Administrative Actions Either By or Against the Company That Could Have a Material Effect on the Company's Business, Financial Condition or Operations and any Current, Past or Pending Suspensions by a Securities Regulator.

On July 2, 2003, Enterasys Networks, Inc. filed a complaint against U.S. Wireless in the United States District Court for the Western District of Kentucky, Louisville Division. The case is Enterasys Networks, Inc. v. U.S. Wireless Online, Inc., Civil Action No. 3:03CV-405-H. Enterasys is seeking $181,844.40 plus interest at 8% from November 30, 2001, along with court costs and attorney's fees. The claim arises from a dispute concerning a convertible note payable. In September of 2003, U.S. Wireless filed an answer and counterclaim, denying all allegations and seeking damages. Enterasys has filed a motion to dismiss the U.S. Wireless counterclaim. The Company entered a settlement agreement with Enterasys Networks, Inc. whereby the Company will pay $2,500 per month for 32 months for a total of $80,000.

In the fourth quarter of 2005, three "non-material" lawsuits were filed against the Company representing two tower management companies and one equipment installation firm resulting from certain amounts invoiced that are strongly disputed by the Company. Collectively these suits seek less than $100,000 in damages.

The Company filed a suit in the United States District Court, Western District of Kentucky, Louisville Division on December 30, 2005, against Thomas J. Busic and Michael D. Marlowe. The Complaint alleges breach of contract, breach of fiduciary duties and unlawful business practices, defamation, tortuous interference and injunctive relief, violation of the Computer Fraud and Abuse Act, unlawful access to stored communications in violation of 18 U.S.C. §2701, and civil actions under Kentucky Unlawful Access to a Computer Statute and violation of Kentucky Trade Secret Statute. The Company seeks an order from the court declaring breach of contract, an award of actual and punitive damages and an order restraining and enjoining Defendants from their unlawful activities.

On or about December 30, 2005, a complaint was filed against the Company and its President, Rick Hughes by MJS Holdings, Inc., Thomas J. Busic, Jr.

and Michael D. Marlowe in the Common Pleas Court of Franklin County, Ohio. The Complaint alleges breach of contract, breach of fiduciary duty, fraud in the inducement, and negligent misrepresentation in the inducement. All allegations are in regard to the Acquisition Agreement of January 1, 2005 between the parties and related contracts. The Plaintiffs request an order that the Acquisition Agreement is void and asks for an award of an amount not less than $25,000 along with attorney fees, prejudgment interest and costs.

Both parties agreed immediately to stay the advancement of the suits to negotiate a settlement. On January 1, 2006, the Company entered into an agreement with the former shareholders of its subsidiary, MJS Holdings, Inc., to rescind the business acquisition consummated in 2005 effective January 1, 2006. In connection therewith, on June 16, 2006, the Company executed a memo of understanding providing for the sale of substantially all of the assets of MJS, including, inventories, equipment, receivables and contract rights to the former owners for a promissory note payable to the Company in the amount of $250,000. In addition all shares of capital stock of MJS are to be returned to the former owners and, correspondingly, all shares of capital stock of U.S. Wireless held by MJS's former owners are to be returned to the Company. A note payable by MJS to the Company in that amount is to be executed providing for payment beginning on the first day of the thirteenth month of the note date, amortized monthly over the next five years. The note will be interest free for the first twelve months and bear interest at 5% per annum thereafter.

On or about March 2, 2006, PNC Bank filed a complaint against the Company in Jefferson Circuit Court, Division Three with Judge Abramson, Case No. 06-CI-06043. The complaint was for a total of $28,044.60 for unpaid rent and expenses. The parties entered into an Agreed Judgment in the principal amount of $12,417.94 and interest on that amount at the rate of 1 ½% per month from April 2, 1006 until paid along with attorney fees and court costs of approximately $2,800. PNC then filed a motion to enforce the Agreed Judgment asking for additional damages. The Company filed a motion for leave to file a late answer with the Court which was granted by the Court.

We are not aware of the final disposition of the above cases for the reason that we do not have all of the Company's records prior to the custodial

proceedings described in Part C. Item VII. A.4., above. We have not been contacted by any of the above litigants since the custodial proceedings were concluded.

There are no current, past or pending suspensions of the Company by a securities regulator. However, the Company's common stock ceased being quoted on the OTC Bulletin Board. On or about March 3, 2010, the Company filed a Form 15 with the SEC pursuant to Exchange Act Rule 12g-4(a)(2).. See Item VIII.A.10, above.

4**The Effect of Existing or Probable Government Regulations on Our Business**

Our business may be subject to numerous governmental regulations that impact our business at the parent and subsidiary levels. These regulations are discussed below.

Governmental Regulations That Impact Us at the Parent Level:

At the present time there are no governmental regulations that have a material impact on the Issuer.

Section 15(g) of the Securities Exchange Act of 1934

Our shares are covered by Section 15(g) of the Securities Exchange Act of 1934 ("Exchange Act") and Rules 15g-1 through 15g-6 promulgated thereunder. They impose additional sales practice requirements on broker-dealers who sell our securities to persons other that established customers and accredited investors (generally institutions with assets in excess of $5,000,000 or individuals with net worth in excess of $1,000,000 or annual income exceeding $200,000 or $300,000 jointly with their spouses).

Rule 15g-1 exempts a number of specific transactions from the scope of the penny stock rules (but is not applicable to us).

Rule 15g-2 declares unlawful broker-dealer transactions in penny stocks unless the broker-dealer has first provided to the customer a standardized disclosure document.

Rule 15g-3 provides that it is unlawful for a broker-dealer to engage in a penny stock transaction unless the broker-dealer first discloses and subsequently confirms to its customers current quotation prices or similar market information concerning the penny stock in question.

Rule 15g-4 prohibits broker-dealers from completing penny stock transactions for a customer unless the broker-dealer first discloses to the customer the amount of compensation or other remuneration received as a result of the penny stock transaction.

Rule 15g-5 requires that a broker-dealer executing a penny stock transaction, other than one exempt under Rule 15g-1, disclose to its customer, at the time of or prior to the transaction, information about the

sales person's compensation and the compensation of any associated person of the broker-dealer.

Rule 15g-6 requires broker-dealers selling penny stocks to provide their customers with monthly account statements.

Rule 3a51-1 of the Exchange Act establishes the definition of a "penny stock" for purposes relevant to us, as any equity security that has a minimum bid price of less than $5.00 per share, subject to a limited number of exceptions. It is likely that our shares will be considered to be penny stocks for the immediately foreseeable future. For any transaction involving a penny stock, unless exempt, the penny stock rules require that a broker or dealer approve a person's account for transactions in penny stocks and the broker or dealer receive from the investor a written agreement to the transaction setting forth the identity and quantity of the penny stock to be purchase.

In order to approve a person's account for transactions in penny stocks, the broker or dealer must obtain financial information and investment experience and objectives of the person and make a reasonable determination that the transactions in penny stocks are suitable for that person and that that person has sufficient knowledge and experience in financial matters to be capable of evaluating the risks of transactions in penny stocks.

The broker or dealer must also deliver, prior to any transaction in a penny stock, a disclosure schedule prepared by the SEC relating to the penny stock market, which, in highlight form, sets forth:

- the basis on which the broker or dealer made the suitability determination; and
- that the broker or dealer received a signed, written agreement from the investor prior to the transaction.

Disclosure also has to be made about the risks of investing in penny stocks in both public offerings and in secondary trading and commissions' payable to both the broker-dealer and the registered representative, current quotations for the securities and the rights and remedies available to an investor in cases of fraud in penny stock transactions. Finally, monthly statements have to be sent disclosing recent price information for the penny

stock held in the account and information on the limited market in penny stocks.

The above-referenced requirements may create a lack of liquidity, making trading difficult or impossible, and accordingly, shareholders may find it difficult to dispose of our shares.

RISK FACTORS

An investment in our securities involves a high degree of risk. Prospective investors should carefully consider the following risk factors and the other information in this disclosure statement before investing in our securities. Our business and results of operations could be seriously harmed by any of the following risks. The risks and uncertainties described below are those that our management currently believes may significantly affect us. If any of the following risks actually occurs, our business, financial condition and results of operations could be harmed and investors in our securities could lose part or all of their investment in our securities

PLEASE CONSIDER THE FOLLOWING RISK FACTORS BEFORE DECIDING TO INVEST IN OUR SECURITIES.

RISKS RELATED TO OUR COMPANY

We have a history of significant net operating losses and may never achieve profitability.

We have a history of significant net operating losses. We cannot assure you that we will ever achieve profitability. Even if we do achieve profitability, we cannot assure you that we will be able to sustain or increase profitability on a quarterly or annual basis in the future. Revenues and profits, if any, will depend upon various factors, including whether we will be able to successfully implement our sales, marketing, and advertising strategies. We may not achieve our business objectives and the failure to achieve such goals would have an adverse impact on us. In addition, an inability to achieve profitability could have a detrimental effect on the long term capital appreciation of our common stock.

If we are unable to attract and retain qualified personnel with experience in our industries, our business could suffer

Our current and future success depends in part on our ability to identify, attract, assimilate, hire, train and motivate professional, highly-skilled

scientific and technical personnel for our research, development efforts, as well as managerial, sales and marketing personnel with experience in our industry. If we fail to attract and retain the necessary professional, highly-skilled scientific, technical, managerial, sales and marketing personnel, we may not develop a sufficient array of products or establish a large enough customer base to adequately develop our proposed operations, and, as a result, could have a material adverse effect on our company.

We may not be able to effectively compete in our highly competitive industry.

Our industry is highly competitive, has undergone a period of consolidation and requires substantial labor and capital resources. Some of the markets in which we compete or will likely compete are served by, or adjacent to markets served by, one or more of the large national or multinational companies, as well as numerous regional and local companies. Intense competition exists not only to provide services to customers, but also to acquire other businesses within each market. Most of our competitors have significantly greater financial and other resources than we do. From time to time, competitors may reduce the price of their services in an effort to expand market share or to win a competitively bid contract. These practices may either require us to reduce the pricing of our services or result in our loss of business.

Current economic conditions may adversely affect our revenues and our operating margin.

Our business may be affected by changes in economic conditions that are outside of our control, including reductions in business and consumer activity generally.

We may engage in acquisitions in the future with the goal of complementing or expanding our business. However, we may be unable to complete these transactions and, if completed, these transactions may not improve our business or may pose significant risks and could have a negative effect on our operations.

We have in the past, and we may in the future, make acquisitions in order to

acquire additional companies. These acquisitions may include assets that are outside our existing markets, or larger, more strategic acquisitions. In addition, from time to time we may acquire businesses that are complementary to our core business strategy. We may not be able to identify suitable acquisition candidates. If we identify suitable acquisition candidates, we may be unable to negotiate successfully their acquisition at a price or on terms and conditions acceptable to us. Furthermore, we may be unable to obtain the necessary regulatory approval to complete potential acquisitions.

Our ability to achieve the benefits from any potential future acquisitions, including cost savings and operating efficiency, depends in part on our ability to successfully integrate the operations of such acquired businesses with our existing operations. The integration of acquired businesses and other assets may require significant management time and company resources that would otherwise be available for the ongoing management of our existing operations.

Any properties or facilities that we acquire may be subject to unknown liabilities, such as undisclosed environmental contamination, for which we would have no recourse, or only limited recourse, to the former owners of such properties. As a result, if a liability were asserted against us based upon ownership of an acquired property, we might be required to pay significant sums to settle it, which could adversely affect our financial results and cash flow. In addition, the process of acquiring and developing businesses is lengthy, expensive and uncertain.

We may need additional financing and may not be able to raise funding on favorable terms or at all, which could increase our costs, limit our ability to operate or grow our business and dilute the ownership interests of existing stockholders.

We require substantial working capital to fund our business. We believe that our current working capital, including our existing cash balance, together with our future cash flows from operations and available financing capacity, will be adequate to support our current operating plans. If necessary, we would seek such future financing from sources of public or private debt and equity. There can be no assurance such financings will be available on terms favorable to us or at all.

The negative conditions in the equity and debt markets, the tightening of the credit markets and the general economic slowdown in the United States has made it difficult for us to raise additional capital or obtain additional financing, and we expect these trends to continue to varying degrees in 2016. Our inability to raise additional financing when necessary or desired could adversely affect our ability to maintain, develop or enhance our services and operations, take advantage of future opportunities, respond to competitive pressures or continue operations. If additional financing is required but not available, we would have to implement further measures to conserve cash and reduce costs, including limiting or reducing our business operations and considering the sale or disposal of non-productive or under-productive assets or operations. However, there is no assurance that any such measures would ultimately be successful.

To the extent any future financings involve the issuance of equity securities, existing stockholders could suffer significant dilution. If we raise additional financing through the issuance of equity, equity- related or debt securities, those securities may have rights, preferences or privileges senior to those of the rights of our common stock or may be convertible into or exchangeable for a significant amount of our common stock, and thus our existing stockholders may experience substantial dilution of their ownership interests as a result of such additional financing.

Our success depends on our management team.

Our company's operations are dependent on the continued efforts of our Board of Directors and our executive officers, including our President and Chief Executive Officer. If any of these individuals becomes unwilling or unable to continue their employment or association with us, our business could be affected materially and adversely. Furthermore, there can be no assurance that our management team will be successful in managing the operations of the company or be able to effectively implement our business strategy. Failure of our management group to successfully manage the operation of our company or to effectively implement our business strategy could have a material adverse effect on our company's financial condition and results of operations. We have no key man life insurance on any of our executives.

We do not have an independent audit or compensation committee, the

absence of which could lead to conflicts of interest of our officers and directors and work as a detriment to our shareholders.

We do not have an independent audit or compensation committee. The absence of an independent audit and compensation committee could lead to conflicts of interest of our officers and directors, which could work as a detriment to our shareholders.

We do not have audited financial statements and our financial statements have not been reviewed by any regulatory authority.

Our financial statements have been prepared by our management and have not been reviewed by any independent third party auditing firm, by the Securities and Exchange Commission or by any state securities administrators. Therefore, investors in our securities do not or will not have the comfort they might otherwise have if our financial statements had been audited by an independent auditing firm.

Trading in our securities is limited and could be subject to extreme price fluctuations that could adversely affect your investment.

Historically speaking, the market prices for securities of small publicly traded companies have been highly volatile. Publicized events and announcements may have a significant impact on the market price of our common stock.

In addition, the stock market from time to time experiences extreme price and volume fluctuations that particularly affect the market prices for small publicly traded companies and which are often unrelated to the operating performance of the affected companies.

Substantial sales of our common stock may impact the market price of our common stock.

Future sales of substantial amounts of our common stock, including shares that we may issue upon exercise of options and warrants could adversely affect the market price of our common stock. Furthermore, if we raise additional funds through the issuance of common stock or securities

convertible into our common stock, the percentage ownership of our shareholders will be reduced and the price of our common stock may fall.

We do not expect to pay dividends for the foreseeable future.

We will use any earnings generated from our operations to finance our business and will not pay any cash dividends to our shareholders in the foreseeable future.

Issuing preferred stock with rights senior to those of our common stock could adversely affect holders of common stock.

Our charter documents grant our board of directors the authority to issue preferred stock without a vote or action by our shareholders. Our board also has the authority to determine the terms of preferred stock, including price, preferences and voting rights. The rights granted to holders of preferred stock may adversely affect the rights of holders of our common stock. For example, a series of preferred stock may be granted the right to receive a liquidation preference - a pre-set distribution in the event of a liquidation that would reduce the amount available for distribution to holders of our common stock. In addition, the issuance of preferred stock could make it more difficult for a third party to acquire a majority of our outstanding voting stock. As a result, common shareholders could be prevented from participating in transactions that would offer an optimal price for their shares.

Having only two directors limits our ability to establish effective independent corporate governance procedures and increases the control of our management.

Having only two directors limits our ability to establish effective independent corporate governance procedures and increases the control of our management. Accordingly, we cannot establish board committees comprised of independent members to oversee functions like compensation or audit issues until we are able to expand our board of directors to include independent directors.

Until we have a larger board of directors that would include some independent members, if ever, there will be limited oversight of our management's decisions and activities and little ability for minority shareholders to challenge or reverse those activities and decisions, even if they are not in the best interests of minority shareholders.

Our articles of incorporation provide for indemnification of officers and directors at our expense and limit their liability, which may result in a major cost to us and hurt the interests of our shareholders because corporate resources may be expended for the benefits of officers and/or directors.

Our articles of incorporation and applicable Nevada laws provide for the indemnification of our directors, officers, employees and agents under certain circumstances, against attorney's fees and other expenses incurred by them in any litigation to which they become a party arising from their association with or activities on our behalf. We will also bear the expenses of such litigation for any of our directors, officers, employees or agents, upon such person's written promise to repay us therefor, even if it is ultimately determined that any such person shall not have been entitled to indemnification. This indemnification policy could result in substantial expenditures by us that we may be unable to recoup.

We have been advised that, in the opinion of the Securities and Exchange Commission, indemnification for liabilities arising under federal securities laws is against public policy and is, therefore, unenforceable. In the event that a claim for indemnification for liabilities arising under federal securities laws, other than the payment by us of expenses incurred or paid by a director, officer or controlling person in the successful defense of any action, suit or proceeding, is asserted by a director, officer or controlling person in connection with the securities being registered, we will (unless in the opinion of our counsel, the matter has been settled by controlling precedent) submit to a court of appropriate jurisdiction, the question of whether indemnification by us is against public policy as expressed by the Securities and Exchange Commission and will be governed by the final adjudication of such issue. The legal process relating to this matter, if it were to occur, is likely to be very costly and may result is us receiving negative publicity, either of which factors is likely to materially reduce the market price for our

shares, if such a market ever develops.

Our common stock is not currently traded on any stock exchange or quoted on the over-the-counter bulletin board. Instead, our common stock is quoted on the pink sheets and is considered to be a "penny stock" and, as such, the market for our common stock will be limited by certain SEC rules applicable to penny stocks.

As long as the price of our common stock remains below $5.00 per share, our shares of common stock are likely to be subject to certain "penny stock" rules promulgated by the sec. Those rules impose certain sales practice requirements brokers who sell penny stock to persons other than established customers and accredited investors (generally, an institution with assets in excess of $5,000,000 or an individual with a net worth in excess of $1,000,000). For transactions covered by the penny stock rules, the broker must make a special suitability determination for the purchaser and receive the purchaser's written consent to the transaction prior to the sale. Furthermore, the penny stock rules generally require, among other things, that brokers engaged in secondary trading of penny stocks provide customers with written disclosure documents, monthly statements of the market value of penny stocks, disclosure of the bid and asked prices of penny stocks and disclosure of the compensation to the brokerage firm and disclosure of the sales person working for the brokerage firm. These rules and regulations make it more difficult for brokers to sell shares of our common stock and limit the liquidity of our shares.

Our records are incomplete.

We were deemed to be abandoned by our previous management and placed in custodianship by a court. The records available to the custodian may be incomplete, and we may discover unreported or unknown liabilities, judgments or other adverse items.

Our stock trades on the Pink Sheets OTC Market which entails numerous risks.

Our stock trades on the Pink Sheets OTC Market which entails numerous risks, including but not limited to the following: Pink Sheets has

experienced computer failures and malfunctions in the past, causing securities quoted there to be misquoted or not quoted at all. Pink Sheets has a system of rating companies and can rate our stock "Caveat Emptor" for many reasons which are out of our control, or for no reason at all. Pink Sheets can label us "Caveat Emptor" or "Toxic" for the actions of others, such as short selling, or making unauthorized spam promotional campaigns. There are no clear standards for being placed on Caveat Emptor and no clear standards for being removed. Generally, stock buyers will avoid buying Caveat Emptor stocks and the stocks experience substantial market declines after being so labeled. Finally, if the Company is unable to obtain the necessary audited financial statements, the Company may be unable to escape the Pink Sheets. In the last year, the Issuer was placed in "Caveat Emptor" status by Pink Sheets and this was removed after the Issuer posted certain disclosures on the Pink Sheets.

The market for penny stocks has experienced numerous frauds and abuses which could adversely impact investors in our stock.

Pink Sheets securities are frequent targets of fraud or market manipulation, both because of their generally low prices and because reporting requirements are less stringent than those of the stock exchanges or NASDAQ. Patterns of fraud and abuse include: (1) Control of the market for the security by one or a few broker-dealers that are often related to the promoter or issuer; (2) Manipulation of prices through prearranged matching of purchases and sales and false and misleading press releases; (3) "Boiler room" practices involving high pressure sales tactics and unrealistic price projections by inexperienced sales persons; (4) Excessive and undisclosed bid-ask differentials and markups by selling broker-dealers; and (5) Wholesale dumping of the same securities by promoters and broker-dealers after prices have been manipulated to a desired level, along with the inevitable collapse of those prices with consequent investor losses.

THERE ARE RISKS ASSOCIATED WITH FORWARD LOOKING STATEMENTS

This disclosure statement contains certain forward looking statements regarding management's plans and objectives for future operations including plans and objectives relating to our planned marketing efforts and

future economic performance. The forward looking statements and associated risks set forth in this disclosure statement include or relate to, among other things, (a) our projected sales and profitability, (b) our growth strategies, (c) anticipated trends in our industry, (d) our ability to obtain and retain sufficient capital for future operations and (e) our anticipated needs for working capital. These statements may be found throughout this disclosure statement, generally. Actual events or results may differ materially from those discussed in forward looking statements as a result of various factors, including, without limitation, the risks outlined under "Risk Factors" and matters described in this disclosure statement, generally. In light of these risks and uncertainties, there can be no assurance that the forward looking statements contained in this disclosure statement will, in fact, occur.
