The information included in this report should be read in conjunction with information posted under the Company’s name on the OTC Markets website; www.otcmarkets.com.

The operating results for the periods presented are not necessarily indicative of financial results for the full year. The Company is currently a development stage company under the as defined by Statement of Financial Accounting Standards ("SFAS") No.7 *Accounting and Reporting by Development* Stage *Enterprises.*

The accompanying financial information has been prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP)

Use of estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from these estimates.

Fair value of financial instruments

For certain of the Company's financial instruments, including cash and cash equivalents, accounts payable and accrued expenses, the carrying amounts approximate fair value due to their short maturities.

Cash and cash equivalents

For purposes of the statements of cash flows, the Company defines cash equivalents as all highly liquid debt instruments purchased with a maturity of three months or less.

Furniture and equipment

Furniture and equipment are stated at cost and are depreciated using the straight-line method over their estimated useful lives of 3·7 years.

Revenue recognition

The Company applies the guidance within SEC Staff Accounting Bulletin No. 104, Revenue Recognition in Financial Statements (SAB 104) to determine when to properly recognize revenue. SAB 104 states that revenue generally is realized or realizable and earned when persuasive evidence of an arrangement exists, services have been rendered, the seller's price to the buyer is fixed or determinable and collectability is reasonably assured.

The Company's reporting currency is the US dollar (USD).

Stock based compensation

The Company accounts for stock option grants in accordance with SFAS No. 123(R), *Share Based Payment*. The Company records the cost of employee and non-employee services received in exchange for an award of equity instruments based on the grant date fair value of the award. That cost is recognized over the period during which an employee is required to provide service in exchange for the award the requisite service period (usually the vesting period). No compensation cost is recognized for equity instruments for which employees do not render the requisite service. The grant-date fair value of employee share options and similar instruments is estimated using a Black-Scholes option-pricing model. If an equity award is modified after the grant date, incremental compensation cost will be recognized in an amount equal to the excess of the fair value of the modified award, if any, over the fair value of the original award.

Income taxes

The Company accounts for income taxes in accordance with SFAS No. 109, "Accounting for Income Taxes." Deferred taxes are provided on the liability method whereby deferred tax assets are recognized for deductible temporary differences, and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

On January 1, 2007, the Company adopted Financial Accounting Standards Board {FASB) Interpretation No. 48, *Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109* (FIN 48). The Interpretation gives guidance related to the financial statement recognition and measurement of a tax position taken or expected *to* be taken in a tax return, and requires that we recognize in our financial statements the impact of a tax position, if that position is more likely than not to be sustained upon an examination, based on the technical merits of the position.

Loss per share

The Company reports loss per share in accordance with SFAS No. 128, *Earnings per Share*. Basic loss per share is computed by dividing the net loss by the weighted average number of common shares outstanding. Diluted loss per share is computed by dividing net income by the weighted average number of common shares used in the basic earnings per share calculation plus the number of common shares that would be issued assuming exercise or conversion of all potentially dilutive common shares outstanding. The Company excludes equity instruments from the calculation of diluted weighted average shares outstanding if the effect of including such instruments is anti-dilutive to earnings per share. For the periods presented, all equity instruments are considered anti-dilutive.

Development Stage Company

The Company is subject to risks and uncertainties, including new product development, actions of competitors, reliance on the knowledge and skills of its employees to be able to service customers, and availability of sufficient capital and a limited operating history. Accordingly, the Company presents its financial statements in accordance with the accounting principles generally accepted in the United States of America that apply in establishing new operating enterprises. As a development stage enterprise, the Company discloses the deficit accumulated during the development stage and the accumulated statement of operations and cash flows from inception of the development stage to the date on the current balance sheet. Contingencies exist with respect to this matter, the ultimate resolution of which cannot presently be determined.

The Company, and its major controlling shareholder Green Cures Inc., have agreed that certain financing that was previously intended to be used for the financial auditing and legal services for Green Cures Inc., will be assigned to Green Cures & Botanical Distribution Inc., to pay the balances that are owed to the corresponding Government agencies and service providers. On August 10, 2015, the company has made one partial payment, to a corresponding Government agency, for the above outstanding tax liability. The company will continue to update its financial disclosures once this balance has been paid in full, or each time a partial payment is made.

The Company has sustained operating losses of $35,541,443 since inception. The Company's operating losses include the losses of the predecessor operations of the Company. As noted above, on February 25, 2014, the Company completed the sale of its entire business, including all assets and liabilities, to Privileged World Travel Club, Inc. ("PWTC"), a Delaware corporation, under a Material Definitive Agreement entered on February 1, 2014. Under the Material Definitive Agreement, PWTC assumed all of the Company's outstanding debts and agreed to indemnify the Company from any and all claims related thereto for a purchase price consisting of 4,062,500 shares of common stock of Privileged World Travel Club, Inc. The Company's continuation as a going concern is dependent on management's ability to develop profitable operations, and / or obtain additional financing from its stockholders and / or other third parties.

The accompanying unaudited financial statements have been prepared assuming that the Company will continue as a going concern; however, the above conditions raise substantial doubt about the Company's ability to do so. The unaudited financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classifications of liabilities that may result should the Company be unable to continue as a going concern.

If management projections are not met, the Company may have to reduce its operating expenses and to seek additional funding through debt and/or equity offerings.

A) Nutritional Supplement/Dietary

According to The Council Responsible for Nutrition (CRN), and economic and market research reports conducted by leading sales and marketing firms, the Nutritional Supplement/Dietary industry in the United States is worth over $31 Billion. Over 50% of all Americans use some form of dietary supplement, and it is estimated that approximately 40% of Americans use nutritional supplements. Green Cures management believes that the aging US population, together with an increase in consumer health concerns, signals continuing growth and opportunity in this market.

B) Health and Wellness

Research also shows that the Health and Wellness industry in the United States generates over $153 Billion per year, which accounts for approximately one quarter of global health and wellness sales. The health and wellness market has continued growing at a rate of about 5% annually, and management believes that much of this continued growth can be attributed to the American consumers' interest on promoting healthy lifestyles and total body wellness.

C) Hemp

According to estimates published by the Hemp Industry Association, in the year 2013, American retailers sold approximately $581 million of products containing hemp seeds and hemp fiber. Due to the similarity in leaf shape, hemp is frequently confused with marijuana. In the United States and many countries around the world, the consumption and use of Hemp is legal. Products like Hemp Fiber, Hemp Protein, and Hemp Oils are used every day by the general public.
