About Dyadic International, Inc.

Dyadic International, Inc. is a global biotechnology company which uses patented, licensed and proprietary technologies to conduct research, development and commercial activities for the development and manufacturing of human and animal vaccines, monoclonal antibodies, biosimilars and/or biobetters, and other therapeutic proteins. Dyadic utilizes an integrated technology platform based on the patented and proprietary strains of the C1 microorganism, which enables the development and large scale manufacture of low cost proteins. Dyadic believes that the C1 technology platform has potential to be a safe and efficient expression system that may help speed up the development and production of biologics at flexible commercial scales. In particular, as the aging population grows in developed and undeveloped countries, Dyadic believes C1 may help bring biologic drugs to market faster, in greater volumes and at lower cost to drug developers and manufacturers and, hopefully, to patients and the healthcare system. Dyadic pursues research & development collaborations, licensing arrangements and other commercial opportunities to leverage the value of its technologies by providing its partners and collaborators with the benefits of developing and manufacturing and/or utilizing the biopharmaceuticals which these technologies help produce. Please visit Dyadic's website at www.dyadic.com for additional information, including details regarding Dyadic's plans for its biopharmaceutical business.

Dyadic trades on the OTCQX tier of the OTC marketplace.
