("ASC") Topic 605, formerly, Staff Accounting Bulletin ("SAB") 104 for revenue recognition. In general, the Company records revenue when persuasive evidence of an arrangement exists, services have been rendered, the sales price to the customer is fixed or determinable, and collectability is reasonably assured. Revenues from services are recognized when the services are performed, evidence of an arrangement exists, the fee is fixed and determinable and collectability is probable. In circumstances when these criteria are not met, revenue recognition is deferred until resolution occurs.

Net Income or (Loss) Per Share of Common Stock

Basic and diluted loss per common share is based upon the weighted average number of common shares outstanding during the period computed under the provisions of Accounting Standards Codification subtopic 260-10, Earnings per Share ("ASC 260-10"). Diluted income (loss) per share includes the dilutive effects of common stock equivalents on an "as if converted" basis.

Recently Issued Accounting Pronouncements

Management does not believe that any recently issued, but not yet effective accounting standards, if adopted, will have a material effect on Companies consolidated financial statements.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in operations in the period enacted. A valuation allowance is provided when it is more likely than not that a portion or all of a deferred tax asset will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income and the reversal of deferred tax liabilities during the period in which related temporary differences become deductible. The benefit of tax positions taken or expected to be taken in the Company's income tax returns are recognized in the condensed financial statements if such positions are more likely than not of being sustained.

In accordance with ASC 740-10, the Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting this standard, the amount recognized in the financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority.

Fair Value of Instruments

ASC 825-10, Financial Instruments requires disclosure of the fair value of certain financial instruments. The carrying value of cash, and accounts payable and accrued liabilities, as reflected in the balance sheets, approximate fair value because of the short-term maturity of these instruments. All other significant financial assets, financial liabilities and equity instruments of the Company are either recognized or disclosed in the financial statements together with other information relevant for making a reasonable assessment of future cash flows, interest rate risk and credit risk. Where practicable the fair values of financial assets and financial liabilities have been determined and disclosed; otherwise only available information pertinent to fair value has been disclosed.

The company follows ASC 820-10, Fair Value Measurements and Disclosures and Accounting Standards Codification subtopic 825-10, Financial Instruments ("ASC 825-10"), which permits entities to choose to measure many financial instruments and certain other items at fair value.

NOTE 3 - PROVISION FOR INCOME TAXES

The Company files income tax returns in the United States federal jurisdiction and certain state jurisdictions. With a few exceptions, the Company is no longer subject to U.S. federal or state income tax examination by tax authorities on tax returns filed before December 31, 2006. The Company will file its

U.S. federal return for the year ended December 31, 2013 and 2012. The federal and state filing payments have not been made for 2013, and 2012, respectively. The U.S. federal returns are considered open tax years for years 2007 - 2013. There are currently no corporate tax filings under examination by IRS tax authorities.

We did not provide any current or deferred U.S. Federal Income Tax provision or benefit for any of the periods presented because we have experienced operating losses since our date of incorporation. Accounting for the Uncertainty in Income Taxes when it is more likely than not that a tax asset cannot be realized through future income, the Company must allow for this future tax benefit. We provided full valuation allowance on the net deferred asset, consisting of net operating loss carry forwards, because management has determined that it is more likely than not that we will not earn income sufficient to realize the deferred assets during the carry forward period.

NOTE 4- NOTES PAYABLE

During the period ended September 30, 2015, the Company's Notes payable remained $236,312.

NOTE 5- LIQUIDITY

These financial statements have been prepared assuming that the Company will continue as a going concern. The Company is exiting the development stage. While in the development stage it has accumulated net losses of $(3,257,834), from inception through September 30, 2015. The Company has historically been financed through an issuance of common stock.

As of September 30, 2015, the Company's principal source of liquidity consisted of $274,776 of cash. The Company had net operating loss of $ 33,497 for the three months ended September 30, 2015 and a nine month loss of $41,143 through September 30, 2015; and an operating profit of $89,064 for the year ending December 31, 2014

NOTE 6 – STOCKHOLDERS' DEFICIT

Preferred Stock

The Company is authorized to issue 5,000,000 shares of Preferred stock, par value of $ 0.001 per share. No preferred series has been designated and none are issued and outstanding

Dividends

During the three months ended March 31, 2015 and the year ended December 31, 2014, the Board of Directors has declared a reverse stock dividend of 1 for 1000 shares held on the effective date January 29, 2015. This reverse dividend did not alter the authorized equity of the corporation which remains 505,000,000 at par value $0.001.

Common Stock

The Company is authorized to issue 500,000,000 shares of common stock, par value $0.001 per share.

The Company did not issue common stock during the quarter ended September 30, 2015.

In February and March of 2015, the Company issued 3,365,000 common restricted shares at par value: 2,400,000 were issued to United Recyclers to complete the Company's acquisition of its recycling activities, the balance were issued for services. All said shares were restricted and valued by contract at $0.001

In October 2014, the Company issued 10,000 common restricted shares for services valued at $37,627.00, (issue adjusted to reflect reverse split effective on 29-Jan-2015.

On December 2, 2014, the Company declared a reverse split of its shares of one (1) share of each common share for each one-thousand (1,000) shares held. A majority of the shareholders approved the reverse on December 11, 2014. The Financial Industry Regulatory Authority ("FINRA") approved the action and announced the reverse on January 29, 2014, on which date it became effective.

The financial statements attached hereto have not been adjusted to reflect the change in equity resulting from the reverse split, because they were completed prior to the split which is effective in the first quarter of 2015. As of February 28, 2015, there are 494,333 shares issued and outstanding, of which 107,752 are free trading. As a result of the reverse split the CUSIP identification number for our stock was changed to 8801J200 (see Section 4, page 6).

During the three month period December 31, 2014, the Company has not issued any shares of its common or preferred shares. The Company has not issued any of its common or preferred shares during the year completed December 31, 2014.
