INNOVATIV MEDIA GROUP, INC.
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2015

NOTE 1: NATURE OF BUSINESS AND SIGNIFICANT ACCOUNTING POLICIES

The Company

Innovativ Media Group, Inc. was incorporated on March 8, 2005 under the laws of the State of Washington. Innovativ Media Group, Inc. is referred to herein as the "Company". The Company operates in the entertainment industry; specifically, in connection with the development, production, marketing or motion pictures, online content and related businesses. In July 2015 the Company closed on its acquisition ("Acquisition") of Wyoming holding corporation Innovativ Media Group, Inc.in exchange for 5,000,000 Series A Preferred Shares and 20,000,000 Series C Preferred Shares and the redemption of certain shares and debt. The Company changed its name from Global Gaming Network, Inc. and changed management and business focus. Under the Acquisition the Company acquired all right and title to certain film media content including eight (8) completed motion pictures, related active distribution contracts, certain developed but unproduced projects, several developing business methods and concepts, an active online video channel and 18 internet domains.

Basis of Presentation

The accompanying interim financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules of the Securities and Exchange Commission ("SEC"). The Company is transitioning from a cash basis method to an accrual accounting basis so certain adjustments have been made to reflect and present prior accounting periods. In the opinion of management, all adjustments necessary in order for the financial statements to be not misleading have been reflected herein. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States requires management to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statement and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from the estimates.

Cash Equivalents

For purposes of reporting cash flows, the Company considers all short-term investments with an original maturity of three months or less to be cash equivalents, however, stock held in a small public entity has been accounted for separately.

Property and Equipment

The capital assets are being depreciated over their estimated useful lives using the straight-line method of depreciation for book purposes.

Revenue Recognition

Revenue consists substantially of fees earned from movies and videos that we have interests in. We recognize revenue from a sale or licensing arrangement of content when all of the following conditions are met: persuasive evidence of a sale or licensing arrangement with a customer exists; the film is complete and, in accordance with the terms of the arrangement, has been delivered or is available for immediate and unconditional delivery; the license period of the arrangement has begun and the customer can begin its exploitation, exhibition, or sale; the arrangement fee is fixed or determinable; and collection of the arrangement fee is reasonably assured. In 2015 the Company received securities with a face, convertible value of $120,000 for the sale of certain sports fantasy related businesses and assets. The Company intends to recognize the revenues from the sale of the businesses and assets upon the liquidation of the securities.

NOTE 1: NATURE OF BUSINESS AND SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair Value of Financial Instruments
The Company's financial instruments consist of cash and cash equivalents, accounts receivable, prepaid consulting, stock in a public company, accounts payable, accrued taxes, accrued interest and a note payable. The carrying amount of these financial instruments approximates fair value due either to length of maturity or interest rates that approximate prevailing market rates unless otherwise disclosed in these financial statements.

Unamortized Film Costs
Under the Acquisition the Company acquired entertainment assets for which it paid restricted stock with a maximum conversion value of $4,000,000. The Company, however, is valuing the unamortized portion of the acquired entertainment content assets at $2,500,000 based upon the selling company's prior investment and the Company's current assessment of the distribution cycles of the content. Unamortized film costs consist of investments in films, online content, unproduced projects and marketing. The costs include all direct production and financing costs and production overhead. Costs of acquiring, producing and marketing films and other content are amortized using the individual forecast method, whereby these costs are amortized and participation and residual costs are accrued in the proportion that current year's revenue bears to management's estimate of ultimate revenue at the beginning of the current year expected to be recognized from the exploitation, exhibition or sale of the film and video content. The Company recognize the full value of any existing contractual obligations or estimated obligation to complete projects on the same basis as accounts payable.

Ultimate revenue includes estimates over a period not to exceed ten years following the date of initial release. The Company is projecting to amortize these assets at a rate of 4% a year for the first 5 years then 16% a year for the following 5 years. Management reserves the right to accelerate this schedule. Unamortized content costs are stated at the lower of amortized cost or estimated fair value on an individual project basis. The valuation of investment in content is reviewed on a title-by-title basis, when an event or changes in circumstances indicates that the fair value of the content is less than its unamortized cost. The fair value of the content is determined using management's future revenue and cost estimates. Additional amortization is recorded in the amount by which the unamortized costs exceed the estimated fair value of the content. Estimates of future revenue involve measurement uncertainty and it is therefore possible that reductions in the carrying value of investment in filmed content may be required as a consequence of changes in management's future revenue estimates. (Also Note 3.)

Income Taxes
The Company uses the asset and liability method of accounting of income taxes. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statements carrying amounts of assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. We evaluate deferred tax assets to determine whether it is more likely than not that they will be realized.

Comprehensive Income
The Company established standards for reporting and display of comprehensive income, its components and accumulated balances. When applicable, the Company would disclose this information on its Statement of Stockholder's Equity. Comprehensive income comprises equity except those resulting from investments by owners and distributions to owners. The Company has not had any transactions that are required to be reported in other comprehensive income.

NOTE 1: NATURE OF BUSINESS AND SIGNIFICANT ACCOUNTING POLICIES (continued)

Basic and Diluted Income (Loss) Per Share
Basic earnings (loss) per common share is computed by dividing net income or (loss) available to common stockholders by the weighted average number of common shares outstanding and are calculated to a maximum of .000000 percent.. Diluted earnings per common share is computed similar to basic earnings per common share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive. At December 31, 2015 the Company had no stock equivalents that were anti-dilutive and excluded in the earnings per share computation.
