STL Marketing Group, Inc.
Attn: Shareholders
10 Boulder Crescent, Suite 102
Colorado Springs, CO 80903

Dear Shareholders:

We want to wish everyone a Happy New Year and hope that the holidays were joyful and filled with family and friends. As we start this year, we wanted to update our stakeholders and follow-up on our last update. Updates will be in various forms, be that Social Media, this type (OTC) of update or full fledged Press Releases or 8Ks, as necessary.

Capital continues to be, and appears that it will continue to be, a serious restraint. This is not new, but it is a concern for our ability to move as quickly as we want on the initiatives and opportunities we have worked so hard to develop. We do believe our Risk Factors adequately explain the possible detrimental effects of this lack of sufficient working capital, but it is important to remind us all of the urgency and prioritization that we need to keep in our planning and work schedule.

As our delay in Costa Rica continues, we are migrating more and more to an Application based company. All of our active business is in this "Product as a Service" or "Software as a Service" model. PhoneSuite is migrating to a communications application, used to be a PBX, and Kinetos and F3TCH are also software/ application type products or services. We will be working to change our overall image to emphasize this more than energy until such a time, if any, that we can proceed in Costa Rica.

We have received a few questions on why not renewable energy somewhere else? The reasons are many but they are mostly capita related. In Costa Rica we could do a smaller project (less capital) and have a decent price for the energy produced and in our opinion there is a definite need. Anything in the USA or other countries is that much larger and the capital requirements would be out of our reach, not to mention that we already invested a very significant amount in Costa Rica. Investment potentially lost in full and the Company simply cannot afford to gamble on energy until we stabilize the Company's finances.

Business Status

- **PhoneSuite Solutions.** We do have some progress in this area. As reported in Social Media, we did undertake several WebEx presentations to hotels in the Caribbean. Our dealer in Barbados has hired new sales staff and we have positive activity and have two quotes due to customers by the end of this week and next. While quotes and presentations do not mean revenue, the fact we are quoting and doing sales presentations bring us closer to generating much needed revenue and building positive momentum. It would be very good to have some of these convert to actual sales and we remain positive on our outlook.

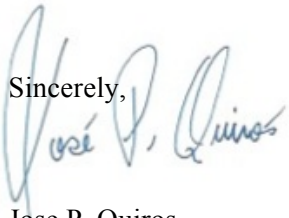

- **Kinetos Software.** We have not progressed here on our contract mainly to the work being completed on PhoneSuite (closest to revenue generation) and F3TCH. In our opinion, the relationship between the companies is excellent (Kinetos is our development partner for F3TCH) and we fully expect to finally get the agreements completed this month. Our sales presentation/ meeting is scheduled for this month as previously noted on Social Media, we will keep everyone updated. We did mention that a Power Point is available on our OTC site and noted that we did not post as promised. We have posted that presentation today. Our apologies for the oversight.

- **F3TCH.** The agreement with Camposagrado is almost finalized. We believe any feedback and final comments will be provided shortly so that we can get this signed. As mentioned, this is a related party agreement. Initial calls with major chains has been positive and our primary tasks for this month are to show the proof of concept, ensure interoperability with PhoneSuite, and develop the Google relationship further.

We believe we have good opportunities ahead of us and that with hard work and focusing on actionable and achievable actions within a planned development we can likely get to our goals or better said, provide us the best chance to achieve our goals. We certainly appreciate everyone's support and goodwill.

As always please direct any questions to us at info@v3rsant.com .

Sincerely,

Jose P. Quiros
CEO

This shareholder update contains forward-looking statements as defined by the Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements concerning plan, objectives, goals, strategies, future events or performance, and underlying assumptions and other statements that are other than statements of historical facts. These statements are subject to uncertainties and risks including, but not limited to, product and service demand and acceptance, changes in technology, economic conditions, the impact of competition and pricing, government regulation, and other risks described in statements filed from time to time with the Securities and Exchange Commission. All such forward-looking statements whether written or oral, and whether made by or on behalf of the Company, are expressly qualified by the cautionary statements that may accompany the forward-looking statements. In addition, the Company disclaims any obligation to update any forward-looking statements to reflect events or circumstances after the date hereof.
