5) Financial Statements: Appended at end of this document.

6) Describe the Issuer's Business, Products and Services

TeleFix Communications, Inc., operating subsidiary of Parent company (Holdings), private entity was founded in March 2010, pre-launched at the CTIA Wireless Show in Las Vegas. We are a woman-owned turn-key wireless communications infrastructure services provider and business technologies company.

Product- (COPS®)

-Proprietary IoT technology using Mobile to mobile video communications real time interactive platform to monitor projects and field work sites for service industries;

Services:

- -Remote Monitoring from Command Center (NOCS®)
- -Contract Infrastructure, Field and Professional services for major telecom carriers, Public Safety and original equipment manufacturers (OEMs).

COPS & NOCS — This solution evolved from our need to meet the immense demand for services for which the company was founded. To solve multiple problematic issues within the telecom sector and from our own inability to adequately meet and deliver on abundant service contracts, we innovated a proprietary process utilizing forward-thinking technology (COPS). We systemized a tedious project close out reporting and documentation process by integrating Internet of Things (IoT) technologies, mobile to mobile (m2m) video communications on a real time live interactive broadcast platform. The platform's capabilities enable precise delivery of TeleFix's mission and solution. Being able to remotely monitor multiple work sites either virtually or from our planned expert staffed command center (NOCS®) meets the higher level of quality and cost efficiency for which so many services industries strive. An added and key benefit of this technology is bridging the skills gap so common in today's technology workplace. From the command center, critical skills are delivered real time then stored for training purposes.

Most importantly, the solution will improve overall cash flow for service contractors with the elimination of time to collect, increase margins and profitability for related industries such as construction and engineering. We want this solution to advance industries across multiple verticals and improve lives. The company is in the process of a product roll-out. This will be a license and subscription based Software as a Service (Saas) business segment.

Multiple additional revenue streams will be derived via mobile devices and data usage.

The solution received an innovative recognition award from Verizon Wireless in October 2013 for our forward-thinking in the use of mobile technology. We have now earned a Vertical Solution Partnership contract which provides us the connectivity required using most expansive LTE (4G) network with discounted rates.

TeleFix Specialty Infrastructure services surpass current industry norms. Our promise is to ensure lower costs of services by getting work done right the first time. Employing our proprietary COPS technology and NOCS solution specifically developed to solve the problem of cost overages and poorly performing networks, we deliver on our promise as well as enable contractors within the industry to deliver higher quality of work and better margins all around.

The company's primary customers are private mobile carriers and equipment manufacturers.

TeleFix is poised to deliver exemplary services in design, project document management, network planning, deployment, quality control, and cost efficiency. The company areas of concentration are small cells deployment and RF Engineering.

Our key advantage to the is our genuine concern for our customers, employees, and passion for the industry. Our continual commitment is to meet the requirements for higher quality and efficiencies; giving customers what they want at the price they want. These are the main pains in the industry - higher overall quality in network performance to the end consumer; faster data speeds and enhanced voice service – reduced dropped calls, lower upgrade build costs, improve margins - Get the work done right the first time. Get jobs done fast.

A. Date and State (or Jurisdiction) of Incorporation:

January 14th, 2009 (Holdings "Parent")

B. The issuer's primary and secondary SIC Code -

Primary – 4812; 4899 Radio Telecommunications - Cellular/Wireless

Secondary - 1623-12 Telecommunications Equipment/Systems, Cabling & Wiring

C. The issuer's fiscal year end date;

June 30th

- D. Principal products or services, and their markets:
 - Video mobile to mobile project and documentation system COPS® & NOCS® Proprietary Technology
 - Wireless Network Infrastructure Service

7) Describe the Issuer's Facilities

The Company has a lease agreement for 2800 SF of office space. This is a temporary space to house administrative and temporary technical command center until the Company is able to remodel permanent space of approximately 5000 SF. This space will mostly be accommodating TeleFix's full 24/7/365 Technical Command Center. This remote monitoring command center (NOCS®) is key to TeleFix's full execution of service delivery's business model of "Get the Job Done Right the First Time."

8) Officers, Directors, and Control Persons

A. <u>Names of Officers, Directors, and Control Persons</u>

<u>Name</u>	<u>Position</u>

(F/K/A Sierra Desert Holdings and Subsidiary TeleFix Communications, Inc.) Notes to Consolidated Financial Statements, Unaudited Fiscal Quarter Ended 9/30/2015

Note 1 - Material Changes in Company

- a) Accounts Payable of \$44,325 and Issuable Stock in the amount of \$68,291 to outside legal counsel were reversed from FY 2014. This was a result of the legal firm's non completion of work plus their merger and restructuring of the partners. TeleFix has recorded this as a prior period adjustment in order to not artificially inflate the net income of the company.
- b) Additional investment of \$30k was received from a private investor in fiscal year, Quarter 1, 2016. The investment is secured by a promissory note, corporate and founder's personal guaranty with an interest rate of 14%.
- c) Doubtful accounts receivable were deemed non-collectable and written off during this period.
- d) Intercompany loan of \$10,000 in cash was issued to affiliated entity for costs to ramp up for delivery of VPP contract with Verizon Wireless.
- e) Unused tower equipment assets were sold in this reporting quarter. The equipment had been depreciated almost in full which resulted in a gain of \$3,512 to the company.
- f) Since the company has shifted to pre–revenue as it prepares for technology roll-out it was decided to not incur or accrue any salaries for the period.
- g) A payment plan was entered into with the IRS for payroll taxes due. The liability was moved to long term liability on the balance sheet.
